With Thomson/Selkirk Treasura™ you do. Treasura is a secure web-based solution that gives you the time and information you need to make better decisions faster. It's easy to use, easy to implement, and easy to afford.

Best of all, it comes to you from two names you know and trust—Thomson Financial and Selkirk, world leaders in financial software solutions.

## Is Treasura Really Different?

Treasura is the first and only purely web-based treasury management suite. And that's important because for the first time ever, you can access your treasury anywhere, anytime. No other solution can do that.

This means no more complex installations. No more software to download. Just an easy-to-use, easy-to-afford solution that fits the way you work.

## Treasury is Easy

### Easy to Use

You can access Treasura using a browser from anywhere that is connected to the Internet. Navigating in Treasura is just like browsing the web. You can click on any summary to get to the information you need. You can use filters to expand or collapse the information you want to work with. And, Treasura's help feature is always there to provide assistance when you need it.

### Easy to Implement

Unlike other systems, Treasura has been designed so that it is easy for you to implement. There are no complex installations or downloads. Plus, there is a built-in disaster recovery system and advanced security features, so you will always have peace of mind when it comes to your data. And as your needs change, you will find Treasura adapts and grows right along with you.

### Easy to Afford

Best of all, Treasura is easy to afford, with the option to pay as you go. No heavy up-front installation or set-up charges. No extra burden on your IT staff.
