

MEMORANDUM

TO: Investors and Analysts
FROM: Rodney L. Waller
DATE: January 30, 2015
RE: ATEX outage questions

As you may be aware, the ATEX pipeline owned by Enterprise is currently out of service and we understand Enterprise estimates repairs will take approximately two weeks. Despite the ATEX outage, Range has satisfied its commercial commitments for ethane. Currently Range has access to sufficient capacity on the Mariner West pipeline system to transport its ethane production and to meet interstate pipeline gas quality specifications.

The Range IR staff is here to discuss any further questions.
