

Zix Corporation CEO Provides Corporate Update

ZixCorp significantly exceeds first quarter cash guidance as company collects higher than expected cash receipts

DALLAS — April 9, 2007 — Zix Corporation (ZixCorp®), (Nasdaq: ZIXI), the leader in hosted services for email encryption and e-prescribing, today offered a corporate update by its chief executive officer, Rick Spurr.

“ZixCorp’s very strong first quarter built off the great momentum we had leaving 2006, which was the most successful year financially in the company’s history,” said Spurr. “I am very pleased with the tremendous progress we continue to make in cash consumption from operations. Our first quarter ending cash balance of \$12.4 million was significantly ahead of our guidance range of \$11.0 to \$11.3 million, driven by higher than expected customer collections. The cash burn of less than \$400,000 represents a substantial improvement over the fourth quarter 2006 rate of \$2.1 million. However, the increase in cash receipts was due in part to collecting several payments originally forecasted for Q2, so at this point we expect the next quarter’s cash consumption to increase over Q1’s rate because of these timing shifts, and we are not yet adjusting our full-year cash guidance of burning less than \$5.8 million. We do remain on track to achieve cash flow breakeven in 2008 on the way to profitability.”

“We had a good start to the year in each of our core businesses – Email Encryption and e-Prescribing,” continued Spurr. “Preliminary revenue estimates are that we will be at least within our guidance range of \$4.9 to \$5.1 million for the first quarter. In our Email Encryption business, we had a strong quarter in Q1 with estimated new first-year orders of \$1.4 million, one of the highest results since we started tracking this metric, and estimated total orders of \$5.2 million. This result was driven by a good quarter for both our enterprise and corporate telesales teams, and continued strength in the financial services sector and high customer renewals.”

Regarding the company’s e-prescribing business, Spurr said, “We had a good quarter in our PocketScript business as well. We had solid deployments of 507 for the quarter, the quarterly e-script count continues to increase with 1.76 million e-scripts in Q1, which was 50% above the rate in Q1 last year, and we announced our GoldRx™ status with SureScripts as an indication of our continued leadership in the industry. The level of activity in e-prescribing remains strong, so we are optimistic about our continued progress and maintaining our leadership position in this emerging market.”

About Zix Corporation

ZixCorp is the leading provider of easy-to-use-and-deploy email encryption and e-prescribing services that Connect entities with their customers and partners to Protect and Deliver sensitive information in the healthcare, finance, insurance and government industries. ZixCorp's hosted Email Encryption Service provides an easy and cost-effective way to ensure customer privacy and regulatory compliance for corporate email.
