GTECH CORPORATION'S GLOBAL TECHNOLOGY SOLUTIONS SUPPORT ORGANIZATION ACHIEVES CMMI® LEVEL 3 RATING

PROVIDENCE, RHODE ISLAND – January 30, 2013 – Lottomatica Group S.p.A. subsidiary GTECH Corporation has been appraised at Level 3 of the Carnegie Mellon University Software Engineering Institute's Capability Maturity Model Integration for Development (CMMI®-DEV), version 1.3 for GTECH's Global Technology Solutions Support organization. While GTECH received its initial maturity Level 3 rating in 2004, this latest appraisal confirms GTECH's continued commitment to following established industry best practices while providing high quality software solutions and services. CMMI® Level 3 rating is highly coveted due to its rigorous assessment of a vendor's software and systems engineering, program management, and organizational process management capabilities.

"Achieving CMMI Level 3 reaffirms GTECH's level of commitment to excellence in system engineering, software development, and delivery," **said GTECH Senior Vice President and Chief Technology Officer Matthew Whalen.** *"I would like to commend each staff member involved in the appraisal process and thank them for their invaluable input in improving the organizational processes, ensuring timely and best-in-class solutions for our global customers."*

CMMI® is an internationally-acknowledged approach that employs best practices to appraise, recognize, and guide process improvements throughout an entire organization. CMMI®-DEV, which focuses on Software and Systems Engineering, is a framework that defines a set of objective standards for assessing an

organization's full range of engineering (systems, software, and hardware), program management, organizational management processes, and other supporting processes used in development and maintenance.

GTECH's maturity rating was confirmed by Process Improvement and Compliance LLC. (PI&C) via an appraisal performed in accordance with the Standard CMMI® Appraisal Method for Process Improvement (SCAMPI℠) Class A methodology. Since 2004, GTECH's Global Technology Solutions Support organization has instituted CMMI-DEV compliant processes across six continents.

CMMI® is the result of more than 20 years of ongoing work at Carnegie Mellon University by members of industry, government, and the Software Engineering Institute. The CMMI Institute is working to build upon CMMI's success, advance the state of the practice, accelerate the development and adoption of best practices, and provide solutions to the emerging needs of businesses around the world.

GTECH is a leading gaming technology and services company. With 8,000 people in approximately 60 countries when combined with Lottomatica Group, GTECH provides innovative technology, creative content, and superior service delivery to effectively manage and grow today's evolving gaming markets.
