IFRS to Non-IFRS Reconciliation

Management believes non-IFRS metrics are useful measures of operations and provides IFRS to non-IFRS reconciliation tables at the end of this press release. Global Sources defines non-IFRS net income as net income excluding non-cash, stock based compensation (SBC) expense or credit, amortization of intangibles as it relates to certain equity compensation plans, profits or losses on acquisitions and investments net of transaction costs and related tax expenses, and/or impairment charges net of related taxes, for all historical and future references to non-IFRS metrics. Non-IFRS EPS is defined as non-IFRS net income divided by the weighted average of diluted common shares outstanding.
