NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1A. Accounting Practices

The Prudential Insurance Company of America (the "Company" or "PICA"), domiciled in the state of New Jersey, prepares its statutory financial statements in accordance with accounting practices prescribed or permitted by the New Jersey Department of Banking and Insurance (the "Department"). Prescribed statutory accounting practices ("SAP") include publications of the National Association of Insurance Commissioners ("NAIC"), state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed.

The Company records leasehold improvements as admitted assets. New Jersey law allows insurance companies domiciled in New Jersey to admit leasehold improvements as admitted assets. NAIC statutory accounting practices require non-admittance of leasehold improvements.

In 2004, one of the Company's insurance subsidiaries, Prudential Retirement and Annuity Company (PRIAC), received approval from its domiciliary insurance department (Connecticut) to record a deferred gain associated with an assumption reinsurance agreements between Connecticut General Life Insurance Company and PRIAC in the Interest Maintenance Reserve ("IMR") and to amortize the deferred gain in a manner consistent with those relevant annual statement instructions. Had the deferred gains been established as a liability limited to an amortization period of 10 years in accordance with the guidance of SSAP No.61, "Life, Deposit-Type and Accident and Health Reinsurance" ("SSAP No.61"), and not included in the IMR, it would have created a material distortion in the analysis of the adequacy of statutory reserves conducted annually by PRIAC's Appointed Actuary. Therefore, the permitted practice for this PICA subsidiary impacts its carrying value on PICA's balance sheet as indicated in the reconciliation below.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the Department is shown below:

	12/31/2013	12/31/2012

Statutory Surplus, New Jersey state basis	$9,382,581,507	$8,698,881,726
State Prescribed Practices (Surplus)		
Non-admit leasehold improvements	($32,542,612)	($38,951,113)

Statutory Surplus, NAIC SAP	$9,448,032,284	$8,766,908,877

1B. Use of Estimates

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

The most significant estimates include those used in determining measurement of any related impairment; valuation of investments including derivatives (in the absence of quoted market values) and the recognition of other-than-temporary impairments; aggregate reserves for life, accident, and health contracts including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; and goodwill; and reserves for contingent liabilities, including reserves for losses in connection with unresolved legal matters.

1C. Accounting Policy

In addition, the Company uses the following accounting policies:

1) Cash includes cash on deposit and cash equivalents. Cash equivalents are short-term, highly liquid investments, with original maturities of three months or less, that are both readily convertible to known amounts of cash and so near their maturity that they represent insignificant risk of changes in value because of changes in interest rates.

   Short-term investments include money market funds and highly liquid debt instruments purchased with a remaining maturity of twelve months or less, excluding those investments classified as cash equivalents. They are stated at amortized cost, which approximates fair value.

2) Bonds, which consist of long-term bonds, are stated primarily at amortized cost in accordance with the valuation prescribed by the Department and the NAIC. Bonds rated by the NAIC are classified into six categories ranging from highest quality bonds to those in or near default. Bonds rated in the top five categories are generally valued at amortized cost while bonds rated at the lowest category are valued at lower of amortized cost or fair market value. The Company follows both the prospective and retrospective methods for amortizing bond premium and discount. Both methods require the recalculation of the effective yield at each reporting date if there has been a change in the underlying assumptions. For the prospective method, the recalculated yield will equate the carrying amount of the investment to the present value of the anticipated future cash flows. The recalculated yield is then used to accrue income on the investment balance for subsequent accounting periods. There are no accounting changes in the current period unless the undiscounted anticipated cash flow is less than the carrying amount of the investment. For the retrospective method, the recalculated yield is the rate that equates the present value of actual and anticipated future cash flows with the original cost of the investment. The current balance of the investment is increased or decreased to the amount that would have resulted had the revised yield been applied since inception and investment income is

NOTES TO FINANCIAL STATEMENTS

correspondingly decreased or increased. For other than temporary impairments, the cost basis of the bond excluding loan-backed and structured securities is written down to fair market value as a new cost basis and the amount of the write down is accounted for as a realized loss. See below for additional disclosure regarding the Company's adoption of SSAP 43R, "Loan-backed and Structured Securities" and accounting for other-than-temporary impairments for loan-backed and structured securities.

3) Common stocks include unaffiliated common stocks and investments in subsidiaries. See (7) below for information related to investments in subsidiaries. Unaffiliated common stocks are carried at fair value. Dividends are recognized in net investment income when earned.

4) Preferred stocks include unaffiliated preferred stocks and investments in subsidiaries. Preferred stocks rated by the NAIC are classified into six categories ranging from highest quality preferred stocks to those in or near default. Preferred stocks rated in the top three categories are generally valued at amortized cost while preferred stocks rated in the lower three categories are generally valued at lower of amortized cost or fair value. For other-than-temporary impairments, the cost basis of the preferred stock is written down to fair market value as a new cost basis and the amount of the write down is accounted for as a realized loss.

5) Mortgage loans on real estate are stated primarily at unpaid principal balances, net of unamortized premiums and discounts and impairments. Impaired loans are identified by management as loans in which a probability exists that all amounts due according to the contractual terms of the loan agreement will not be collected.

   Interest received on impaired loans, including loans that were previously modified in a troubled debt restructuring, is generally either applied against the principal or reported as revenue, according to management's judgment as to the collectability of principal. Management discontinues accruing interest on impaired loans after the loans are 90 days delinquent as to principal or interest, or earlier when management has substantial doubts about collectability. When this interest is deemed uncollectible, it is reversed against interest income on loans for the current period. Generally, a loan is restored to accrual status only after all delinquent interest and principal are brought current and, in the case of loans where interest has been interrupted for a substantial period, a regular payment performance has been established. Real estate includes properties occupied by the Company and properties held for sale. Properties occupied by the Company are carried at cost less accumulated straight-line depreciation, encumbrances and permanent impairments in value. Properties held for sale are valued at lower of depreciated cost or fair value less encumbrances and estimated disposition costs.

6) Loan-backed and structured securities are primarily carried at amortized cost. For loan-backed and structured securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. For high credit quality loan-backed and structured securities (those rated AA or above), cash flows are provided quarterly, and the amortized cost and effective yield of the security are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. The adjustments to amortized cost for those securities rated AA or above are recorded in accordance with the retrospective method. For loan-backed and structured securities rated below AA, the effective yield is adjusted prospectively for any changes in estimated cash flows.

   The NAIC designations for non-agency residential mortgage-backed securities ("RMBS"), including asset-backed securities collateralized by sub-prime mortgages are based on security level expected losses as modeled by an independent third party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized. The model used in determining NAIC designations was updated and utilized for reporting as of December 31, 2012 and December 31, 2013.

   Similar to the change for RMBS, the NAIC designations for commercial mortgage-backed securities ("CMBS") are based on security level expected losses as modeled by an independent third party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized. The model used in determining NAIC designations was updated and utilized for reporting as of December 31, 2012 and December 31, 2013.

7) Investments in subsidiaries are accounted for using an equity method as defined in SSAP No. 97, Investments in Subsidiary, Controlled and Affiliated Entities ("SCA"), a Replacement of SSAP No. 88 ("SSAP No. 97"). Investments in insurance subsidiaries are recorded based on the underlying audited statutory equity of the respective entity's financial statements, adjusted for unamortized goodwill as provided for in SSAP No. 68, Business Combinations and Goodwill ("SSAP No. 68"). Investments in non-insurance subsidiaries that do not engage in certain transactions or activities, per paragraph 8b ii of SSAP No. 97 are recorded based on audited U.S. GAAP equity of the investee. The subsidiaries' change in net assets, excluding capital contributions and distributions, is included in "Change in net unrealized capital gains (losses)". Dividends or distributions received from the investee are recognized in net investment income when declared to the extent they are not in excess of undistributed accumulated earnings attributed to our investment. The subsidiaries are engaged principally in the business of life insurance and annuities.

8) Other invested assets include primarily the Company's investment in joint ventures, limited liability companies and other forms of partnerships. These investments are accounted for using an equity method as defined in SSAP No. 97. These entities are valued based on the underlying audited U.S. GAAP equity, or permitted alternatives as defined in SSAP No. 48, "Joint Ventures, Partnerships and Limited Liability Companies," ("SSAP No. 48") of the investee.

9) Derivatives used by the Company include swaps, futures, forwards, and options and may be exchange-traded or contracted in the over-the-counter market. Derivatives are recorded at fair value either as assets, within "Derivatives," or as liabilities, surplus and other funds within "Miscellaneous liabilities: Derivatives" at their estimated fair value.

(10) The Company considers anticipated investment income when calculating its premium deficiency reserves in accordance with SSAP No. 54, "Individual and Group Accident and Health Contracts".

(11) Accident and health reserves represent the estimated value of the future payments, adjusted for contingencies and interest. The remaining reserves for active life reserves and unearned premiums are valued using the preliminary term method, gross premium valuation method, or a pro rata portion of gross premiums. Reserves are also held for amounts not yet due on hospital benefits and other coverages.

(12) The Company has not modified its capitalization policy from the prior period.

(13) The Company does not have any pharmaceutical rebates receivable.

NOTES TO FINANCIAL STATEMENTS

(14) Repurchase agreements and reverse repurchase agreements are agreements between a seller and a buyer, whereby the seller of securities sells and simultaneously agrees to repurchase the same or substantially the same securities from the buyer at an agreed upon price and, usually, at a stated date. Repurchase agreements (securities sold under agreements to repurchase) are generally accounted as secured borrowings. The assets transferred are not removed from the balance sheet, the cash collateral received is invested and reported on balance sheet and accounted for based on the type of investment. An offsetting liability is reported in “Aggregate write-ins for liabilities”. For reverse repurchase agreements (securities purchased under agreements to resell), an asset is recorded in “Cash, cash equivalents, and short term” to reflect the receivable from the counterparty. Dollar repurchase agreements and reverse dollar repurchase agreements involve debt instruments that are pay-through securities collateralized with GNMA, FNMA and FHLMC and similar securities. The Company typically uses "to be announced" ("TBAs") securities in the dollar repurchase and reverse dollar repurchase agreements which are accounted for as derivatives. Dollar repurchase and reverse dollar repurchase agreements are reported in "Aggregate write-ins for invested assets" with the change in value reported as "Change in net unrealized capital gains". "Net realized capital gains (losses)" are recorded upon termination of the agreements.

(15) Securities lending transactions are transactions where the Company loans securities to a third party, primarily large brokerage firms. These transactions are accounted for as secured borrowings. Cash collateral received is invested and reported on balance sheet and accounted for based on the type of investment. An offsetting liability is reported in “Payable for securities lending”.

(16) Contract loans are stated at unpaid principal balances.

(17) Net realized capital gains/(losses) are computed using the specific identification method. Net realized investment gains and losses are generated from numerous sources, including the sale of bonds, stocks, other type of investments, as well as adjustments to the cost basis of investments for other than temporary impairments. Realized investment gains and losses are also generated from prepayment premiums received on private bonds, recoveries of principal on previously impaired securities, provisions for losses on mortgage loans on real estate, fair value changes on derivatives that do not qualify for hedge accounting treatment. Amortized cost of investments are adjusted for impairments considered other than temporary. All bonds, preferred stocks and common stocks with unrealized losses are subject to review to identify other-than-temporary impairments in value. Under SAP, several factors must be considered to determine whether a decline in value of a security is other than temporary, including:

a) the reasons for the decline in value (credit event, currency or interest related, including general spread widening);
b) a company’s ability and intent to hold its investment for a period of time to allow for recovery of value;
c) a company’s intent to sell its investment before recovery of the cost of the investment;
d) the financial condition of and near-term prospects of the issuer; and
e) for stocks, the extent and duration of the decline.

For stocks, when it is determined that there is an other-than-temporary impairment, the Company records a write down in the Statement of Operations and Changes in Capital and Surplus within "Net Realized Capital Gains (Losses)" to the estimated fair value, which reduces the cost basis. The new cost basis of an impaired security is not adjusted for subsequent increases in the estimated fair value. Estimated fair values for publicly traded common stock are based on quoted market prices or prices obtained from independent pricing services. Estimated fair values for privately traded common stock are determined using valuation and discounted cash flow models that require a substantial level of judgment.

For bonds, excluding loan-backed and structured securities, when it is determined that there is an other-than-temporary impairment, the Company records a write down to the estimated fair value of the bond, which reduces its amortized cost. Credit event related impairments are recorded in the Statement of Operations and Changes in Surplus within "Net Realized Capital Gains" and applied to the AVR, and interest related impairments are directly applied to the IMR, on a post tax basis. The new cost basis of an impaired bond is not adjusted for subsequent increases in estimated fair value. Estimated fair values for bonds, other than private placement bonds, are generally based on quoted market prices or prices obtained from independent pricing services. Estimated fair values for private placement bonds are typically determined primarily by using a discounted cash flow model, which relies upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions and takes into account, among other factors, the credit quality of the issuer and the reduced liquidity associated with private placements. In determining the fair value of certain securities, including those that are distressed, the discounted cash flow model may also use unobservable inputs, which reflect management’s own assumptions about the inputs market participants would use in pricing the asset.

For loan-backed and structured securities, when an other-than-temporary impairment has occurred because the entity does not expect to recover the entire amortized cost basis of the security, even if the entity has no intent to sell and the entity has the intent and ability to hold to recovery, the amount of the other-than-temporary impairment recognized as a realized loss shall equal the difference between the investment's amortized cost basis and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate. Credit event related impairments are recorded in the Statement of Operations and Changes in Surplus within "Net Realized Capital Gains" and applied to the AVR, and interest related impairments are directly applied to the IMR, on a post tax basis. Additionally, the amortized cost of the security, less the other-than-temporary impairment recognized as a realized loss, shall become the new amortized cost basis of the investment. When the entity has the intent to sell or cannot assert ability and intent to hold to recovery, the security is impaired to the fair value basis.

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

The State of New Jersey requires that insurance companies domiciled in the State of New Jersey prepare their statutory basis financial statements in accordance with the NAIC Accounting Practices and Procedures manual (the "Manual"), subject to any deviations prescribed or permitted by the Department.

Accounting changes adopted to conform to the provisions of the Manual are reported as changes in accounting principles. The cumulative effect of changes in accounting principles is reported as an adjustment to unassigned funds (surplus) in the period of the change in accounting principle. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all prior periods.

NOTES TO FINANCIAL STATEMENTS

The Company has assessed the non-insurance entities subject to SSAP No. 97, and, based upon the amount of capital that these entities represent and the Company's strong capital position, the Company has decided not to obtain GAAP audits for 17 entities as of December 31, 2013 The Company has therefore valued these entities for purposes of its financial statements at zero. At the end of future fiscal years, the Company may decide to obtain U.S. GAAP audits for entities subject to SSAP No. 97 and thereby restore their equity value for purposes of inclusion in capital and surplus.

Effective January 1, 2013, the Company adopted SSAP No. 92, "Accounting for Postretirement Benefits Other Than Pensions, A Replacement of SSAP No. 14", ("SSAP No. 92") and SSAP No. 102, "Accounting for Pensions, A Replacement of SSAP No. 89" ("SSAP No. 102"). The disclosures required by SSAP No. 92 and SSAP No. 102 are included in footnote 12. The cumulative impact of adopting these pronouncements was a $236 million charge to surplus as of January 1, 2013, which is reflected through the Summary of Operations line 49, (Cumulative effect of changes in accounting principles).

Effective December 15, 2013, the Company adopted INT 13-03, "Clarification of Surplus Deferral in SSAP No. 92 and SSAP No. 102", which clarified that the transition guidance in SSAP No. 92 and SSAP No. 102, was not intended to result in a more favorable subsequent pension and/or other postemployment benefit (OPEB) surplus position when there are remaining unrecognized liabilities as a result of the reporting entity's initial election for surplus deferral. For any reductions in the benefit obligation due to settlement, curtailment, or plan amendments, as well as net benefit obligation gains due to revisions in assumptions (e.g., discount rates), plan experience differing from assumptions, or actual asset gains exceeding expected returns, a corresponding amount of the deferred surplus liability will be recognized. Additionally, the deferred surplus liability must be recognized to the extent the plan reflects a prepaid cost.

Effective January 1, 2013, the Company adopted SSAP No. 103, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", which superseded SSAP No. 91R, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities". The new pronouncement enhances the information that must be provided regarding security lending, repurchase agreements, and activity related to the transfer and servicing of financial assets.

Effective January 1, 2012, the Company adopted SSAP No. 101, "Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10" ("SSAP No. 101"). SSAP No. 101 contains changes to accounting for current and deferred federal and foreign income taxes, effective on January 1, 2012. This guidance provides that the deferred tax asset admissibility guidance is no longer elective, and the reversal and surplus limitation parameters in the admissibility tests are determined based on the risk based capital level (or other metrics). It also requires that gross deferred tax assets be reduced by a statutory valuation allowance if it is more likely than not that some portion or all of the gross deferred tax assets will not be realized. Finally, the guidance sets a more likely than not threshold for the recording of contingent tax liabilities. The cumulative impact of adopting this pronouncement was a decrease to surplus of $69 million.

In the first quarter of 2012, the Company determined that its liabilities for accrued taxes, licenses, and fees have been overstated by state contingent taxes accrued prior to 2005. During the first quarter of 2012, the liability was reduced and a $53 million adjustment was recorded through line 53, "Aggregate write-ins for gains and losses to surplus" in the Summary of Operations page. In the second and third quarters of 2012, the Company also recorded a prior year adjustment to line 53 to increase by $99 million reserves for estimated payments arising from use of new Social Security Master Death File matching criteria to identify deceased policy and contract holders. During the initial calculation of the reserve in the third quarter of 2011, the Company excluded certain life policies in extended term status from the analysis used to identify potential claims. In the fourth quarter of 2012, the Company recorded an increase of $39 million in recorded liabilities for certain employee benefits based on a review of the consistency of recognition, of such liabilities across PFI which should have been recorded in prior years. Together, these three prior year adjustments totaling ($85) million are recorded on line 5304, "Aggregate write-ins for gains and losses to surplus- Correction related to prior year" in the 2012 Summary of Operations page.

Prepayment assumptions for loan-backed and structured securities were obtained from broker dealer survey values or internal estimates.

NOTES TO FINANCIAL STATEMENTS

(2) As of December 31, 2013, the Company has no loan-backed securities, within the scope of SSAP No 43R “Loan-backed and Structured Securities” (“SSAP 43R), with a recognized other-than-temporary impairment, classified on the basis of either, a) intent to sell or b) inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis.

Investments held in the short-term spread portfolios include cash and cash equivalents, short-term investments and fixed maturities, including mortgage- and asset-backed securities. In addition, $303,983,113 and $342,249,849 at amortized cost and fair value, respectively, of Repurchase Agreement proceeds were reinvested in FNMA pass-through securities. At December 31, 2013, the Company has sufficient assets to cover its secured borrowing liability.

These programs are typically limited to securities in demand that can be loaned at relatively low financing rates. As such, we believe there is unused capacity available through these programs. Holdings of cash and cash equivalent investments in these short-term spread portfolios allow for further flexibility in sizing the portfolio to better match available financing. Current conditions in both the financing and investment markets are continuously monitored in order to appropriately manage the cost of funds, investment spreads, asset/liability duration matching and liquidity.

8. DERIVATIVE INSTRUMENTS

The Company uses derivatives to manage risks from changes in interest rates or foreign currency values, to alter interest rate or currency exposures arising from mismatches between assets and liabilities (including duration mismatches), to hedge against changes in the value of assets it anticipates acquiring and other anticipated transactions and commitments, and to replicate the investment performance of otherwise permissible investments. Insurance statutes restrict the Company's use of derivatives primarily to hedging, income generation, and replication activities intended to offset changes in the market value and cash flows of assets held, obligations, and anticipated transactions and prohibit the use of derivatives for speculation.

The Company, at inception, may designate derivatives as either (1) a hedge of the fair value of a recognized asset or liability or unrecognized firm commitment; (2) a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability; (3) a foreign-currency fair value or cash flow hedge; (4) a hedge of the foreign currency exposure of a net investment in a foreign operation or (5) a derivative that does not qualify for hedge accounting, including replications.

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship.

Upon termination of a derivative that qualified for hedge accounting, the gain or loss is reflected as an adjustment to the basis of the hedged item and is recognized in income consistent with the hedged item. There were no instances in which the Company discontinued cash flow hedge accounting because the forecasted transaction did not occur. The maximum length of time for which these variable cash flows are hedged is twenty-five years.

To the extent that the Company chooses not to designate its derivatives for hedge accounting or designated derivatives no longer meet the criteria of an effective hedge, the changes in their fair value are included in “Change in net unrealized capital gains” without considering changes in fair value of the hedged item. Accruals of interest income, expense and related cash flows on swaps are reported in "Net investment income". Upon termination of a derivative that does not qualify for hedge accounting, the gain or loss is included in “Net realized capital gains (losses)”. In addition, when realized gains or losses on interest-rate related derivatives are recognized, they are amortized through the IMR.

NOTES TO FINANCIAL STATEMENTS

Derivative instruments used by the Company included currency swaps, interest rate swaps, total return swaps, treasury futures, options (including rights and warrants), credit default swaps, forwards (including TBA contracts) and currency forwards. For those hedge transactions which qualify for hedge accounting, the change in the carrying value or cash flow of the derivative is recorded in a manner consistent with the changes in the carrying value or cash flow of the hedged asset, liability, firm commitment or forecasted transaction. For hedges of net investments in a foreign operation, changes in fair value of such derivatives, to the extent effective, are recorded in "Change in net unrealized capital gains". In measuring effectiveness, no component of the derivative's gain or loss is excluded. The Company does not have any cash flow hedges of forecasted transactions other than those related to the payment of variable cash flows on existing financial instruments.

Interest rate swaps are used by the Company to manage interest rate exposures arising from mismatches between assets and liabilities (including duration mismatches) and to hedge against changes in the value of assets it anticipates acquiring and other anticipated transactions and commitments. Swaps may be attributed to specific assets or liabilities or may be used on a portfolio basis. Under interest rate swaps, the Company agrees with other parties to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts calculated by reference to an agreed upon notional principal amount. Generally, no cash is exchanged at the outset of the contract and no principal payments are made by either party. These transactions are entered into pursuant to master agreements that provide for a single net payment to be made by one counterparty at each due date.

Total return swaps are used in part to manage risks from market exposure related to the Company's overall capital position from its variable annuity business. Total return swaps are designed to partially offset changes in the Company's capital position resulting from market changes in certain living and death benefit features in variable annuities products. The fair value of these total return swap agreements is based on proprietary valuation models and market quotes. These derivatives do not qualify for hedge accounting.

Equity index options are contracts which will settle in cash based on differentials in the underlying indices at the time of exercise and the strike price. The Company uses combinations of purchases and sales of equity index options to hedge the effects of adverse changes in equity indices within a predetermined range. These hedges do not qualify for hedge accounting.

Exchange-traded futures and options are used by the Company to manage risks from changes in interest rates, to alter mismatches between the duration of assets in a portfolio and the duration of liabilities supported by those assets and to hedge against changes in the value of securities it owns or anticipates acquiring or selling. In exchange-traded futures transactions, the Company agrees to purchase or sell a specified number of contracts, the values of which are determined by the values of underlying referenced investments, and to post variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The Company enters into exchange-traded futures and options with regulated futures commission's merchants who are members of a trading exchange. The fair value of exchange-traded futures and options is based on market quotes. These futures and options do not qualify for hedge accounting.

Over-the-counter equity options are used to manage risks related to certain living benefit features included in our annuity products. The fair value of these options is based on proprietary valuation models and market quotes. These equity options do not qualify for hedge accounting.

Currency derivatives, including currency forwards and currency swaps, are used to manage risks from changes in currency values of investments denominated in foreign currencies that the Company either holds or intends to acquire or sell and to alter the currency exposures arising from mismatches between such foreign currencies and the U.S. Dollar. Currency derivatives are used by the Company in cash flow and net investment hedge accounting relationships as well as in relationships that do not qualify for hedge accounting.

The Company uses "to be announced ("TBA") forward contracts to gain exposure to the investment risk and return of the mortgage-backed securities market. TBA transactions enable the Company to achieve better diversification and to enhance the return on its investment portfolio. TBAs provide a more liquid and cost effective method of achieving these goals than purchasing or selling individual mortgage-backed pools. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date. Additionally, pursuant to the Company's mortgage dollar roll program, TBAs or mortgage-backed securities are transferred to counterparties with a corresponding agreement to repurchase them at a future date. These transactions do not qualify as secured borrowings and are treated as forward contracts which reflect the obligation to repurchase the securities.

Credit default swaps are used by the Company in conjunction with fixed income investments as replication synthetic asset transactions ("RSAT"). RSATs are derivative transactions entered into in conjunction with other investments in order to produce the investment characteristics of otherwise permissible investments. Credit default swaps used in RSATs are carried at amortized cost with premiums received on such transactions recorded to "Net investment income" over the life of the contract and loss payouts, if any, are recorded as "Net realized capital gains/(losses)". The Company also uses credit default swaps to hedge exposures in its investment portfolios. Such contracts are not designated as replications, and they are used in relationships that do not qualify for hedge accounting.

The Company is exposed to credit-related losses in the event of nonperformance by counterparties to financial derivative transactions. Generally, the credit exposure of the Company's over-the-counter (OTC) derivative transaction is represented by the contracts with a positive fair value (market value) at the reporting date after taking into consideration the existence of netting agreements. Cleared derivatives are bilateral transactions between the Company and a counterparty where the transactions are cleared through a clearinghouse, such that each derivative counterparty is only exposed to the default of the clearinghouse. These cleared transactions require initial and daily variation margin collateral postings and include certain interest rate swaps and credit default swaps entered into on or after June 10, 2013. Also, the Company enters into exchange-traded futures and transactions through regulated exchanges and these transactions are settled on a daily basis, thereby reducing credit risk exposure in the event of non-performance by counterparties to such financial instruments.

Substantially all of the Company's over-the-counter derivative contracts are transacted with a subsidiary. In instances where the Company transacts with unaffiliated counterparties, the Company manages credit risk by entering into derivative transactions with major international financial institutions and other creditworthy counterparties, and by obtaining collateral where appropriate. Additionally, limits are set on single party credit exposures which are subject to periodic management review.

Internal controls are in place to ensure that derivative transactions are conducted in accordance with Company policy and guidelines. Those controls include limits, segregation of functions and periodic management review, including quarterly review of exposures by the Investment Committee of the Board of Directors, as well as monitoring for compliance with authorization and operating guidelines.

9. INCOME TAXES

The application of SSAP No. 101 requires a company to evaluate the recoverability of deferred tax assets and to establish a valuation allowance if necessary to reduce the deferred tax asset to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the company considers many factors, including: (1) the nature of the deferred tax assets and liabilities; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carry back years as well as projected taxable earnings, exclusive of reversing temporary differences and carry forwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the deferred tax assets; and, (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although the realization is not assured, management believes it is more likely than not that the deferred tax assets, net of valuation allowances, will be realized. The Company has not recorded a valuation allowance as of December 31, 2013, and December 31, 2012.

11B. FHLB Funding Agreements

(1) In June 2008, the Company became a member of the Federal Home Loan Bank of New York ("FHLBNY"), which provides the Company access to collateralized advances, collateralized funding agreements, and other FHLBNY products. Collateralized advances from the FHLBNY are classified in "Borrowed money". Collateralized funding agreements issued to the FHLBNY are classified in "Liability for deposit-type funds" These funding agreements have priority claim status above debt holders of the Company.

The Company's membership in FHLBNY requires the ownership of member stock, and borrowings from FHLBNY require the purchase of FHLBNY activity based stock in an amount equal to 4.5% of the outstanding borrowings. All FHLBNY stock purchased by the Company is classified as restricted general account investments within "Common stock" and the carrying value of these investments was $168 million as of December 31, 2013. Under guidance of the Department, the total amount of qualifying mortgage-related assets and U.S. Treasury securities that can be pledged as collateral by the Company to FHLBNY is limited to 5% of the net admitted assets of the Company on a statutory basis, exclusive of separate account assets, as of the prior year end, which equates to $8.5 billion based on net admitted assets as of December 31, 2013. Based upon this limit and on the fair value of qualifying assets owned by the Company within the Financial Services Businesses as of December 31, 2013 (including assets on loan and assets pledged to the FHLBNY at that date and taking into account applicable required collateralization levels and required purchases of activity based FHLBNY stock), the estimated total borrowing capacity with the FHLBNY was approximately $4.7 billion as of December 31, 2013. The fair value of the qualifying assets pledged as collateral by the Company must be maintained at certain specified levels of the borrowed amount, which can vary, depending on the nature of the assets pledged. As of December 31, 2013, the Company had pledged qualifying assets with a fair value of $2.7 billion, which is above the minimum level required by the FHLBNY, and had total outstanding borrowings of $2.2 billion. The total borrowings from the FHLBNY as of December 31, 2013, is comprised of collateralized advances, of which $0.3 billion is reflected in "Borrowed money", as well as $1.9 billion of collateralized funding agreements that are reflected in "Liability for deposit-type funds."

12. RETIREMENT PLANS, DEFERRED COMPENSATION, POSTEMPLOYMENT BENEFITS AND COMPENSATED ABSENCES AND OTHER POSTRETIREMENT PLANS

A. The Company has funded non-contributory defined benefit pension plans, which cover substantially all of its employees. The Company also has several non-funded, non-contributory defined benefit plans covering certain executives. For some employees, benefits are based on final average earnings and length of service, while benefits for other employees are based on an account balance that takes into consideration age, service and salary during their careers.

The Company provides certain life insurance and health care benefits ("Other postretirement benefits") for its retired employees, their beneficiaries and covered dependents. The healthcare plan is contributory, the life insurance plan is non-contributory. Substantially all of the Company's employees may become eligible to receive benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service. These benefits are funded as considered necessary by Company management.

On January 1, 2013, the Company adopted SSAP No. 102, "Accounting for Pensions, A Replacement of SSAP No. 89," and SSAP No. 92, "Accounting for Postretirement Benefits Other Than Pensions, A Replacement of SSAP No. 14". The adoption caused a change in measurement date from September 30 to December 31, as well as other changes effecting the obligations of the plans. The impact of all these changes on 2013 activity is disclosed as follows: Line 12A (1)a.9 reflects $55 million and ($5) million for pension overfunded and pension underfunded, respectively. Line 12A (1)b.9 reflects ($110) million for postretirement underfunded. Line 12A (2)g reflects $23 million and ($21) million for pension and postretirement, respectively.

On December 6, 2013, the Company transferred $340 million of assets within the qualified pension plan under Section 420 of the Internal Revenue Code from assets supporting pension benefits to assets supporting retiree medical and life benefits. The transfer resulted in a reduction to the prepaid benefit cost for the qualified pension plan and an offsetting decrease in the

accrued benefit liability for the post retirement plan. Line 12A (2)g reflects ($340) million and $340 million for pension and postretirement, respectively. The transfer will reduce the future cash contributions required to be made to the postretirement plan.

The measurement date for 2013 is December 31 and the measurement date for 2012 is September 30.

	2013	2012
Weighted-average assumptions used to determine net periodic benefit cost as of December 31, 2013 and September 30, 2012:		
a. Weighted-average discount rate	4.05%	5.05%
b. Expected long-term rate of return on plan assets	6.25%	6.75%

d. Weighted-average discount rate	4.95%	3.95%
e. Rate of compensation increase	4.50%	4.50%

Ultimate health care cost trend rate after gradual decrease until 2019	5.00%	5.00%

The investment goal of the domestic pension plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds and other investments. The cash requirements of the pension obligation, which include a traditional formula principally representing payments to annuitants and a cash balance formula that allows lump sum payments and annuity payments, are designed to be met by the bonds and short term investments in the portfolio. The pension plan risk management practices include guidelines for asset concentration, credit rating and liquidity. The pension plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

The investment goal of the domestic postretirement plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds, and other investments, while meeting the cash requirements for the postretirement obligation that includes a medical benefit including prescription drugs, a dental benefit, and a life benefit. The postretirement plans risk management practices include guidelines for asset concentration, credit rating, liquidity, and tax efficiency. The postretirement plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

NOTES TO FINANCIAL STATEMENTS

To implement the investment strategy, plan assets are invested in funds that primarily invest in securities that correspond to one of the asset categories under the investment guidelines. However, at any point in time, some of the assets in a fund may be of a different nature than the specified asset category.

Assets held with Prudential Insurance are in either pooled separate accounts or single client separate accounts. Pooled separate accounts hold assets for multiple investors. Each investor owns a "unit of account." Single client separate accounts hold assets for only one investor, the domestic qualified pension plan and each security in the fund is treated as individually owned. Assets held with a bank are either in common/collective trusts or single client trusts. Common or collective trusts hold assets for more than one investor. Each investor owns a "unit of account." Single client trusts hold assets for only one investor, the domestic qualified pension plan and each security in the fund is treated as individually owned.

As allowed by authoritative guidance, the measurement date for plan assets and obligations for 2012 reporting was September 30th. New authoritative guidance requires a December 31st measurement date for 2013 reporting. The Fair Value Measurement disclosure is provided at December 31, 2013 and December 31, 2012 for comparative purposes.

There were no investments in Prudential Financial Common Stock as of December 31, 2013 and December 31, 2012 for either the pension or postretirement plans.

The authoritative guidance around fair value established a framework for measuring fair value. Fair value is disclosed using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, as described in Note 20.

The following describes the valuation methodologies used for pension and postretirement plans assets measured at fair value.

Insurance Company Pooled Separate Accounts, Common or Collective Trusts, and United Kingdom Insurance Pooled Funds – Insurance company pooled separate accounts are invested via group annuity contracts issued by Prudential Insurance. Assets are represented by a "unit of account." The redemption value of those units is based on a per unit value whose value is the result of the accumulated values of underlying investments. The underlying investments are valued in accordance with the corresponding valuation method for the investments held.

Common and Preferred Stock – See Note 20 for a discussion of the valuation methodologies for common and preferred stocks.

Bonds - See Note 20 for a discussion of the valuation methodologies for bonds.

Interest Rate Swaps – See Note 20 for a discussion of the valuation methodologies for derivative instruments.

Guaranteed Investment Contract - The value is based on contract cash flows and available market rates for similar investments.

Registered Investment Companies (Mutual Funds) - Securities are priced at the net asset value ("NAV") of shares.

Unrealized Gain (Loss) on Investment of Securities Lending Collateral - This value is the contractual position relative to the investment of securities lending collateral.

Real Estate - The values are determined through an independent appraisal process. The estimate of fair value is based on three approaches; (1) current cost of reproducing the property less deterioration and functional/economic obsolescence; (2) discounting a series of income streams and reversion at a specific yield or by directly capitalizing a single year income estimate by an appropriate factor; and (3) value indicated by recent sales of comparable properties in the market. Each approach requires the exercise of subjective judgment.

Short-term Investments - Securities are valued initially at cost and thereafter adjusted for amortization of any discount or premium (i.e., amortized cost). Amortized cost approximates fair value.

Partnerships - The value of interests owned in partnerships is based on valuations of the underlying investments that include private placements, structured debt, real estate, equities, fixed maturities, commodities and other investments.

Hedge Funds - The value of interests in hedge funds is based on the underlying investments that include equities, debt and other investments.

Variable Life Insurance Policies – These assets are held in group and individual variable life insurance policies issued by Prudential Insurance. Group policies are invested in Insurance Company Pooled Separate Accounts. Individual policies are invested in Registered Investment Companies (Mutual Funds). The value of interest in these policies is the cash surrender value of the policies based on the underlying investments.

D. The domestic discount rate used to value the pension and postretirement obligations at December 30, 2013 and September 30, 2012 is based upon the value of a portfolio of Aa investments whose cash flows would be available to pay the benefit obligation's cash flows when due. The portfolio is selected from a compilation of approximately 515 Aa-rated bonds across the full range of maturities. Since yields can vary widely at each maturity point, the Company generally avoids using the highest and lowest yielding bonds at the maturity points, so as to avoid relying on bonds that might be mispriced or misrated. This refinement process generally results in having a distribution from the 10th to 90th percentile. The Aa portfolio is then selected and, accordingly, its value is a measure of the benefit obligation at December 31, 2013 and September 30, 2012. A single equivalent discount rate is calculated to equate the value of the Aa portfolio to the cash flows for the benefit obligation. The result is rounded to the nearest 5 basis points and the benefit obligation is recalculated using the rounded discount rate.

The pension and postretirement expected long-term rates of return on plan assets for 2013 were determined based upon an approach that considered an expectation of the allocation of plan assets during the measurement period of 2013. Expected returns are estimated by asset class as noted in the discussion of investment policies and strategies below. Expected returns on asset classes are developed using a building-block approach that is forward looking and are not strictly based upon historical returns. The building blocks for equity returns include inflation, real return, a term premium, an equity risk premium, capital appreciation and the effect of active management, expenses and the effect of rebalancing. The building blocks for fixed maturity returns include inflation, real return, a term premium, credit spread, capital appreciation and the effect of active management, expenses and the effect of rebalancing.

The Company applied the same approach to the determination of the expected long term rate of return in 2014. The expected long term rate of return for 2014 is 6.25% and 7.00% for the pension and postretirement plans, respectively.

E. The Company sponsors voluntary savings plans for employees (401(k) plans). The plans provide for salary reduction contributions by employees and matching contributions by the Company of up to 4% of annual salary for 2013 and 2012. The matching contributions by the Company included in “Other expenses” are $57 million and $54 million for 2013 and 2012 respectively.

F. Not applicable. The Company does not participate in multiemployer pension or postretirement benefit plans.

G. Not applicable. The Company does not participate in pension or postretirement benefit plans sponsored by an affiliated consolidated/ holding company.

Each payment of principal and interest on the surplus notes may be made only with the prior written approval of the Commissioner, which approval will only be granted if, in the judgment of the Commissioner, the then current and projected financial condition of the Company warrants such payment. In addition, pursuant to applicable New Jersey law, any payment of principal or interest on the surplus notes may be only out of surplus, earnings, or profits of the Company.

If these conditions to payment are not met, the applicable scheduled maturity date or scheduled interest payment date will be extended until such time, if any, at which conditions are met. Interest will continue to accrue on any unpaid principal amount of the surplus notes during the period of any such extension. Interest will not accrue on interest.

(12)/(13) The Company has not had any quasi-reorganizations during December 31, 2013 and December 31, 2012.

The maximum amount of the guaranty is $240,000,000, plus accrued interest on all amounts outstanding under the promissory note or the purchase agreement to the date of repayment and plus all reasonable expenses incurred by Gibraltar in enforcing its rights under the guarantee. The guarantee may be cancelled by the Company upon prior written notice to Gibraltar, provided that the guarantee remains applicable to any guaranteed obligations then outstanding. The guarantee terminates automatically on March 18, 2015, unless the Company notifies Gibraltar that the guarantee will be extended. There are no recourse provisions that enable recovery from a third party, nor are there any assets held as collateral that can be liquidated to cover amounts paid under the guarantee.

9) The Company's ERISA Separate Accounts are managed by the following affiliates: Prudential Investment Management, Inc., Quantitative Management Associates LLC, Prudential Private Placement Investors, L.P., Jennison Associates LLC, and Prudential Mortgage Capital Company, LLC (collectively, the "Advisor Affiliates"). Under ERISA guidelines, the Advisor Affiliates are required to obtain a financial performance bond to protect the plan assets from loss due to fraud or dishonesty. In lieu of purchasing an external financial performance bond, the Company has provided a guarantee to the Advisor Affiliates to protect the plan assets from any loss due to fraud or dishonesty. The guarantee creates no additional risk to the Company from loss or fraud since the Company would retain the same risk under ERISA's fiduciary standards.

10) The Company has guaranteed the obligations of Pruco Insurance Company of Iowa ("Pruco of Iowa"), a wholly owned, insurance subsidiary of the Company, under insurance contracts that may be issued from time to time by Pruco of Iowa to its policyholders, in accordance with the terms of such insurance contracts. The guarantee may be canceled by the Company at any time upon prior written notice to the applicable policyholder beneficiaries of the guarantee and upon thirty days' prior written notice to the Department and the Iowa Insurance Division; provided, that the guarantee remains applicable to any guaranteed obligations outstanding at the time of termination. Since Pruco of Iowa had no direct business as of December 31, 2013, the maximum potential amount of future payments is $0.

The Company also guarantees that it will maintain the capital and surplus accounts of Pruco of Iowa at or above the Iowa statutory minimum levels of $5,000,000 (capital and surplus) or risk based capital, whichever is greater. The exposure that is not limited to the separate account assets relates mostly to guarantees limited to fraud, criminal activity or other bad acts. These guarantees generally expire at various times over the next eleven years. At December 31, 2013, the Company's assessment is that it is unlikely payments will be required. Premium tax credits are generally expected to be realized over a similar time period as the assessment liability but will vary by state, which can affect the available amounts and duration.

The Company has no balance that is reasonably possible to be uncollectible for assets covered by SSAP No.s 6, 47 or 66.

(2) Other Contingencies

The Company is subject to legal and regulatory actions in the ordinary course of its businesses. Pending legal and regulatory actions include proceedings specific to it and proceedings generally applicable to business practices in the industries in which it operates, including in both cases businesses that have either been divested or placed in wind-down status. The Company is subject to class action lawsuits and individual lawsuits involving a variety of issues, including sales practices, underwriting practices, claims payment and procedures, additional premium charges for premiums paid on a periodic basis, denial or delay of benefits, return of premiums or excessive premium charges and breaching fiduciary duties to customers. In its investment-related operations, the Company is subject to litigation involving commercial disputes with counterparties or partners and class action lawsuits and other litigation alleging, among other things, that the Company has made improper or inadequate disclosures in connection with the sale of assets and annuity and investment products or charged excessive or impermissible fees on these products, recommended unsuitable products to customers, mishandled customer accounts or breached fiduciary duties to customers.

The Company is also subject to litigation arising out of its general business activities, such as its investments, contracts, leases and labor and employment relationships, including claims of discrimination and harassment and could be exposed to claims or litigation concerning certain business or process patents. Regulatory authorities from time to time make inquiries and conduct investigations and examinations relating particularly to the Company and its businesses and products. In addition, the Company, along with other participants in the businesses in which it engages, may be subject from time to time to investigations, examinations and inquiries, in some cases industry-wide, concerning issues or matters upon which such regulators have determined to focus. In some of the Company's pending legal and regulatory actions, parties are seeking large and/or indeterminate amounts, including punitive or exemplary damages. The outcome of a litigation or regulatory matter, and the amount or range of potential loss at any particular time, is often inherently uncertain. The following is a summary of certain pending proceedings.

In January 2013, a *qui tam* action on behalf of the State of Florida, *Total Asset Recovery Services v. Met Life Inc., et al., Manulife Financial Corporation, et. al., Prudential Financial, Inc., The Prudential Insurance Company of America, and Prudential Insurance Agency, LLC.,* filed in the Circuit Court of Leon County, Florida, was served on the Company. The complaint alleges that the Company failed to escheat life insurance proceeds to the State of Florida in violation of the Florida False Claims Act and seeks injunctive relief, compensatory damages, civil penalties, treble damages, prejudgment interest, attorneys' fees and costs. In March 2013, the Company filed a motion to dismiss the complaint. In August 2013, the court dismissed the complaint with prejudice. In September 2013, plaintiff filed an appeal with Florida's Circuit Court of the Second Judicial Circuit in Leon County.

In September 2012, the State of West Virginia, through its State Treasurer, filed a lawsuit, *State of West Virginia ex. Rel. John D. Perdue v. Prudential Insurance Company of America*, in the Circuit Court of Putnam County, West Virginia. The complaint alleges violations of the West Virginia Uniform Unclaimed Property Fund Act by failing to properly identify and report all unclaimed insurance policy proceeds which should either be paid to beneficiaries or escheated to West Virginia. The complaint seeks to examine the records of Prudential Insurance to determine compliance with the West Virginia Uniform Unclaimed Property Fund Act, and to assess penalties and costs in an undetermined amount. In October 2012, the State of West Virginia commenced a second action, *State of West Virginia ex. Rel. John D. Perdue v. Pruco Life Insurance Company* making the same allegations stated in the action against the Company. In April 2013, the Company filed motions to dismiss the Complaints in both of the West Virginia actions. In December 2013, the Court granted the Company's motions and dismissed the complaints with prejudice. In January 2014, the State of West Virginia appealed the decisions.

Since April 2012, the Company has filed ten actions seeking to recover damages attributable to investments in residential mortgage-backed securities ("RMBS"). Eight actions were filed in New Jersey state court, captioned *The Prudential Insurance Company of America, et al. v. JP Morgan Chase, et al.; The Prudential Insurance Company of America, et al. v. Morgan Stanley, et al.*; *The Prudential Insurance Company of America, et al. v. Nomura Securities International, Inc., et al.; The Prudential Insurance Company of America, et al. v. Barclays Bank PLC, et al.; The Prudential Insurance Company of America, et al. v. Goldman Sachs & Company, et al.; The Prudential Insurance Company of America, et al. v.*

NOTES TO FINANCIAL STATEMENTS

RBS Financial Products, Inc., et al.; The Prudential Insurance Company of America, et al. v. Countrywide Financial Corp., et al.; and *The Prudential Insurance Company of America, et al. v. UBS Securities LLC. et al*. Additionally, two actions were filed in the United States District Court for the District of New Jersey: *The Prudential Insurance Company of America v. Credit Suisse Securities (USA) LLC, et al.* and *The Prudential Insurance Company of America v. Bank of America National Association and Merrill Lynch & Co., Inc., et al*. Among other allegations stemming from the defendants' origination, underwriting and sales of RMBS, the complaints assert claims of common law fraud, negligent misrepresentation, breaches of the New Jersey Civil RICO statute, and, in some lawsuits, federal securities claims. The complaints seek unspecified damages. Seven of the defendants (*J.P. Morgan, Barclays, Nomura, RBS, Goldman Sachs, Countrywide, and UBS*) removed the lawsuits from New Jersey state court to the United States District Court for the District of New Jersey. The *Countrywide* defendants also made an application to the Judicial Panel on Multi-District Litigation to transfer that case to the United States District Court for the Central District of California. In August 2013, that application was granted. Except for the *Nomura* and *Goldman Sachs* actions, the Company filed motions to remand the lawsuits to New Jersey state court. The *J.P. Morgan, Barclays, RBS and UBS* lawsuits were subsequently remanded to New Jersey state court. Each of the *Goldman Sachs, Morgan Stanley, Nomura, Credit Suisse, Barclays, Bank of America/Merrill Lynch, RBS, J.P. Morgan,* and *Countrywide* defendants filed motions to dismiss the complaints against them. The motions to dismiss filed by *Goldman Sachs, J.P. Morgan, Morgan Stanley, and Credit Suisse* have been denied, the motion to dismiss filed by *Nomura* has been superseded by the filing of our amended complaint, and the motions to dismiss filed by *Barclays, Bank of America/Merrill Lynch, RBS,* and *Countrywide* are pending. In December 2013, the lawsuit against *Goldman Sachs* was settled.

In January 2012, a Global Resolution Agreement entered into by the Company and a third party auditor became effective upon its acceptance by the unclaimed property departments of 20 states and jurisdictions. Under the terms of the Global Resolution Agreement, the third party auditor acting on behalf of the signatory states will compare expanded matching criteria to the Social Security Master Death File ("SSMDF") to identify deceased insureds and contract holders where a valid claim has not been made. In February 2012, a Regulatory Settlement Agreement entered into by the Company to resolve a multi-state market conduct examination regarding its adherence to state claim settlement practices became effective upon its acceptance by the insurance departments of 20 states and jurisdictions. The Regulatory Settlement Agreement applies prospectively and requires the Company to adopt and implement additional procedures comparing its records to the SSMDF to identify unclaimed death benefits and prescribes procedures for identifying and locating beneficiaries once deaths are identified. Substantially all other jurisdictions that are not signatories to the Global Resolution Agreement or the Regulatory Settlement Agreement have entered into similar agreements with the Company.

The Company is one of several companies subpoenaed by the New York Attorney General regarding its unclaimed property procedures. Additionally, the New York State Department of Financial Services ("NYDFS") has requested that 172 life insurers (including the Company) provide data to the NYDFS regarding use of the SSMDF. The New York Office of Unclaimed Funds is conducting an audit of the Company's compliance with New York's unclaimed property laws. In February 2012, the Massachusetts Office of the Attorney General requested information regarding the Company's unclaimed property procedures. In December 2013, this matter was closed without prejudice. In May 2013, the Company entered into a settlement agreement with the Minnesota Department of Commerce, Insurance Division, which requires the Company to take additional steps to identify deceased insureds and contract holders where a valid claim has not been made.

In February 2011, a fifth amended complaint was filed in the United States District Court for the District of New Jersey in *Clark v. Prudential Insurance Company*. The complaint brought on behalf of a purported class of California, Indiana, Ohio and Texas residents who purchased individual health insurance policies alleges that Prudential Insurance failed to disclose that it had ceased selling this type of policy in 1981 and that, as a result, premiums would increase significantly. The complaint alleges claims of fraudulent misrepresentation and omission, breach of the duty of good faith and fair dealing, and California's Unfair Competition Law and seeks compensatory and punitive damages. The matter was originally filed in 2008 and certain of the claims in the first four complaints were dismissed. In February 2012, plaintiffs filed a motion for class certification. In July 2012, the Company moved for summary judgment on certain of plaintiffs' claims. In February 2013, the court denied plaintiffs' motion for class certification, granted the motion by the Company for summary judgment against two of the named plaintiffs and denied summary judgment against two other plaintiffs. In April 2013, the court denied plaintiffs' motions: (i) for reconsideration of the court's order denying class certification and granting the Company partial summary judgment; and (ii) to alter or amend the order denying class certification by redefining the class and bifurcating liability and damages issues. In December 2013, the named plaintiffs agreed to a settlement within reserved amounts. In January 2014, the Court dismissed the complaints with prejudice.

In January 2011, a purported state-wide class action, *Garcia v. The Prudential Insurance Company of America* was dismissed by the Second Judicial District Court, Washoe County, Nevada. The complaint was brought on behalf of Nevada beneficiaries of individual life insurance policies for which, unless the beneficiaries elected another settlement method, death benefits were placed in retained asset accounts. The complaint alleges that by failing to disclose material information about the accounts, the Company wrongfully delayed payment and improperly retained undisclosed profits, and seeks damages, injunctive relief, attorneys' fees and pre and post-judgment interest. In February 2011, plaintiff appealed the dismissal to the Nevada Supreme Court. As previously reported, in December 2009, an earlier purported nationwide class action raising substantially similar allegations brought by the same plaintiff in the United States District Court for the District of New Jersey, *Garcia v. Prudential Insurance Company of America*, was dismissed. In December 2011, plaintiff appealed the dismissal. In January 2013, the Nevada Supreme Court affirmed the dismissal of the complaint. In May 2013, the time for the plaintiff to appeal the dismissal expired.

In December 2010, a purported state-wide class action complaint, *Phillips v. Prudential Financial, Inc*., was filed in state court and removed to the United States District Court for the Southern District of Illinois. The complaint makes allegations under Illinois law, substantially similar to the *Garcia* cases, on behalf of a class of Illinois residents whose death benefit claims were settled by retained assets accounts. In March 2011, the complaint was amended to drop the Company as a defendant and add Pruco Life Insurance Company as a defendant and is now captioned *Phillips v. Prudential Insurance and Pruco Life Insurance Company*. In November 2011, the complaint was dismissed. In December 2011, plaintiff appealed the dismissal. In May 2013, the United States Court of Appeals for the Seventh Circuit affirmed the dismissal of plaintiff's putative class action complaint. In August 2013, plaintiff's time to appeal the dismissal expired.

From July 2010 to December 2010, four purported nationwide class actions were filed challenging the use of retained asset accounts to settle death benefit claims of beneficiaries of a group life insurance contract owned by the United States

Department of Veterans Affairs that covers the lives of members and veterans of the U.S. armed forces. In 2011, the cases were consolidated in the United States District Court for the District of Massachusetts by the Judicial Panel for Multi-District Litigation as *In re Prudential Insurance Company of America SGLI/VGLI Contract Litigation.* The consolidated complaint alleges that the use of the retained assets accounts that earn interest and are available to be withdrawn by the beneficiary, in whole or in part, at any time, to settle death benefit claims is in violation of federal law, and asserts claims of breach of contract, breaches of fiduciary duty and the duty of good faith and fair dealing, fraud and unjust enrichment and seeks compensatory and punitive damages, disgorgement of profits, equitable relief and pre and post-judgment interest. In March 2011, the motion to dismiss was denied. In January 2012, plaintiffs filed a motion to certify the class. In August 2012, the court denied plaintiffs' class certification motion without prejudice pending the filing of summary judgment motions on the issue of whether plaintiffs sustained an actual injury. In October 2012, the parties filed motions for summary judgment. In November 2013, the Court issued a Memorandum and Order stating that the named plaintiffs: (1) did not suffer a cognizable legal injury; (2) are not entitled to any damages based on allegations of delay in payment of benefits; and (3) are not entitled to disgorgement of profits as a remedy. The Court ordered further briefing on whether nominal damages should be awarded and whether any equitable relief should be granted. In February 2014, the parties filed briefs addressing the issues ordered by the Court.

In September 2010, *Huffman v. The Prudential Insurance Company*, a purported nationwide class action brought on behalf of beneficiaries of group life insurance contracts owned by ERISA-governed employee welfare benefit plans was filed in the United States District Court for the Eastern District of Pennsylvania, challenging the use of retained asset accounts in employee welfare benefit plans to settle death benefit claims as a violation of ERISA and seeking injunctive relief and disgorgement of profits. In July 2011, the Company's motion for judgment on the pleadings was denied. In February 2012, plaintiffs filed a motion to certify the class. In April 2012, the court stayed the case pending the outcome of a case involving another insurer that is before the Third Circuit Court of Appeals.

In October 2006, a purported class action lawsuit, *Bouder v. Prudential Financial, Inc. and Prudential Insurance Company of America*, was filed in the United States District Court for the District of New Jersey, claiming that the Company failed to pay overtime to insurance agents in violation of federal and Pennsylvania law, and that improper deductions were made from these agents' wages in violation of state law. The complaint sought back overtime pay and statutory damages, recovery of improper deductions, interest, and attorneys' fees. In March 2008, the court conditionally certified a nationwide class on the federal overtime claim. Separately, in March 2008, a purported nationwide class action lawsuit was filed in the United States District Court for the Southern District of California, *Wang v. Prudential Financial, Inc. and Prudential Insurance,* claiming that the Company failed to pay its agents overtime and provide other benefits in violation of California and federal law and seeking compensatory and punitive damages in unspecified amounts. In September 2008, *Wang* was transferred to the United States District Court for the District of New Jersey and consolidated with the *Bouder* matter. Subsequent amendments to the complaint resulted in additional allegations involving purported violations of an additional nine states' overtime and wage payment laws. In February 2010, the Company moved to decertify the federal overtime class that had been conditionally certified in March 2008 and moved for summary judgment on the federal overtime claims of the named plaintiffs. In July 2010, plaintiffs filed a motion for class certification of the state law claims. In August 2010, the district court granted Prudential Financial's motion for summary judgment, dismissing the federal overtime claims. In January 2013, the court denied plaintiffs' motion for class certification in its entirety. In July 2013, the court granted plaintiffs' motion for reconsideration, permitting plaintiffs to file a motion to certify a class of employee insurance agents seeking recovery under state wage and hour laws. In September 2013, plaintiffs filed a renewed motion for class certification.

From November 2002 to March 2005, eleven separate complaints were filed against the Company and the law firm of Leeds Morelli & Brown in New Jersey state court and in the New Jersey Superior Court, Essex County as *Lederman v. Prudential Financial, Inc., et al.* The complaints allege that an alternative dispute resolution agreement entered into among the Company, over 235 claimants who are current and former employees, and Leeds Morelli & Brown (the law firm representing the claimants) was illegal and that the Company conspired with Leeds Morelli & Brown to commit fraud, malpractice, breach of contract, and violate racketeering laws by advancing legal fees to the law firm with the purpose of limiting Prudential Financial's liability to the claimants. In February 2010, the New Jersey Supreme Court assigned the cases for centralized case management to the Superior Court, Bergen County. The Company participated in a court-ordered mediation that resulted in a settlement involving 193 of the remaining 235 plaintiffs. The amounts paid to the 193 plaintiffs were within existing reserves for this matter. In December 2013, the Company participated in court-ordered mediation that resulted in a December 2013 settlement involving 40 of the remaining 42 plaintiffs with litigation against the Company, including plaintiffs who had not yet appealed the dismissal of their claims. The amounts paid to the 40 plaintiffs were within existing reserves for this matter.

On an ongoing basis, the Company's internal supervisory and control functions review the quality of sales, marketing and other customer interface procedures and practices and may recommend modification or enhancement. From time to time, this review process results in the discovery of product administration, servicing or other errors, including errors relating to the timing or amount of payments or contract values due to customers. In certain cases, if appropriate, the Company may offer customers remediation and may incur charges, including the cost of such remediation, administrative costs and regulatory fines.

The Company's litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, their outcomes cannot be predicted. It is possible that the Company's results of operations or cash flows in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. In light of the unpredictability of the Company's litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on the Company's financial position. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification is not likely to have a material adverse effect on the Company's financial position.

20. FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative guidance around fair value established a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls

NOTES TO FINANCIAL STATEMENTS

is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1 – Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. These generally provide the most reliable evidence and are used to measure fair value whenever available. Active markets are defined as having the following characteristics for the measured asset/liability: (i) many transactions, (ii) current prices, (iii) price quotes not varying substantially among market makers, (iv) narrow bid/ask spreads and (v) most information publicly available. The Company's Level 1 assets and liabilities primarily include certain cash equivalents and short term investments, common stock and derivative contracts that are traded in an active exchange market. Prices are obtained from readily available sources for market transactions involving identical assets or liabilities.

Level 2 – Fair value is based on significant inputs, other than Level 1 inputs, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities and other market observable inputs. The Company's Level 2 assets and liabilities include: bonds (corporate public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain common stock securities (mutual funds, which do not actively trade and are priced based on a net asset value), short-term investments within the separate accounts as well as certain cash equivalents (primarily commercial paper), and certain over-the-counter derivatives in the general account. Valuations are generally obtained from third party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs. Prices from services are validated through comparison to trade data and internal estimates of current fair value, generally developed using market observable inputs and economic indicators.

Level 3 – Fair value is based on at least one or more significant unobservable inputs for the asset or liability. These inputs reflect the Company's assumptions about the inputs market participants would use in pricing the asset or liability. The Company's Level 3 assets and liabilities primarily include: certain private bonds and common stock securities, certain manually priced public common stock and bonds, and certain highly structured over-the-counter derivative contracts. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market, and are generally considered Level 3. Under certain conditions, based on its observations of transactions in active markets, the Company may conclude the prices received from independent third party pricing services or brokers are not reasonable or reflective of market activity. In those instances, the Company may choose to over-ride the third-party pricing information or quotes received and apply internally developed values to the related assets or liabilities. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3.

Bonds carried at the lower of amortized cost or market value — The fair values of the Company's public bonds are generally based on prices obtained from independent pricing services. Prices from pricing services are sourced from multiple vendors, and a vendor hierarchy is maintained by asset type based on historical pricing experience and vendor expertise. The Company generally receives prices from multiple pricing services for each security, but ultimately uses the price from the pricing service highest in the vendor hierarchy based on the respective asset type. To validate reasonability, prices are reviewed by internal asset managers through comparison with directly observed recent market trades and internal estimates of current fair value, developed using market observable inputs and economic indicators. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2 as they are primarily based on observable pricing for similar assets and/or other market observable inputs. If the pricing information received from third party pricing services is not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service. If the pricing service updates the price to be more consistent in comparison to the presented market observations, the security remains within Level 2.

If the Company ultimately concludes that pricing information received from the independent pricing service is not reflective of market activity, non-binding broker quotes are used, if available. If the Company concludes the values from both pricing services and brokers are not reflective of market activity, it may over-ride the information from the pricing service or broker with an internally developed valuation. As of December 31, 2013, over-rides on a net basis were not material. Internally developed valuations or non-binding broker quotes are also used to determine fair value in circumstances where vendor pricing is not available. These estimates may use significant unobservable inputs, which reflect our own assumptions about the inputs market participants would use in pricing the asset. Circumstances where observable market data are not available may include events such as market illiquidity and credit events related to the security. Pricing service over-rides, internally developed valuations and non-binding broker quotes are generally included in Level 3 in our fair value hierarchy.

The fair value of private bonds, which are primarily comprised of investments in private placement securities, originated by internal private asset managers, are primarily determined using a discounted cash flow model. In certain cases these models primarily use observable inputs with a discount rate based upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions, taking into account, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. Generally, these securities would be reflected within Level 2. For certain private bonds, the discounted cash flow model may also incorporate significant unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the asset. To the extent management determines that such unobservable inputs are not significant to the price of a security, a Level 2 classification is made. Otherwise, a Level 3 classification is used.

Preferred Stocks carried at the lower of amortized cost or market value – consist principally of debt investments in funds as well as publicly and privately traded preferred stock. The investment of debt fund that, in addition to a stated coupon, pays a return based upon the results of the underlying portfolios. The fair values of these securities are determined by reference to the funds' net asset value (NAV). Since the NAV at which the funds trade can be observed by redemption and subscription transactions between third parties, the fair values of these investments would be reflected within Level 2 in the fair value hierarchy. The fair values of most publicly traded preferred stock securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded preferred stock securities are determined using valuation and discounted cash flow models that require a substantial level of judgment. In determining the fair value of certain privately traded preferred stock the discounted cash flow model may also use unobservable inputs, which reflect the Company's assumptions about the inputs market participants would use in pricing the asset. Most privately traded preferred stock securities are classified within Level 3.

Common Stocks carried at market value—consist principally of investments in common stocks of publicly traded companies, privately traded securities, as well as common stock mutual fund shares. The fair values of most publicly traded stock are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded stock are determined using valuation and discounted cash flow models that require a substantial level of

NOTES TO FINANCIAL STATEMENTS

judgment. In determining the fair value of certain privately traded stock the discounted cash flow model may also use unobservable inputs, which reflect the Company's assumptions about the inputs market participants would use in pricing the asset. Most privately traded equity securities are classified within Level 3. The fair values of common stock mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares and are classified within Level 2 in the fair value hierarchy. The fair values of preferred stock are based on prices obtained from independent pricing services. These prices are then validated for reasonableness against recently traded market prices. Accordingly, these securities are generally classified within Level 2 in the fair value hierarchy. Fair values of perpetual preferred stock based on observable market inputs are classified within Level 2. However, when prices from independent pricing services are based on non-binding broker quotes as the directly observable market inputs become unavailable, the fair value of perpetual preferred stock are classified as Level 3.

Derivative Instruments—Derivatives are recorded at fair value either as assets, within "Derivatives," or as liabilities, within "Miscellaneous liabilities: Derivatives". The fair values of derivative contracts are determined based on quoted prices in active exchanges or through the use of valuation models. The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, credit spreads, market volatility, expected returns, and liquidity as well as other factors. Liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity, and other specific attributes of the underlying derivative position. Fair values can also be affected by changes in estimates and assumptions including those related to counterparty behavior used in valuation models.

The Company's exchange-traded options include eurodollar options and commodity options. Exchange-traded options are valued using quoted prices in active markets and are classified within Level 1 in our fair value hierarchy.

The majority of the Company's derivative positions which are traded in the over-the-counter (OTC) derivative market are classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models generally accepted in the financial services industry that use actively quoted or observable market input values from external market data providers, third-party pricing vendors and/or recent trading activity. The fair values of most OTC derivatives, including interest rate and cross currency swaps, currency forward contracts, commodity swaps, commodity forward contracts, and single name credit default swaps on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models' key assumptions include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yields, non-performance risk and volatility, and are classified as Level 2.

OTC derivative contracts are executed under master netting agreements with counterparties with a Credit Support Annex, or CSA, which is a bilateral ratings-sensitive agreement that requires collateral postings at established credit threshold levels. These agreements protect the interests of the Company and its counterparties, should either party suffer a credit rating deterioration. The vast majority of the Company's derivative agreements are with highly rated major international financial institutions. To reflect the market's perception of its own and the counterparty's non-performance risk, the Company incorporates additional spreads over London Interbank Offered Rate ("LIBOR") into the discount rate used in determining the fair value of OTC derivative assets and liabilities. However, the non-performance risk adjustment is applied only to the uncollateralized portion of the OTC derivative assets and liabilities, after consideration of the impacts of two-way collateral posting. Most OTC derivative contracts have bid and ask prices that are actively quoted or can be readily obtained from external market data providers. The Company's policy is to use mid-market pricing in determining its best estimate of fair value and classify these derivative contracts as Level 2.

Derivatives classified as Level 3 typically include first-to-default credit basket swaps, look-back equity options and other structured products. The fair values of first-to-default credit basket swaps are derived from relevant observable inputs such as: individual credit default spreads, interest rates, recovery rates and unobservable model-specific input values such as correlation between different credits within the same basket. Look-back equity options and other structured options and derivatives are valued using simulation models such as the Monte Carlo technique. The input values for look-back equity options are derived from observable market indices such as interest rates, dividend yields, equity indices as well as unobservable model-specific input values such as certain volatility parameters. Level 3 methodologies are validated through periodic comparison of the Company's fair values to external broker-dealer values.

a. Separate account assets represent segregated funds that are invested for certain customers. Investment risks associated with market value changes are borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Separate account assets classified as Level 3 consist primarily of real estate and real estate investment funds. Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Statements of Admitted Assets, Liabilities and Capital and Surplus.

Transfers into or out of Levels 1 and 2 are generally reported at the value as of the beginning of the quarter in which the transfer occurs. As of December 31, 2013, the transfers into or out of Levels 1 and 2 are disclosed below:

Transfers into or out of Level 1:

D. The Company did not have any assets or liabilities that were not practicable to value at fair value as of December 31, 2013.

Bonds: fixed maturities (excluding NAIC 6 rated Bonds) - The fair values of public fixed maturity securities are generally based on prices from independent pricing services, which are validated by the Company. However, for certain public fixed maturity securities and investments in private placement fixed maturity securities, this information is either not available or not reliable. For these public fixed maturity securities the fair value is based on non-binding quotes from brokers if available, or, determined using a discounted cash flow model or internally developed values. For private fixed maturities fair value is determined using a discounted cash flow model, which utilizes a discount rate based upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions and takes into account, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. In determining the fair value of certain fixed maturity securities, the discounted cash flow model may also use unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the security.

Mortgage Loans - The fair value of mortgage loans on real estate is primarily based upon the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate, adjusted for the current market spread for similar quality loans. The fair value of

NOTES TO FINANCIAL STATEMENTS

commercial mortgage and other loans held by the Company's commercial mortgage operations is based upon various factors, including the terms of the loans, the principal exit markets for the loans, prevailing interest rates, and credit risk.

Contract Loans - The fair value of insurance contract loans is calculated using a discounted cash flow model based upon current U.S. Treasury rates and historical loan repayment patterns. For group corporate- and trust-owned life insurance contracts and group universal life contracts, the fair value of the contract loans is the amount due as of the reporting date.

Policyholder Account Balances & Separate Account Liabilities - Only the portion of policyholder account balances and separate account liabilities related to products that are investment contracts (those without mortality and morbidity risk) are reflected in the table below. For fixed deferred annuities, single premium endowments, payout annuities and other similar contracts without life contingencies, fair values are derived using discounted projected cash flows based on credit ratings that are representative of the Company's financial strength ratings, and hence reflect the Company's own non-performing risk. For guaranteed investment contracts, funding agreements, structured settlements without life contingencies and other similar products, fair values are derived using discounted projected cash flows based on interest rates being offered for similar contracts with maturities consistent with those of the contracts being valued. For those balances that can be withdrawn by the customer at any time without prior notice or penalty, the fair value is the amount estimated to be payable to the customer as of the reporting date, which is generally the carrying value. For defined contribution and defined benefit contracts and certain other products the fair value is the market value of the assets supporting the liabilities.

Notes Payable and Other Borrowing - The fair value of debt is generally determined by either prices obtained from independent pricing services, which are validated by the Company, or discounted cash flow models. Discounted cash flow models predominately use market observable inputs such as the borrowing rates currently available to the Company for debt and financial instruments with similar terms and remaining maturities. For commercial paper issuances and other debt with a maturity of less than 90 days, the carrying value approximates fair value.

Other Invested Assets - The estimated fair value of other invested assets is determined using the methodologies as described above for bonds, mortgage loans or short-term investments, based on the nature of the investment.

Claim reserves for Group Long Term Disability contained in Exhibit 6 are discounted at interest rates ranging from 3.0% to 6.75%. For non-buyout claims, the interest rate is based on the date of disability. For buyout claims, the interest rate is based on the effective date of the buyout. Group Long Term Disability reserves are calculated using the 1987 CGDT Table modified with the Pru Basic 2007 Claim Termination Table.

Reserves for Single Premium policies contained in Exhibit 6 are discounted using a seriatim reserve calculation using 1994 GAM with projection and a valuation rate of 3.0%.

Individual Long Term Care active life reserves are one-year full preliminary term reserves based on Milliman USA Guidelines for LTC Claims Cost for morbidity, 1983 GAM for older products and 1994 GAM for the new generation product and interest rates ranging from 3.5% to 4.5% depending on the effective date of coverage of each participant.

Group Long Term Care active life reserves are one-year full preliminary term reserves based on Milliman USA Guidelines for LTC Claims Cost for morbidity, 1983 GAM mortality for older products and 1994 GAM for the new generation products and interest rates ranging from 3.5% to 5.5% depending on the disablement date of claim for each claimant.

Individual and Group Long Term Care claim reserves represent the present value of benefits payable to insureds in benefit status using claim termination rates based on the 1985 National Nursing Home Study and interest rates ranging from 3.5% to 4.5% depending on the disablement date claim for each claimant.

On January 2, 2013, the Company acquired The Hartford's individual life insurance business through a reinsurance transaction. Under the agreement, the Company paid The Hartford cash consideration of $615 million, primarily in the form of a ceding commission to provide reinsurance for approximately 700,000 life insurance policies with a net retained face amount in force of approximately $141 billion. This acquisition increases the Company's scale in the U.S. individual life insurance market, particularly universal life products, and provides complementary distribution opportunities through expanded wirehouse and bank distribution channels.

The Company received a $712 million capital contribution in the first quarter of 2013 from its parent company, Prudential Holdings, LLC, representing funding for the Company's acquisition of the Hartford's individual life insurance business.

NOTES TO FINANCIAL STATEMENTS

In connection with this transaction, the Company assumed $8.4 billion of assets from The Hartford under coinsurance and modified coinsurance agreements. The Company retroceded to its subsidiary, Pruco Life Insurance Company, the portion of the assumed business that is classified as guaranteed universal life insurance ("GUL") with account values of approximately $4 billion as of January 2, 2013. Pruco Life Insurance Company then retroceded all of the GUL policies to an affiliated captive reinsurance company.

In connection with disputes arising out of the Chapter 11 bankruptcy petition filed by Lehman Brothers Holdings Inc., the Company, through its subsidiary, Pru Global Funding, LLC. ("PGF"), previously recorded losses related to a portion of its counterparty exposure on derivative transactions it had previously held with Lehman Brothers and its affiliates. In 2013, the Company, through PGF, recorded a $146 million estimated recovery related to this matter, which is recorded within "change in net unrealized capital gains (losses)" in the Company's Summary of Operations.

On June 1, 2012, the Company announced the signing of an agreement with General Motors Co., pursuant to which the Company would assume certain of its pension benefit obligations to U.S. salaried retiree plan participants and beneficiaries that are covered by the agreement. At closing on November 1, 2012, the Company issued a non-participating group annuity contract to the General Motors Salaried Employees Pension Trust, and assumed responsibility for providing specified benefits to certain participants. In addition, on October 17, 2012, the Company signed an agreement with Verizon Communications Inc., pursuant to which the Company will assume certain of its pension benefit obligations to U.S. salaried retiree plan participants and beneficiaries that are covered by the agreement. At closing on December 10, 2012, the Company issued a non-participating group annuity contract to the Verizon Management Pension Plan, and assumed responsibility for providing specified benefits to certain participants. These pension risk transfer transactions significantly expand the size of the Company's existing payout annuity business.

In July 2012, the Company announced our decision to cease sales of group long-term care insurance reflecting the challenging economics of the long-term care market including the continued low interest rate environment as well as our desire to focus our resources on our core group life and disability businesses. In March 2012, the Company also discontinued sales of our individual long-term care products. As a result of our decision to wind down this business, the Company has reflected the results of the long-term care insurance business, previously reported within the Group Insurance segment, as a divested business for all periods presented.

On March 30, 2012, the Company sold, in a Rule 144A private placement, $1 billion aggregate principal amount of 2.997% notes maturing on September 30, 2015. The notes are secured by the assets of a trust, consisting of approximately $2.8 billion aggregate principal balance of residential mortgage-backed securities deposited into the trust by the Company. Payments of interest and principal on the notes will be made only to the extent of funds available to the trust in accordance with a priority of payments set forth in the indenture governing the notes. PFI guaranteed to the holders of the notes the timely payment of all principal and interest due on the notes and any "make-whole payments" that may become due as a result of the payment of principal on the notes prior to its scheduled payment date. The deposit of the residential mortgage-backed securities into the trust by the Company did not result in recognition of a gain or loss on the securities, or de-recognition of the securities from the balance sheet, under statutory accounting principles or U.S. GAAP.

In the third quarter of 2011, the Company established a reinsurance arrangement with a captive reinsurance subsidiary, Prudential New Jersey Captive Insurance Company ("NJCAP"), domiciled in New Jersey, whereby the New Jersey captive reinsures 90% of the short-term risks of the Company's Closed Block Business. These short-term risks represent the impact of variations in experience of the Closed Block that are expected to be recovered over time as a result of corresponding adjustments to policyholder dividends. The reinsurance arrangement is intended to alleviate the short-term statutory surplus volatility within the Company resulting from the Closed Block Business, including volatility caused by the impact of any unrealized mark-to-market losses and realized credit losses within the investment portfolio of the Closed Block.

In connection with the Closed Block reinsurance arrangement, NJCAP entered into a $2 billion letter of credit facility with certain financial institutions, pursuant to which NJCAP can obtain a letter of credit during an availability period expiring in October 2015 to support its funding obligations under the reinsurance arrangement. PFI guarantees all obligations of NJCAP under the facility, including its obligation to reimburse any draws made under the letter of credit. Because experience of the Closed Block is ultimately passed along to policyholders over time through the annual policyholder dividend, the Company believes that the likelihood of any draw under the letter of credit is unlikely. NJCAP's ability to obtain a letter of credit under the facility is subject to the continued satisfaction of customary conditions, including the maintenance at all times by the Company of total adjusted capital of at least $5.5 billion based on statutory accounting principles prescribed under New Jersey law and PFI's maintenance of consolidated net worth, relating to its Financial Services Businesses only, of at least $18.985 billion, based on U.S. GAAP equity but excluding "Accumulated other comprehensive income (loss)" and excluding equity of noncontrolling interests". As of December 31, 2013, the Company's total adjusted capital and the consolidated net worth of PFI's Financial Services Businesses exceeded the minimum amounts required under the facility.

The Company has established a dividend trust with an affiliate, The Prudential Bank and Trust FSB, as Trustee. Assets with a par value of $527,612,690 and a market value of $589,326,065 as of December 31, 2013 are being held in this trust. These assets are being used solely to satisfy the liabilities associated with the guarantee of certain minimum amounts of annual and termination dividends ("Minimum Guaranteed Dividends") as declared by the Company's Board of Directors. Any liability associated with this trust is included on Page 3, Line 6.1. The Company may substitute assets held in the trust subject to the terms of the Trust Agreement. The Company may only terminate the Trust Agreement (1) when there is no remaining trust property or (2) upon satisfaction of its obligation to pay each Minimum Guaranteed Dividend which became the subject of the Trust. Assets remaining in the trust under condition (2) above revert to the Company.

As of December 31, 2013 there was $0 of forward commitments not in the nature of derivative instruments included in "Bonds".

The Company had no cash deposits that were held in an escrow account and as such would not have been reported in the financial statements as of December 31, 2013.

The Company elected to use rounding in reporting amounts in the pages, exhibits, and schedules except for a few schedules where truncation was used. The amounts in this statement pertain to the entire Company business including, as appropriate, Separate Account business.

NOTES TO FINANCIAL STATEMENTS

21D. Business Interruption Insurance Recoveries

The Company did not have any business interruption insurance recoveries during 2013 or 2012.

21E. State Transferable and Non-transferable Tax Credits

The Company did not have any state transferable and non-transferable tax credits during 2013 or 2012.

21F. Sub-prime Mortgage Related Risk Exposure

(1) While there is no market standard definition, we define sub-prime mortgages as residential mortgages that are originated to weaker quality obligors as indicated by weaker credit scores, as well as mortgages with higher loan to value ratios, or limited documentation. The slowing U.S. housing market, rising interest rates, and relaxed underwriting standards for some originators of sub-prime mortgages have recently led to higher delinquency rates, particularly for those mortgages issued in 2006 and 2007.

(2) The Company has no direct exposure through investments in subprime mortgage loans.

(3) The Company's exposure to sub-prime mortgage loans is through other investments. The following table sets forth the composition of our asset-backed securities collateralized by sub-prime mortgages as of December 31, 2013.

	Actual Cost	Book/Adjusted Carrying Value	Fair Value	Other Than Temporary Impairment Losses Recognized
a. Residential mortgage-backed securities	$3,148,787,464	$3,147,460,034	$3,048,505,182	$46,579,674
b. Commercial mortgage-backed securities				
c. Collateralized debt obligations				
d. Structured securities				
e. Equity investment in SCAs				
f. Other Assets				
g. Total	$3,148,787,464	$3,147,460,034	$3,048,505,182	$46,579,674

The residential mortgage-backed securities in the table above are rated by nationally recognized rating agencies. In making our investment decisions, we assign internal ratings to our asset-backed securities based upon our dedicated asset-backed securities unit's independent evaluation of the underlying collateral and securitization structure.

(4) The Company has no underwriting exposure to sub-prime mortgage risk through Mortgage Guaranty or Financial Guaranty insurance coverage.

21G. Retained Assets

The Company offers retained asset accounts, called Alliance Accounts (the "Account" or "Accounts"), as a settlement option available to beneficiaries when an insured dies. The beneficiary is provided information at the time of claim about each of various settlement options available and provided the opportunity to select any of the available settlement options. For most products, if the beneficiary does not select a settlement option, they are permitted an Account in most states as provided by applicable state law. The Company generally offers the Accounts for all individual and group life insurance and non-custodial annuity contract beneficiaries when the death benefit proceeds payable are $5,000 or greater.

When an Account is opened the beneficiary receives a book of drafts, similar to a checkbook. The beneficiary owns the account with the Company in full and can access the death benefit proceeds immediately by writing a draft for any amount desired, up to and including the full death benefit.

The Accounts earn interest immediately when established. The interest is accrued daily, compounded daily and credited every month. The interest rate may change without notice, but will not change more often than once a month. Some Accounts may be subject to certain minimum interest rates. The interest rate credited to Accounts may be more or less than the rate the Company earns on the funds. During 2013, interest rates credited to Accounts ranged from .50% to 3.50%. There were no changes to interest rates credited during 2013.

There are no recurring fees for the maintenance or administration of an Account. Fees are only paid for special services such as returned drafts ($10 per draft), stop payment requests ($12 per draft) and draft or statement copy requests ($2 per draft or statement).

Amounts attributable to the Accounts are included in "Liability for deposit–type contracts" on the Statement of Liabilities, Surplus and Other Funds and in "Supplemental Contracts" on Exhibit 7 - "Deposit-type Contracts".

22. EVENTS SUBSEQUENT

Type 1 – Recognized Subsequent Events:

The Company has evaluated recognized subsequent events through March 1, 2014, the date these statutory financial statements were released to the U.S. State insurance regulators. There were no subsequent events to report.

Type 2 – Non recognized Subsequent Events:

Beginning in 2014, the Company will be subject to an annual fee under section 9010 of the Affordable Care Act (“ACA”). This annual fee will be allocated to individual health insurers based on the ratio of the amount of an entity’s net premiums written for health insurance for any U.S. health risk during the preceding calendar year to the aggregate amount of health insurance for any U.S. health risk that is written during the preceding calendar year. For the year-ended December 31, 2013, the Company had health insurance premiums subject to the ACA assessment of $16,971,588. However, because net premiums written in 2013 were less than $25 million, no fee is required. As such, there is no expected impact to risk based capital.

31. RESERVES FOR LIFE CONTRACTS AND DEPOSIT-TYPE CONTRACTS

Life and Annuity Reserves

(1) The reserve for waiver of the deduction of deferred fractional premiums upon death of the insured, and for return of a portion of final premium for periods beyond the date of death is at least as great as that computed using the minimum standards of mortality, interest and valuation method, taking into account the aforementioned treatment of premiums. The Company does not promise surrender values in excess of the legally computed reserves.

(2) Reserves on policies issued at or subsequently subject to a premium for extra mortality or otherwise issued on lives classed as substandard for the plan of contract issued or on special class lives, including paid-up insurance, are reported in Section A of Exhibit 5 according to mortality and interest bases applicable to the respective years of issue. In addition, an extra mortality reserve is held for ordinary life insurance policies classed as group conversions, or otherwise substandard, equal to the excess, if any, over a basic reserve, of a substandard reserve based on mortality rates appropriately increased over the standard class mortality rates. For all other such policies, the extra mortality reserve is one-half the appropriate net additional premium. Weekly premium policies issued at ages higher than true ages are valued according to the higher ages, as are Ordinary second-to-die policies.

(3) As of December 31, 2013, the Company had $4,538,360,815 of insurance in force for which gross premiums for the life insurance benefits are less than the net premiums according to the standard of valuation required by the state.

(4) The Tabular Interest (Page 7, Line 4) has been determined by formula as described in the instructions for Page 7 except for individual unmatured annuities, group universal life insurance and group annuity fund accumulation reserves, for which tabular interest has been determined from the basic data.

The Tabular Less Actual Reserve Released (Page 7, Line 5) has been determined by formula as described in the instructions for Page 7.

The Tabular Cost (Page 7, Line 9) has been determined by formula as described in the instructions for Page 7 except for certain variable and universal life insurance policies for which tabular cost has been determined from the basic data for the calculation of policy reserves.

(5) For the determination of Tabular Interest on funds not involving life contingencies for each valuation rate of interest, the tabular interest is calculated as one hundredth of the product of such valuation rate of interest times the mean of the amount of funds subject to such valuation rate of interest held at the beginning and end of the year of valuation.

(6) As of December 31, 2013, the change in reserves due to a change in valuation basis, for life and annuity reserves, was a decrease of $7,128,537, which was due to the following:
