NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1A. Accounting Practices

The Prudential Insurance Company of America (the "Company" or "PICA"), domiciled in the state of New Jersey, prepares its statutory financial statements in accordance with accounting practices prescribed or permitted by the New Jersey Department of Banking and Insurance (the "Department"). Prescribed statutory accounting practices ("SAP") include publications of the National Association of Insurance Commissioners ("NAIC"), state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed, by the Department.

The Company records leasehold improvements as admitted assets. New Jersey law allows insurance companies domiciled in New Jersey to admit leasehold improvements as admitted assets. NAIC statutory accounting practices require non-admittance of leasehold improvements.

In 2004, one of the Company's insurance subsidiaries, Prudential Retirement and Annuity Company (PRIAC), received approval from its domiciliary insurance department (Connecticut) to record a deferred gain associated with an assumption reinsurance agreements between Connecticut General Life Insurance Company and PRIAC in the Interest Maintenance Reserve ("IMR") and to amortize the deferred gain in a manner consistent with those relevant annual statement instructions. Had the deferred gains been established as a liability limited to an amortization period of 10 years in accordance with the guidance of SSAP No.61, "Life, Deposit-Type and Accident and Health Reinsurance" ("SSAP No.61"), and not included in the IMR, it would have created a material distortion in the analysis of the adequacy of statutory reserves conducted annually by PRIAC's Appointed Actuary. Therefore, the permitted practice for this PICA subsidiary impacts its carrying value on PICA's balance sheet as indicated in the reconciliation below.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the Department is shown below:

	12/31/2014	12/31/2013

Statutory Surplus, New Jersey state basis	$10,330,977,148	$9,382,581,507
State Prescribed Practices (Surplus)		
Non-admit leasehold improvements	($29,260,004)	($32,542,612)
State Permitted Practices (Surplus)	0	0
Deferred gain amortization in insurance subsidiary	90,299,613	97,993,389
Statutory Surplus, NAIC SAP	$10,392,016,757	$9,448,032,284

1B. Use of Estimates

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

The most significant estimates include those used in determining measurement of any related impairment; valuation of investments including derivatives (in the absence of quoted market values) and the recognition of other-than-temporary impairments; aggregate reserves for life, accident, and health contracts including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; and goodwill; and reserves for contingent liabilities, including reserves for losses in connection with unresolved legal matters.

1C. Accounting Policy

In addition, the Company uses the following accounting policies:

1) Cash includes cash on deposit and cash equivalents. Cash equivalents are short-term, highly liquid investments, with original maturities of three months or less, that are both readily convertible to known amounts of cash and so near their maturity that they represent insignificant risk of changes in value because of changes in interest rates.

   Short-term investments primarily consist of money market funds and highly liquid debt instruments with a remaining maturity of twelve months or less and greater than three months when purchased. They are stated at amortized cost, which approximates fair value.

2) Bonds, which consist of long-term bonds, are stated primarily at amortized cost in accordance with the valuation prescribed by the Department and the NAIC. Bonds rated by the NAIC are classified into six categories ranging from highest quality bonds to those in or near default. Bonds rated in the top five categories are generally valued at amortized cost while bonds rated at the lowest category are valued at lower of amortized cost or fair market value. The Company follows both the prospective and retrospective methods for amortizing bond premium and discount. See below for additional disclosure regarding the prospective vs. retrospective methods. Both methods require the recalculation of the effective yield at each reporting date if there has been a change in the underlying assumptions. For the prospective method, the recalculated yield will equate the carrying amount of the investment to the present value of the anticipated future cash flows. The recalculated yield is then used to accrue income on the investment balance for subsequent accounting periods. There are no accounting changes in the current period unless the undiscounted anticipated cash flow is less than the carrying amount of the investment. For the retrospective method, the recalculated yield is the rate that equates the present value of actual and anticipated future cash flows with the original cost of the investment. The current balance of the investment is increased or decreased to the amount that would have

NOTES TO FINANCIAL STATEMENTS

resulted had the revised yield been applied since inception and investment income is correspondingly decreased or increased. For other than temporary impairments, the cost basis of the bond excluding loan-backed and structured securities is written down to fair market value as a new cost basis and the amount of the write down is accounted for as a realized loss.

3) Common stocks include unaffiliated common stocks and investments in subsidiaries. See (7) below for information related to investments in subsidiaries. Unaffiliated common stocks are carried at fair value. Dividends are recognized in net investment income when earned.

4) Preferred stocks include unaffiliated preferred stocks and investments in subsidiaries. Preferred stocks rated by the NAIC are classified into six categories ranging from highest quality preferred stocks to those in or near default. Preferred stocks rated in the top three categories are generally valued at amortized cost while preferred stocks rated in the lower three categories are generally valued at lower of amortized cost or fair value. For other-than-temporary impairments, the cost basis of the preferred stock is written down to fair market value as a new cost basis and the amount of the write down is recorded for as a realized loss.

5) Mortgage loans on real estate are stated primarily at unpaid principal balances, net of unamortized premiums and discounts and impairments. Impaired loans are identified by management as loans when it is considered probable that all amounts due according to the contractual terms of the loan agreement will not be collected. These loans are recorded based on the fair value of the collateral less estimated costs to obtain and sell or a discounted cash flow model. The difference between the net value of the collateral and the recorded investment in the mortgage loan is recognized as an impairment by creating a valuation allowance with a corresponding charge to unrealized loss or by adjusting an existing valuation allowance for the impaired loan with a corresponding charge or credit to unrealized gain or loss. Other than temporary impairments are then recognized as a realized loss in net income.

   Interest received on impaired loans, including loans that were previously modified in a troubled debt restructuring, is generally either applied against the principal or reported as revenue, according to management's judgment as to the collectability of principal. Management discontinues accruing interest on impaired loans after the loans are 90 days delinquent as to principal or interest, or earlier when management has substantial doubts about collectability. When this interest is deemed uncollectible, it is reversed against interest income on loans for the current period. Generally, a loan is restored to accrual status only after all delinquent interest and principal are brought current and, in the case of loans where interest has been interrupted for a substantial period, a regular payment performance has been established.

6) Loan-backed and structured securities are primarily carried at amortized cost. For loan-backed and structured securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. For high credit quality loan-backed and structured securities (those rated AA or above), cash flows are provided quarterly, and the amortized cost and effective yield of the security are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. The adjustments to amortized cost for those securities rated AA or above are recorded in accordance with the retrospective method. For loan-backed and structured securities rated below AA, the effective yield is adjusted prospectively for any changes in estimated cash flows.

   The NAIC designations for non-agency residential mortgage-backed securities ("RMBS"), including asset-backed securities collateralized by sub-prime mortgages, are based on security level expected losses as modeled by an independent third party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized. The model used in determining NAIC designations was updated at December 31, 2013, and utilized for reporting as of December 31, 2014 and December 31, 2013.

   Similar to the change for RMBS, the NAIC designations for commercial mortgage-backed securities ("CMBS") are based on security level expected losses as modeled by an independent third party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized. The model used in determining NAIC designations was updated at December 31, 2013, and utilized for reporting as of December 31, 2014 and December 31, 2013.

7) Investments in subsidiaries are accounted for using the equity method as defined in SSAP No. 97, Investments in Subsidiary, Controlled and Affiliated Entities ("SCA"), a Replacement of SSAP No. 88 ("SSAP No. 97"). Investments in insurance subsidiaries are recorded based on the underlying audited statutory equity of the respective entity's financial statements, adjusted for unamortized goodwill as provided for in SSAP No. 68, Business Combinations and Goodwill ("SSAP No. 68"). Investments in non-insurance subsidiaries that do not engage in certain transactions or activities, per paragraph 8b ii of SSAP No. 97 are recorded based on audited U.S. GAAP equity of the investee. The subsidiaries' change in net assets, excluding capital contributions and distributions, is included in "Change in net unrealized capital gains (losses)". Dividends or distributions received from the investee are recognized in net investment income when declared to the extent they are not in excess of undistributed accumulated earnings attributed to our investment. The subsidiaries are engaged principally in the business of life insurance and annuities.

8) Other invested assets include primarily the Company's investment in joint ventures, limited liability companies and other forms of partnerships. These investments are accounted for using an equity method as defined in SSAP No. 97. These entities are valued based on the underlying audited U.S. GAAP equity of the investee, or permitted alternatives as defined in SSAP No. 48, "Joint Ventures, Partnerships and Limited Liability Companies," ("SSAP No. 48").

9) Derivatives used by the Company include swaps, futures, forwards, and options and may be exchange-traded or contracted in the over-the-counter market. Derivatives are recorded at fair value either as assets, within "Derivatives," or as liabilities, surplus and other funds within "Derivatives" at their estimated fair value. To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship.

(10) The Company considers anticipated investment income when calculating its premium deficiency reserves in accordance with SSAP No. 54, "Individual and Group Accident and Health Contracts" ("SSAP No. 54").

(11) Accident and health reserves represent the estimated value of the future payments, adjusted for contingencies and interest. The remaining reserves for active life reserves and unearned premiums are valued using the preliminary term method, gross premium valuation method, or a pro rata portion of gross premiums. Reserves are also held for amounts not yet due on hospital benefits and other coverages.

(12) The Company has not modified its capitalization policy from the prior period.

NOTES TO FINANCIAL STATEMENTS

(13) The Company does not have any pharmaceutical rebates receivable.

(14) Repurchase agreements and reverse repurchase agreements are agreements between a seller and a buyer, whereby the seller of securities sells and simultaneously agrees to repurchase the same or substantially the same securities from the buyer at an agreed upon price and, usually, at a stated date. Repurchase agreements (securities sold under agreements to repurchase) are generally accounted as secured borrowings. The assets transferred are not removed from the balance sheet, the cash collateral received is invested and reported on balance sheet and accounted for based on the type of investment. An offsetting liability is reported in “Aggregate write-ins for liabilities”. For reverse repurchase agreements (securities purchased under agreements to resell), an asset is recorded in “Cash, cash equivalents, and short term” to reflect the receivable from the counterparty. Dollar repurchase agreements and reverse dollar repurchase agreements involve debt instruments that are pay-through securities collateralized with GNMA, FNMA and FHLMC and similar securities. The Company typically uses "to be announced" ("TBAs") securities in the dollar repurchase and reverse dollar repurchase agreements which are accounted for as derivatives. Dollar repurchase and reverse dollar repurchase agreements are reported in "Aggregate write-ins for invested assets" with the change in value reported as "Change in net unrealized capital gains". "Net realized capital gains (losses)" are recorded upon termination of the agreements.

(15) Securities lending transactions are transactions where the Company loans securities to a third party, primarily large brokerage firms. These transactions are accounted for as secured borrowings. Cash collateral received is invested and reported on the balance sheet and accounted for based on the type of investment. An offsetting liability is reported in “Payable for securities lending”.

(16) Contract loans are stated at unpaid principal balances.

(17) Net realized capital gains/(losses) are computed using the specific identification method. Net realized investment gains and losses are generated from numerous sources, including the sale of bonds, stocks, other type of investments, as well as adjustments to the cost basis of investments for other-than-temporary impairments. Realized investment gains and losses are also generated from, the termination of derivatives that do not qualify for hedge accounting. In addition, when realized gains or losses on interest-rate related derivatives are recognized, they are amortized through the IMR. Amortized cost of investments is adjusted for impairments considered other than temporary. All bonds, preferred stocks and common stocks with unrealized losses are subject to review to identify other-than-temporary impairments in value. Under SAP, several factors must be considered to determine whether a decline in value of a security is other than temporary, including:

a) the reasons for the decline in value (credit event, currency or interest related, including general spread widening);
b) a company’s ability and intent to hold its investment for a period of time to allow for recovery of value;
c) a company’s intent to sell its investment before recovery of the cost of the investment;
d) the financial condition of and near-term prospects of the issuer; and
e) for stocks, the extent and duration of the decline.

For stocks, when it is determined that there is an other-than-temporary impairment, the Company records a write down in the Statement of Operations and Changes in Capital and Surplus within "Net Realized Capital Gains (Losses)" to the estimated fair value, which reduces the cost basis. The new cost basis of an impaired security is not adjusted for subsequent increases in the estimated fair value. Estimated fair values for publicly traded common stock are based on quoted market prices or prices obtained from independent pricing services. Estimated fair values for privately traded common stock are determined using valuation and discounted cash flow models that require a substantial level of judgment.

For bonds, excluding loan-backed and structured securities, when it is determined that there is an other-than-temporary impairment, the Company records a write down to the estimated fair value of the bond, which reduces its amortized cost. Credit event related impairments are recorded in the Statement of Operations and Changes in Surplus within "Net Realized Capital Gains" and applied to the AVR, and interest related impairments are directly applied to the IMR, on a post tax basis. The AVR is used to stabilize surplus from fluctuations in the market value of bonds, stocks, mortgage loans, real estate, limited partnerships and other investments. Changes in the AVR are accounted for as direct increases or decreases in surplus. The IMR captures interest related realized gains and losses on sales (net of taxes) of bonds, preferred stocks, mortgage loans, interest related other-than-temporary impairments (net of taxes) and realized gains or losses (net of taxes) on terminated interest rate related derivatives, which are amortized into net income over the expected years to maturity of the investments sold or the item being hedged by the derivative using the grouped method.

The new cost basis of an impaired bond is not adjusted for subsequent increases in estimated fair value. Estimated fair values for bonds, other than private placement bonds, are generally based on quoted market prices or prices obtained from independent pricing services. Estimated fair values for private placement bonds are typically determined primarily by using a discounted cash flow model, which relies upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions and takes into account, among other factors, the credit quality of the issuer and the reduced liquidity associated with private placements. In determining the fair value of certain securities, including those that are distressed, the discounted cash flow model may also use unobservable inputs, which reflect management’s own assumptions about the inputs market participants would use in pricing the asset.

For loan-backed and structured securities, when an other-than-temporary impairment has occurred because the entity does not expect to recover the entire amortized cost basis of the security, even if the entity has no intent to sell and the entity has the intent and ability to hold to recovery, the amount of the other-than-temporary impairment recognized as a realized loss shall equal the difference between the investment's amortized cost basis and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate. Credit event related impairments are recorded in the Statement of Operations and Changes in Surplus within "Net Realized Capital Gains" and applied to the AVR, and interest related impairments are directly applied to the IMR, on a post tax basis. Additionally, the amortized cost of the security, less the other-than-temporary impairment recognized as a realized loss, shall become the new amortized cost basis of the investment. When the entity has the intent to sell or cannot assert ability and intent to hold to recovery, the security is impaired to its fair value basis.

(18) Separate account assets and liabilities are generally reported at estimated fair value and represent segregated funds, which are invested for certain policyholders, pension funds and other customers. However, there are some separate account assets and liabilities that support products with guarantees and are carried at the same basis as the general account. The assets consist primarily of common stocks, long-term bonds, real estate, mortgages and short-term investments. The assets of each account are legally segregated and are not subject to claims that arise out of any other business of the Company. The liabilities include reserves established to meet withdrawal and future benefit payment contractual provisions. Investment risks associated with

NOTES TO FINANCIAL STATEMENTS

fair value changes are generally borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Mortality, policy administration and surrender charges on the accounts are included in "Miscellaneous income."

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

The State of New Jersey requires that insurance companies domiciled in the State of New Jersey prepare their statutory basis financial statements in accordance with the NAIC Accounting Practices and Procedures manual (the "Manual"), subject to any deviations prescribed or permitted by the Department.

Accounting changes adopted to conform to the provisions of the Manual are reported as changes in accounting principles. The cumulative effect of changes in accounting principles is reported as an adjustment to unassigned funds (surplus) in the period of the change in accounting principle. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all prior periods.

The Company has assessed the non-insurance entities subject to SSAP No. 97, and, based upon the amount of capital that these entities represent and the Company's strong capital position, the Company has decided not to obtain GAAP audits for 17 entities as of December 31, 2014 The Company has therefore valued these entities for purposes of its financial statements at zero. At the end of future fiscal years, the Company may decide to obtain U.S. GAAP audits for entities subject to SSAP No. 97 and thereby restore their equity value for purposes of inclusion in capital and surplus.

Effective January 1, 2013, the NAIC adopted SSAP No. 92, "Accounting for Postretirement Benefits Other Than Pensions, A Replacement of SSAP No. 14", ("SSAP No. 92") and SSAP No. 102, "Accounting for Pensions, A Replacement of SSAP No. 89" ("SSAP No. 102"). The disclosures required by SSAP No. 92 and SSAP No. 102 are included in footnote 12. The cumulative impact of adopting these pronouncements was a $236 million charge to surplus as of January 1, 2013, which is reflected through the Summary of Operations line 49, (Cumulative effect of changes in accounting principles).

Effective December 15, 2013, the NAIC adopted INT 13-03, "Clarification of Surplus Deferral in SSAP No. 92 and SSAP No. 102", which clarified that the transition guidance in SSAP No. 92 and SSAP No. 102, was not intended to result in a more favorable subsequent pension and/or other postemployment benefit (OPEB) surplus position when there are remaining unrecognized liabilities as a result of the reporting entity's initial election for surplus deferral. For any reductions in the benefit obligation due to settlement, curtailment, or plan amendments, as well as net benefit obligation gains due to revisions in assumptions (e.g., discount rates), plan experience differing from assumptions, or actual asset gains exceeding expected returns, a corresponding amount of the deferred surplus liability will be recognized. Additionally, the deferred surplus liability must be recognized to the extent the plan reflects a prepaid cost.

Effective January 1, 2013, the NAIC adopted SSAP No. 103, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", which superseded SSAP No. 91R, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities". The new pronouncement enhances the information that must be provided regarding security lending, repurchase agreements, and activity related to the transfer and servicing of financial assets.

In March, 2014, the NAIC adopted INT 13-04, "Accounting for the Risk Sharing Provisions of the Affordable Care Act". The Affordable Care Act ("ACA") imposes fee and premium stabilization provisions on health insurers that offer commercial health insurance. INT 13-04 recommends accounting guidance for three programs known as risk adjustment, reinsurance, and risk corridors that take effect in 2014. The risk adjustment program, which impacts premium adjustments and user fees, will be accounted for in accordance with the guidance in SSAP No. 54 and SSAP No. 35R, "Revised-Guaranty Fund and Other Assessments", respectively. The reinsurance program, which includes characteristics of traditional reinsurance, involuntary pools, and government assessments, will be accounted for using provisions of both SSAP No. 61, "Revised-Life, Deposit-Type and Accident and Health Reinsurance", and SSAP No. 63, "Underwriting Pools and Associations, Including Intercompany Pools". Finally, the risk corridors program will be accounted for in accordance with SSAP No. 66, "Retrospectively Rated Contracts". The Company does not offer commercial health insurance so it is not impacted by the risk sharing programs of ACA.

In the first quarter of 2014, the Company determined that accrued federal income taxes and deferred taxes were incorrectly reported as of December 31, 2013 in the 2013 annual statement. A $5.8 million correction related to prior year was recorded through line 53 of the Summary of Operations in the first quarter of 2014. In the second quarter of 2014, the Company determined that it overstated its IMR liability in 2013. During the second quarter of 2014, the IMR liability was reduced and a $12.4 million adjustment was recorded to line 53. Together, these two adjustments totaling $18.2 million are recorded on line 5302, "Aggregate write-ins for gains and losses to surplus – Correction related to prior year" in the Summary of Operations.

3. BUSINESS COMBINATIONS AND GOODWILL

3A. Statutory Purchase Method

Goodwill represents the excess of the amounts the Company paid to acquire subsidiaries and other businesses over the fair value of their net assets at the date of acquisition. When indication of impairment exists, management tests goodwill for the impairment based upon estimates of the fair value of the acquired entity to which the goodwill relates and comparing the carrying value of the acquired entity, including the recorded goodwill, to its estimated fair value at that date. Goodwill is considered impaired when the fair value of the investment in the acquired entity is less than the carrying value of the investment, including the recorded goodwill and the decline is considered other-than-temporary. Given changes in facts and circumstances, this test could lead to reductions in goodwill that could have an adverse effect of the Company's financial condition.

In 2013, the Company acquired 80% ownership of Don CeSar Resort Hotel Ltd. from Rosada Grande LLC and Don CeSar Investor LLC. Goodwill from this purchase was $43,721,085 as of December 31, 2014. Amortization was $6,245,869 for the period ended December 31, 2014. In addition, goodwill for the Company's various other investment entities totaled $19,802,725 as of December 31, 2014. Amortization for these entities for the period ended December 31, 2014 was $1,300,898.

b. We conduct asset-based or secured financing within our insurance and other subsidiaries, including transactions such as securities lending, repurchase agreements and mortgage dollar rolls, in order to earn spread income, to borrow funds, or to facilitate trading activity. The collateral received in connection with these programs is primarily used to purchase securities in the short-term spread portfolios of our domestic insurance entities. Investments held in the short-term spread portfolios include cash and cash equivalents, short-term investments and bonds, including mortgage- and asset-backed securities. In addition, $226,105,793 and $259,130,861 at amortized cost and fair value, respectively, of Repurchase Agreement proceeds were reinvested in FNMA pass-through securities. At December 31, 2014, the Company has sufficient assets to cover its secured borrowing liability.

These programs are typically limited to securities in demand that can be loaned at relatively low financing rates. As such, we believe there is unused capacity available through these programs. Holdings of cash and cash equivalent investments in these short-term spread portfolios allow for further flexibility in sizing the portfolio to better match available financing. Current conditions in both the financing and investment markets are continuously monitored in order to appropriately manage the cost of funds, investment spreads, asset/liability duration matching and liquidity.

8. DERIVATIVE INSTRUMENTS

The Company uses derivatives to manage risks from changes in interest rates or foreign currency values, to alter interest rate or currency exposures arising from mismatches between assets and liabilities (including duration mismatches), to hedge against changes in the value of assets it anticipates acquiring and other anticipated transactions and commitments, and to replicate the investment performance of otherwise permissible investments. Insurance statutes restrict the Company's use of derivatives primarily to hedging, income generation,

and replication activities intended to offset changes in the market value and cash flows of assets held, obligations, and anticipated transactions and prohibit the use of derivatives for speculation.

The Company, at inception, may designate derivatives as either (1) a hedge of the fair value of a recognized asset or liability or unrecognized firm commitment; (2) a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability; (3) a foreign-currency fair value or cash flow hedge; (4) a hedge of the foreign currency exposure of a net investment in a foreign operation or (5) a derivative that does not qualify for hedge accounting, including replications.

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship.

Upon termination of a derivative that qualified for hedge accounting, the gain or loss is reflected as an adjustment to the basis of the hedged item and is recognized in income consistent with the hedged item. There were no instances in which the Company discontinued cash flow hedge accounting because the forecasted transaction did not occur. The maximum length of time for which these variable cash flows are hedged is twenty-nine years.

To the extent that the Company chooses not to designate its derivatives for hedge accounting or designated derivatives no longer meet the criteria of an effective hedge, the changes in their fair value are included in “Change in net unrealized capital gains” without considering changes in fair value of the hedged item. Accruals of interest income, expense and related cash flows on swaps are reported in "Net investment income". Upon termination of a derivative that does not qualify for hedge accounting, the gain or loss is included in “Net realized capital gains (losses)”. In addition, when realized gains or losses on interest-rate related derivatives are recognized, they are amortized through the IMR.

Types of Derivative Instruments and Derivative Strategies

Derivative instruments used by the Company include currency swaps, interest rate swaps, total return swaps, treasury futures, equity futures, equity options, currency options, rights and warrants, credit default swaps, “to be announced” (“TBA”) forwards and currency forwards. For those hedge transactions which qualify for hedge accounting, the change in the carrying value or cash flow of the derivative is recorded in a manner consistent with the changes in the carrying value or cash flow of the hedged asset, liability, firm commitment or forecasted transaction. For hedges of net investments in a foreign operation, changes in fair value of such derivatives, to the extent effective, are recorded in “Change in net unrealized capital gains”. In measuring effectiveness, no component of the derivative’s gain or loss is excluded. The Company does not have any cash flow hedges of forecasted transactions other than those related to the payment of variable cash flows on existing financial instruments.

Interest Rate Contracts

Interest rate swaps and futures are used by the Company to reduce risks from changes in interest rates, manage interest rate exposures arising from mismatches between assets and liabilities (including duration mismatches) and to hedge against changes in the value of assets it owns or anticipates acquiring or selling. Swaps may be attributed to specific assets or liabilities or may be used on a portfolio basis. Under interest rate swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed upon notional principal amount.

In exchange-traded interest rate futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the values of underlying referenced investments, and posts variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The Company enters into exchange-traded futures with regulated futures commission’s merchants who are members of a trading exchange.

Equity Contracts

Total return swaps are contracts whereby the Company agrees with counterparties to exchange, at specified intervals, the difference between the return on an asset (or market index) and LIBOR based on a notional amount. The Company generally uses total return swaps to hedge the effect of adverse changes in equity indices. These derivatives do not qualify for hedge accounting.

Equity index options are contracts which will settle in cash based on differentials in the underlying indices at the time of exercise and the strike price. The Company uses combinations of purchases and sales of equity index options to hedge the effects of adverse changes in equity indices within a predetermined range. These equity options do not qualify for hedge accounting.

Foreign Exchange Contracts

Currency derivatives, including currency futures, options, forwards, and swaps, are used by the Company to reduce risks from changes in currency exchange rates with respect to investments denominated in foreign currencies that the Company either holds or intends to acquire or sell, and to hedge the currency risk associated with net investments in foreign operations and anticipated earnings of its foreign operations.

Under currency forwards, the Company agrees with counterparties to deliver a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. As noted above, the Company uses currency forwards to mitigate the impact of changes in currency exchange rates on U.S. dollar equivalent earnings generated by certain of its non-U.S. businesses, primarily its international insurance and investments operations. The Company executes forward sales of the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these forwards correspond with the future periods in which the non-U.S. dollar-denominated earnings are expected to be generated. These earnings hedges do not qualify for hedge accounting.

Under currency swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between one currency and another at an exchange rate and calculated by reference to an agreed principal amount. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party

Credit Contracts

Credit default swaps are used by the Company in conjunction with fixed income investments as replication synthetic asset transactions (“RSAT”). RSATs are derivative transactions entered into in conjunction with other investments in order to produce the investment characteristics of otherwise permissible investments. Credit default swaps used in RSATs are carried at amortized cost with premiums received on such transactions recorded to “Net investment income” over the life of the contract and loss payouts, if any, are recorded as

NOTES TO FINANCIAL STATEMENTS

"Net realized capital gains/(losses)". The Company also uses credit default swaps to hedge exposures in its investment portfolios. Such contracts are not designated as replications, and they are used in relationships that do not qualify for hedge accounting.

Other Contracts

TBAs. The Company uses TBA forward contracts to gain exposure to the investment risk and return of mortgage-backed securities. TBA transactions can help the Company enhance the return on its investment portfolio, and can provide a more liquid and cost effective method of achieving these goals than purchasing or selling individual mortgage-backed pools. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at a specified future date. Additionally, pursuant to the Company's mortgage dollar roll program, TBAs or mortgage-backed securities are transferred to counterparties with a corresponding agreement to repurchase them at a future date. These transactions do not qualify as secured borrowings and are accounted for as derivatives.

The Company is exposed to credit-related losses in the event of nonperformance by counterparties to financial derivative transactions. Generally, the credit exposure of the Company's OTC derivative transactions are represented by the contracts with a positive fair value (market value) at the reporting date after taking into consideration the existence of netting agreements. Also, the Company enters into exchange-traded futures and transactions through regulated exchanges and these transactions are settled on a daily basis, thereby reducing credit risk exposure in the event of non-performance by counterparties to such financial instruments.

Substantially all of the Company's OTC derivative contracts are transacted with a subsidiary. In instances where the Company transacts with unaffiliated counterparties, the Company manages credit risk by entering into derivative transactions with major international financial institutions and other creditworthy counterparties, and by obtaining collateral where appropriate. Additionally, limits are set on single party credit exposures which are subject to periodic management review.

Internal controls are in place to ensure that derivative transactions are conducted in accordance with Company policy and guidelines. Those controls include limits, segregation of functions and periodic management review, including quarterly review of exposures by the Investment Committee of the Board of Directors, as well as monitoring for compliance with authorization and operating guidelines.

9. INCOME TAXES

The application of SSAP No. 101 requires a company to evaluate the recoverability of deferred tax assets and to establish a valuation allowance if necessary to reduce the deferred tax asset to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the company considers many factors, including: (1) the nature of the deferred tax assets and liabilities; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carry back years as well as projected taxable earnings, exclusive of reversing temporary differences and carry forwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the deferred tax assets; and, (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although the realization is not assured, management believes it is more likely than not that the deferred tax assets, net of valuation allowances, will be realized. The Company has not recorded a valuation allowance as of December 31, 2014 and December 31, 2013.

11B. FHLB Funding Agreements

(1) Prudential Insurance is a member of the Federal Home Loan Bank of New York (“FHLBNY’). Membership allows Prudential Insurance access to the FHLBNY’s financial services, including the ability to obtain collateralized loans and to issue collateralized funding agreements. Under applicable law, the funding agreements issued to the FHLBNY have priority claim status above debt holders of Prudential Insurance. FHLBNY borrowings and funding agreements are collateralized by qualifying mortgage-related assets or U.S. Treasury securities, the fair value of which must be maintained at certain specified levels relative to outstanding borrowings. FHLBNY membership requires Prudential Insurance to own member stock and borrowings require the purchase of activity-based stock in an amount equal to 4.5% of outstanding borrowings. Under FHLBNY guidelines, if Prudential Insurance’s financial strength ratings decline below A/A2/A Stable by S&P/Moody’s/Fitch, respectively, and the FHLBNY does not receive

NOTES TO FINANCIAL STATEMENTS

written assurances from the NJDOBI regarding Prudential Insurance's solvency, new borrowings from the FHLBNY would be limited to a term of 90 days or less. Currently there are no restrictions on the term of borrowings from the FHLBNY.

NJDOBI permits Prudential Insurance to pledge collateral to the FHLBNY in an amount of up to 5% of its prior year-end statutory net admitted assets, excluding separate account assets. As of December 31, 2014, the 5% limitation equates to a maximum amount of pledged assets of $8,559,961,408 and an estimated maximum borrowing capacity (after taking into account required collateralization levels) of approximately $7,158,661,431 of which $2,225,000,000 was outstanding. In 2015, based on statutory net admitted assets as of December 31, 2014, the 5% limitation will equate to a maximum amount of pledged assets of $9,071,232,176. Nevertheless, FHLBNY borrowings are subject to the FHLBNY's discretion and to the availability of qualifying assets at Prudential Insurance.

As of December 31, 2014, Prudential Insurance had pledged assets with a fair value of $2,750,461,055 supporting aggregate outstanding collateralized advances and collateralized funding agreements. As of December 31, 2014, an outstanding advance of $280,000,000 is in "Long-term debt" and matures in December 2015 and outstanding funding agreements, totaling $1,945,000,000 are included in "Policyholders' account balances." The fair value of qualifying assets that were available to Prudential Insurance but not pledged amounted to $4,070,057,961 as of December 31, 2014.

NOTES TO FINANCIAL STATEMENTS

12. RETIREMENT PLANS, DEFERRED COMPENSATION, POSTEMPLOYMENT BENEFITS AND COMPENSATED ABSENCES AND OTHER POSTRETIREMENT PLANS

A. The Company has funded non-contributory defined benefit pension plans, which cover substantially all of its employees. The Company also has several non-funded, non-contributory defined benefit plans covering certain executives. For some employees, benefits are based on final average earnings and length of service, while benefits for other employees are based on an account balance that takes into consideration age, service and salary during their careers.

The Company provides certain life insurance and health care benefits ("Other postretirement benefits") for its retired employees, their beneficiaries and covered dependents. The healthcare plan is contributory, the life insurance plan is non-contributory. Substantially all of the Company's employees may become eligible to receive benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service. These benefits are funded as considered necessary by Company management.

The Company updated its mortality assumption as of December 31, 2014 with respect to its measure of its domestic pension and post-retirement obligations as a result of a review of plan experience following the Society of Actuaries (SOA) final issuance in October 2014 of a study of rates of mortality and expected future improvement in mortality rates for U.S. participants.

The Company's evaluation resulted in an increase in its domestic obligations for pensions and post-retirement of $452,397,517 or 4.9% and $124,426,809 or 6.3%, respectively. The offset to these benefit obligation increases was recorded in unassigned funds (surplus) as of December 31, 2014. The mortality assumption update will result in an increase in future benefit cost in 2015 of $75,600,000 and $15,400,000 for the pension and postretirement plans, respectively. The 2015 cost increases included additional amortization of actuarial losses for pension and post-retirement of $50,600,000 and $9,300,000, respectively.

As a result of this mortality assumption change, future benefit payments are expected to increase and based upon the specific funding method for a given benefit plan, will be sourced primarily from existing plan assets or via employer contributions. The increases in the undiscounted expected cash outflows underlying the domestic benefit obligations are distributed whereby 8% occurs in the next ten years from December 31, 2014, 23% in the next ten year band and 68% in the remaining future years.

The domestic obligations will increase further if actual mortality improvements are better than the assumption used. A 25% increase in the improvement scale would increase the domestic obligations by approximately $115,000,000 at December 31, 2014.

On January 1, 2013, the Company adopted SSAP No. 102, "Accounting for Pensions, A Replacement of SSAP No. 89," and SSAP No. 92, "Accounting for Postretirement Benefits Other Than Pensions, A Replacement of SSAP No. 14". The adoption caused a change in measurement date from September 30 to December 31, as well as other changes effecting the obligations of the plans. The impact of all these changes on 2013 activity is disclosed as follows: Line 12A (1)a.9 reflects $55,526,166 and ($4,702,479) for pension overfunded and pension underfunded, respectively. Line 12A (1)b.9 reflects ($109,677,748) for postretirement underfunded. Line 12A (2)g reflects $23,042,927 and ($21,131,133) for pension and postretirement, respectively.

On December 6, 2013, the Company transferred $340,000,000 of assets within the qualified pension plan under Section 420 of the Internal Revenue Code from assets supporting pension benefits to assets supporting retiree medical and life benefits. The transfer resulted in a reduction to the prepaid benefit cost for the qualified pension plan and an offsetting decrease in the accrued benefit liability for the post retirement plan. Line 12A (2)g reflects ($340,000,000) and $340,000,000 for pension and postretirement, respectively. The transfer will reduce the future cash contributions required to be made to the postretirement plan.

A summary of asset, obligations, and assumptions of the Pension and Other Postretirement Benefit Plans are as follows:

	2014	2013
Weighted-average assumptions used to determine net periodic benefit cost for the year ending December 31, 2014 and December 31, 2013:		
a. Weighted-average discount rate	4.95%	4.05%
b. Expected long-term rate of return on plan assets	6.25%	6.25%
c. Rate of compensation increase	4.50%	4.50%
Weighted-average assumptions used to determine projected benefit obligations as of December 31, 2014 and December 31, 2013:

e. Rate of compensation increase	4.50%	4.50%

On a weighted-average basis, the following assumptions are used in accounting for the postretirement plans:

The weighted-average assumptions used to determine net periodic benefit cost for the year ending December 31, 2014 and December 31, 2013 are discount rates of 4.75% and 3.85%, respectively and expected long-term rate of return on plan assets of 7.0% and 7.0%, respectively.

	One Percentage Point Increase	One Percentage Point Decrease
a. Effect on total of service and interest costs components	$6,808,874	$5,545,337

B. The plan fiduciaries for the Company's pension and postretirement plans have developed guidelines for asset allocations reflecting a percentage of total assets by asset class, which are reviewed on an annual basis. Asset allocation targets as of December 31, 2014 are as follows:

	Pension Investment Policy Guidelines 2014		Postretirement Investment Policy Guidelines 2014	
	Minimum	**Maximum**	**Minimum**	**Maximum**
Asset category				
U.S. Stocks……	2%	16%	47%	61%
International Stocks……..	2%	16%	2%	10%
Bonds……	54%	69%	1%	38%
Short Term Investments……..	0%	15%	0%	44%
Real Estate……	2%	16%	0%	0%
Other…….	0%	16%	0%	0%

The investment goal of the domestic pension plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds and other investments. The cash requirements of the pension obligation, which include a traditional formula principally representing payments to annuitants and a cash balance formula that allows lump sum payments and annuity payments, are designed to be met by the bonds and short term investments in the portfolio. The pension plan risk management practices include guidelines for asset concentration, credit rating and liquidity. The pension plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

The investment goal of the domestic postretirement plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds, and other investments, while meeting the cash requirements for the postretirement obligation that includes a medical benefit including prescription drugs, a dental benefit, and a life benefit. The postretirement plans risk management practices include guidelines for asset concentration, credit rating, liquidity, and tax efficiency. The postretirement plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

To implement the investment strategy, plan assets are invested in funds that primarily invest in securities that correspond to one of the asset categories under the investment guidelines. However, at any point in time, some of the assets in a fund may be of a different nature than the specified asset category.

Assets held with Prudential Insurance are in either pooled separate accounts or single client separate accounts. Pooled separate accounts hold assets for multiple investors. Each investor owns a "unit of account." Single client separate accounts hold assets for only one investor, the domestic qualified pension plan and each security in the fund is treated as individually owned. Assets held with a bank are either in common/collective trusts or single client trusts. Common or collective trusts hold assets for more than one investor. Each investor owns a "unit of account." Single client trusts hold assets for only one investor, the domestic qualified pension plan and each security in the fund is treated as individually owned.

There were no investments in Prudential Financial Common Stock as of December 31, 2014 and December 31, 2013 for either the pension or postretirement plans.

The authoritative guidance around fair value established a framework for measuring fair value. Fair value is disclosed using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, as described in Note 20.

The following describes the valuation methodologies used for pension and postretirement plans assets measured at fair value.

Insurance Company Pooled Separate Accounts and Common or Collective Trusts – Insurance company pooled separate accounts are invested via group annuity contracts issued by Prudential Insurance. Assets are represented by a "unit of account." The redemption value of those units is based on a per unit value whose value is the result of the accumulated values of underlying investments. The underlying investments are valued in accordance with the corresponding valuation method for the investments held.

Common and Preferred Stock – See Note 20 for a discussion of the valuation methodologies for common and preferred stocks.

Bonds - See Note 20 for a discussion of the valuation methodologies for bonds.

Interest Rate Swaps – See Note 20 for a discussion of the valuation methodologies for derivative instruments.

Guaranteed Investment Contract - The value is based on contract cash flows and available market rates for similar investments.

Registered Investment Companies (Mutual Funds) - Securities are priced at the net asset value ("NAV") of shares.

Unrealized Gain (Loss) on Investment of Securities Lending Collateral - This value is the contractual position relative to the investment of securities lending collateral.

NOTES TO FINANCIAL STATEMENTS

Real Estate - The values are determined through an independent appraisal process. The estimate of fair value is based on three approaches; (1) current cost of reproducing the property less deterioration and functional/economic obsolescence; (2) discounting a series of income streams and reversion at a specific yield or by directly capitalizing a single year income estimate by an appropriate factor; and (3) value indicated by recent sales of comparable properties in the market. Each approach requires the exercise of subjective judgment.

Short-term Investments - Securities are valued initially at cost and thereafter adjusted for amortization of any discount or premium (i.e., amortized cost). Amortized cost approximates fair value.

Partnerships - The value of interests owned in partnerships is based on valuations of the underlying investments that include private placements, structured debt, real estate, equities, fixed maturities, commodities and other investments.

Hedge Funds - The value of interests in hedge funds is based on the underlying investments that include equities, debt and other investments.

Variable Life Insurance Policies – These assets are held in group and individual variable life insurance policies issued by Prudential Insurance. Group policies are invested in Insurance Company Pooled Separate Accounts. Individual policies are invested in Registered Investment Companies (Mutual Funds). The value of interest in these policies is the cash surrender value of the policies based on the underlying investments.

D. The domestic discount rate used to value the pension and postretirement obligations at December 31, 2014 and December 31, 2013 is based upon the value of a portfolio of Aa investments whose cash flows would be available to pay the benefit obligation's cash flows when due. The December 31, 2014 portfolio is selected from a compilation of approximately 740 Aa-rated bonds across the full range of maturities. Since yields can vary widely at each maturity point, the Company generally avoids using the highest and lowest yielding bonds at the maturity points, so as to avoid relying on bonds that might be mispriced or misrated. This refinement process generally results in having a distribution from the 10th to 90th percentile. The Aa portfolio is then selected and, accordingly, its value is a measure of the benefit obligation. A single equivalent discount rate is calculated to equate the value of the Aa portfolio to the cash flows for the benefit obligation. The result is rounded to the nearest 5 basis points and the benefit obligation is recalculated using the rounded discount rate.

The pension and postretirement expected long-term rates of return on plan assets for 2014 were determined based upon an approach that considered an expectation of the allocation of plan assets during the measurement period of 2014. Expected returns are estimated by asset class as noted in the discussion of investment policies and strategies below. Expected returns on asset classes are developed using a building-block approach that is forward looking and are not strictly based upon historical returns. The building blocks for equity returns include inflation, real return, a term premium, an equity risk premium, capital appreciation and the effect of active management, expenses and the effect of rebalancing. The building blocks for fixed maturity returns include inflation, real return, a term premium, credit spread, capital appreciation and the effect of active management, expenses and the effect of rebalancing.

The Company applied the same approach to the determination of the expected long term rate of return in 2015. The expected long term rate of return for 2015 is 6.25% and 7.00% for the pension and postretirement plans, respectively.

E. The Company sponsors voluntary savings plans for employees (401(k) plans). The plans provide for salary reduction contributions by employees and matching contributions by the Company of up to 4% of annual salary for 2014 and 2013. The matching contributions by the Company included in “Other expenses” are $59,860,611 and $57,209,212 for 2014 and 2013 respectively.

The Company is subject to legal and regulatory actions in the ordinary course of its businesses. Pending legal and regulatory actions include proceedings specific to it and proceedings generally applicable to business practices in the industries in which it operates, including in both cases businesses that have either been divested or placed in wind-down status. The Company is subject to class action lawsuits and individual lawsuits involving a variety of issues, including sales practices, underwriting practices, claims payment and procedures, additional premium charges for premiums paid on a periodic basis, denial or delay of benefits, return of premiums or excessive premium charges and breaching fiduciary duties to customers. In its investment-related operations, the Company is subject to litigation involving commercial disputes with counterparties or partners and class action lawsuits and other litigation alleging, among other things, that the Company has made improper or inadequate disclosures in connection with the sale of assets and annuity and investment products or charged excessive or impermissible fees on these products, recommended unsuitable products to customers, mishandled customer accounts or breached fiduciary duties to customers.

The Company is also subject to litigation arising out of its general business activities, such as its investments, contracts, leases and labor and employment relationships, including claims of discrimination and harassment and could be exposed to claims or litigation concerning certain business or process patents. Regulatory authorities from time to time make inquiries and conduct investigations and examinations relating particularly to the Company and its businesses and products. In addition, the Company, along with other participants in the businesses in which it engages, may be subject from time to time to investigations, examinations and inquiries, in some cases industry-wide, concerning issues or matters upon which such regulators have determined to focus. In some of the Company's pending legal and regulatory actions, parties are seeking large and/or indeterminate amounts, including punitive or exemplary damages. The outcome of a litigation or regulatory matter, and the amount or range of potential loss at any particular time, is often inherently uncertain. The following is a summary of certain pending proceedings.

In January 2013, a *qui tam* action on behalf of the State of Florida, *Total Asset Recovery Services v. Met Life Inc., et al., Manulife Financial Corporation, et. al., Prudential Financial, Inc., The Prudential Insurance Company of America, and Prudential Insurance Agency, LLC.,* filed in the Circuit Court of Leon County, Florida, was served on the Company. The complaint alleges that the Company failed to escheat life insurance proceeds to the State of Florida in violation of the Florida False Claims Act and seeks injunctive relief, compensatory damages, civil penalties, treble damages, prejudgment interest, attorneys' fees and costs. In March 2013, the Company filed a motion to dismiss the complaint. In August 2013, the court dismissed the complaint with prejudice. In September 2013, plaintiff filed an appeal with Florida's Circuit Court of the Second Judicial Circuit in Leon County. In September 2014, the Florida District Court of Appeal First District affirmed the trial Court's decision.

In September 2012, the State of West Virginia, through its State Treasurer, filed a lawsuit, *State of West Virginia ex. Rel. John D. Perdue v. Prudential Insurance Company of America*, in the Circuit Court of Putnam County, West Virginia. The complaint alleges violations of the West Virginia Uniform Unclaimed Property Fund Act by failing to properly identify and report all unclaimed insurance policy proceeds which should either be paid to beneficiaries or escheated to West Virginia. The complaint seeks to examine the records of Prudential Insurance to determine compliance with the West Virginia Uniform Unclaimed Property Fund Act, and to assess penalties and costs in an undetermined amount. In October 2012, the State of West Virginia commenced a second action, *State of West Virginia ex. Rel. John D. Perdue v. Pruco Life Insurance Company* making the same allegations stated in the action against the Company. In April 2013, the Company filed motions to dismiss the Complaints in both of the West Virginia actions. In December 2013, the Court granted the Company's motions and dismissed the complaints with prejudice. In January 2014, the State of West Virginia appealed the decisions.

Since April 2012, the Company has filed ten actions seeking to recover damages attributable to investments in residential mortgage-backed securities ("RMBS"). Eight actions were filed in New Jersey state court, captioned *The Prudential Insurance Company of America, et al. v. JP Morgan Chase, et al.; The Prudential Insurance Company of America, et al. v. Morgan Stanley, et al.*; *The Prudential Insurance Company of America, et al. v. Nomura Securities International, Inc., et al.; The Prudential Insurance Company of America, et al. v. Barclays Bank PLC, et al.; The Prudential Insurance Company of America, et al. v. Goldman Sachs & Company, et al.; The Prudential Insurance Company of America, et al. v. RBS Financial Products, Inc., et al.; The Prudential Insurance Company of America, et al. v. Countrywide Financial Corp., et al.;* and *The Prudential Insurance Company of America, et al. v. UBS Securities LLC. et al*. Additionally, two actions were filed in the United States District Court for the District of New Jersey: *The Prudential Insurance Company of America v. Credit Suisse Securities (USA) LLC, et al.* and *The Prudential Insurance Company of America v. Bank of America National Association and Merrill Lynch & Co., Inc., et al*. Among other allegations stemming from the defendants' origination, underwriting and sales of RMBS, the complaints assert claims of common-law fraud, negligent misrepresentation, breaches of the New Jersey Civil RICO statute, and, in some lawsuits, federal securities claims. The complaints seek unspecified damages. Seven of the defendants (*J.P. Morgan, Barclays, Nomura, RBS, Goldman Sachs, Countrywide, and UBS*) removed the lawsuits from New Jersey state court to the United States District Court for the District of New Jersey. The *Countrywide* defendants also made an application to the Judicial Panel on Multi-District Litigation to transfer that case to the United States District Court for the Central District of California. In August 2013, that application was granted. Except for the *Nomura* and *Goldman Sachs* actions, the Company filed motions to remand the lawsuits to New Jersey state court. The *J.P. Morgan, Barclays, RBS and UBS* lawsuits were subsequently remanded to New Jersey state court. Each of the *Goldman Sachs, Morgan Stanley, Nomura, Credit Suisse, Barclays, Bank of America/Merrill Lynch, J.P. Morgan, RBS, UBS,* and *Countrywide* defendants filed motions to dismiss the complaints against them. The motions to dismiss filed in *Goldman Sachs, Morgan Stanley, J.P. Morgan, Credit Suisse,* and *Nomura* have been denied in their entirety. In March 2014, the motion to dismiss filed by *Countrywide* was granted in part by the federal court in California, dismissing the federal securities, successor-liability, fraudulent-transfer, and New Jersey RICO claims, and the court, sua sponte, remanded the remaining claims to New Jersey state court for further consideration. In

The court dismissed with prejudice the negligent representation claim; dismissed without prejudice the New Jersey Civil RICO claim, aiding and abetting claim, and certain aspects of the common-law fraud claim; and permitted the Company 45 days to file an amended complaint. In December 2014, the New York State court actions were dismissed without prejudice upon the Company's request.

In January 2012, a Global Resolution Agreement entered into by the Company and a third party auditor became effective upon its acceptance by the unclaimed property departments of 20 states and jurisdictions. Under the terms of the Global Resolution Agreement, the third party auditor acting on behalf of the signatory states will compare expanded matching criteria to the Social Security Master Death File ("SSMDF") to identify deceased insureds and contract holders where a valid claim has not been made. In February 2012, a Regulatory Settlement Agreement entered into by the Company to resolve a multi-state market conduct examination regarding its adherence to state claim settlement practices became effective upon its acceptance by the insurance departments of 20 states and jurisdictions. The Regulatory Settlement Agreement applies prospectively and requires the Company to adopt and implement additional procedures comparing its records to the SSMDF to identify unclaimed death benefits and prescribes procedures for identifying and locating beneficiaries once deaths are identified. Substantially all other jurisdictions that are not signatories to the Global Resolution Agreement or the Regulatory Settlement Agreement have entered into similar agreements with the Company.

The Company is one of several companies subpoenaed by the New York Attorney General regarding its unclaimed property procedures. Additionally, the New York State Department of Financial Services ("NYDFS") has requested that 172 life insurers (including the Company) provide data to the NYDFS regarding use of the SSMDF. The New York Office of Unclaimed Funds is conducting an audit of the Company's compliance with New York's unclaimed property laws. In February 2012, the Massachusetts Office of the Attorney General requested information regarding the Company's unclaimed property procedures. In December 2013, this matter was closed without prejudice.

From July 2010 to December 2010, four purported nationwide class actions were filed challenging the use of retained asset accounts to settle death benefit claims of beneficiaries of a group life insurance contract owned by the United States Department of Veterans Affairs that covers the lives of members and veterans of the U.S. armed forces. In 2011, the cases were consolidated in the United States District Court for the District of Massachusetts by the Judicial Panel for Multi-District Litigation as *In re Prudential Insurance Company of America SGLI/VGLI Contract Litigation.* The consolidated complaint alleges that the use of the retained assets accounts that earn interest and are available to be withdrawn by the beneficiary, in whole or in part, at any time, to settle death benefit claims is in violation of federal law, and asserts claims of breach of contract, breaches of fiduciary duty and the duty of good faith and fair dealing, fraud and unjust enrichment and seeks compensatory and punitive damages, disgorgement of profits, equitable relief and pre and post-judgment interest. In March 2011, the motion to dismiss was denied. In January 2012, plaintiffs filed a motion to certify the class. In August 2012, the court denied plaintiffs' class certification motion without prejudice pending the filing of summary judgment motions on the issue of whether plaintiffs sustained an actual injury. In October 2012, the parties filed motions for summary judgment. In November 2013, the Court issued a Memorandum and Order stating that the named plaintiffs: (1) did not suffer a cognizable legal injury; (2) are not entitled to any damages based on allegations of delay in payment of benefits; and (3) are not entitled to disgorgement of profits as a remedy. The Court ordered further briefing on whether nominal damages should be awarded and whether any equitable relief should be granted. In February 2014, the parties filed briefs addressed in the Court's order. In August 2014, the Court granted preliminary approval of a proposed settlement of this matter as a class action suit. In December 2014, the Court issued a final order approving the class action settlement and dismissed the consolidated complaint with prejudice. The settlement was within the amount reserved for this matter.

In September 2010, *Huffman v. The Prudential Insurance Company*, a purported nationwide class action brought on behalf of beneficiaries of group life insurance contracts owned by ERISA-governed employee welfare benefit plans was filed in the United States District Court for the Eastern District of Pennsylvania, challenging the use of retained asset accounts in employee welfare benefit plans to settle death benefit claims as a violation of ERISA and seeking injunctive relief and disgorgement of profits. In July 2011, the Company's motion for judgment on the pleadings was denied. In February 2012, plaintiffs filed a motion to certify the class. In April 2012, the court stayed the case pending the outcome of a case

involving another insurer that is before the Third Circuit Court of Appeals. In August 2014, the Court lifted the stay, and in September 2014, Plaintiffs filed a motion seeking leave to amend the complaint.

In October 2006, a purported class action lawsuit, *Bouder v. Prudential Financial, Inc. and Prudential Insurance Company of America*, was filed in the United States District Court for the District of New Jersey, claiming that the Company failed to pay overtime to insurance agents in violation of federal and Pennsylvania law, and that improper deductions were made from these agents' wages in violation of state law. The complaint sought back overtime pay and statutory damages, recovery of improper deductions, interest, and attorneys' fees. In March 2008, the court conditionally certified a nationwide class on the federal overtime claim. Separately, in March 2008, a purported nationwide class action lawsuit was filed in the United States District Court for the Southern District of California, *Wang v. Prudential Financial, Inc. and Prudential Insurance,* claiming that the Company failed to pay its agents overtime and provide other benefits in violation of California and federal law and seeking compensatory and punitive damages in unspecified amounts. In September 2008, *Wang* was transferred to the United States District Court for the District of New Jersey and consolidated with the *Bouder* matter. Subsequent amendments to the complaint resulted in additional allegations involving purported violations of an additional nine states' overtime and wage payment laws. In February 2010, the Company moved to decertify the federal overtime class that had been conditionally certified in March 2008 and moved for summary judgment on the federal overtime claims of the named plaintiffs. In July 2010, plaintiffs filed a motion for class certification of the state law claims. In August 2010, the district court granted Prudential Financial's motion for summary judgment, dismissing the federal overtime claims. In January 2013, the court denied plaintiffs' motion for class certification in its entirety. In July 2013, the court granted plaintiffs' motion for reconsideration, permitting plaintiffs to file a motion to certify a class of employee insurance agents seeking recovery under state wage and hour laws. In September 2013, plaintiffs filed a renewed motion for class certification.

From November 2002 to March 2005, eleven separate complaints were filed against the Company and the law firm of Leeds Morelli & Brown in New Jersey state court and in the New Jersey Superior Court, Essex County as *Lederman v. Prudential Financial, Inc., et al.* The complaints allege that an alternative dispute resolution agreement entered into among the Company, over 235 claimants who are current and former employees, and Leeds Morelli & Brown (the law firm representing the claimants) was illegal and that the Company conspired with Leeds Morelli & Brown to commit fraud, malpractice, breach of contract, and violate racketeering laws by advancing legal fees to the law firm with the purpose of limiting Prudential Financial's liability to the claimants. In February 2010, the New Jersey Supreme Court assigned the cases for centralized case management to the Superior Court, Bergen County. The Company participated in a court-ordered mediation that resulted in a settlement involving 193 of the remaining 235 plaintiffs. The amounts paid to the 193 plaintiffs were within existing reserves for this matter. In December 2013, the Company participated in court-ordered mediation that resulted in a December 2013 settlement involving 40 of the remaining 42 plaintiffs with litigation against the Company, including plaintiffs who had not yet appealed the dismissal of their claims. The amounts paid to the 40 plaintiffs were within existing reserves for this matter. In July 2014, the Court granted the Company's summary judgment motion dismissing with prejudice the complaint of one of the two remaining plaintiffs asserting claims against the Company. In August 2014, an appeal was filed from the Court's summary judgment decision. In January 2015, the New Jersey Appellate Division dismissed the appeal without prejudice.

On an ongoing basis, the Company's internal supervisory and control functions review the quality of sales, marketing and other customer interface procedures and practices and may recommend modification or enhancement. From time to time, this review process results in the discovery of product administration, servicing or other errors, including errors relating to the timing or amount of payments or contract values due to customers. In certain cases, if appropriate, the Company may offer customers remediation and may incur charges, including the cost of such remediation, administrative costs and regulatory fines.

The Company's litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, their outcomes cannot be predicted. It is possible that the Company's results of operations or cash flows in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. In light of the unpredictability of the Company's litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on the Company's financial position. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification is not likely to have a material adverse effect on the Company's financial position.

20. FAIR VALUE MEASUREMENTS

Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative fair value guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1 – Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. The Company’s Level 1 assets and liabilities primarily include certain cash equivalents and short term investments, common stock and derivative contracts that trade on an active exchange market.

NOTES TO FINANCIAL STATEMENTS

Level 2 – Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities and other market observable inputs. The Company's Level 2 assets and liabilities include: bonds (corporate public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain common stock securities (mutual funds, which do not actively trade and are priced based on a net asset value), short-term investments as well as certain cash equivalents (primarily commercial paper), and certain over-the-counter derivatives.

Level 3 – Fair value is based on at least one or more significant unobservable inputs for the asset or liability. The assets and liabilities in this category may require significant judgment or estimation in determining the fair value. The Company's Level 3 assets and liabilities primarily include: certain private bonds and common stock securities, certain manually priced public common stock and bonds, and certain highly structured over-the-counter derivative contracts.

Bonds carried at the lower of amortized cost or market value — The fair values of the Company's public bonds are generally based on prices obtained from independent pricing services. Prices for each security are generally sourced from multiple pricing vendors, and a vendor hierarchy is maintained by asset type based on historical pricing experience and vendor expertise. The Company ultimately uses the price from the pricing service highest in the vendor hierarchy based on the respective asset type. The pricing hierarchy is updated for new financial products and recent pricing experience with various vendors. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2 as they are primarily based on observable pricing for similar assets and/or other market observable inputs. Typical inputs used by these pricing services include but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flow, prepayment speeds, and default rates. If the pricing information received from third party pricing services is deemed not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service or classify the securities as Level 3. If the pricing service updates the price to be more consistent in comparison to the presented market observations, the security remains within Level 2.

Internally-developed valuations or indicative broker quotes are also used to determine fair value in circumstances where vendor pricing is not available, or where the Company ultimately concludes that pricing information received from the independent pricing service is not reflective of market activity. If the Company concludes the values from both pricing services and brokers are not reflective of market activity, it may over-ride the information from the pricing service or broker with an internally developed valuation. As of December 31, 2014 over-rides on a net basis were not material. Pricing service over-rides, internally developed valuations and indicative broker quotes are generally included in Level 3 in our fair value hierarchy.

The Company conducts several specific price monitoring activities. Daily analyses identify price changes over pre-determined thresholds defined at the financial instrument level. Various pricing integrity reports are reviewed on a daily and monthly basis to determine if pricing is reflective of market activity or if it would warrant any adjustments. Other procedures performed include, but are not limited to, reviews of third-party pricing services methodologies, reviews of pricing trends, and back testing.

The fair value of private bonds, which are primarily comprised of investments in private placement securities, originated by internal private asset managers, is primarily determined using a discounted cash flow model. These models primarily use observable inputs that include Treasury or similar base rates plus estimated credit spreads to value each security. The credit spreads are obtained through a survey of private market intermediaries who are active in both primary and secondary transactions, and consider, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. Since most private placements are valued using standard market observable inputs and inputs derived from, or corroborated by, market observable data including observed prices and spreads for similar publicly traded or privately traded issues, they have been reflected within Level 2. For certain private fixed maturities, the discounted cash flow model may incorporate significant unobservable inputs, which reflect the Company's own assumptions about the inputs that market participants would use in pricing the asset. To the extent management determines that such unobservable inputs are significant to the price of a security, a Level 3 classification is made.

Preferred Stocks carried at the lower of amortized cost or market value – consist principally of publicly and privately traded preferred stock. The fair values of most publicly traded preferred stock securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded preferred stock securities are determined using valuation and discounted cash flow models that require a substantial level of judgment. In determining the fair value of certain privately traded preferred stock the discounted cash flow model may also use unobservable inputs, which reflect the Company's assumptions about the inputs market participants would use in pricing the asset. Most privately traded preferred stock securities are classified within Level 3. Fair values of perpetual preferred stock based on observable market inputs are classified within Level 2. However, when prices from independent pricing services are based on indicative broker quotes as the directly observable market inputs become unavailable, the fair value of perpetual preferred stock is classified as Level 3.

Common Stocks carried at market value—consist principally of investments in common stocks of publicly traded companies, privately traded securities, as well as common stock mutual fund shares. The fair values of most publicly traded stock are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy Estimated fair values for most privately traded equity securities are determined using discounted cash flow, earnings multiple and other valuation models that require a substantial level of judgment around inputs and therefore are classified within Level 3.The fair values of common stock mutual fund shares that transact regularly (but do not trade in active markets because they are not publicly available) are based on transaction prices of identical fund shares. The fair values of common stock are based on prices obtained from independent pricing services. These prices are then validated for reasonableness against recently traded market prices. Accordingly, these securities are generally classified within Level 2 in the fair value hierarchy.

Derivative Instruments – Derivatives are recorded at fair value either as assets, within "Derivatives," or as liabilities, within "Miscellaneous liabilities: Derivatives." The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, credit spreads, market volatility, expected returns, non-performance risk ("NPR"), liquidity and other factors. Liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity, and other specific attributes of the underlying derivative position.

The Company's exchange-traded futures include Treasury futures and equity futures. Exchange-traded futures and options are valued using quoted prices in active markets and are classified within Level 1 in the fair value hierarchy.

The majority of the Company's derivative positions are traded in the over-the-counter ("OTC") derivative market and are classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models that utilize actively quoted or observable market input values from external market data providers, third-party pricing vendors and/or recent trading activity. The Company's policy is to use mid-market pricing in determining its best estimate of fair value. The fair values of most OTC derivatives,

NOTES TO FINANCIAL STATEMENTS

including interest rate and cross currency swaps, currency forward contracts, single name credit default swaps, and “to be announced” (“TBA”) forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models’ key inputs include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yields, NPR, volatility and other factors.

The vast majority of the Company’s derivative agreements are with highly rated major international financial institutions. To reflect the market’s perception of its own and the counterparty’s NPR, the Company incorporates additional spreads over LIBOR into the discount rate used in determining the fair value of OTC derivative assets and liabilities that are not otherwise collateralized.

Derivatives classified as Level 3 include structured products. These derivatives are valued based upon models, such as Monte Carlo simulation models and other techniques that utilize significant unobservable inputs. Level 3 methodologies are validated through periodic comparison of the Company’s fair values to external broker-dealer values.

Separate account liabilities are not included in the above table as they are reported at contract value and not fair value in the Company's Statements of Admitted Assets, Liabilities and Capital and Surplus.

Bonds: fixed maturities (excluding NAIC 6 rated Bonds) - The fair values of public fixed maturity securities are generally based on prices from independent pricing services, which are validated by the Company. However, for certain public fixed maturity securities and investments in private placement fixed maturity securities; this information is either not available or not reliable. For these public fixed maturity securities the fair value is based on indicative quotes from brokers if available, or, determined using a discounted cash flow model or internally developed values. For private fixed maturities fair value is determined using a discounted cash flow model, which utilizes a discount rate based upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions and takes into account, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. In determining the fair value of certain fixed maturity securities, the discounted cash flow model may also use unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the security.

Mortgage Loans - The fair value of commercial mortgage loans is based upon the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate, plus an appropriate credit spread for similar quality loans. The quality ratings for these loans, a primary determinant of the appropriate credit spread and a significant component of the pricing process, are based on internally-developed methodology.

Certain commercial mortgage loans are valued incorporating other factors, including the terms of the loans, the principal exit strategies for the loans, prevailing interest rates and credit risk. Other loan valuations are primarily based upon the present value of the expected future cash flows discounted at the appropriate local government bond rate and local market swap rates or credit default swap spreads, plus an appropriate credit spread and liquidity premium. The credit spread and liquidity premium are a significant component of the pricing inputs, and are based upon an internally-developed methodology, which takes into account, among other factors, the credit quality of the loans, the property type of the collateral, the weighted average coupon and the weighted average life of the loans.

Contract Loans - During the fourth quarter of 2013, the Company changed the valuation technique used to fair value contract loans. For the period ended December 31, 2013, the fair value of contract loans was determined by discounting expected cash flows at the current loan coupon rate. As a result, the carrying value of the contract loans approximates the fair value for the year ended December 31, 2013. Prior to this change, the fair value of U.S. insurance policy loans was calculated by discounting expected cash flows based upon current U.S. Treasury rates and historical loan repayment patterns.

Cash and Short-Term Investments - The Company believes that due to the short-term nature of certain assets, the carrying value approximates fair value. These assets include cash, cash equivalent instruments and certain short-term investments, which are recorded at amortized cost and are not securities.

Other Invested Assets - The estimated fair value of other invested assets is determined using the methodologies as described above for bonds, mortgage loans or short-term investments, Including Affiliated Assets based on the nature of the investment. Excluded from the disclosure are those other invested assets that are not considered to be financial instruments subject to this disclosure including investments carried on the equity method.

Policyholder Account Balances & Separate Account Liabilities - Only the portion of policyholder account balances and separate account liabilities related to products that are investment contracts (those without mortality and morbidity risk) are reflected in the table below. For fixed deferred annuities, single premium endowments, payout annuities and other similar contracts without life contingencies, fair values are derived using discounted projected cash flows based on credit ratings that are representative of the Company's financial strength ratings, and hence reflect the Company's own NPR. For guaranteed investment contracts, funding agreements, structured settlements without life contingencies and other similar products, fair values are derived using discounted projected cash flows based on interest rates being offered for similar contracts with maturities consistent with those of the contracts being

valued. For those balances that can be withdrawn by the customer at any time without prior notice or penalty, the fair value is the amount estimated to be payable to the customer as of the reporting date, which is generally the carrying value. For defined contribution and defined benefit contracts and certain other products the fair value is the market value of the assets supporting the liabilities.

Notes Payable and Other Borrowing - The fair value of debt is generally determined by either prices obtained from independent pricing services, which are validated by the Company, or discounted cash flow models. Discounted cash flow models predominately use market observable inputs such as the borrowing rates currently available to the Company for debt and financial instruments with similar terms and remaining maturities. For commercial paper issuances and other debt with a maturity of less than 90 days, the carrying value approximates fair value.

Securities Sold Under Agreements to Repurchase - The Company receives collateral for selling securities under agreements to repurchase. Repurchase agreements are also generally short-term in nature, and therefore, the carrying amounts of these instruments approximate fair value.

Cash Collateral for Loaned Securities - Cash collateral for loaned securities represents the collateral received or paid in connection with loaning or borrowing securities, similar to the securities sold under agreement to repurchase above. For these transactions, the carrying value of the related asset or liability approximates fair value, as they equal the amount of cash collateral received or paid.

Separate Account Liabilities–Investment Contracts - Only the portion of separate account liabilities related to products that are investments contracts are reflected in the table above. Separate account liabilities are recorded at the amount credited to the contractholder, which reflects the change in fair value of the corresponding separate account assets including contractholder deposits less withdrawals and fees. Therefore, carrying value approximates fair value.

21. OTHER ITEMS

21A. Extraordinary Items

The Company did not have extraordinary items during 2014 or 2013.

21B. Troubled Debt Restructuring Debtors

The Company did not have troubled debt restructuring during 2014 or 2013.

21C. Other Disclosures and Unusual Items

In February 2014, the New York State Department of Financial Services (“NY DFS”) notified the Company that it did not agree with the Company’s calculation of statutory reserves (including the applicable credit for reinsurance) for New York financial reporting purposes in respect of certain variable annuity products. During the fourth quarter of 2014, the Company reached an agreement on reserving methodologies with the NY DFS for these variable annuity products and for certain life insurance products. As a result, the Company will hold additional statutory reserves on a New York basis. As of December 31, 2014, the Company held sufficient statutory surplus on a New York basis to satisfy these additional New York reserves, but such additional reserves will reduce New York statutory surplus. The Company is not domiciled in New York, and these changes do not impact statutory reserves reported in the Company’s state of domicile, or any states other than New York, and therefore do not impact RBC ratios; however, the agreed reserve methodologies may require the Company to hold additional New York statutory reserves in the future, which would result in a further reduction of New York statutory surplus.

Claim reserves for Group Long Term Disability contained in Exhibit 6 are discounted at interest rates ranging from 3.0% to 6.75%. For non-buyout claims, the interest rate is based on the date of disability. For buyout claims, the interest rate is based on the effective date of the buyout. Group Long Term Disability reserves are calculated using the 1987 CGDT Table modified with the Pru Basic 2007 Claim Termination Table.
Reserves for Single Premium policies contained in Exhibit 6 are discounted using a seriatim reserve calculation using 1994 GAM with projection and a valuation rate of 3.5%.

Individual Long Term Care active life reserves are one-year full preliminary term reserves based on Milliman USA Guidelines for LTC Claims Cost for morbidity, 1983 GAM for older products and 1994 GAM for the new generation product and interest rates ranging from 3.5% to 4.5% depending on the effective date of coverage of each participant.

Group Long Term Care active life reserves are one-year full preliminary term reserves based on Milliman USA Guidelines for LTC Claims Cost for morbidity, 1983 GAM mortality for older products and 1994 GAM for the new generation products and interest rates ranging from 3.5% to 5.5% depending on the effective date of coverage of each participant.

Individual and Group Long Term Care claim reserves represent the present value of benefits payable to insureds in benefit status using claim termination rates based on the 1985 National Nursing Home Study and interest rates ranging from 3.5% to 4.5% depending on the disablement date claim for each claimant.

Claim reserves for US Individual Disability contained in Exhibits 6 and 8 are discounted using the 1964 CDT table with interest rate ranging from 3.5% and 6.0% for disability years 1988 and prior and using the 1985 CIDA table with interest rate ranging from 3.5% and 6.0% for disability years 1989 and after.

Claim reserves for other Individual Guaranteed Renewable Accident and Health policies contained in Exhibits 6 and 8 are discounted at interest rates ranging from 3.5% to 6.0% from the assumed date of payment to the year incurred. The applicable interest rate depends on the year of coverage.

Claim reserves for Individual Cancelable Accident and Health policies contained in Exhibits 6 and 8 are discounted at 3.5% from the assumed date of payment to the year incurred.

On January 2, 2013, the Company acquired The Hartford’s individual life insurance business through a reinsurance transaction. Under the agreement, the Company paid The Hartford cash consideration of $615 million, primarily in the form of a ceding commission to provide reinsurance for approximately 700,000 life insurance policies with a net retained face amount in force of approximately $141 billion. This acquisition increased the Company’s scale in the U.S. individual life insurance market,

NOTES TO FINANCIAL STATEMENTS

particularly universal life products, and provides complementary distribution opportunities through expanded wirehouse and bank distribution channels.

The Company received a $712 million capital contribution in the first quarter of 2013 from its parent company, Prudential Holdings, LLC, representing funding for the Company's acquisition of the Hartford's individual life insurance business.

In connection with this transaction, the Company assumed $8.4 billion of assets from The Hartford under coinsurance and modified coinsurance agreements. The Company retroceded to its subsidiary, Pruco Life Insurance Company, the portion of the assumed business that is classified as guaranteed universal life insurance ("GUL") with account values of approximately $4 billion as of January 2, 2013. Pruco Life Insurance Company then retroceded all of the GUL policies to an affiliated captive reinsurance company.

In connection with disputes arising out of the Chapter 11 bankruptcy petition filed by Lehman Brothers Holdings Inc., the Company, through its subsidiary, Pru Global Funding, LLC. ("PGF"), previously recorded losses related to a portion of its counterparty exposure on derivative transactions it had previously held with Lehman Brothers and its affiliates. In 2013 and 2014, the Company, through PGF, recorded $146 million and $19 million, respectively, of estimated recovery related to this matter, which is recorded within "change in net unrealized capital gains (losses)" in the Company's Summary of Operations.

Through December 31, 2014, the Company maintained a reinsurance arrangement with a captive reinsurance subsidiary, Prudential New Jersey Captive Insurance Company ("NJCAP"), domiciled in New Jersey, whereby the New Jersey captive reinsured 90% of the short-term risks of the Company's Closed Block Business. These short-term risks represent the impact of variations in experience of the Closed Block that are expected to be recovered over time as a result of corresponding adjustments to policyholder dividends. The reinsurance arrangement was intended to alleviate the short-term statutory surplus volatility within the Company resulting from the Closed Block Business, including volatility caused by the impact of any unrealized mark-to-market losses and realized credit losses within the investment portfolio of the Closed Block. NJCAP maintained a $2 billion letter of credit facility with certain financial institutions to support its funding obligations under the reinsurance arrangement, and PFI guaranteed all obligations of NJCAP under the facility. Effective January 1, 2015, this reinsurance arrangement was recaptured, and NJCAP terminated the related letter of credit facility on January 2, 2015. This captive structure is no longer necessary due to the reinsurance of the Company's Closed Block to Prudential Legacy Insurance Company of New Jersey ("PLIC"), effective January 1, 2015.

The Company has established a dividend trust with an affiliate, The Prudential Bank and Trust FSB, as Trustee. Assets with a par value of $0 and a market value of $0 as of December 31, 2014 are being held in this trust. These assets are being used solely to satisfy the liabilities associated with the guarantee of certain minimum amounts of annual and termination dividends ("Minimum Guaranteed Dividends") as declared by the Company's Board of Directors. Any liability associated with this trust is included on Page 3, Line 6.1. The Company may substitute assets held in the trust subject to the terms of the Trust Agreement. The Company may only terminate the Trust Agreement (1) when there is no remaining trust property or (2) upon satisfaction of its obligation to pay each Minimum Guaranteed Dividend which became the subject of the Trust. Assets remaining in the trust under condition (2) above revert to the Company.

As of December 31, 2014 there was $0 of forward commitments not in the nature of derivative instruments included in "Bonds".

The Company had no cash deposits that were held in an escrow account and as such would not have been reported in the financial statements as of December 31, 2014.

The Company elected to use rounding in reporting amounts in the pages, exhibits, and schedules except for a few schedules where truncation was used. The amounts in this statement pertain to the entire Company business including, as appropriate, Separate Account business.

(1) While there is no market standard definition, we define sub-prime mortgages as residential mortgages that are originated to weaker quality obligors as indicated by weaker credit scores, as well as mortgages with higher loan to value ratios, or limited documentation.

(2) The Company has no direct exposure through investments in subprime mortgage loans.

(4) The Company has no underwriting exposure to sub-prime mortgage risk through Mortgage Guaranty or Financial Guaranty insurance coverage.

21G. Retained Assets

The Company offers retained asset accounts, called Alliance Accounts (the "Account" or "Accounts"), as a settlement option available to beneficiaries when an insured dies. The beneficiary is provided information at the time of claim about each of various settlement options available and provided the opportunity to select any of the available settlement options. For most products, if the beneficiary does not select a settlement option, they are permitted an Account in most states as provided by applicable state law. The Company generally offers the Accounts for all individual and group life insurance and non-custodial annuity contract beneficiaries when the death benefit proceeds payable are $5,000 or greater.

When an Account is opened the beneficiary receives a book of drafts, similar to a checkbook. The beneficiary owns the account with the Company in full and can access the death benefit proceeds immediately by writing a draft for any amount desired, up to and including the full death benefit.

The Accounts earn interest immediately when established. The interest is accrued daily, compounded daily and credited every month. The interest rate may change without notice, but will not change more often than once a month. Some Accounts may be subject to certain minimum interest rates. The interest rate credited to Accounts may be more or less than the rate the Company earns on the funds. During 2014, interest rates credited to Accounts ranged from 1.50% to 3.50%. There were no changes to interest rates credited during 2014.

There are no recurring fees for the maintenance or administration of an Account. Fees are only paid for special services such as returned drafts ($10 per draft), stop payment requests ($12 per draft) and draft or statement copy requests ($2 per draft or statement).

Amounts attributable to the Accounts are included in "Liability for deposit–type contracts" on the Statement of Liabilities, Surplus and Other Funds and in "Supplemental Contracts" on Exhibit 7 - "Deposit-type Contracts".

22. EVENTS SUBSEQUENT

Type 1 – Recognized Subsequent Events:

Subsequent events have been considered through February 20, 2015 for the statutory statement issued March 1, 2015.

There were no subsequent events to report.

Type 2 – Non recognized Subsequent Events:

Subsequent events have been considered through February 20, 2015 for the statutory statement issued March 1, 2015.

On January 1, 2015, the Company entered into a reinsurance agreement with its subsidiary PLIC, in which the Company reinsured substantially all of the outstanding liabilities of its regulatory closed block (the “Closed Block”), primarily on a coinsurance basis. The only exceptions to the 100% coinsurance arrangement are as follows (1) the policyholder dividend liability which will be reinsured from the Company to PLIC on a 100% modified coinsurance basis (2) 10% of the Closed Block’s New York policies, which will be retained by the Company on both the coinsurance and modified coinsurance agreements; and (3) certain Closed Block policies that were previously reinsured externally. In connection with this reinsurance transaction, the Company ceded approximately $57 billion of assets into a newly established statutory guaranteed separate account of PLIC. Concurrently, the Company ceded approximately $5 billion of assets to PLIC to support the securities lending program. The Closed Block is a regulatory mechanism that consists of Prudential Insurance’s liabilities for certain participating individual life insurance policies and annuities issued in the United States that were, together with certain assets, allocated to the Closed Block in an amount that has been determined to produce cash flows which, together with revenues from policies included in the Closed Block, are expected to be sufficient to support obligations and liabilities relating to these policies, including provision for payment of benefits, certain expenses, and taxes and to provide for continuation of the Closed Block policyholder dividend scales in effect in 2000, assuming experience underlying such scales continues.

Also effective January 1, 2015, the Company recaptured existing agreements whereby the Company reinsured 90% of the Closed Block’s long-term risk under modified coinsurance agreements and reinsured 90% of the Closed Block’s short-term risk with its captive reinsurance subsidiary, NJCAP on a coinsurance basis. Concurrently, NJCAP cancelled its $2 billion letter of credit facility it had entered into in connection with the reinsurance arrangement.

Beginning in 2014, the Company will be subject to an annual fee under section 9010 of the Affordable Care Act (“ACA”). This annual fee will be allocated to individual health insurers based on the ratio of the amount of an entity’s net premiums written for health insurance for any U.S. health risk during the preceding calendar year to the aggregate amount of health insurance for any U.S. health risk that is written during the preceding calendar year. For the year-ended December 31, 2014, the Company had health insurance premiums subject to the ACA assessment of $4,349,926. However, because net premiums written in 2014 were less than $25 million, no fee is required. As such, there is no expected impact to risk based capital.

The Company does not promise surrender values in excess of the legally computed reserves.

(2) Reserves on policies issued at or subsequently subject to a premium for extra mortality or otherwise issued on lives classed as substandard for the plan of contract issued or on special class lives, including paid-up insurance, are reported in Section A of Exhibit 5 according to mortality and interest bases applicable to the respective years of issue. In addition, an extra mortality reserve is held for ordinary life insurance policies classed as group conversions, or otherwise substandard, equal to the excess, if any, over a basic reserve, of a substandard reserve based on mortality rates appropriately increased over the standard class mortality rates. For all other such policies, the extra mortality reserve is one-half the appropriate net additional premium.
