NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1A. Accounting Practices

The Prudential Insurance Company of America (the “Company” or “PICA”), domiciled in the state of New Jersey, prepares its statutory financial statements in accordance with accounting practices prescribed or permitted by the New Jersey Department of Banking and Insurance (the “Department” or “NJDOBI”). Prescribed statutory accounting practices (“SAP”) include publications of the National Association of Insurance Commissioners (“NAIC”), state laws, regulations and general administrative rules. Permitted statutory accounting practices encompass all accounting practices not so prescribed, by the Department.

The Company records leasehold improvements as admitted assets. New Jersey law allows insurance companies domiciled in New Jersey to admit leasehold improvements as admitted assets. NAIC statutory accounting practices require non-admittance of leasehold improvements.

Pursuant to New Jersey law, the Commissioner of NJDOBI may require or permit a different basis of valuation of separate account assets. The Company values separate account assets for certain non-participating group annuity products, related to our pension risk transfer business, as if the assets were held in the general account. Under SSAP No. 56 “Separate Accounts”, separate account assets supporting fund accumulation contracts ("GICs"), which do not participate in underlying portfolio experience, with a fixed interest rate guarantee, purchased under a retirement plan or plan of deferred compensation, established or maintained by an employer, will be recorded as if the assets were held in the general account while assets supporting all other contractual benefits shall be recorded at fair value on the date of valuation. The participants in our non-participating group annuity products do not participate in the investment income of the underlying assets, and therefore, the valuation prescribed by NJDOBI follows the similar general account treatment. With certain separate account assets being valued as if they were held in the general account, the Company’s separate account reserves and related asset adequacy analysis reserves are also adjusted accordingly. As of December 31, 2016, Risk Based Capital calculated using this prescribed practice resulted in Risk Based Capital consistent with the amount calculated using NAIC guidance.

In 2004, one of the Company’s insurance subsidiaries, Prudential Retirement and Annuity Company ("PRIAC"), received approval from its domiciliary insurance department, the Connecticut Insurance Department, to record a deferred gain associated with an assumption reinsurance agreements between Connecticut General Life Insurance Company and PRIAC in the Interest Maintenance Reserve (“IMR”) and to amortize the deferred gain in a manner consistent with those relevant annual statement instructions. Had the deferred gains been established as a liability limited to an amortization period of 10 years in accordance with the guidance of SSAP No. 61R, “Life, Deposit-Type and Accident and Health Reinsurance” (“SSAP No. 61R”), and not included in the IMR, it would have created a material distortion in the analysis of the adequacy of statutory reserves conducted annually by PRIAC’s Appointed Actuary. Therefore, the permitted practice for this PICA subsidiary impacts its carrying value on PICA’s balance sheet.

NOTES TO FINANCIAL STATEMENTS

A reconciliation of the Company's assets, liabilities, net income and capital and surplus between NAIC SAP and practices permitted and prescribed by the Department is shown below:

1B. Use of Estimates

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

The most significant estimates include those used in determining measurement of any related impairment; valuation of investments including derivatives (in the absence of quoted market values) and the recognition of other-than-temporary impairments; aggregate reserves for life, accident, and health contracts including guarantees; pension and other postretirement benefits; provision for income taxes and valuation of deferred tax assets; and goodwill; and reserves for contingent liabilities, including reserves for losses in connection with unresolved legal matters.

1C. Accounting Policy

In addition, the Company uses the following accounting policies:

(1) Cash includes cash on deposit and cash equivalents. Cash equivalents are short-term, highly liquid investments, with original maturities of three months or less, that are both readily convertible to known amounts of cash and so near their maturity that they represent insignificant risk of changes in value because of changes in interest rates.

Short-term investments primarily consist of money market funds and highly liquid debt instruments with a remaining maturity of twelve months or less and greater than three months when purchased. They are stated at amortized cost, which approximates fair value.

(2) Bonds, which consist of long-term bonds, are stated primarily at amortized cost in accordance with the valuation prescribed by the Department and the NAIC. Bonds rated by the NAIC are classified into six categories ranging from highest quality bonds to those in or near default. Bonds rated in the top five categories are generally valued at amortized cost while bonds rated at the lowest category are valued at lower of amortized cost or fair market value. The Company follows both the prospective and retrospective methods for amortizing bond premium and discount. See below for additional disclosure regarding the prospective vs. retrospective methods. Both methods require the recalculation of the effective yield at each reporting date if there has been a change in the underlying assumptions. For the prospective method, the recalculated yield will equate the carrying amount of the investment to the present value of the anticipated future cash flows. The recalculated yield is then used to accrue income on the investment balance for subsequent accounting periods. There are no accounting changes in the current period unless the undiscounted anticipated cash flow is less than the carrying amount of the investment. For the retrospective method, the recalculated yield is the rate that equates the present value of actual and anticipated future cash flows with the original cost of the investment. The current balance of the investment is increased or decreased to the amount that would have resulted had the revised yield been applied since inception and investment income is correspondingly decreased or increased. For other than temporary impairments, the cost basis of the bond excluding loan-backed and structured securities is written down to fair market value as a new cost basis and the amount of the write down is accounted for as a realized loss.

(3) Common stocks include unaffiliated common stocks and investments in subsidiaries. See (7) below for information related to investments in subsidiaries. Unaffiliated common stocks are carried at fair value. Dividends are recognized in net investment income when earned.

(4) Preferred stocks include unaffiliated preferred stocks and investments in subsidiaries. Preferred stocks rated by the NAIC are classified into six categories ranging from highest quality preferred stocks to those in or near default. Preferred stocks rated in the top three categories are generally valued at amortized cost while preferred stocks rated in the lower three categories are generally valued at lower of amortized cost or fair value. For other-than-temporary impairments, the cost basis of the preferred stock is written down to fair market value as a new cost basis and the amount of the write down is recorded for as a realized loss.

(5) Mortgage loans on real estate are stated primarily at unpaid principal balances, net of unamortized premiums and discounts and impairments. Impaired loans are identified by management as loans when it is considered probable that all amounts due according to the contractual terms of the loan agreement will not be collected. These loans are recorded based on the fair value of the collateral less estimated costs to obtain and sell or a discounted cash flow model. The difference between the net value of the collateral and the recorded investment in the mortgage loan is recognized as an impairment by creating a valuation allowance with a corresponding charge to unrealized loss or by adjusting an existing valuation allowance for the impaired loan with a corresponding charge or credit to unrealized gain or loss. Other than temporary impairments are then recognized as a realized loss in net income.

Interest received on impaired loans, including loans that were previously modified in a troubled debt restructuring, is generally either applied against the principal or reported as revenue, according to management's judgment as to the collectability of principal. Management discontinues accruing interest on impaired loans after the loans are 90 days delinquent as to principal or interest, or earlier when management has substantial doubts about collectability. When this interest is deemed uncollectible, it is reversed against interest income on loans for the current period. Generally, a loan is restored to accrual status only after all delinquent interest and principal are brought current and, in the case of loans where interest has been interrupted for a substantial period, a regular payment performance has been established.

(6) Loan-backed and structured securities are primarily carried at amortized cost. For loan-backed and structured securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources or internal estimates. For high credit quality loan-backed and structured securities (those rated AA or above), cash flows are provided quarterly, and the amortized cost and effective yield of the security are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. The adjustments to amortized cost for those securities rated AA or above are recorded in accordance with the retrospective method. For loan-backed and structured securities rated below AA, the effective yield is adjusted prospectively for any changes in estimated cash flows.

The NAIC designations for non-agency residential mortgage-backed securities ("RMBS"), including asset-backed securities collateralized by sub-prime mortgages, are based on security level expected losses as modeled by an independent third party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized. The model used in determining NAIC designations was updated and utilized for reporting as of December 31, 2016 and December 31, 2015.

Similar to the change for RMBS, the NAIC designations for commercial mortgage-backed securities ("CMBS") are based on security level expected losses as modeled by an independent third party (engaged by the NAIC) and the statutory carrying value of the security, including any purchase discounts or impairment charges previously recognized. The model used in determining NAIC designations was updated and utilized for reporting as of December 31, 2016 and December 31, 2015.

(7) Investments in subsidiaries are accounted for using the equity method as defined in SSAP No. 97, "Investments in Subsidiary, Controlled and Affiliated Entities ("SCA") a Replacement of SSAP No. 88," ("SSAP No. 97"). Investments in insurance subsidiaries are recorded based on the underlying audited statutory equity of the respective entity's financial statements, adjusted for unamortized goodwill as provided for in SSAP No. 68, "Business Combinations and Goodwill," ("SSAP No. 68"). Investments in non-insurance subsidiaries that do not engage in certain transactions or activities, per paragraph 8b ii of SSAP No. 97 are recorded based on audited U.S. GAAP equity of the investee. The subsidiaries' change in net assets, excluding

capital contributions and distributions, is included in “Change in net unrealized capital gains (losses)”. Dividends or distributions received from the investee are recognized in net investment income when declared to the extent they are not in excess of undistributed accumulated earnings attributed to our investment. The subsidiaries are engaged principally in the business of life insurance and annuities.

(8) Other invested assets include primarily the Company's investment in joint ventures, limited liability companies and other forms of partnerships. These investments are accounted for using an equity method as defined in SSAP No. 97. These entities are valued based on the underlying audited U.S. GAAP equity of the investee, or permitted alternatives as defined in SSAP No. 48, “Joint Ventures, Partnerships and Limited Liability Companies,” (“SSAP No. 48”).

(9) Derivatives used by the Company include swaps, futures, forwards, and options and may be exchange-traded or contracted in the over-the-counter market. Derivatives are recorded at fair value either as assets, within "Derivatives," or as liabilities, surplus and other funds within "Derivatives" at their estimated fair value. To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship.

(10) The Company considers anticipated investment income when calculating its premium deficiency reserves in accordance with SSAP No. 54, “Individual and Group Accident and Health Contracts” (“SSAP No. 54”).

(11) Accident and health reserves represent the estimated value of the future payments, adjusted for contingencies and interest. The remaining reserves for active life reserves and unearned premiums are valued using the preliminary term method, gross premium valuation method, or a pro rata portion of gross premiums. Reserves are also held for amounts not yet due on hospital benefits and other coverages.

(12) The Company has not modified its capitalization policy from the prior period.

(13) The Company does not have any pharmaceutical rebates receivable.

(14) Repurchase agreements and reverse repurchase agreements are agreements between a seller and a buyer, whereby the seller of securities sells and simultaneously agrees to repurchase the same or substantially the same securities from the buyer at an agreed upon price and, usually, at a stated date. Repurchase agreements (securities sold under agreements to repurchase) are generally accounted as secured borrowings. The assets transferred are not removed from the balance sheet, the cash collateral received is invested and reported on balance sheet and accounted for based on the type of investment. An offsetting liability is reported in “Aggregate write-ins for liabilities”. For reverse repurchase agreements (securities purchased under agreements to resell), an asset is recorded in “Cash, cash equivalents, and short term investments” to reflect the receivable from the counterparty. Dollar repurchase agreements and reverse dollar repurchase agreements involve debt instruments that are pay-through securities collateralized with GNMA, FNMA and FHLMC and similar securities. The Company typically uses "to be announced" ("TBAs") securities in the dollar repurchase and reverse dollar repurchase agreements which are accounted for as derivatives. Dollar repurchase and reverse dollar repurchase agreements are reported in "Aggregate write-ins for invested assets" with the change in value reported as "Change in net unrealized capital gains". "Net realized capital gains (losses)" are recorded upon termination of the agreements.

(15) Securities lending transactions are transactions where the Company loans securities to a third party, primarily large brokerage firms. These transactions are accounted for as secured borrowings. Cash collateral received is invested and reported on the balance sheet and accounted for based on the type of investment. An offsetting liability is reported in “Payable for securities lending”.

(16) Contract loans are stated at unpaid principal balances.

(17) Net realized capital gains/(losses) are computed using the specific identification method. Net realized investment gains and losses are generated from numerous sources, including the sale of bonds, stocks, other type of investments, as well as adjustments to the cost basis of investments for other-than-temporary impairments. Realized investment gains and losses are also generated from, the termination of derivatives that do not qualify for hedge accounting. In addition, when realized gains or losses on interest-rate related derivatives are recognized, they are amortized through the IMR. Amortized cost of investments is adjusted for impairments considered other than temporary. All bonds, preferred stocks and common stocks with unrealized losses are subject to review to identify other-than-temporary impairments in value. Under SAP, several factors must be considered to determine whether a decline in value of a security is other than temporary, including:

a) the reasons for the decline in value (credit event, currency or interest related, including general spread widening);
b) a company’s ability and intent to hold its investment for a period of time to allow for recovery of value;
c) a company’s intent to sell its investment before recovery of the cost of the investment;
d) the financial condition of and near-term prospects of the issuer; and
e) for stocks, the extent and duration of the decline.

For stocks, when it is determined that there is an other-than-temporary impairment, the Company records a write down in the Statement of Operations and Changes in Capital and Surplus within "Net Realized Capital Gains (Losses)" to the estimated fair value, which reduces the cost basis. The new cost basis of an impaired security is not adjusted for subsequent increases in the estimated fair value. Estimated fair values for publicly traded common stock are based on quoted market prices or prices obtained from independent pricing services. Estimated fair values for privately traded common stock are determined using valuation and discounted cash flow models that require a substantial level of judgment.

For bonds, excluding loan-backed and structured securities, when it is determined that there is an other-than-temporary impairment, the Company records a write down to the estimated fair value of the bond, which reduces its amortized cost. Credit event related impairments are recorded in the Statement of Operations and Changes in Surplus within "Net Realized Capital Gains" and applied to the AVR, and interest related impairments are directly applied to the IMR, on a post tax basis. The AVR is used to stabilize surplus from fluctuations in the market value of bonds, stocks, mortgage loans, real estate, limited partnerships and other investments. Changes in the AVR are accounted for as direct increases or decreases in surplus. The IMR captures interest related realized gains and losses on sales (net of taxes) of bonds, preferred stocks, mortgage loans, interest related other-than-temporary impairments (net of taxes) and realized gains or losses (net of taxes) on terminated interest rate related derivatives, which are amortized into net income over the expected years to maturity of the investments sold or the item being hedged by the derivative using the grouped method.

The new cost basis of an impaired bond is not adjusted for subsequent increases in estimated fair value. Estimated fair values for bonds, other than private placement bonds, are generally based on quoted market prices or prices obtained from independent pricing services. Estimated fair values for private placement bonds are typically determined primarily by using a discounted cash flow model, which relies upon the average of spread surveys collected from private market intermediaries who are active in both primary and secondary transactions and takes into account, among other factors, the credit quality of the issuer and the reduced liquidity associated with private placements. In determining the fair value of certain securities, including those that are distressed, the discounted cash flow model may also use unobservable inputs, which reflect management's own assumptions about the inputs market participants would use in pricing the asset.

For loan-backed and structured securities, when an other-than-temporary impairment has occurred because the entity does not expect to recover the entire amortized cost basis of the security, even if the entity has no intent to sell and the entity has the intent and ability to hold to recovery, the amount of the other-than-temporary impairment recognized as a realized loss shall equal the difference between the investment's amortized cost basis and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate. Credit event related impairments are recorded in the Statement of Operations and Changes in Surplus within "Net Realized Capital Gains" and applied to the AVR, and interest related impairments are directly applied to the IMR, on a post tax basis. Additionally, the amortized cost of the security, less the other-than-temporary impairment recognized as a realized loss, shall become the new amortized cost basis of the investment. When the entity has the intent to sell or cannot assert ability and intent to hold to recovery, the security is impaired to its fair value basis.

(18) Separate account assets and liabilities are generally reported at estimated fair value and represent segregated funds, which are invested for certain policyholders, pension funds and other customers. However, there are some separate account assets and liabilities that support products with guarantees and are carried at the same basis as the general account. The assets consist primarily of common stocks, long-term bonds, real estate, mortgages and short-term investments. The assets of each account are legally segregated and are not subject to claims that arise out of any other business of the Company. The liabilities include reserves established to meet withdrawal and future benefit payment contractual provisions. Investment risks associated with fair value changes are generally borne by the customers, except to the extent of minimum guarantees made by the Company with respect to certain accounts. Mortality, policy administration and surrender charges on the accounts are included in "Miscellaneous income."

1D. Going Concern

The Company has not had any condition or event that would cause doubt about its ability to continue as a going concern.

2. ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

The State of New Jersey requires that insurance companies domiciled in the State of New Jersey prepare their statutory basis financial statements in accordance with the NAIC Accounting Practices and Procedures manual (the "Manual"), subject to any deviations prescribed or permitted by the Department.

Accounting changes adopted to conform to the provisions of the Manual are reported as changes in accounting principles. The cumulative effect of changes in accounting principles is reported as an adjustment to unassigned funds (surplus) in the period of the change in accounting principle. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all prior periods.

The Company has assessed the non-insurance entities subject to SSAP No. 97, and, based upon the amount of capital that these entities represent and the Company's strong capital position, the Company has decided not to obtain GAAP audits for 24 entities as of December 31, 2016. The Company has therefore valued these entities for purposes of its financial statements at zero. At the end of future fiscal years, the Company may decide to obtain U.S. GAAP audits for entities subject to SSAP No. 97 and thereby restore their equity value for purposes of inclusion in capital and surplus.

Effective January 1, 2015, the NAIC adopted revisions to SSAP No. 40 Real Estate Investments ("SSAP No. 40R"). The substantive revisions incorporate real estate property investments that are wholly-owned by a limited liability company ("LLC") that is directly and wholly owned by the reporting entity. These investments were previously reported under SSAP No. 48, Joint Ventures, Partnerships and Limited Liability Companies. The Company reported a net $3.0 billion transfer from other invested assets to direct real estate holdings in the Separate Accounts. In the General Account, no real estate was transferred; however, 6 existing direct real estate holdings were restructured as LLCs.

In June 2016, the NAIC adopted a recommendation that will activate a principles-based reserving approach for life insurance products. Principles-based reserving replaces the reserving methods for life insurance products for which the current formulaic basis for reserves may not accurately reflect the risks or costs of the liability or obligations of the insurer. The principles-based reserving approach has a three-year phase-in period. At the Company's discretion, it may be applied to new individual life business beginning as early as January 1, 2017, and must be applied for all new individual life business issued January 1, 2020 and later. The Company may select different implementation dates for different products. Principles-based reserving will not affect reserves for policies in force prior to January 1, 2017. During 2017, the Company expects to adopt principles-based reserving for its guaranteed universal life products and to introduce updated versions of these products, designed using principles-based reserving. The updated products are expected to support the principles-based statutory reserve level without the need for captive reserve financing or additional assets under Actuarial Guideline XLVIII-Actuarial Opinion and Memorandum Requirements for the Reinsurance of Policies Required to be Valued under Sections 6 and 7 of the NAIC Valuation of Life Insurance Policies Model Regulation (#830) ("AG 48"). The Company is continuing to assess the impact of this new reserving approach on projected statutory reserve levels and product pricing for its entire portfolio of individual life product offerings, and expects to adopt principles-based reserving for other products in its portfolio in phases through the January 1, 2020 adoption date.

NOTES TO FINANCIAL STATEMENTS

3. BUSINESS COMBINATIONS AND GOODWILL

3A. Statutory Purchase Method

Goodwill represents the excess of the amounts the Company paid to acquire subsidiaries and other businesses over the fair value of their net assets at the date of acquisition. When indication of impairment exists, management tests goodwill for the impairment based upon estimates of the fair value of the acquired entity to which the goodwill relates and comparing the carrying value of the acquired entity, including the recorded goodwill, to its estimated fair value at that date. Goodwill is considered impaired when the fair value of the investment in the acquired entity is less than the carrying value of the investment, including the recorded goodwill and the decline is considered other-than-temporary. Given changes in facts and circumstances, this test could lead to reductions in goodwill that could have an adverse effect of the Company's financial condition.

In 2013, the Company acquired 80% ownership of Don CeSar Resort Hotel Ltd. from Rosada Grande LLC and Don CeSar Investor LLC. Goodwill from this purchase was $33,727,694 as of December 31, 2016. Amortization was $16,239,260 for the period ended December 31, 2016. In addition, goodwill for the Company's various other investment entities totaled $36,338,744 as of December 31, 2016. Amortization for these entities for the period ended December 31, 2016 was $10,596,224.

3B. Statutory Merger

The Company had no statutory mergers during 2016 or 2015.

3C. Assumption Reinsurance

There was no goodwill resulting from assumption reinsurance during 2016 or 2015.

b. We conduct asset-based or secured financing within our insurance and other subsidiaries, including transactions such as securities lending, repurchase agreements and mortgage dollar rolls, in order to earn spread income, to borrow funds, or to facilitate trading activity. The collateral received in connection with these programs is primarily used to purchase securities in the short-term spread portfolios of our domestic insurance entities. Investments held in the short-term spread portfolios include cash and cash equivalents, short-term investments and bonds, including mortgage- and asset-backed securities. In addition, $131,975,524 and $149,709,186 at amortized cost and fair value, respectively, of Repurchase Agreement proceeds were reinvested in FNMA pass-through securities. At December 31, 2016, the Company has sufficient assets to cover its secured borrowing liability.

These programs are typically limited to securities in demand that can be loaned at relatively low financing rates. As such, we believe there is unused capacity available through these programs. Holdings of cash and cash equivalent investments in these short-term spread portfolios allow for further flexibility in sizing the portfolio to better match available financing. Current conditions in both the financing and investment markets are continuously monitored in order to appropriately manage the cost of funds, investment spreads, asset/liability duration matching and liquidity.

8. DERIVATIVE INSTRUMENTS

The Company uses derivatives to manage risks from changes in interest rates or foreign currency values, to alter interest rate or currency exposures arising from mismatches between assets and liabilities (including duration mismatches), to hedge against changes in the value of assets it anticipates acquiring and other anticipated transactions and commitments, and to replicate the investment performance of otherwise permissible investments. Insurance statutes restrict the Company's use of derivatives primarily to hedging, income generation, and replication activities intended to offset changes in the market value and cash flows of assets held, obligations, and anticipated transactions and prohibit the use of derivatives for speculation.

The Company, at inception, may designate derivatives as either (1) a hedge of the fair value of a recognized asset or liability or unrecognized firm commitment; (2) a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability; (3) a foreign-currency fair value or cash flow hedge; (4) a hedge of the foreign currency exposure of a net investment in a foreign operation or (5) a derivative that does not qualify for hedge accounting, including replications.

To qualify for hedge accounting treatment, a derivative must be highly effective in mitigating the designated risk of the hedged item. Effectiveness of the hedge is formally assessed at inception and throughout the life of the hedging relationship.

Upon termination of a derivative that qualified for hedge accounting, the gain or loss is reflected as an adjustment to the basis of the hedged item and is recognized in income consistent with the hedged item. There were no instances in which the Company discontinued cash flow hedge accounting because the forecasted transaction did not occur. The maximum length of time for which these variable cash flows are hedged is forty years.

To the extent that the Company chooses not to designate its derivatives for hedge accounting or designated derivatives no longer meet the criteria of an effective hedge, the changes in their fair value are included in “Change in net unrealized capital gains” without considering changes in fair value of the hedged item. Accruals of interest income, expense and related cash flows on swaps are reported in "Net investment income". Upon termination of a derivative that does not qualify for hedge accounting, the gain or loss is included in “Net realized capital gains (losses)”. In addition, when realized gains or losses on interest-rate related derivatives are recognized, they are amortized through the IMR.

Types of Derivative Instruments and Derivative Strategies

Derivative instruments used by the Company include currency swaps, currency forwards, interest rate swaps, total return swaps, treasury futures, equity options (including rights and warrants), and credit default swaps. For those hedge transactions which qualify for hedge accounting, the change in the carrying value or cash flow of the derivative is recorded in a manner consistent with the changes in the carrying value or cash flow of the hedged asset, liability, firm commitment or forecasted transaction. For hedges of net investments in a foreign operation, changes in fair value of such derivatives, to the extent effective, are recorded in “Change in net unrealized capital gains”. In measuring effectiveness, no component of the derivative’s gain or loss is excluded. The Company does not have any cash flow hedges of forecasted transactions other than those related to the payment of variable cash flows on existing financial instruments.

Interest Rate Contracts

Interest rate swaps and futures are used by the Company to reduce risks from changes in interest rates, manage interest rate exposures arising from mismatches between assets and liabilities (including duration mismatches) and to hedge against changes in the value of assets it owns or anticipates acquiring or selling. Swaps may be attributed to specific assets or liabilities or may be used on a portfolio basis. Under interest rate swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between fixed-rate and floating-rate interest amounts calculated by reference to an agreed upon notional principal amount.

In exchange-traded interest rate futures transactions, the Company purchases or sells a specified number of contracts, the values of which are determined by the values of underlying referenced investments, and posts variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The Company enters into exchange-traded futures with regulated futures commission’s merchants who are members of a trading exchange.

Equity Contracts

Total return swaps are contracts whereby the Company agrees with counterparties to exchange, at specified intervals, the difference between the return on an asset (or market index) and LIBOR based on a notional amount. The Company generally uses total return swaps to hedge the effect of adverse changes in equity indices. These derivatives do not qualify for hedge accounting.

Equity index options are contracts which will settle in cash based on differentials in the underlying indices at the time of exercise and the strike price. The Company uses combinations of purchases and sales of equity index options to hedge the effects of adverse changes in equity indices within a predetermined range. These equity options do not qualify for hedge accounting.

Foreign Exchange Contracts

Currency derivatives, including currency forwards and swaps are used by the Company to reduce risks from changes in currency exchange rates with respect to investments denominated in foreign currencies that the Company either holds or intends to acquire or sell, and to hedge the currency risk associated with net investments in foreign operations and anticipated earnings of its foreign operations.

Under currency forwards, the Company agrees with counterparties to deliver a specified amount of an identified currency at a specified future date. Typically, the price is agreed upon at the time of the contract and payment for such a contract is made at the specified future date. As noted above, the Company uses currency forwards to mitigate the impact of changes in currency exchange rates on U.S. dollar equivalent earnings generated by certain of its non-U.S. businesses, primarily its international insurance and investments operations. The Company executes forward sales of the hedged currency in exchange for U.S. dollars at a specified exchange rate. The maturities of these forwards correspond with the future periods in which the non-U.S. dollar-denominated earnings are expected to be generated. These earnings hedges do not qualify for hedge accounting.

Under currency swaps, the Company agrees with counterparties to exchange, at specified intervals, the difference between one currency and another at an exchange rate and calculated by reference to an agreed principal amount. Generally, the principal amount of each currency is exchanged at the beginning and termination of the currency swap by each party.

Credit Contracts

Credit default swaps are used by the Company in conjunction with fixed income investments as replication synthetic asset transactions (“RSAT”). RSATs are derivative transactions entered into in conjunction with other investments in order to produce the investment characteristics of otherwise permissible investments. Credit default swaps used in RSATs are carried at amortized cost with premiums received on such transactions recorded to “Net investment income” over the life of the contract and loss payouts, if any, are recorded as “Net realized capital gains/(losses)”. The Company also uses credit default swaps to hedge exposures in its investment portfolios. Such contracts are not designated as replications, and they are used in relationships that do not qualify for hedge accounting.

The Company is exposed to credit-related losses in the event of nonperformance by counterparties to financial derivative transactions. Generally, the credit exposure of the Company’s OTC derivative transactions are represented by the contracts with a positive fair value (market value) at the reporting date after taking into consideration the existence of netting agreements. Also, the Company enters into exchange-traded futures and transactions through regulated exchanges and these transactions are settled on a daily basis, thereby reducing credit risk exposure in the event of non-performance by counterparties to such financial instruments.

Substantially all of the Company’s OTC derivative contracts are transacted with a subsidiary. In instances where the Company transacts with unaffiliated counterparties, the Company manages credit risk by entering into derivative transactions with major international financial institutions and other credit worthy counterparties, and by obtaining collateral where appropriate. Additionally, limits are set on single party credit exposures which are subject to periodic management review.

Internal controls are in place to ensure that derivative transactions are conducted in accordance with Company policy and guidelines. Those controls include limits, segregation of functions and periodic management review, including quarterly review of exposures by the Investment Committee of the Board of Directors, as well as monitoring for compliance with authorization and operating guidelines.

* Non-performance risk (“NPR”) is the risk that financial obligations will not be fulfilled by the counterparty. SSAP No. 100, “Fair Value Measurements,” (“SSAP No. 100”), rejects consideration of NPR for fair value calculations of liabilities, including derivative liabilities. However, SSAP No. 100 does not reject consideration of NPR for valuation of a company's asset positions. The change in the valuation of the company’s net asset affiliated derivative position as a result of NPR consideration as of December 31, 2016 and December 31, 2015 was $10 and $672, respectively.

9. INCOME TAXES

The application of SSAP No. 101, Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10 ("SSAP No. 101") requires a company to evaluate the recoverability of deferred tax assets and to establish a valuation allowance if necessary to reduce the deferred tax asset to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the company considers many factors, including: (1) the nature of the deferred tax assets and liabilities; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carry back years as well as projected taxable earnings, exclusive of reversing temporary differences and carry forwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the deferred tax assets; and, (7) any tax planning strategies that the Company would employ to avoid a tax benefit from expiring unused. Although the realization is not assured, management believes it is more likely than not that the deferred tax assets, net of valuation allowances, will be realized. The Company has not recorded a valuation allowance as of December 31, 2016 and December 31, 2015.

11B. FHLB (Federal Home Loan Bank) Agreements

(1) The Company is a member of the Federal Home Loan Bank of New York ("FHLBNY'). Membership allows the Company access to the FHLBNY's financial services, including the ability to obtain collateralized loans and to issue collateralized funding agreements. Under applicable law, the funding agreements issued to the FHLBNY have priority claim status above debt holders of the Company. FHLBNY borrowings and funding agreements are collateralized by qualifying mortgage-related assets or U.S. Treasury securities, the fair value of which must be maintained at certain specified levels relative to outstanding borrowings. FHLBNY membership requires the Company to own member stock and borrowings require the purchase of activity-based stock in an amount equal to 4.5% of outstanding borrowings. Under FHLBNY guidelines, if the Company's financial strength ratings decline below A/A2/A Stable by S&P/Moody's/Fitch, respectively, and the FHLBNY does not receive written assurances from the NJDOBI regarding the Company's solvency, new borrowings from the FHLBNY would be limited to a term of 90 days or less. Currently there are no restrictions on the term of borrowings from the FHLBNY.

NJDOBI permits the Company to pledge collateral to the FHLBNY in an amount of up to 5% of its prior year-end statutory net admitted assets, excluding separate account assets. As of December 31, 2016, the 5% limitation equates to a maximum amount of pledged assets of $5,843,560,192 and an estimated maximum borrowing capacity (after taking into account required collateralization levels) of approximately $4,971,657,170 of which $1,000,000,000 was outstanding. Nevertheless, FHLBNY borrowings are subject to the FHLBNY's discretion and to the availability of qualifying assets at the Company.

As of December 31, 2016, the Company had pledged assets with a fair value of $1,226,610,285 supporting aggregate outstanding collateralized advances and collateralized funding agreements. As of December 31, 2016, outstanding funding agreements, totaling $1,000,000,000 are included in "Policyholders' account balances." A. The Company has funded non-contributory defined benefit pension plans, which cover substantially all of its employees. The Company also has several non-funded, non-contributory defined benefit plans covering certain executives. For some employees, benefits are based on final average earnings and length of service, while benefits for other employees are based on an account balance that takes into consideration age, service and salary during their careers.

The Company provides certain life insurance and health care benefits (“Other postretirement benefits”) for its retired employees, their beneficiaries and covered dependents. The healthcare plan is contributory, the life insurance plan is non-contributory. Substantially all of the Company’s employees may become eligible to receive benefits if they retire after age 55 with at least 10 years of service or under certain circumstances after age 50 with at least 20 years of continuous service. These benefits are funded as considered necessary by Company management.

NOTES TO FINANCIAL STATEMENTS

(8) On a weighted-average basis, the following assumptions are used in accounting for the pension plans:

	2016	2015
Weighted-average assumptions used to determine net periodic benefit cost for the year ending December 31, 2016 and December 31, 2015:		
a. Weighted-average discount rate	4.50%	4.10%
b. Expected long-term rate of return on plan assets	6.25%	6.25%
c. Rate of compensation increase	4.50%	4.50%
Weighted-average assumptions used to determine projected benefit obligations as of December 31, 2016 and December 31, 2015:		
d. Weighted-average discount rate	4.15%	4.50%
e. Rate of compensation increase	4.50%	4.50%

On a weighted-average basis, the following assumptions are used in accounting for the postretirement plans:

The weighted-average assumptions used to determine net periodic benefit cost for the year ending December 31, 2016 and December 31, 2015 are discount rates of 4.35% and 3.95%, respectively and expected long-term rate of return on plan assets of 7.0% and 7.0%, respectively.

The weighted-average assumptions used to determine accumulated postretirement benefit obligation as of December 31, 2016 and December 31, 2015 are discount rates of 4.05% and 4.35%, respectively.

(9) The amount of the accumulated benefit obligation for defined benefit pension plans was $10,449,079,629 as of December 31, 2016, and $9,977,780,002 for the prior year ended December 31, 2015.

(10) For postretirement benefits other than pensions, the assumed health care cost trend rate(s) used to measure the expected cost of benefits covered by the plan are:

	2016	2015
Health care cost trend rates	6.60%	7.00%
Ultimate health care cost trend rate after gradual decrease until 2021	5.00%	5.00%

(11) Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plan. A one-percentage point increase and decrease in assumed health care cost trend rates would have the following effects:

	One Percentage Point Increase	One Percentage Point Decrease
a. Effect on total of service and interest costs components	$6,215,387	$4,922,753
b. Effect on postretirement benefit obligation	$145,815,109	$98,705,764

(12) The expected future benefit payments for the Company's domestic pension and postretirement plans and other postretirement benefit receipts for the years indicated are as follows:

Years	Amount
a. 2017	$777,677,258
b. 2018	799,956,697
c. 2019	818,686,310
d. 2020	836,742,773
e. 2021	864,085,173
f. 2022-2026	$4,560,913,154

(13) The Company anticipates that it will make cash contributions in 2017 of $70,000,000, $10,000,000, and $40,000,000 to the pension, postretirement and the postemployment plans, respectively.

(14) There were no purchases of annuity contracts in 2016 and 2015, respectively. The approximate future annual benefit payment for the annuity contracts was $19,019,517 and $19,663,002 in 2016 and 2015, respectively.

(15) Not applicable. The Company does not use an alternative method to amortize prior service amounts or net gains and losses.

(16) Not applicable.

(17) Certain employees are provided special termination benefits under non-qualified plans in the form of unreduced early retirement benefits as a result of their involuntary termination. The cost associated with these benefits for 2016 was $110,000.

(18) There were no pension plan amendments in 2016 and 2015, respectively.

There were no material postretirement plan amendments in 2016 and 2015.

(19) Not applicable. The Company does not have any plan assets that it expects will be returned during 2016.

(20) Refer to Funded Status disclosure in Note 12A(3).

(21) The calculated transition liability at adoption of SSAP No. 92, "Accounting for Postretirement Benefits Other Than Pensions, A Replacement of SSAP No. 14", ("SSAP No. 92") and SSAP No. 102, "Accounting for Pensions, A Replacement of SSAP No. 89" ("SSAP No. 102") was $938,997,578. The balance as of December 31, 2015 was $70,660,294. For 2016, $70,660,294 was recognized.

B. The plan fiduciaries for the Company's pension and postretirement plans have developed guidelines for asset allocations reflecting a percentage of total assets by asset class, which are reviewed on an annual basis. Asset allocation targets as of December 31, 2016 are as follows:

	Pension Investment Policy Guidelines 2016		Postretirement Investment Policy Guidelines 2016	
	Minimum	**Maximum**	**Minimum**	**Maximum**
Asset category				
U.S. Stocks……	2%	16%	27%	60%
International Stocks……..	2%	16%	2%	23%
Bonds……	52%	67%	4%	50%
Short Term Investments……..	0%	15%	0%	42%
Real Estate……	2%	16%	0%	0%
Other……..	0%	16%	0%	0%

The investment goal of the domestic pension plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds and other investments. The cash requirements of the pension obligation, which include a traditional formula principally representing payments to annuitants and a cash balance formula that allows lump sum payments and annuity payments, are designed to be met by the bonds and short term investments in the portfolio. The pension plan risk management practices include guidelines for asset concentration, credit rating and liquidity. The pension plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

The investment goal of the domestic postretirement plan assets is to generate an above benchmark return on a diversified portfolio of stocks, bonds, and other investments, while meeting the cash requirements for the postretirement obligation that includes a medical benefit including prescription drugs, a dental benefit, and a life benefit. The postretirement plans risk management practices include guidelines for asset concentration, credit rating, liquidity, and tax efficiency. The postretirement plan does not invest in leveraged derivatives. Derivatives such as futures contracts are used to reduce transaction costs and change asset concentration, while interest rate swaps and futures are used to adjust duration.

To implement the investment strategy, plan assets are invested in funds that primarily invest in securities that correspond to one of the asset categories under the investment guidelines. However, at any point in time, some of the assets in a fund may be of a different nature than the specified asset category.

Assets held with the Company are in either pooled separate accounts or single client separate accounts. Pooled separate accounts hold assets for multiple investors. Each investor owns a "unit of account." Single client separate accounts hold assets for only one investor, the domestic qualified pension plan and each security in the fund is treated as individually owned. Assets held with a bank are either in common/collective trusts or single client trusts. Common or collective trusts hold assets for more than one investor. Each investor owns a "unit of account." Single client trusts hold assets for only one investor, the domestic qualified pension plan and each security in the fund is treated as individually owned.

There were no investments in Prudential Financial Common Stock as of December 31, 2016 and December 31, 2015 for either the pension or postretirement plans.

The authoritative guidance around fair value established a framework for measuring fair value. Fair value is disclosed using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value, as described in Note 20.

The following describes the valuation methodologies used for pension and postretirement plans assets measured at fair value.

Insurance Company Pooled Separate Accounts and Common or Collective Trusts - Insurance company pooled separate accounts are invested via group annuity contracts issued by Prudential Insurance. Assets are represented by a "unit of account." The redemption value of those units is based on a per unit value whose value is the result of the accumulated values of underlying investments. The underlying investments are valued in accordance with the corresponding valuation method for the investments held.

Common and Preferred Stock - See Note 20 for a discussion of the valuation methodologies for common and preferred stocks.

Bonds - See Note 20 for a discussion of the valuation methodologies for bonds.

Interest Rate Swaps - See Note 20 for a discussion of the valuation methodologies for derivative instruments.

Guaranteed Investment Contract - The value is based on contract cash flows and available market rates for similar investments.

Registered Investment Companies (Mutual Funds) - Securities are priced at the net asset value ("NAV") of shares.

Unrealized Gain (Loss) on Investment of Securities Lending Collateral - This value is the contractual position relative to the investment of securities lending collateral.

Real Estate - The values are determined through an independent appraisal process. The estimate of fair value is based on three approaches; (1) current cost of reproducing the property less deterioration and functional/economic obsolescence; (2) discounting a series of income streams and reversion at a specific yield or by directly capitalizing a single year income estimate by an appropriate factor; and (3) value indicated by recent sales of comparable properties in the market. Each approach requires the exercise of subjective judgment.

Short-term Investments - Securities are valued initially at cost and thereafter adjusted for amortization of any discount or premium (i.e., amortized cost). Amortized cost approximates fair value.

Partnerships - The value of interests owned in partnerships is based on valuations of the underlying investments that include private placements, structured debt, real estate, equities, fixed maturities, commodities and other investments.

NOTES TO FINANCIAL STATEMENTS

Private equity and real estate partnerships do not provide redemption rights to their investors, and there is not a public market for these investments. The Plan's ability to redeem its investments at the end of the partnership term will depend on the ability of the fund manager to liquidate the illiquid private equity or real estate holdings. These funds are established with expected terms ranging from seven to fifteen years, with an option to extend the liquidation period for additional terms of up to two years.

Hedge Funds - The value of interests in hedge funds is based on the underlying investments that include equities, debt and other investments.

Hedge fund investments are structured as fund-of-funds vehicles or as direct investments in various hedge funds. The fund-of-funds vehicles are used for the purpose of making investments in a diverse portfolio of smaller hedge funds, while the direct investments allow for larger targeted investments without the additional fees inherent in a fund-of-funds structure. The hedge fund investments may be subject to initial period lock-up restrictions, under which capital must remain invested for a minimum period, ranging from one to two years. At December 31, 2016 and December 31, 2015, substantially none of the funds were in their initial lock-up period. Following the expiration of a fund's lock-up period, redemptions are permitted quarterly, semi-annually or annually, with advance written notice from 65 to 185 days, depending on the fund. However, redemptions from hedge funds and fund-of-funds may also be restricted by a maximum redemption limitation on any redemption payment date, generally stated as a percentage of the total fund assets or total investment by the redeeming investor; payments of redemptions in excess of that "gate" amount are deferred. The Plan's hedge fund investments include "gate" limits of 20% to 25% of the hedge fund's net assets, depending on the fund.

Variable Life Insurance Policies - These assets are held in group and individual variable life insurance policies issued by Prudential Insurance. Group policies are invested in Insurance Company Pooled Separate Accounts. Individual policies are invested in Registered Investment Companies (Mutual Funds). The value of interest in these policies is the cash surrender value of the policies based on the underlying investments.

D. The domestic discount rate used to value the pension and postretirement obligations at December 31, 2016 and December 31, 2015 is based upon the value of a portfolio of Aa investments whose cash flows would be available to pay the benefit obligation's cash flows when due. The December 31, 2016 portfolio is selected from a compilation of approximately 720 Aa-rated bonds across the full range of maturities. Since yields can vary widely at each maturity point, the Company generally avoids using the highest and lowest yielding bonds at the maturity points, so as to avoid relying on bonds that might be mispriced or misrated. This refinement process generally results in having a distribution from the 10th to 90th percentile. The Aa portfolio is then selected and, accordingly, its value is a measure of the benefit obligation. A single equivalent discount rate is calculated to equate the value of the Aa portfolio to the cash flows for the benefit obligation. The result is rounded to the nearest 5 basis points and the benefit obligation is recalculated using the rounded discount rate.

The pension and postretirement expected long-term rates of return on plan assets for 2016 were determined based upon an approach that considered the allocation of plan assets as of December 31, 2015. Expected returns are estimated by asset class as noted in the discussion of investment policies and strategies below. Expected returns on asset classes are developed using a building-block approach that is forward looking and are not strictly based upon historical returns. The building blocks for equity returns include inflation, real return, a term premium, an equity risk premium, capital appreciation and the effect of active management, expenses and the effect of rebalancing. The building blocks for fixed maturity returns include inflation, real return, a term premium, credit spread, capital appreciation and the effect of active management, expenses and the effect of rebalancing.

The Company applied the same approach to the determination of the expected long term rate of return in 2016. The expected long term rate of return for 2016 is 6.25**%** and 7.00% for the pension and postretirement plans, respectively.

E. The Company sponsors voluntary savings plans for employees (401(k) plans). The plans provide for salary reduction contributions by employees and matching contributions by the Company of up to 4% of annual salary for 2016 and 2015. The matching contributions by the Company included in “Other expenses” are $72,296,467 and $64,214,511 for 2016 and 2015 respectively.

F. Not applicable. The Company does not participate in multiemployer pension or postretirement benefit plans.

Escheatment Litigation

State of West Virginia ex. Rel. John D. Perdue v. Prudential Insurance Company of America

In September 2012, the State of West Virginia, through its State Treasurer, filed a lawsuit in the Circuit Court of Putnam County, West Virginia. The complaint alleges violations of the West Virginia Uniform Unclaimed Property Fund Act by failing to properly identify and report all unclaimed insurance policy proceeds which should either be paid to beneficiaries or escheated to West Virginia. The complaint seeks to examine the records of the Company to determine compliance with the West Virginia Uniform Unclaimed Property Fund Act, and to assess penalties and costs in an undetermined amount. In June 2015, the West Virginia Supreme Court issued a decision: (i) reversing the trial court's dismissal of the West Virginia Treasurer's complaint alleging violations of West Virginia's unclaimed property law; and (ii) remanding the case to the Circuit Court of Putnam County for proceedings consistent with its decision. In July 2015, a petition for rehearing was filed with the West Virginia Supreme Court. In September 2015, the West Virginia Supreme Court of Appeals denied defendants' rehearing petition. In November 2015, the Company filed its answer.

State of West Virginia ex. Rel. John D. Perdue v. Pruco Life

In October 2012, the State of West Virginia commenced a second action making the same allegations stated in the action against the Company. In June 2015, the West Virginia Supreme Court issued a decision: (i) reversing the trial court's dismissal of the West Virginia Treasurer's complaint alleging violations of West Virginia's unclaimed property law; and (ii) remanding the case to the Circuit Court of Putnam County for proceedings consistent with its decision. In July 2015, a petition for rehearing was filed with the West Virginia Supreme Court. In September 2015, the West Virginia Supreme Court of Appeals denied Pruco Life's rehearing petition. Escheatment Audit and Claims Settlement Practices Market Conduct Exam

In January 2012, a Global Resolution Agreement entered into by the Company and a third-party auditor became effective upon its acceptance by the unclaimed property departments of 20 states and jurisdictions. Under the terms of the Global Resolution Agreement, the third-party auditor acting on behalf of the signatory states will compare expanded matching criteria to the Social Security Master Death File ("SSMDF") to identify deceased insureds and contractholders where a valid claim has not been made. In February 2012, a Regulatory Settlement Agreement entered into by the Company to resolve a multi-state market conduct examination regarding its adherence to state claim settlement practices became effective upon its acceptance by the insurance departments of 20 states and jurisdictions. The Regulatory Settlement Agreement applies prospectively and requires the Company to adopt and implement additional procedures comparing its records to the SSMDF to identify unclaimed death benefits and prescribes procedures for identifying and locating beneficiaries once deaths are identified. Substantially all other jurisdictions that are not signatories to the Global Resolution Agreement or the Regulatory Settlement Agreement have entered into similar agreements with the Company.

The New York Attorney General has subpoenaed the Company, along with other companies, regarding its unclaimed property procedures and may ultimately seek remediation and other relief, including damages. Additionally, the New York Office of Unclaimed Funds is conducting an audit of the Company's compliance with New York's unclaimed property laws.

On an ongoing basis, the Company's internal supervisory and control functions review the quality of sales, marketing and other customer interface procedures and practices and may recommend modifications or enhancements. From time to time, this review process results in the discovery of product administration, servicing or other errors, including errors relating to the timing or amount of payments or contract values due to customers. In certain cases, if appropriate, the Company may offer customers remediation and may incur charges, including the cost of such remediation, administrative costs and regulatory fines.

The Company's litigation and regulatory matters are subject to many uncertainties, and given their complexity and scope, their outcome cannot be predicted. It is possible that the Company's results of operations or cash flows in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. In light of the unpredictability of the Company's litigation and regulatory matters, it is also possible that in certain cases an ultimate unfavorable resolution of one or more pending litigation or regulatory matters could have a material adverse effect on the Company's financial position. Management believes, however, that, based on information currently known to it, the ultimate outcome of all pending litigation and regulatory matters, after consideration of applicable reserves and rights to indemnification, is not likely to have a material adverse effect on the Company's financial position.

20. FAIR VALUE OF ASSETS AND LIABILITIES

Fair Value Measurement - Fair value represents the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The authoritative fair value guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement. The levels of the fair value hierarchy are as follows:

Level 1 - Fair value is based on unadjusted quoted prices in active markets that are accessible to the Company for identical assets or liabilities. The Company's Level 1 assets and liabilities primarily include certain cash equivalents and short-term investments, common stocks and derivative contracts that trade on an active exchange market.

Level 2 - Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability through corroboration with observable market data. Level 2 inputs include quoted market prices in active markets for similar assets and liabilities, quoted market prices in markets that are not active for identical or similar assets or liabilities, and other market observable inputs. The Company's Level 2 assets and liabilities include: bonds (corporate public and private bonds, most government securities, certain asset-backed and mortgage-backed securities, etc.), certain common stock securities (mutual funds, which do not trade in active markets because they are not publicly available), short-term investments and certain cash equivalents (primarily commercial paper), and certain over-the-counter ("OTC") derivatives.

Level 3 - Fair value is based on at least one significant unobservable input for the asset or liability. The assets and liabilities in this category may require significant judgment or estimation in determining the fair value. The Company's Level 3 assets and liabilities primarily include: certain private bonds and common stock securities, certain manually priced public common stock and bonds, and certain highly structured OTC derivative contracts.

Bonds carried at the lower of amortized cost or market value - The fair values of the Company's public bonds are generally based on prices obtained from independent pricing services. Prices for each bond are generally sourced from multiple pricing vendors, and a vendor hierarchy is maintained by asset type based on historical pricing experience and vendor expertise. The Company ultimately uses the price from the pricing service highest in the vendor hierarchy based on the respective asset type. The pricing hierarchy is updated for new financial products and recent pricing experience with various vendors. Consistent with the fair value hierarchy described above, securities with validated quotes from pricing services are generally reflected within Level 2, as they are primarily based on observable pricing for similar assets and/or other market observable inputs. Typical inputs used by these pricing services include but are not limited to, reported trades, benchmark yields, issuer spreads, bids, offers, and/or estimated cash flow, prepayment speeds and default rates. If the pricing information received from third-party pricing services is deemed not reflective of market activity or other inputs observable in the market, the Company may challenge the price through a formal process with the pricing service or classify the securities as Level 3. If the pricing service updates the price to be more consistent with the presented market observations, the security remains within Level 2.

Internally-developed valuations or indicative broker quotes are also used to determine fair value in circumstances where vendor pricing is not available, or where the Company ultimately concludes that pricing information received from the independent pricing service is not reflective of market activity. If the Company concludes the values from both pricing services and brokers are not reflective of market activity, it may override the information with an internally developed valuation. As of December 31, 2016, and December 31, 2015, overrides on a net basis were not material. Pricing service overrides, internally-developed valuations and indicative broker quotes are generally included in Level 3 in the fair value hierarchy.

The Company conducts several specific price monitoring activities. Daily analyses identify price changes over predetermined thresholds defined at the financial instrument level. Various pricing integrity reports are reviewed on a daily and monthly basis to determine if pricing is reflective of market activity or if it would warrant any adjustments. Other procedures performed include, but are not limited to, reviews of third-party pricing services methodologies, reviews of pricing trends and back testing.

The fair value of private bonds, which are primarily comprised of investments in private placement securities, originated by internal private asset managers, are primarily determined using discounted cash flow models. These models primarily use observable inputs that include Treasury or similar base rates plus estimated credit spreads to value each security. The credit spreads are obtained through a survey of private market intermediaries who are active in both primary and secondary transactions, and consider, among other factors, the credit quality and industry sector of the issuer and the reduced liquidity associated with private placements. Since most private placements are valued using standard market observable inputs and inputs derived from, or corroborated by, market observable data including observed prices and spreads for similar publicly traded or privately traded issues, they have been reflected within Level 2. For certain private fixed maturities, the discounted cash flow model may incorporate significant unobservable inputs, which reflect the Company's own assumptions about the inputs that market participants would use in pricing the asset. To the extent management determines that such unobservable inputs are significant to the price of a security, a Level 3 classification is made.

Preferred Stocks carried at the lower of amortized cost or market value - Preferred stocks consist principally of publicly traded and privately traded preferred stock. The fair values of most publicly traded preferred stock securities are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded preferred stock securities are determined using valuation and discounted cash flow models that require a substantial level of judgment. In determining the fair value of certain privately traded preferred stock the discounted cash flow model may also use unobservable inputs, which reflect the Company's assumptions about the inputs market participants would use in pricing the asset. Most privately traded preferred stock securities are classified within Level 3. Fair values of perpetual preferred stock based on observable market inputs are classified within Level 2. However, when prices from independent pricing services are based on indicative broker quotes as the directly observable market inputs become unavailable, the fair value of perpetual preferred stock is classified as Level 3.

Common Stocks carried at market value -Common stocks consist principally of investments in common stocks of publicly traded companies, privately traded securities, as well as common stock mutual fund shares. The fair values of most publicly traded common stocks are based on quoted market prices in active markets for identical assets and are classified within Level 1 in the fair value hierarchy. Estimated fair values for most privately traded equity securities are determined using discounted cash flow, earnings multiple and other valuation models that require a substantial level of judgment around inputs and therefore are classified within Level 3. The fair values of common stock mutual fund shares that transact regularly (but do not trade in active

markets because they are not publicly available) are based on transaction prices of identical fund shares. The fair values of common stocks are based on prices obtained from independent pricing services. These prices are then validated for reasonableness against recently traded market prices. Accordingly, these securities are generally classified within Level 2 in the fair value hierarchy.

Derivative Instruments - Derivatives are recorded at fair value either as assets, within "Derivatives," or as liabilities, within "Miscellaneous liabilities: Derivatives." The fair values of derivative contracts can be affected by changes in interest rates, foreign exchange rates, commodity prices, credit spreads, market volatility, expected returns, non-performance risk ("NPR"), liquidity and other factors. For derivative positions included within Level 3 of the fair value hierarchy, liquidity valuation adjustments are made to reflect the cost of exiting significant risk positions, and consider the bid-ask spread, maturity, complexity, and other specific attributes of the underlying derivative position.

The Company's exchange-traded futures include Treasury futures and equity futures. Exchange-traded futures and options are valued using quoted prices in active markets and are classified within Level 1 in the fair value hierarchy.

The majority of the Company's derivative positions are traded in the OTC derivative market and are classified within Level 2 in the fair value hierarchy. OTC derivatives classified within Level 2 are valued using models that utilize actively quoted or observable market input values from external market data providers, third-party pricing vendors and/or recent trading activity. The Company's policy is to use mid-market pricing in determining its best estimate of fair value. The fair values of most OTC derivatives, including interest rate and cross-currency swaps, currency forward contracts, single name credit default swaps, and "to be announced" ("TBA") forward contracts on highly rated mortgage-backed securities issued by U.S. government sponsored entities are determined using discounted cash flow models. The fair values of European style option contracts are determined using Black-Scholes option pricing models. These models' key inputs include the contractual terms of the respective contract, along with significant observable inputs, including interest rates, currency rates, credit spreads, equity prices, index dividend yields, NPR, volatility and other factors.

The vast majority of the Company's derivative agreements are with highly rated major international financial institutions. To reflect the market's perception of its own and the counterparty's NPR, the Company incorporates additional spreads over London Interbank Offered Rates ("LIBOR") into the discount rate used in determining the fair value of OTC derivative assets and liabilities that are not otherwise collateralized.

Derivatives classified as Level 3 include structured products. These derivatives are valued based upon models, such as Monte Carlo simulation models and other techniques that utilize significant unobservable inputs. Level 3 methodologies are validated through periodic comparison of the Company's fair values to external broker-dealer values.

b. NPR is the risk that financial obligations sill not be fulfilled by the counterparty, SSAP No. 100 rejects consideration of NPR for fair value calculations of liabilities, including derivative liabilities. D. The Company did not have any assets or liabilities that were not practicable to value at fair value as of December 31, 2016.

Bonds: Fixed Maturities (excluding NAIC 6 rated Bonds) - The fair values of public fixed maturity securities are generally based on prices from third-party pricing services, which are reviewed for reasonableness; however, for certain public fixed maturity securities and investments in private placement fixed maturity securities, this information is either not available or not reliable. For these public fixed maturity securities, the fair value is based on indicative quotes from brokers, if available, or determined using a discounted cash flow model or internally-developed values. For private fixed maturities, fair value is determined using a discounted cash flow model. In determining the fair value of certain fixed maturity securities, the discounted cash flow model may also use unobservable inputs, which reflect the Company's own assumptions about the inputs market participants would use in pricing the security.

Mortgage Loans - The fair value of commercial mortgage loans is based upon the present value of the expected future cash flows discounted at the appropriate U.S. Treasury rate, plus an appropriate credit spread for loans of similar quality, average life and currency. The quality ratings for these loans, a primary determinant of the appropriate credit spread and a significant component of the pricing process, are based on internally-developed methodology. Certain commercial mortgage loans are valued incorporating other factors, including the terms of the loans, the principal exit strategies for the loans, prevailing interest rates and credit risk.

Contract Loans - The Company's valuation technique for contract loans is to discount cash flows at the current contract loan coupon rate. Contract loans are fully collateralized by the cash surrender value of underlying insurance policies. As a result, the carrying value of the contract loans approximates the fair value.

Cash and Short-Term Investments - The Company believes that due to the short-term nature of certain assets, the carrying value approximates fair value. These assets include cash, cash equivalent instruments and certain short-term investments, which are recorded at amortized cost and are not securities.

Other Invested Assets - The estimated fair value of other invested assets is determined using the methodologies as described above for bonds, mortgage loans or short-term investments, including affiliated assets based on the nature of the investment. Excluded from the disclosure are those other invested assets that are not considered to be financial instruments subject to this disclosure including investments carried on the equity method.

Policyholder Account Balances & Separate Account Liabilities - Only the portion of policyholder account balances and separate account liabilities related to products that are investment contracts (those without mortality and morbidity risk) are reflected in the table above. For fixed deferred annuities, single premium endowments, payout annuities and other similar contracts without life contingencies, fair values are generally derived using discounted projected cash flows based on interest rates that are representative of the Company's financial strength ratings, and hence reflect the Company's own NPR. For guaranteed investment contracts, funding agreements, structured settlements without life contingencies and other similar products, fair values are generally derived using discounted projected cash flows based on interest rates being offered for similar contracts with maturities consistent with those of the contracts being valued. For those balances that can be withdrawn by the customer at any time without prior notice or penalty, the fair value is the amount estimated to be payable to the customer as of the reporting date, which is generally the carrying value. For defined contribution and defined benefit contracts and certain other products, the fair value is the market value of the assets supporting the liabilities.

Notes Payable and Other Borrowing - The fair value of debt is generally determined by either prices obtained from independent pricing services, which are validated by the Company, or discounted cash flow models. Discounted cash flow models predominately use market observable inputs such as the borrowing rates currently available to the Company for debt and financial instruments with similar terms and remaining maturities. For commercial paper issuances and other debt with a maturity of less than 90 days, the carrying value approximates fair value.

Securities Sold Under Agreements to Repurchase - The Company receives collateral for selling securities under agreements to repurchase. Repurchase agreements are also generally short-term in nature, and therefore, the carrying amounts of these instruments approximate fair value.

Cash Collateral for Loaned Securities - Cash collateral for loaned securities represents the collateral received or paid in connection with loaning or borrowing securities, similar to the securities sold under agreement to repurchase above. Due to the short-term nature of these transactions, the carrying value approximates fair value.

Separate Account Liabilities-Investment Contracts - Only the portion of separate account liabilities related to products that are investments contracts are reflected in the table above. Separate account liabilities are recorded at the amount credited to the contractholder, which reflects the change in fair value of the corresponding separate account assets including contractholder deposits less withdrawals and fees; therefore, carrying value approximates fair value.

21. OTHER ITEMS

21A. Extraordinary Items

The Company did not have extraordinary items during 2016 or 2015.

21B. Troubled Debt Restructuring Debtors

The Company did not have any troubled debt restructuring during 2016 or 2015.

21C. Other Disclosures and Unusual Items

Through March 31, 2016, the Company reinsured the majority of its variable annuity living benefit guarantees to an affiliated reinsurance company, Pruco Reinsurance, Ltd. (“Pruco Re”). Effective April 1, 2016, the Company recaptured the risks related to its variable annuity living benefit riders that were previously reinsured to Pruco Re. In addition, the Company reinsured variable annuity base contracts, along with the living benefit riders, from its subsidiary Pruco Life Insurance Company of NJ ("PLNJ"). This reinsurance agreement covers new and in force business and excludes business reinsured externally. The product risks related to the reinsured business are being managed in the Company. In addition, the living benefit hedging program related to the reinsured living benefit riders is managed within the Company.

For the coinsurance component of the reinsurance agreement with PLNJ, the Company received invested assets of approximately $0.7 billion and established reserves of $0.7 billion. For the Modified coinsurance (“Modco”) component of the reinsurance agreement, the initial Modco transactions were reported on a net basis on the Summary of Operations for both the ceding and assuming companies. The Modco reserve balance on the effective date of this new reinsurance agreement was $8.4 billion.

During the second quarter of 2016, a trust was established for the benefit of certain policyholders related to a reinsurance agreement between the Company and an affiliate. Total assets related to this new trust arrangement of $1.2 billion were on deposit with trustees as of December 31, 2016.

On January 1, 2015, the Company entered into a reinsurance agreement with its subsidiary PLIC, in which the Company reinsured substantially all of the outstanding liabilities of its regulatory closed block (the “Closed Block”), primarily on a coinsurance basis. The only exceptions to the 100% coinsurance arrangement are as follows (1) the policyholder dividend liability which will be reinsured from the Company to PLIC on a 100% modified coinsurance basis (2) 10% of the Closed Block’s New York policies, which will be retained by the Company on both the coinsurance and modified coinsurance agreements; and (3) certain Closed Block policies that were previously reinsured externally. In connection with this reinsurance transaction, the Company ceded approximately $58 billion of assets into a newly established statutory guaranteed separate account of PLIC. Concurrently, the Company ceded approximately $5 billion of assets to PLIC to support the securities lending program. The Closed Block is a regulatory mechanism that consists of Prudential Insurance’s liabilities for certain participating individual life insurance policies and annuities issued in the United States that were, together with certain assets, allocated to the Closed Block in an amount that has been determined to produce cash flows which, together with revenues from policies included in the Closed Block, are expected to be sufficient to support obligations and liabilities relating to these policies, including provision for payment of benefits, certain expenses, and taxes and to provide for continuation of the Closed Block policyholder dividend scales in effect in 2000, assuming experience underlying such scales continues.

Also effective January 1, 2015, the Company recaptured existing agreements whereby the Company reinsured 90% of the Closed Block’s long-term risk under modified coinsurance agreements and reinsured 90% of the Closed Block’s short-term risk with its captive reinsurance subsidiary, NJCAP on a coinsurance basis. Concurrently, NJCAP cancelled its $2 billion letter of credit facility it had entered into in connection with the reinsurance arrangement.

As a result of an agreement with the New York State Department of Financial Services (“NY DFS”) regarding the Company's reserving methodologies for certain variable annuity and life insurance products, the Company holds additional statutory reserves on a New York basis, which reduces its New York statutory surplus. The Company is not domiciled in New York, and these changes do not impact statutory reserves reported in the Company’s state of domicile, or any states other than New York, and therefore do not impact its RBC ratio; however, the agreed reserve methodologies may require the Company to hold additional New York statutory reserves in the future. If the Company were required to establish material additional reserves on a New York statutory accounting basis or post material amounts of additional collateral with respect to annuity or insurance products, its ability to deploy capital held within the Company for other purposes could be affected.

The NY DFS issued a proposed new cybersecurity regulation in September 2016 and a revised proposal in December 2016. The regulation would require financial institutions regulated by NY DFS, including the Company, to establish a cybersecurity

program. The regulation includes specific technical safeguards as well as requirements regarding governance, incident planning, data management, system testing and regulator notification. The regulation goes into effect on March 1, 2017, subject to any further revisions that may arise as part of the comment process. The Company is taking steps to comply with the regulation.

Claim reserves for Group Long Term Disability contained in Exhibit 6 are discounted at interest rates ranging from 3.0% to 6.75%. For non-buyout claims, the interest rate is based on the date of disability. For buyout claims, the interest rate is based on the effective date of the buyout. Group Long Term Disability reserves are calculated using the 1987 CGDT Table modified with the Pru Basic 2007 Claim Termination Table.

Metlife Long Term Care active life reserves are using 1983 GAM mortality table and interest rates ranging from 3.5% to 5.5%. For Disable Life Reserve they are using Metlife Termination Experience and interest rates ranging from 3.5% to 4.0%.

Through December 31, 2014, the Company maintained a reinsurance arrangement with a captive reinsurance subsidiary, Prudential New Jersey Captive Insurance Company ("NJCAP"), domiciled in New Jersey, whereby the New Jersey captive reinsured 90% of the short-term risks of the Company's Closed Block Business. These short-term risks represent the impact of variations in experience of the Closed Block that are expected to be recovered over time as a result of corresponding adjustments to policyholder dividends. The reinsurance arrangement was intended to alleviate the short-term statutory surplus volatility within the Company resulting from the Closed Block Business, including volatility caused by the impact of any unrealized mark-to-market losses and realized credit losses within the investment portfolio of the Closed Block. NJCAP maintained a $2 billion letter of credit facility with certain financial institutions to support its funding obligations under the reinsurance arrangement, and PFI guaranteed all obligations of NJCAP under the facility. Effective January 1, 2015, this reinsurance arrangement was recaptured, and NJCAP terminated the related letter of credit facility on January 2, 2015. This captive structure is no longer necessary due to the reinsurance of the Company's Closed Block to Prudential Legacy Insurance Company of New Jersey ("PLIC"), effective January 1, 2015.

As of December 31, 2016 there was $0 of forward commitments not in the nature of derivative instruments included in "Bonds".

The Company had no cash deposits that were held in an escrow account and as such would not have been reported in the financial statements as of December 31, 2016.

The Company elected to use rounding in reporting amounts in the pages, exhibits, and schedules except for a few schedules where truncation was used. The amounts in this statement pertain to the entire Company business including, as appropriate, Separate Account business.

21G. Retained Assets

The Company offers retained asset accounts, called Alliance Accounts (the "Account" or "Accounts"), as a settlement option available to beneficiaries when an insured dies. The beneficiary is provided information at the time of claim about each of various settlement options available and provided the opportunity to select any of the available settlement options. For most products, if the beneficiary does not select a settlement option, they are permitted an Account in most states as provided by applicable state law. The Company generally offers the Accounts for all individual and group life insurance and non-custodial annuity contract beneficiaries when the death benefit proceeds payable are $5,000 or greater.

When an Account is opened the beneficiary receives a book of drafts, similar to a checkbook. The beneficiary owns the Account with the Company in full and can access the death benefit proceeds immediately by writing a draft for any amount desired, up to and including the full death benefit.

The Accounts earn interest immediately when established. The interest is accrued daily, compounded daily and credited every month and is accrued until all funds are with drawn. The interest rate may change without notice, but will not change more often than once a month. Some Accounts may be subject to certain minimum interest rates. The interest rate credited to Accounts may be more or less than the rate the Company earns on the funds. During 2016, interest rates credited to Accounts ranged from 0.50% to 3.50%.

There are no recurring fees for the maintenance or administration of an Account. Fees are only paid for special services such as returned drafts ($10 per draft), stop payment requests ($12 per draft) and draft or statement copy requests ($2 per draft or statement).

Amounts attributable to the Accounts are included in "Liability for deposit–type contracts" on the Statement of Liabilities, Surplus and Other Funds and in "Supplemental Contracts" on Exhibit 7 - "Deposit-type Contracts".

Beginning in 2014, the Company will be subject to an annual fee under section 9010 of the Affordable Care Act ("ACA"). This annual fee will be allocated to individual health insurers based on the ratio of the amount of an entity's net premiums written for health insurance for any U.S. health risk during the preceding calendar year to the aggregate amount of health insurance for any U.S. health risk that is written during the preceding year. For the year-ended December 31, 2016, the Company had health insurance premiums subject to the ACA assessment of $3,130,247. However, because net premiums written in 2016 were less than $25 million, no fee is required. As such, there is no expected impact to risk based capital.

NOTES TO FINANCIAL STATEMENTS

23G. Ceding Entities That Utilize Captive Reinsurers To Assume Reserves Subject to the XXX/AXXX Captive Framework

On December 16, 2014, the NAIC adopted a new actuarial guideline, AG 48. Specifically, AG 48 prescribes an actuarial method to determine the portion of the assets held by captive reinsurance companies to support reserves for certain term and universal life policies that must be a "primary security". AG 48 provides that reserves in excess of those calculated with the prescribed actuarial method may be supported or financed with a broader range of assets, referred to as "other security". The requirements in AG 48 became effective on January 1, 2015, and apply in respect of term and universal life insurance policies written from and after January 1, 2015, or written prior to January 1, 2015, but not included in a captive reserve financing arrangement as of December 31, 2014. While the Company does not have any ceded business subject to AG 48 requirements, certain of the Company's insurance subsidiaries cede a portion of statutory reserves for term and universal life policies to captive reinsurance companies and are subject to AG 48. As of December 31, 2016, primary securities held in trusts for the benefit of these subsidiaries were sufficient to meet the required level of primary securities for AG 48 covered business. In addition, as of December 31, 2016, captive reinsurance companies assuming AG 48 covered business did not have any risk-based capital shortfalls.

Life and Annuity Reserves

(1) The reserve for waiver of the deduction of deferred fractional premiums upon death of the insured, and for return of a portion of final premium for periods beyond the date of death is at least as great as that computed using the minimum standards of mortality, interest and valuation method, taking into account the aforementioned treatment of premiums. The Company does not promise surrender values in excess of the legally computed reserves.

(2) Reserves on policies issued at or subsequently subject to a premium for extra mortality or otherwise issued on lives classed as substandard for the plan of contract issued or on special class lives, including paid-up insurance, are reported in Section A of Exhibit 5 according to mortality and interest bases applicable to the respective years of issue. In addition, an extra mortality reserve is held for ordinary life insurance policies classed as group conversions, or otherwise substandard, equal to the excess, if any, over a basic reserve, of a substandard reserve based on mortality rates appropriately increased over the standard class mortality rates. For all other such policies, the extra mortality reserve is one-half the appropriate net additional premium. Weekly premium policies issued at ages higher than true ages are valued according to the higher ages, as are Ordinary second-to-die policies.

The Tabular Cost (Page 7, Line 9) has been determined by formula as described in the instructions for Page 7 except for certain variable and universal life insurance policies for which tabular cost has been determined from the basic data for the calculation of policy reserves.

(5) For the determination of Tabular Interest on funds not involving life contingencies for each valuation rate of interest, the tabular interest is calculated as one hundredth of the product of such valuation rate of interest times the mean of the amount of funds subject to such valuation rate of interest held at the beginning and end of the year of valuation.

(6) As of December 31, 2016, the change in reserves due to a change in valuation basis, for life and annuity reserves, was a decrease of $0 which was due to the following:

34B. General Nature and Characteristics of Separate Accounts

Separate Accounts assets and liabilities represent segregated funds, which are administered for pension and policyholders.
