# NII Holdings, Inc. Reconciliations of Non-GAAP Financial Measures for 2017

The tables below include financial information prepared in accordance with accounting principles generally accepted in the United States, or GAAP, as well as other financial measures referred to as non-GAAP financial measures. These non-GAAP financial measures should be considered in addition to, but not as a substitute for, the information prepared in accordance with GAAP.

(1) Consolidated operating income before depreciation and amortization, or OIBDA, represents operating income before depreciation and amortization expense. Consolidated adjusted operating income before depreciation and amortization, or adjusted OIBDA, represents consolidated operating income before depreciation expense, amortization expense, material non-cash asset impairments, severance costs associated with publicly announced restructuring plans and other material non-recurring or unusual charges. Consolidated adjusted OIBDA margin represents adjusted OIBDA divided by total operating revenues and consolidated OIBDA margin are presents OIBDA divided by total operating revenues. Consolidated OIBDA, consolidated adjusted OIBDA, consolidated adjusted OIBDA margin and consolidated adjusted OIBDA margin are not measurements under accounting principles generally accepted in the United States, may not be similar to consolidated OIBDA, consolidated adjusted OIBDA margin and consolidated adjusted OIBDA margin measures of other companies and should be considered in addition to, but not as substitutes for, the information contained in our statements of operations. We believe that consolidated OIBDA, consolidated adjusted OIBDA, consolidated OIBDA margin and consolidated OIBDA margin provide useful information to investors because they are indicators of our operating performance, especially in a capital intensive industry such as ours, since they exclude items that are not directly attributable to ongoing business operations. Consolidated OIBDA, consolidated adjusted OIBDA margin and consolidated adjusted OIBDA margin and consolidated adjusted OIBDA margin can be reconciled to our consolidated statements of operations as follows (in thousands, except for margins):

#### a. Consolidated

(2) Average monthly revenue per subscriber unit in service, or ARPU, is an industry term that measures service revenues, which we refer to as subscriber revenues, per period from our customers divided by the weighted average number of subscriber units in commercial service during that period. ARPU is not a measurement under accounting principles generally accepted in the United States, may not be similar to ARPU measures of other companies and should be considered in addition, but not as a substitute for, the information contained in our statements of operations. We believe that ARPU provides useful information concerning the appeal of our rate plans and service offerings and our performance in attracting and retaining high value customers. Other revenue includes revenues for such services as roaming, handset maintenance, cancellation fees, analog and other. ARPU can be calculated and reconciled to our consolidated statement of operations as follows (in thousands, except ARPU):

<sup>(3)</sup> Cost per gross add, or CPGA, is an industry term that is calculated by dividing our selling, marketing and handset and accessory subsidy costs, excluding costs unrelated to initial customer acquisition, by our new subscribers during the period, or gross adds. CPGA is not a measurement under accounting principles generally accepted in the United States, may not be similar to CPGA measures of other companies and should be considered in addition, but not as a substitute for, the information contained in our statements of operations. We believe CPGA is a measure of the relative cost of customer acquisition. CPGA can be calculated and reconciled to our consolidated statements of operations as follows (in thousands, except CPGA):

(4) Cash cost per handset/user, or CCPU, represents the sum of cost of service, general and administrative expenses and customer retention and other costs divided by average handsets in service during the period and divided by the number of months in the period. CCPU is not a measurement under accounting principles generally accepted in the United States, may not be similar to CCPU measures of other companies and should be considered in addition to, but not as a substitute for, the information contained in our statements of operations. We believe CCPU is a measure of the recurring costs we incur on a monthly basis to provide service to our subscribers. Consolidated CCPU can be reconciled to our consolidated statements of operations as follows (in thousands, except CCPU):

(5) The following table shows the impact of changes in foreign currency exchange rates on certain financial measures for the three and twelve months ended December 31, 2016 compared to the same periods in 2017 by (i) adjusting the relevant measures for the three and twelve months ended December 31, 2016 to levels that would have resulted if the average foreign currency exchange rates for the three and twelve months ended December 31, 2016 were the same as the average foreign currency exchange rates that were in effect for the three and twelve months ended December 31, 2017; and (ii) comparing the actual and adjusted financial measures for the three and twelve months ended December 31, 2016 to the similar financial measures for the three and twelve months ended December 31, 2017 to show the percentage change in those measures before and after taking those adjustments into account. The amounts reflected in the following table for operating income before depreciation and amortization on a consolidated basis and segment earnings for Nextel Brazil, before the adjustments for changes in foreign currency exchange rates, are based on the calculations contained elsewhere in these non-GAAP reconciliations for the three and twelve months ended December 31, 2017 and 2016. The average foreign currency exchange rates for each of the relevant currencies during each of the three and twelve months ended December 31, 2017 and 2016 are included in the notes to the table below. The information reflected in the following table is not a measurement under accounting principles generally accepted in the United States and should be considered in addition to, but not as a substitute for, the information contained in our statements of operations. We believe that these calculations provide useful information concerning our relative performance for the three and twelve months ended December 31, 2017 compared to the same periods in 2016 by removing the impact of the significant difference in the average foreign currency exchange rates in effect for those periods.

NM-Not Meaningful

(1) The "4Q 2016 Normalized" and "YTD 2016 Normalized" amounts reflect the impact of applying the average foreign currency exchange rates for the three and twelve months ended December 31, 2017 to the operating revenues earned in foreign currencies and to the other components of each of the actual financial measures shown above for the three and twelve months ended December 31, 2016, other than certain components of those measures consisting of U.S. dollar-based operating expenses, which were not adjusted. The amounts included under the columns "4Q 2016 Normalized" and "YTD 2016 Normalized" reflect the amount determined by adding the "4Q 2016 Adjustment" and "YTD 2016 Adjustment" amounts calculated as described in the preceding sentence to the "4Q 2016 Actual" and "YTD 2016 Actual" amounts and reflect the impact of the year-over-year change in the average foreign currency exchange rates on each of the financial measures for the three and twelve months ended December 31, 2017. The average foreign currency exchange rates for each of the relevant currencies during the three and twelve months ended December 31, 2017 and 2016 for purposes of these calculations were as follows:

	Three Months En	ded December 31,	Year Ended December 31,			
	2017	2016	2017	2016		
Brazilian real	3.25	3.29	3.19	3.49		

<sup>(2)</sup> The percentage amounts in these columns reflect the better, or B, or worse, or W, growth rates for each of the financial measures comparing the amounts in the "4Q 2017 Actual" and "YTD 2017 Actual" columns with those in the "4Q 2016 Actual" and "YTD 2016 Actual" columns.

- (3) The percentage amounts in these columns reflect the better, or B, or worse, or W, growth rates for each of the financial measures comparing the amounts in the "4Q 2017 Actual" and "YTD 2017 Actual" columns with those in the "4Q 2016 Normalized" and "YTD 2016 Normalized" columns.
- (6) Operational free cash burn is an industry term that represents all of the Company's cash spending, with the exception of payments related to debt principal and interest, cash returned from escrow in connection with the sale of Nextel Mexico and cash recovered from certain performance bonds relating to the Company's obligations to deploy its WCDMA spectrum in Brazil. Operational free cash burn is not derived from or based on any measurement under accounting principles generally accepted in the United States but is instead calculated through the Company's cash forecasting process. For this reason, we believe that it would require unreasonable efforts to provide a quantitative reconciliation of this term.
