# HTC CORPORATION Fiscal 2013 Business Report

Faced with increasingly intense competitive pressure in the global smartphone market, HTC Corporation (HTC), has, in the past year, continued to allocate resources to product development, technological innovation, and marketing, in order to satisfy consumer needs and at the same time solidify HTC's core developmental ability.

2012 saw HTC reach its 15th anniversary, marking an important milestone. In February, at Mobile World Congress (MWC) held in Barcelona, HTC started a camera and audio revolution with the announcement of its One series of smartphones. These smartphones introduce new technological advances such as "amazing camera" and "authentic sound," bringing consumers a brand new user experience. In addition, in order to meet the needs of different consumers, HTC has successfully rolled out a variety of smartphones such as the DROID DNA, HTC J, and HTC Butterfly that deliver superior performance and eye-catching, user-focused designs. These smartphones were positively received by the market. In addition, HTC jointly launched with Microsoft the Windows Phone 8X by HTC and the Windows Phone 8S by HTC, which won the "red dot award: product design 2013®". HTC have worked closely with global telecom carriers to provide the same great experience across various mobile device platforms.

HTC celebrated its 15th anniversary in mid-June with the grand opening of its new Taipei headquarters with a broad range of global technology and telecom industry leaders in attendance. The new headquarters achieved LEED (Leadership in Energy and Environmental Design) Gold certification. With the implementation of an all-weather carbon reduction program and provision of a quality workplace, colleagues can maximize their creative enthusiasm and lofty dreams. In July, our CEO was invited to pass the Olympic torch in London, promoting the symbols of friendship, honor, peace, and the Olympic spirit of fair competition. On top of that, he was also able to publicize the concept of technological innovation at HTC, garnering international attention. In November, HTC reached a settlement with Apple, as both sides agreed to drop all patent litigation and signed a 10-year patent licensing contract. Both companies can now focus on product and research development.

At the end 2012, HTC released a corporate image advertisement. From a human perspective, employees were invited to perform in a film in order to convey HTC's positive attitudes and share with the masses the power which comes from the commitment to our dreams. HTC fully demonstrates the determination of our continued investment in research, innovation, and marketing. Facing stern competition in the 2013 smartphone market, HTC will utilize its substantial resources and strengths to exhibit stronger momentum.

#### Financial Performance

HTC gives consumers more choices by partnering with global technology leaders.

In events held in both London and New York in February of 2013, HTC launched its new flagship smartphone HTC One. This smartphone upturns prior experiences with mobile usage, and encompasses a seamless metal uni-body design. The new HTC One comes with the latest HTC Sense® that incudes BlinkFeed<sup>TM</sup>, which gives the user a real time dynamic homepage to access global and personal social network news. HTC Zoe<sup>TM</sup> shooting mode uses HTC's UltraPixel powered camera to bring image galleries to life. It redefines how people take pictures, play and share precious moments. In addition, HTC BoomSound<sup>TM</sup> provides the industry's best mobile audio experience, utilizing front-facing speakers and dedicated microphones. Add to that a Full HD screen, and users can immerse themselves in their music, movies, and games. In addition, the HTC Sense TV<sup>TM</sup> feature allows for the control of most TVs, box units, and receivers by transforming the smartphone into a remote control. By utilizing cloud services, users can watch TV shows now playing or their favorites.

After its announcement in London and New York, the new HTC One has been much discussed by the media and consumers.
