Agenda 1

Report from the Board of Directors on the Company’s operation and financial activities for the book year ended on 31 December 2015, as well as the approval for full release and discharge (acquit et de charge) to all members of the Board of Directors and the Board of Commissioners for the supervision and control during the year book.

1.1. Background

In compliance with Article 10 paragraph 4 point (a) and (b) and Article 10 paragraph 5 of the Company’s Articles of Association, and the Law No.40 year 2007 regarding the Limited Liabilities Company (“Company Law”).

1.2 Explanation of Board of Directors and Board of Commissioners

Against a backdrop of macroeconomic volatility, the Company delivered record earnings growth in 2015, backed by the strength of its business model and the resilience of its target market, Indonesia’s middle-income consumers.

The Company had to contend with several challenging economic headwinds during the year. Under pressure from a slowdown in China, plunging commodity prices and the continued weakening of the Rupiah, Indonesia’s GDP growth slowed to 4.7% in 2015. However, although consumer confidence was severely dented and overall consumption weakened, the Company’s target middle income segment was the least impacted by the turmoil.

Having targeted 10% Same-Store Sales Growth (SSSG) at the start of the year, we soon had to factor in a slowing economy, particularly in commodity-driven areas like Kalimantan, and revise our targets down. Even in this adverse environment, however, we managed to drive improvements in store productivity, and closed the year with a 6.8% same store sales growth.

Throughout 2015, we opened 11 new stores, a strong result in a year that saw very little expansion in the department store sector in general. This brings our network to 142 stores, giving us 931,700 square meters of retail space, an increase of 9.1% compared to the end of the previous year. We were particularly pleased to be able to open two new stores in Jakarta, as well as extending our footprint to four new cities.

The new store openings and productivity increases delivered sales of Rp 16,020 billion, growing 10.8% from Rp 14,460 billion in 2014. SSSG was 6.8%.

As a retailer, our sustained growth is also dependent on the presence of a prosperous, healthy society. We are therefore committed to seeing the communities in which we work grow and prosper. We believe that our store operations benefit the communities they serve by creating jobs and contributing to local economies. In addition, with a predominantly local supplier base, we are directly supporting the growth of the country's SME sector, which is one of the country's key engines of growth.

Throughout the year we continued to partner with local non-profit organizations on a range of education, health, social welfare and disaster relief programs throughout the country. Many of our people are also actively engaged in community outreach and support organized by our local employees' associations, and we are proud to support these initiatives.

On the environmental front, we are actively reducing our carbon footprint by installing LED lighting in all our new stores. This energy-saving technology not only contributes to reducing our emissions and improving our cost profile but also gives us the flexibility to create a more dynamic ambiance in our stores. Over the last two years, as part of our store refurbishment program, we have been retrofitting the traditional lighting fixtures in our existing stores with energy efficient LED lighting. We expect to retrofit the remaining stores and the distribution center by the end of 2016 to further reduce energy consumption.

As we look forward to 2016, we would also like express the Board's deep appreciation to those that have helped to deliver another strong year for Matahari, to the Board of Commissioners for their guidance, to the Board of Management for their expertise and skilful execution of our strategy, to our employees for their dedication and enthusiasm, and to all our customers, suppliers and business partners for continuing to trust us. We look forward to earning your continued support.

Rencana Kerja Tahun 2016

Although we expect the current macroeconomic challenges to persist into the early part of the year, we view this volatility as temporary, and we anticipate some improvement in the second half of 2016. Our strategies will therefore continue to focus on expanding our store network and meeting the needs of our customers. Going into 2016, Matahari will continue to see benefits from strong tailwinds that will keep us on course for future growth. Firstly, the growth in the middle income segment in Indonesia, in terms of disposable income as well as numbers, is driving consumption growth. Secondly, the trend of increasing urbanization backed up by infrastructure development, particularly in the eastern part of the country, is opening up new market potential, as is the ongoing shift from traditional to modern retail channels.

Alongside these positive trends, we have put in place several initiatives to improve operational efficiency over the last two years and will continue to optimize our operations going forward. We therefore envisage continued improvement in the performance of our existing stores and we are looking forward to adding 6 to 8 new stores to our network in 2016. As a result, we believe that we have enhanced our resilience in the event of a further deterioration in the economy, and are strongly positioned to take advantage of opportunities when the economic upturn gets under way.
