IDAHO GENERAL MINES APPOINTS GREGORY E. McClain AS VP BUSINESS DEVELOPMENT AND MARKETING AND ANDREW RUSSELL AS VP OF PROJECT DEVELOPMENT

LAKESWOOD, COLORADO – September 5, 2007, Idaho General Mines ([AMEX:GMO](#)) announced the appointment of Gregory E. McClain as Vice President Business Development and Marketing. In this position, Greg will be responsible for interacting with potential customers and strategic partners. Greg was most recently an Executive Vice President of Fabricated Products, Inc., a wholly owned subsidiary of the Doe Run Resources Corp. Previously, Greg oversaw the global marketing of Doe Run's concentrates and by-product metals. Earlier in his career, Greg worked in a variety of positions where he developed and modified steel alloys. Greg has a Bachelor of Science in Metallurgical Engineering and a Masters of Science in Engineering Management from the University of Missouri at Rolla.

Bruce D. Hansen, Chief Executive Officer, said, "With the Mt. Hope Bankable Feasibility Study now in hand, we need to progress our discussions with strategic partners as well as potential customers, many of whom have indicated an interest in long-term off-take arrangements. I am extremely pleased to have Greg join our team."

Additionally, Idaho General Mines has promoted Andrew Russell to Vice President of Project Development from Director of Projects and Operations. Andrew has been with Idaho General Mines over the past year leading the Mt. Hope and Hall-Tonopah project development. Prior to joining Idaho General, Andrew served as a contractor for the Company since 2005, providing technical support and market research.

* * *

Idaho General Mines is a U.S. based molybdenum mineral development, exploration and mining company listed on the American Stock Exchange under the symbol GMO. Our primary asset, the Mt. Hope project located in central Nevada, is considered one of the world's largest and highest grade molybdenum deposits. Combined with our second molybdenum property, the Hall-Tonopah project which is also located in central Nevada, our goal is to become the largest primary molybdenum producer by the middle of the next decade.
