

FUSION-io®

Unique Market Focus

Gary Smerdon, Chief Strategy Officer

February 6, 2014

Safe Harbor Disclosure

Note on Forward-looking Statements

Certain statements in this presentation may constitute "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934 and Section 27A of the Securities Act of 1933, including, but are not limited to, statements concerning our future plans, expectations, beliefs, intentions and prospects, financial guidance for our third fiscal quarter of 2014, our progress on, and effect of, our key technology and strategic initiatives, our sales execution efforts, our expectations regarding the market opportunity and our ability to execute our go-to-market strategy, expectations concerning our product portfolio and our strategic partnerships, and benefits and value of our products and solutions to our customers and end users. These statements are based on current expectations and assumptions regarding future events and business performance and involve certain risks and uncertainties that could cause actual results to differ materially from those contained, anticipated, or implied in any forward-looking statement, including, but not limited to, risks associated with changes in the demand for our products, our expectation that large and concentrated purchases by a limited number of customers will continue to represent a substantial majority of our revenue and our ability to sustain or increase our revenue from our large customers or offset the discontinuation of concentrated purchases by our larger customers with purchases by new or existing customers, the continued adoption by customers of our ioMemory platform products, growing our sales through OEMs, resellers and channel partners and maintaining our relationships with OEMs, resellers and channel partners, including the timely qualification of our products for promotion and sale by our OEMs, long and unpredictable sales cycles, changes in the competitive dynamics of our markets, including the potential for increased pressure on the pricing of our products, reduced gross margins, increased sales and marketing expenses, the potential that we or our customers may not realize the benefits we currently expect from our acquisitions of ID7 and NexGen Storage, our ability to develop or acquire new products to meet customer needs and expectations, including additional software solutions to be integrated with our storage memory products, our acquisition and strategic partner strategy and disruptions in our business, operations and financial results as a result of acquisitions and strategic partner relationships, as well as the risks inherent in the integration and combination of complex products and technologies from acquisitions, undetected errors, defects or security vulnerabilities in our products, worldwide economic conditions and the impact these conditions have on levels of spending on datacenter technology like ours, our ability to recruit and successfully hire new executive officers, and such other risks set forth in the registration statements and reports that Fusion-io files with the U.S. Securities and Exchange Commission, which are available on the Investor Relations section of our website at www.fusionio.com. You should not rely upon forward-looking statements as predictions of future events. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that the future results, levels of activity, performance or events and circumstances reflected in the forward-looking statements will be achieved or will occur. Fusion-io undertakes no obligation to update publicly any forward-looking statement for any reason after the date of this presentation.

Use of Non-GAAP Financial Information

This presentation includes a discussion of "non-GAAP financial measures" as that term is defined in Regulation G promulgated by the U.S. Securities and Exchange Commission. The most directly comparable GAAP financial measures and information reconciling these non-GAAP financial measures to the Company's financial results prepared in accordance with GAAP are provided on the company's investor relations website at <http://investor.fusionio.com> under "Financial Information."

The Next Wave of Application Acceleration

Solid State Era

Application Acceleration Value

“Google found an extra half second in search page generation time dropped traffic by 20%.”

“Amazon found every 100ms of latency cost them 1% in sales.”

“If a trading platform is 5 milliseconds behind the competition, it could lose millions in revenues per millisecond.”

Fusion-io has documented over 70 examples of delivering customer value through application acceleration www.fusionio.com/case-studies

Application Acceleration Across Segments

Application Acceleration For Hyperscale

NoSQL Database Consolidation

- ▶ 3-4x consolidation factor
- ▶ 3-6x reduction in latency
- ▶ Forcing SStables to memory not needed anymore
- ▶ ROI so far is 2.2x

Application Acceleration For Enterprise

SAP ERP

- ▶ 2.5x faster database transactions
- ▶ 3x faster SQL Server queries
- ▶ 12x faster database restore
- ▶ “Percentage of database time in average SAP dialog steps decreased about 20 to 30%.” —David Yu, Global Service Team

Application Acceleration For SME

Back Up Efficiency

- ▶ 4x footprint reduction
- ▶ 50% reduction in backup window
- ▶ “We literally cut nine hours off our backup window and eliminated the I/O contention with other applications. Fusion’s ioControl hybrid storage solution worked like a magic trick!” —Dave Bajic, IT Operations Manager

Investing in ISV Partnerships

Success with SAP HANA

Leveraging ISV Partnerships

- ▶ Thousands of MSSQL joint customers
- ▶ Deployed in all Microsoft Technology Centers Worldwide
- ▶ SQL Server 2014 launch partner
- ▶ SQL Partner Advisory Council member

- ▶ Over a thousand VMware deployments using Fusion-io
- ▶ vSAN partner supporting VMware early access customers
- ▶ VMware Horizon Fast Track member for ioControl and ioVDI

Competitive Position

The Future is Bright

- ▶ Flash is enabling the next big wave in application acceleration – huge opportunity
- ▶ Applications are evolving to harness this new power
- ▶ Fusion-io pioneered and continues to lead this new market
