

Credit Suisse 20th Annual Energy Summit

NYSE: KOS

February 2015

Andrew G. Inglis
Chairman & CEO

Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical facts, included in this presentation that address activities, events or developments that Kosmos Energy Ltd. ("Kosmos" or the "Company") expects, believes or anticipates will or may occur in the future are forward-looking statements. Without limiting the generality of the foregoing, forward-looking statements contained in this presentation specifically include the expectations of management regarding plans, strategies, objectives, anticipated financial and operating results of the Company, including as to estimated oil and gas in place and recoverability of the oil and gas, estimated reserves and drilling locations, capital expenditures, typical well results and well profiles and production and operating expenses guidance included in the presentation. The Company's estimates and forward-looking statements are mainly based on its current expectations and estimates of future events and trends, which affect or may affect its businesses and operations. Although the Company believes that these estimates and forward-looking statements are based upon reasonable assumptions, they are subject to several risks and uncertainties and are made in light of information currently available to the Company. When used in this presentation, the words "anticipate," "believe," "intend," "expect," "plan," "will" or other similar words are intended to identify forward-looking statements. Such statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond the control of the Company, which may cause actual results to differ materially from those implied or expressed by the forward-looking statements. Further information on such assumptions, risks and uncertainties is available in the Company's Securities and Exchange Commission ("SEC") filings. The Company's SEC filings are available on the Company's website at www.kosmosenergy.com. Kosmos undertakes no obligation and does not intend to update or correct these forward-looking statements to reflect events or circumstances occurring after the date of this presentation, whether as a result of new information, future events or otherwise, except as required by applicable law. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this presentation. All forward-looking statements are qualified in their entirety by this cautionary statement.

Cautionary Statements regarding Oil and Gas Quantities

The SEC permits oil and gas companies, in their filings with the SEC, to disclose only proved, probable and possible reserves that meet the SEC's definitions for such terms, and price and cost sensitivities for such reserves, and prohibits disclosure of resources that do not constitute such reserves. The Company uses terms in this presentation, such as "total un-risked resource potential," "total discovered," "net un-risked mean discovered resources," "net un-risked resource exposure," "de-risked plays," "defined growth resources," "de-risked prospectivity," "discovered resources," "potential," "gross resources" and other descriptions of volumes of reserves potentially recoverable that the SEC's guidelines strictly prohibit the Company from including in filings with the SEC. These estimates are by their nature more speculative than estimates of proved, probable and possible reserves and accordingly are subject to substantially greater risk of being actually realized. Investors are urged to consider closely the disclosures and risk factors in the Company's SEC filings, available on the Company's website at www.kosmosenergy.com.

Potential drilling locations and resource potential estimates have not been risked by the Company. Actual locations drilled and quantities that may be ultimately recovered from the Company's interest may differ substantially from these estimates. There is no commitment by the Company to drill all of the drilling locations that have been attributed these quantities. Factors affecting ultimate recovery include the scope of the Company's ongoing drilling program, which will be directly affected by the availability of capital, drilling and production costs, availability of drilling and completion services and equipment, drilling results, agreement terminations, regulatory approval and actual drilling results, including geological and mechanical factors affecting recovery rates. Estimates of reserves and resource potential may change significantly as development of the Company's oil and gas assets provides additional data.

What Differentiates Kosmos?

- **World-Class Production / Development Asset in Ghana**
 - Doubling gross production to >200 MBopd in next two years with high quality cash flow
- **Exploration Portfolio with both Scale and Quality**
 - Testing ~37 BBoe portfolio with 3-4 wells per year
 - Portfolio break-evens in \$30-50/bbl range
- **Self Funded Explorer**
 - \$1.9 Bn of liquidity, strong balance sheet and well-hedged production
- **Proven Management Team**

Growing reserve base with high margin cash flow

- **>1BBbl gross of high-value barrels**
 - ~125 Mmbbl produced through YE 2014
- **Delivered 2014 Goals:**
 - Grow Reserves – 336% RRR at YE 2014 ✓
 - Increase Production > 100 MBopd Gross ✓
 - Commence Gas Export ✓
 - TEN Development 50% complete ✓
 - MTA appraisal complete ✓
- **Top quartile fiscal terms**
 - ~\$20 cash breakeven for Jubilee
 - ~\$10/bbl operating costs

Ghana expected to deliver over 200 MBopd of production (gross) providing continued production and cash flow growth

- **Greater Jubilee (incl. MTA)**

- By YE 2015, testing FPSO capacity (>120 MBopd)
- Production plateau of 5-7 years

- **TEN Development**

- 50% complete
 - All 10 Phase 1 wells have been drilled
- First oil expected in 2H 2016
- FPSO capacity of 80 MBopd gross

Substantial Net Production Growth⁽¹⁾

(1) Net of royalties

Funding Long-Term Growth

Strong balance sheet and high quality cash flow organically funds development and transformational exploration program

Jubilee Production

- Long-life production plateau
- Significant reserve / production growth
- Low cost, efficient operations
- Steady, free cash flow

Strong Balance Sheet

Appraisal and Development

- High-quality, high-value projects
- TEN development underway
- MTA appraisal completed

Exploration

- Delivering our “Second Inning”
- Executing on high-impact portfolio
- Focus on high value, low cost barrels

Transformational Exploration Portfolio

Testing “Second Inning” portfolio with 3-4 petroleum system tests per year

- **Differentiated business model**

- High-volume, high-value barrels
- Disciplined execution

- **Focus on Geology and Geography**

- Exported the core Cretaceous theme
- Industry-leading position in Northwest Africa

- **~37 BBoe of potential gross, unrisks inventory**

- 3-4 tests per year

“Second Inning” Exploration Potential
(Unrisks BBoe)

1) Pending final government approval

Creating Value In a Low Price Environment

Focus on the lowest portion of the deepwater cost curve creates differentiated value

- Deepwater exploration can deliver sustained, industry-leading returns
 - In sustained lower price environment, expect break-evens in the \$30-50/bbl range
- Jubilee is a demonstration of our strategy in action

Top 400 Projects Cost Curve

Breakeven Price (in US\$/bbl)

Western Sahara – Aaiun Basin

1+ BBoe Al Khayr prospect results expected in early March

- ~22,000 km² position captures undrilled, Cretaceous age delta (~950 GOM blocks)
 - 12+ BBoe potential in multiple plays / fairways
- **Key Prospect – Al Khayr (formerly Gargaa)**
 - Stacked Cretaceous channels in four-way dip closure with AVO support

PROSPECT INVENTORY
(Gross Unrisked Resource Potential)

De-risked Follow-On Potential
Pmean 11.4 BBoe

16 Additional
Leads / Prospects

Targeted Interval

Mauritania / Senegal

Significant acreage position in proven working petroleum system

- ~45,000 km² contiguous position captures multiple undrilled, Cretaceous age, petroleum systems
 - 8+ BBoe potential in multiple plays / fairways
 - Equivalent to ~1900 GOM blocks
 - Down-dip of proven working petroleum system
 - Proven sources and reservoir
- Successful farm-out of 30% non-operating interest to Chevron
- Key Prospect tests in 2015 – Tortue & Marsouin

PROSPECT INVENTORY (Gross Unrisked Resource Potential)

De-risked Follow-On Potential
P_{mean} 6.1 BBoe

16 Additional
Leads / Prospects

Mauritania / Senegal Key Prospects

Two high potential prospects with AVO support to be tested in 2015

Tortue Prospect – 2.1BBoe
Cretaceous age fan with AVO support

 Targeted Interval

Marsouin Prospect – 0.3BBoe
Stacked, Cretaceous age channel with AVO support

 Targeted Interval

Self-Funded Explorer

Strength of business model provides a competitive advantage

- **Disciplined financial management**
 - **Diversified sources of capital**
 - YE 2014 Liquidity ~ \$1.9 Bn
 - **Strategic hedging program**
 - ~12MMBbls hedged through 2016¹
 - **Low leverage**
 - 0.3x LTM Net Debt/ EBITDAX
- **At \$50/bbl Brent, expect to exit 2015 with \$1.5Bn+ of liquidity²**

1) As of January 15, 2015
 2) Assumes refinancing of \$300 MM RCF
 3) 2015 CFO @ \$50/bbl

Investing Through the Cycle

2015 capital program continues strategic focus on Ghana development and high impact exploration

- **Ghana Capex - \$500MM**
 - Increase driven by additional TEN activity
- **Exploration Capex - \$300MM**
 - 4 high impact wells
 - Ongoing technical work in Senegal, Ireland, Portugal and Morocco

What Differentiates Kosmos?

- **World-Class Production / Development Asset in Ghana**
 - Doubling gross production to >200 MBopd in next two years with high quality cash flow
- **Exploration Portfolio with Scale *and* Quality**
 - Testing ~37 BBoe portfolio with 3-4 wells per year
 - Portfolio break-evens in \$30-50/bbl range
- **Self Funded Explorer**
 - \$1.9 Bn of liquidity, strong balance sheet and well-hedged production
- **Proven Management Team**
