

## **AZURE RECEIVES GPA AWARD FOR OUTSTANDING WORK SAFETY**

May 6, 2014 - Houston, T.X. – Azure Midstream Energy, LLC (“Azure”) was honored with the Gas Processors Association (GPA) Safety Award for outstanding work safety in 2013, at the recent 2014 GPA Convention in Dallas, Texas.

The company was awarded second place in Division III for zero “total cases incidence rate” (TCR), zero fatalities plus lost workdays incidence rate” (LTR) and 178,360 work hours.

“Ensuring that our people are safe in their work every day is our top priority at Azure,” said Azure President, I.J. “Chip” Berthelot II. “While we are pleased to receive this award from the GPA, and ensuring that our personnel safely return home to their families will be a continued focus for the company. Safety is something we must re-focus on every day.”

The GPA Safety Awards Program recognizes GPA member companies for outstanding safety performance in comparison with similar companies within the association's membership. U.S.-based and non-U.S. midstream operating companies compete and are recognized separately for the safety honors.

The GPA’s four award divisions are determined by a range of midstream operational work hours, from less than 50,000 to more than one million. The top two entries in each division are selected according to lowest "total cases incidence rate" (TCR), lowest "fatalities plus lost workdays incidence rate" (LTR) and highest "number of work hours reported."
