our strategy and operations, and a better than expected first half of 2016, we expect the fiscal year 2016 GMV to grow by over 60%, which is higher than our prior expectation of over 50%. Our core business saw significant improvement in profitability, mainly driven by the continuous optimization of our business model mix and improvements in our operational efficiency. We continue to review Maikefeng's operations and strategy. Excluding a one-time inventory write-down due to the restructuring of its direct sales business, Maikefeng's operating loss this quarter decreased dramatically on a sequential basis. We will continue to adjust Maikefeng's strategy to the evolving Chinese market and focus on improving its performance."

# **Second Quarter 2016 Financial Results**

**Total net revenues** were RMB700.3 million (US\$105.4 million), an increase of 35.3% from RMB517.6 million in the same quarter of last year. Maikefeng contributed RMB6.8 million (US\$1.0 million) to total net revenues, a decrease of 70.6% from RMB23.3 million in the same quarter of last year.

**Product sales revenue** was RMB460.0 million (US\$69.2 million), an increase of 18.2% from RMB389.1 million in the same quarter of last year. The increase was primarily due to the increased popularity of brand partners' products and increasingly effective promotional and marketing activities. Maikefeng contributed RMB4.6 million (US\$0.7 million) to product sales revenues, a decrease of 80.1% from RMB23.2 million in the same quarter of last year. The decrease was a result of Maikefeng's transition from a direct sales model to a marketplace-focused model.

**Services revenue** was RMB240.3 million (US\$36.2 million), an increase of 87.1% from RMB128.4 million in the same quarter of last year. The increase was primarily attributable to the rapid growth of the Company's non-distribution model and in particular growth in sales of apparel products sold by existing brand partners as they expand their online presence. Maikefeng contributed RMB2.2 million (US\$0.3 million) to services revenue, a significant increase from RMB0.1 million in the same quarter of last year.

**Total operating expenses** were RMB699.9 million (US\$105.3 million), compared with RMB512.9 million in the same quarter of last year.

- Cost of products was RMB412.0 million (US\$62.0 million), compared with RMB345.5 million in the same quarter of last year. The increase was primarily due to an increase in the volume of product sales from the Company's core brand e-commerce business. Maikefeng accounted for RMB32.3 million (US\$4.9 million) in cost of products, compared with RMB19.3 million in the same quarter of last year. The increase was mainly due to a one-time inventory write-down of RMB27.7 million as a result of the restructuring of Maikefeng's direct sales business.
- Fulfillment expenses were RMB110.1 million (US\$16.6 million), compared with RMB66.6 million in the same quarter of last year. The increase was primarily due to an increase in GMV contribution from the Company's consignment business, an increase in the percentage of total orders fulfilled by a premium delivery service provider, and an increase in warehouse rental expenses. Maikefeng accounted for RMB1.2 million (US\$0.2 million) in fulfillment expenses, compared with RMB4.3 million in the same quarter of last year.

- Sales and marketing expenses were RMB141.0 million (US\$21.2 million), compared with RMB73.5 million in the same quarter of last year. The increase was primarily due to an increase in promotional and marketing expenses associated with the Company-operated stores. Maikefeng accounted for RMB4.0 million (US\$0.6 million) in sales and marketing expenses, compared with RMB8.0 million in the same quarter of last year.
- Technology and content expenses were RMB21.6 million (US\$3.2 million), compared with RMB13.1 million in the same quarter of last year. The increase was primarily due to increases in technology-focused staff and project-based variable technological expenses from brand stores. Maikefeng accounted for RMB1.7 million (US\$0.3 million) in technology and content expenses, compared with RMB1.5 million in the same quarter of last year.
- General and administrative expenses were RMB19.5 million (US\$2.9 million), compared with RMB16.9 million in the same quarter of last year. The increase was primarily due to increases in professional service fees associated with being a publicly listed company. Maikefeng accounted for RMB0.4 million (US\$0.1 million) in general and administrative expenses, compared with nil during the same quarter of last year.

Excluding Maikefeng's direct impact on revenues and expenses, non-GAAP income from operations was RMB39.8 million (US\$6.0 million), a significant increase compared with RMB21.8 million in the same quarter of last year, and non-GAAP operating margin was 5.7%, compared with 4.4% in the same quarter of last year.

**Net income** was RMB1.5 million (US\$0.2 million), a significant increase from RMB51 thousand during the same quarter of last year. Basic and diluted net income attributable to ordinary shareholders per ADS were RMB0.03, compared with basic and diluted net income attributable to ordinary shareholders per ADS of RMB0.00, for the same period of 2015.

**Non-GAAP net income** <sup>6</sup> was RMB8.2 million (US\$1.2 million), an increase of 11.5% year-over-year. Basic and diluted non-GAAP net income attributable to ordinary shareholders per ADS <sup>7</sup> were RMB0.17 and RMB0.15, respectively, compared with basic and diluted non-GAAP net income attributable to ordinary shareholders per ADS of RMB0.28 and RMB0.24, respectively, for the same period of 2015.

As of June 30, 2016, the Company had RMB737.6 million (US\$111.0 million) of **cash, cash equivalents and short-term investment**, a decrease from RMB837.3 million as of December 31, 2015 due to the Company's share repurchase program, investment in logistics and office space. For the quarter ended June 30, 2016, net cash provided by operating activities was RMB60.3 million (US\$9.1 million).

#### **Use of Non-GAAP Financial Measures**

In evaluating the Company's business, the Company considers and uses non-GAAP net income/(loss) from operations, non-GAAP operating margin, non-GAAP net income/(loss), non-GAAP net margin, non-GAAP net income (loss) attributable to ordinary shareholders and non-GAAP net income (loss) attributable to ordinary shareholders per ADS, as supplemental measures to review and assess the Company's operating performance. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. Non-GAAP net income/(loss) from operations is net income/(loss) from operations excluding share-based compensation expenses. Non-GAAP operating margin is non-GAAP income from operations as a percentage of total net revenues. Non-GAAP net income/(loss) is net income/(loss) excluding share-based compensation expenses. Non-GAAP net margin is non-GAAP net income as a percentage of total net revenues. Non-GAAP net income (loss) attributable to ordinary shareholders is net income (loss) attributable to ordinary shareholders excluding share-based compensation expenses. Non-GAAP net income (loss) attributable to ordinary shareholders per ADS is non-GAAP net income (loss) attributable to ordinary shareholders divided by weighted average number of shares multiplied by three.

The Company presents the non-GAAP financial measures because they are used by the Company's management to evaluate the Company's operating performance and formulate business plans. Non-GAAP income/(loss) from operations and non-GAAP net income/(loss) enable the Company's management to assess the Company's operating results without considering the impact of share-based compensation expenses. The Company also believes that the use of the non-GAAP measures facilitate investors' assessment of the Company's operating performance.

The non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. The non-GAAP financial measures have limitations as analytical tools. One of the key limitations of using non-GAAP income/(loss) from operations and non-GAAP net income/(loss) is that they do not reflect all items of income and expense that affect the Company's operations. Share-based compensation expenses have been and may continue to be incurred in the Company's business and is not reflected in the presentation of non-GAAP income/(loss) from operations and non-GAAP net income/(loss). Further, the non-GAAP measures may differ from the non-GAAP measures used by other companies, including peer companies, and therefore their comparability may be limited.

The Company compensates for these limitations by reconciling the non-GAAP financial measures to the nearest U.S. GAAP performance measures, which should be considered when evaluating the Company's performance.
