POZEN Inc.
NOTES TO FINANCIAL STATEMENTS
(Unaudited)

1. Significant Accounting Policies

General

POZEN Inc. (“we” or “POZEN” or the “Company”) was incorporated in the State of Delaware on September 25, 1996 and is operating in a single reportable segment. The Company has been a pharmaceutical company committed to transforming medicine that transforms lives. Since inception, the Company has focused its efforts on developing products which can provide improved efficacy, safety or patient convenience in the treatment of acute and chronic pain and pain related conditions and has developed a portfolio of integrated aspirin therapies. Historically, the Company has entered into collaboration agreements to commercialize its product candidates. The Company’s licensing revenues include upfront payments, additional payments if and when certain milestones in the product’s development or commercialization are reached, and the eventual royalty payments based on product sales.

We decided to retain ownership of our PA product candidates which contain a combination of a proton pump inhibitor and enteric coated aspirin in a single tablet through the clinical development and pre-commercialization stage and our chief commercial officer was responsible for developing the commercialization strategy for these products and conducting all the required pre-commercialization activities. On September 3, 2013, we entered into an exclusive license agreement with sanofi-aventis U.S. LLC, or Sanofi US, for the commercialization of POZEN’s proprietary, investigational, coordinated-delivery tablets combining immediate-release omeprazole, a proton pump inhibitor, or PPI, and enteric-coated, or EC, aspirin in a single tablet, or (“PA”), including PA8140 and PA32540. Under the terms of the agreement, Sanofi US will have exclusive rights to commercialize all PA combinations that contain 325 mg or less of enteric-coated aspirin in the United States. Outside the United States, we intend to secure relationships with one or more commercial partners with relevant expertise to commercialize our future products globally.

With respect to future products we may develop, we have decided that we will no longer commit substantial resources to further drug development without a partner who agrees to pay the full cost of that development. Consistent with this model, we have reduced our R&D staff and other costs and expenses as our PA development program activities wind down and intend to continue to reduce staff that is no longer required to support our then current business activities. Our board of directors and management team continue to explore potential ways to return value to our stockholders. On November 21, 2013, our Board of Directors declared a special cash distribution of \$1.75 per share to all stockholders of record as of the close of business on December 11, 2013, with a payment date of December 30, 2013. This distribution represented a surplus of corporate cash and is accounted for as a return of capital to stockholders. We are committed to return as much cash to our stockholders as is prudent and may consider other cash distributions in the future.

Basis of Presentation

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial reporting and the instructions to Form 10-Q and do not include all of the information and footnotes required for complete financial statements. In the opinion of the Company’s management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of the results for the interim periods have been included. Operating results for the three and six months ended June 30, 2014 are not necessarily indicative of the results for the year ending December 31, 2014 or future periods. The accompanying financial statements should be read in conjunction with the Company’s audited financial statements and related notes included in the Company’s Annual Report on Form 10-K filed on March 6, 2014 and available on the website of the United States Securities and Exchange Commission (www.sec.gov). The accompanying balance sheet as of December 31, 2013 has been derived from the audited balance sheet as of that date included in the Form 10-K.

2. Summary of Significant Accounting Policies

Use of Estimates— The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts in the financial statements and accompanying notes. Actual results could differ from the estimates and assumptions used.

Accrued expenses, including contracted costs— Significant management judgments and estimates must be made and used in connection with accrued expenses, including those related to contract costs, such as costs associated with clinical trials. Specifically, the Company must make estimates of costs incurred to date but not yet paid for or not yet invoiced in relation to contracted, external costs. The Company analyzes the progress of product development, clinical trial and related activities, invoices received, amounts paid, and budgeted costs when evaluating the adequacy of the accrued liability for these related costs.

The Company believes that its current assumptions and other considerations used to estimate accrued expenses for the period are appropriate. However, determining the date on which certain contract services commence, the extent of services performed on or before a given date and the cost of such, paid and unpaid, involves subjective judgments and estimates and often must be based upon information provided by third parties. In the event that management does not identify certain contract costs which have begun to be incurred or under- or over-estimates the extent of services performed or the costs of such services, management adjusts costs during the period in which the information becomes available.

Accrued costs related to product development and operating activities, including clinical trials, based upon the progress of these activities covered by the related contracts, invoices received and estimated costs totaled \$0.9 million at June 30, 2014, and \$1.3 million at June 30, 2013. The variance, at each of these ending periods, between the actual expenses incurred and the estimated expenses accrued was not material or significant.

Revenue Recognition— The Company records revenue under the following categories: sale of royalty rights and, licensing revenues consisting of royalty revenues and other licensing revenues.

On November 23, 2011, the Company entered into a Purchase and Sale Agreement, or the Purchase Agreement, with CPPIB Credit Investments Inc., or CII, pursuant to which the Company sold, and CII purchased, its right to receive future royalty payments arising from U.S. sales of MT 400, including *Treximet*® (sumatriptan/naproxen sodium). Under the Purchase Agreement, the Company received a purchase price of \$75 million and will receive a twenty percent (20%) interest in any royalties received by CII relating to the period commencing on April 1, 2018. No sale of royalty rights occurred subsequent to 2011.

In September 2013, the Company announced the signing of an exclusive license agreement for the commercialization of its PA products, including, PA8140 and PA32540. Under the terms of the agreement, Sanofi will have exclusive rights to commercialize all PA combinations that contain 325 mg or less of enteric-coated aspirin in the United States. The Company received an upfront payment of \$15.0 million which is being amortized through first quarter 2015. This revenue amortization is included within the license revenue in the accompanying statements of comprehensive income (loss). The revenue for the three and six months ended June 30, 2014 was \$2.0 million and \$5.0 million, respectively.

With regard to licensing revenues, the Company's licensing agreements have terms that include royalty payments based on the manufacture, sale or use of the Company's products or technology. VIMOVO® (naproxen and esomeprazole magnesium) delayed release tablets royalty revenue has been recognized when earned, as will any other future royalty revenues. For VIMOVO or those future arrangements where royalties are reasonably estimable, the Company recognizes revenue based on estimates of royalties earned during the applicable period and reflects in future revenue any differences between the estimated and actual royalties. These estimates are based upon information reported to the Company by its collaboration partners and is included within licensing revenue in the accompanying statements of comprehensive income (loss). During the three and six months ended June 30, 2014, the Company recognized \$5.4 million and \$10.0 million, respectively, for VIMOVO royalty revenue. During the three and six months ended June 30, 2013, the Company recognized \$1.7 million and \$3.1 million, respectively, for VIMOVO royalty revenue.

Also, with regard to the licensing revenues, the Company's licensing agreements have had terms that include upfront payments upon contract signing and additional payments if and when certain milestones in the product's development or commercialization are reached. Historically, the non-refundable portion of upfront payments received under the Company's existing agreements is deferred by the Company upon receipt and recognized on a straight-line basis over periods ending on the anticipated date of regulatory approvals, as specified in the agreements relating to the product candidates, or the conclusion of any obligation on the part of the Company. If regulatory approvals or other events relating to our product candidates are accelerated, delayed or not ultimately obtained, then the amortization of revenues for these products is prospectively accelerated or reduced accordingly. Milestone payments along with the refundable portions of up-front payments are recognized as licensing revenue upon the achievement of specified milestones if (i) the milestone is substantive in nature and the achievement of the milestone was not reasonably assured at the inception of the agreement; and (ii) the fees are non-refundable. Any milestone payments received prior to satisfying these revenue recognition criteria are recorded as deferred revenue.

On March 21, 2011, the Company entered into a license agreement with Cilag GmbH International ("Cilag") a division of Johnson & Johnson, for the exclusive development and commercialization of MT 400 in Brazil, Colombia, Ecuador and Peru. Cilag's upfront payment of \$257,300, which is refundable under certain conditions, has been deferred until those conditions have been satisfied.

With regard to royalty revenues, royalty revenue from *Treximet* and VIMOVO is recognized when earned, as will any other future royalty revenues with respect to the manufacture, sale or use of the Company's products or technology. For *Treximet* and VIMOVO or those future arrangements where royalties are reasonably estimable, the Company recognizes revenue based on estimates

of royalties earned during the applicable period and reflects in future revenue any differences between the estimated and actual royalties. These estimates are based upon information reported to the Company by its collaboration partners.

Our statements of Comprehensive Income (Loss) for the three and six months ended June 30, 2014 and 2013 include the following licensing revenue:

	Three months ended June 30,		Six months ended June 30,	
	2014	2013	2014	2013
Royalty revenue	\$ 5,419,306	\$ 1,651,000	\$ 9,967,982	\$ 3,066,000
Licensing fee amortization	2,000,000	—	5,000,000	—
Total licensing revenue	<u>\$ 7,419,306</u>	<u>\$ 1,651,000</u>	<u>\$ 14,967,982</u>	<u>\$ 3,066,000</u>

Cash, Cash Equivalents, Investments and Concentration of Credit Risk — Cash is invested in open-ended money market mutual funds and interest-bearing investment-grade debt securities. Cash is restricted to the extent of a \$42,000 letter of credit in compliance with the terms of the Company's office lease. The Company considers all highly liquid investments with maturities of 90 days or less when purchased to be cash equivalents.

The Company invests in high-credit quality investments in accordance with its investment policy, which attempts to minimize the possibility of loss. Investments, other than investments considered to be cash equivalents, that have maturities of greater than 90 days and less than one year are classified as short-term and are considered to be available-for-sale and carried at fair value with unrealized gains and losses recognized in other comprehensive income (loss). Investment purchases and sales are recorded on their trade dates. Realized gains and losses are determined using the specific identification method. Marketable and non-marketable investments are evaluated on an on-going basis for market impairment. If the Company determines that a decline of any investment is other-than-temporary, the investment is written down to fair value. For the three months ended June 30, 2014 and 2013, the Company had \$6,800 and \$15,400, respectively, of interest, bond amortization and other income. For the six months ended June 30, 2014 and 2013, the Company has \$14,200 and \$40,400, respectively, of interest bond amortization and other income. As of June 30, 2014 and 2013, there were no investments in a significant unrealized loss position.

The money market mutual funds generally seek a higher level of current income that is consistent with the preservation of capital and the maintenance of liquidity. The funds generally are subject to maturity, quality, liquidity and diversification requirements which are designed to help money market funds maintain a stable share price of \$1.00. As a result, the funds normally invest in a diversified portfolio of high quality, short-term, dollar-denominated debt securities, including: securities issued or guaranteed as to principal and interest by the U.S. government or its agencies or instrumentalities; certificates of deposit, time deposits, bankers' acceptances and other short-term securities issued by domestic or foreign banks or thrifts or their subsidiaries or branches; repurchase agreements, including tri-party repurchase agreements; asset-backed securities; domestic and dollar-denominated foreign commercial paper and other short-term corporate obligations, including those with floating or variable rates of interest; and dollar-denominated obligations issued or guaranteed by one or more foreign governments or any of their political subdivisions or agencies.

Cash and cash equivalents include financial instruments that potentially subject the Company to a concentration of credit risk. Cash and cash equivalents are of a highly liquid nature and are held with high credit quality financial institutions and money market mutual fund managers. Cash held directly with financial institutions is insured up to \$250,000 per account and any excess amounts are uninsured. The counterparties to the Company's investment in interest-bearing corporate debt securities are various major corporations with high credit standings. There were no investments as of June 30, 2014.

Fair Value of Financial Instruments

Financial instruments consist of cash and cash equivalents, short-term investments, accounts receivable and accounts payable. The carrying values of these amounts approximate the fair value due to their short-term nature.

Fair Value Measurement

The Company defines fair value ("FV") as the price that would be received to sell an asset or paid to transfer a liability ("the exit price") in an orderly transaction between market participants at the measurement date. The FV hierarchy for inputs maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. The Company uses the following hierarchy of inputs to measure FV:

- Level 1 - quoted prices in active markets for identical assets and liabilities.

- Level 2 - observable inputs other than quoted prices in active markets for identical assets and liabilities, including quoted prices in active markets for instruments that are similar or quoted prices in markets that are not active for identical or similar instruments and model-derived valuations in which all significant inputs and value drivers are observable in active markets.
- Level 3 - unobservable inputs that are significant to the overall valuation, for which there is little or no market data available and which require the Company to develop its own assumptions.

The Company values investments using the most observable inputs available that are current as of the measurement date and classifies them according to the lowest level of inputs used. Observable inputs are inputs that market participants would use in pricing the asset or liability developed from market data obtained from independent sources. Unobservable inputs are inputs that reflect the Company's judgment concerning the assumptions that market participants would use in pricing the asset or liability developed from the best information available under the circumstances.

The Company targets investment principally in Level 1 and Level 2 cash equivalents and financial instruments and records them at FV. The Company did not rely on Level 3 input for valuation of investments at June 30, 2014 or December 31, 2013. The Company expects that the carrying values of cash equivalents will approximate FV because of their short maturities.

Accumulated Other Comprehensive Income (Loss) — Accumulated other comprehensive income (loss) is comprised of unrealized gains and losses on marketable securities and is disclosed as a component of stockholders' equity. The Company had no unrealized losses on its investments at June 30, 2014 and December 31, 2013.

Comprehensive income (loss) consists of the following components for the three and six months ended June 30, 2014 and 2013:

	Three months ended June 30,		Six months ended June 30,	
	2014	2013	2014	2013
Net income (loss)	\$ 2,999,457	\$ (3,987,996)	\$ 5,904,148	\$ (9,765,928)
Change in unrealized loss on marketable securities	—	—	—	3,253
Total comprehensive income (loss)	\$ 2,999,457	\$ (3,987,996)	\$ 5,904,148	\$ (9,762,675)

Stock-based Compensation— Stock-based compensation cost is estimated at the grant date based on the fair value of the award and is recognized as expense over the requisite service period of the award. The fair value of restricted stock awards is determined by reference to the fair market value of our common stock on the date of grant. We use the Black-Scholes model to value service condition and performance condition option awards. For awards with only service conditions and graded-vesting features, we recognize compensation cost on a straight-line basis over the requisite service period. For awards with performance conditions granted we recognize compensation cost over the expected period to achieve the performance conditions, provided achievement of the performance conditions are deemed probable.

Our Statements of Comprehensive Income (Loss) for the three and six months ended June 30, 2014 and 2013 include the following stock-based compensation expense:

	Three months ended June 30,		Six months ended June 30,	
	2014	2013	2014	2013
Research and development	\$ 148,420	\$ 117,370	\$ 289,602	\$ 271,517
General and administrative	409,346	780,100	1,024,199	1,369,338
Total expense	\$ 557,766	\$ 897,470	\$ 1,313,801	\$ 1,640,855

Unrecognized stock-based compensation expense, including time-based options, performance-based options and restricted stock awards, expected to be recognized over an estimated weighted-average amortization period of 2.1 years, was \$3.6 million at June 30, 2014.

Stock Plans

On November 20, 1996, the Company established a Stock Option Plan (the "Option Plan") and authorized the issuance of options for up to 1,605,310 shares of common stock to attract and retain quality employees and to allow such employees to participate

in the growth of the Company. In June 2000, the stockholders approved the POZEN Inc. 2000 Equity Compensation Plan (the “2000 Plan”). The 2000 Plan became effective upon the completion of the Company’s initial public offering in October 2000, after which time no further grants were made under the Option Plan. At adoption, the 2000 Plan authorized up to 3,000,000 shares of common stock for issuance under the terms of the 2000 Plan. In May 2004, the stockholders approved an amendment to and restatement of the 2000 Plan. The amendment to the 2000 Plan provided for an increase in the number of shares of common stock authorized for issuance under the 2000 Plan, from 3,000,000 to 5,500,000, or an increase of 2,500,000 shares. In addition, the amendment to the 2000 Plan limited the number of shares that may be issued pursuant to grants other than options under the 2000 Plan to 2,000,000 shares and made certain other clarifying changes. In June 2007, the stockholders approved the amendment and restatement of the 2000 Plan to, among other things, increase the number of shares authorized for issuance under the 2000 Plan from 5,500,000 to 6,500,000 shares and continue the various performance criteria for use in establishing specific vesting targets for certain awards under the 2000 Plan so as to qualify the compensation attributable to any such awards as performance-based compensation under Section 162(m) of the Internal Revenue Code of 1986, as amended and the promulgated thereunder, the Code.

In June 2010, our stockholders approved the POZEN Inc. 2010 Equity Compensation Plan, or the 2010 Plan. The 2010 Plan is a successor incentive compensation plan to the 2000 Plan and provides the Company with an omnibus plan to design and structure grants of stock options, stock units, stock awards, stock appreciation rights and other stock-based awards for selected individuals in our employ or service. The 2000 Plan was merged with and into the 2010 Plan and all grants outstanding under the 2000 Plan were issued or transferred under the 2010 Plan. No further grants will be made under the 2000 Plan.

The 2010 Plan provides for grants of incentive stock options, nonqualified stock options, stock awards, and other stock-based awards, such as restricted stock units and stock appreciation rights (“SARs”), to employees, non-employee directors, and consultants and advisors who perform services for us and our subsidiaries. The 2010 Plan authorizes up to 7,452,327 shares of common stock for issuance, which includes 2,000,000 shares of our common stock which are in excess of the number of shares previously reserved under the 2000 Plan. The maximum number of shares for which any individual may receive grants in any calendar year is 1,000,000 shares. The Compensation Committee of the Board of Directors, which administers the 2010 Plan, will determine the terms and conditions of options, including when they become exercisable. Neither our Board nor the Committee can amend the 2010 Plan or options previously granted under the Plan to permit a repricing of options or SARs, without prior stockholder approval. If options granted under the 2010 Plan expire or are terminated for any reason without being exercised, or if stock awards, performance units, or other stock-based awards are forfeited or otherwise terminate, the shares of common stock underlying the grants will again be available for awards granted under the 2010 Plan.

If there is any change in the number or kind of shares of company stock outstanding or if the value of outstanding shares of company stock is substantially reduced as a result of a spinoff or the Company’s payment of an extraordinary dividend or distribution, the 2010 Plan requires that an equitable adjustment be made to all outstanding grants to preclude dilution of rights and benefits under the plan. Therefore, as a result of the December 31, 2013 cash dividend distribution, a dividend equivalent was provided to all outstanding grants. The adjustments were in the form of additional RSUs to RSU holders or an adjustment to both the outstanding number of options and their strike price; all adjustments were made in compliance with Sections 409A and 424 of the Internal Revenue Code. The total number of outstanding time-based awards, performance-based awards and RSUs increased by 987,000 shares and is reflected as a distribution allocation in the tables that follow.

Time-Based Stock Awards

No time-based stock awards were issued during the six months ended June 30, 2014 and 25,000 awards were issued during the six months ended June 30, 2013. Historically, the fair value of each time-based award was estimated on the date of grant using the Black-Scholes option valuation model, which typically uses the following assumptions. The expected volatility rate was estimated based on an equal weighting of the historical volatility of POZEN common stock over approximately a six-year period. The expected term was based upon average historical terms to exercise. The risk-free interest rate was based on six-year U.S. Treasury securities. The pre-vesting forfeiture rates were based on historical rates and were periodically adjusted based upon actual experience.

A summary of the time-based stock awards as of June 30, 2014, and changes during the six months ended June 30, 2014, are as follows:

Time-Based Stock Awards	Underlying Shares (000s)	Weighted- Average Exercise Price	Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (000s)
Outstanding at December 31, 2013	4,315	\$ 6.82	4.3	\$ 8,553
Granted	—	—		
Exercised	(101)	5.40		
Forfeited or expired	(398)	8.28		

Outstanding at March 31, 2014	<u>3,816</u>	<u>6.70</u>	<u>4.4</u>	<u>\$ 8,162</u>
Exercisable at March 31, 2014	<u>3,289</u>	<u>\$ 7.15</u>	<u>3.9</u>	<u>\$ 5,987</u>
Vested or expected to vest at March 31, 2014	<u>3,737</u>	<u>\$ 6.70</u>	<u>4.4</u>	<u>\$ 7,992</u>
Granted	—	—		
Exercised	(547)	5.97		
Forfeited or expired	(6)	3.87		
Outstanding at June 30, 2014	<u>3,263</u>	<u>6.83</u>	<u>4.4</u>	<u>\$ 7,642</u>
Exercisable at June 30, 2014	<u>2,788</u>	<u>\$ 7.33</u>	<u>3.9</u>	<u>\$ 5,532</u>
Vested or expected to vest at June 30, 2014	<u>3,192</u>	<u>\$ 6.83</u>	<u>4.4</u>	<u>\$ 7,475</u>

The aggregate intrinsic value of options outstanding represents the pretax value (the period's closing market price, less the exercise price, times the number of in-the-money options) that would have been received by all option holders had they exercised their options at the end of the period. The exercise price of stock options granted during the three and six months ended June 30, 2014 and 2013 was equal to the market price of the underlying common stock on the grant date. A total of 648,992 stock options were exercised during the six months ended June 30, 2014 with an intrinsic value of \$1.4 million, and no stock options were exercised during the six months ended June 30, 2013 with an intrinsic value of \$48,000.

A summary of the time-based nonvested awards as of June 30, 2014, and changes during the six months ended June 30, 2014, are as follows:

	Underlying Shares (000s)	Weighted-Average Exercise Price
Nonvested outstanding at December 31, 2013	760	\$ 4.06
Granted	—	—
Forfeited or expired	—	—
Vested	(233)	4.47
Nonvested outstanding at March 31, 2014	<u>527</u>	<u>\$ 3.88</u>
Granted	—	—
Forfeited or expired	—	—
Vested	(52)	3.79
Restricted stock outstanding at June 30, 2014	<u>475</u>	<u>\$ 3.89</u>

Restricted Stock and Restricted Stock Units

For the six months ended June 30, 2014 and 2013, the Company recognized \$0.5 million and \$0.6 million, respectively, in compensation expense related to restricted stock units.

A summary of the restricted stock awards as of March 31, 2014, and changes during the three months ended March 31, 2014, are as follows:

	Underlying Shares (000s)	Weighted-Average Exercise Price
Restricted stock outstanding at December 31, 2013	747	\$ 6.22
Granted	188	8.65
Vested and released	(57)	5.32
Forfeited or expired	—	—
Restricted stock outstanding at March 31, 2014	<u>878</u>	<u>\$ 6.80</u>
Granted	37	8.61
Vested and released	(25)	5.42
Forfeited or expired	(4)	5.91
Restricted stock outstanding at June 30, 2014	<u>886</u>	<u>\$ 6.92</u>

As of June 30, 2014 there was an aggregate \$2.6 million of unrecognized compensation expense related to unvested restricted stock units. Of the aggregate amount, \$25,000 unrecognized compensation expense related to unvested restricted stock units under the

2011 award of 110,870 restricted stock units with a grant-date per-share fair value of \$4.60, \$665,000 unrecognized compensation expense related to unvested restricted stock units under the March 2013 award of 206,049 restricted stock units with a grant-date per-share fair value of \$5.91, \$1.5 million unrecognized compensation expense related to unvested restricted stock units under the March 2014 award of 187,539 restricted stock units with a grant-date per-share fair value of \$8.65 and \$297,000 unrecognized compensation expense related to unvested restricted stock units under the June 2014 award of 37,000 restricted stock units with a grant-date per-share fair value of \$8.61.

There were 368,168 unvested restricted stock units outstanding at June 30, 2014. There were 598,280 unvested restricted stock units outstanding at June 30, 2013. The total fair value of restricted stock that vested during the six months ended June 30, 2014 and 2013 was \$706,000 and \$163,000, respectively.

Performance-Based Awards

On May 6, 2008, pursuant to an incentive program (the “PN incentive program”) approved by the Compensation Committee of the Board of Directors of the Company, stock options were granted to all of the Company’s employees, including its executive officers, to purchase an aggregate of 281,433 shares of common stock. On September 10, 2008, additional stock options were granted under the PN incentive program, to purchase 11,700 shares of common stock. Twenty-five percent (25%) of the PN incentive program options granted vested during September 2009, upon the acceptance by the FDA of the NDA for VIMOVO (enteric-coated naproxen / immediate release esomeprazole magnesium, formerly referred to as PN 400). The remaining seventy-five percent (75%) of the options granted vested on April 30, 2010 upon the Company’s receipt of an action letter from the FDA indicating approval of the NDA for VIMOVO. The options have a ten-year term. The May 6, 2008 and September 10, 2008 option grants have exercise prices of \$14.45 per share and \$10.82 per share, respectively, which was equal to the NASDAQ reported market closing price of the Company’s common stock on the date of grant. The weighted average grant-date fair value of these performance-based options was \$9.66 per share and \$7.08 per share for the May 6, 2008 and September 10, 2008 option grants, respectively. The fair value of the performance-based options granted under the PN incentive program was estimated as of the grant date using the Black-Scholes option valuation model without consideration of the performance measures. The options also include provisions that require satisfactory employee performance prior to vesting. Additionally, 20,000 options were granted to an executive officer on May 6, 2008 under the PN incentive plan, with identical grant and exercise terms except that 100% of the options granted vested during September 2009, upon acceptance by the FDA of the NDA for VIMOVO. The Company recognized compensation costs for these awards over the expected service period.

On October 1, 2011, pursuant to an incentive program (the “PA32540 incentive program”) approved by the Compensation Committee of the Board of Directors of the Company, stock options were granted to all of the Company’s employees, including its executive officers, to purchase an aggregate of 453,960 shares of common stock. The underlying stock options and RSUs are performance-based and focus on the successful completion of certain value-enhancing events for the Company’s PA32540 product candidate. Each of the grants described above were granted on October 1, 2011 pursuant to, and subject to, the terms of the Company’s 2010 Omnibus Equity Compensation Plan (the “Equity Plan”). The stock options have a ten-year term and have an exercise price equal to the closing sale price of the Company’s common stock, as reported on the NASDAQ Global Market, on the date immediately preceding the date of grant, October 1, 2011. The underlying stock options and RSUs vest in accordance with the following schedule: (a) one-third (1/3) upon the acceptance of the filing of a new drug application (the “NDA”) for PA32540, assuming the NDA filing is made prior to December 31, 2012, (b) one-third (1/3) upon first cycle NDA approval of PA32540 (otherwise 16.5% upon NDA approval after first cycle), and (c) one-third (1/3) upon execution of a significant partnering transaction for PA32540 in a major territory as determined by the Compensation Committee of the Company, in its sole discretion, at the time of such transaction, subject in each case to continued employment or service to the Company. On December 31, 2012, 132,883 options were forfeited in acknowledgement that the NDA filing was not made prior to December 31, 2012.

On October 25, 2012, the Compensation Committee of the Board of as part of the Company’s initiative to retain, award and incentive its employees, approved the performance-based incentive awards for all employees of the Company, including the executive officers. During a pre-submission meeting with respect to its NDA for PA32540 in April 2012, the FDA suggested that the Company also seek approval for a lower dose formulation of the product containing 81 mg of enteric coated aspirin as part of its NDA for PA32540. The Company decided to include data and information relating to a lower dose formulation, PA8140, in its NDA. Generation of additional information with respect to PA8140 and incorporation of data into the NDA for PA32540 delayed submission of the NDA from the original planned submission date in the third quarter of 2012 until the first half of 2013.

The Company believes that seeking approval for lower dose formulation in addition to PA32540 added significant value to the products in the market place. However, the addition of PA8140 to the NDA impacted the Company’s ability to achieve one or more of the performance conditions of the PA Incentive Program, including the Company’s ability to submit the NDA by December 31, 2012. Therefore, the Compensation Committee granted the performance-based incentive awards both to compensate the employees for the expected loss of value under the PA Incentive Program, as well as to provide additional incentive to employees to

complete the value-added activities required for submission and approval of the lower dose product. The Compensation Committee granted an aggregate of 208,740 restricted stock units to various employees of the Company, including 105,000 restricted stock units granted to the Company's named executive officers.

The restricted stock units are performance-based and focus on the successful completion of certain value-enhancing events for the Company's lower dose PA product candidate, currently PA8140. Each of the restricted stock units described above were granted on October 25, 2011 pursuant to, and subject to, the terms of the Company's 2010 Omnibus Equity Compensation Plan. Such restricted stock units shall vest in accordance with the following schedule: (a) one-half (1/2) upon the acceptance by the FDA of the filing of an NDA for a lower dose PA product, currently PA8140, and (b) one-half (1/2) upon approval by the FDA of an NDA for a lower dose PA product, currently PA8140.

A summary of the performance-based stock awards as of June 30, 2014, and changes during the six months ended June 30, 2014, are as follows:

	Underlying Shares (000s)	Weighted-Average Exercise Price
Performance-based outstanding at December 31, 2013	540	\$ 6.76
Granted	—	—
Exercised	(6)	2.01
Forfeited or expired	(11)	11.83
Performance-based outstanding at March 31, 2014	523	\$ 6.71
Granted	73	7.89
Exercised	(22)	1.98
Forfeited or expired	(67)	2.08
Performance-based outstanding at June 30, 2014	507	\$ 7.70

During the six months ended June 30, 2014 there was expense of \$268,000 recorded for performance-based awards under the PA32540 and PA8140 incentive programs. As of June 30, 2014, there was \$454,000 in unrecognized compensation expense related to performance-based awards granted under the PA32540 and PA8140 incentive programs and there was no unrecognized compensation expense related to performance-based awards granted under the PN incentive program. The June 30, 2014 amount is expected to be recognized over the period ending in the first quarter of 2015. Under the PA32540 and PA8140 incentive programs, there were 250,000 unvested performance-based options outstanding at June 30, 2014. No performance-based awards vested during the six months ended June 30, 2014 while 105,000 performance-based awards vested during the six months ended 2013. There were 257,000 vested performance-based options outstanding at June 30, 2014. There were 78,000 awards forfeited during the six months ended June 31, 2014, 67,000 of which were forfeited when PA32540 did not receive a first cycle NDA approval, and 12,000 awards forfeited during the six months ended June 30, 2013. A total of 28,000 performance-based awards were exercised during the six months ended June 30, 2014 and 105,000 performance-based awards were exercised during the six months ended June 30, 2013. At June 30, 2014, the performance-based options had an intrinsic value of \$1.8 million and a remaining weighted contractual life of 6.5 years.

Net Income (Loss) Per Share— Basic and diluted net income or loss per common share amounts have been computed using the weighted-average number of shares of common stock outstanding for the six months ended June 30, 2014 and 2013. During the six months ended June 30, 2014 and 2013, the Company had potential common stock equivalents related to its outstanding stock options. These potential common stock equivalents were not included, if the effect would have been antidilutive. The Company has excluded the impact of any shares which might be issued under the Rights Plan, detailed below, from the earnings per share calculation because the Rights are not exercisable since the specified contingent future event has not occurred.

Reconciliation of denominators for basic and diluted earnings per share computations:

	Three months ended June 30, 2014	2013	Six months ended June 30, 2014	2013
Basic weighted average shares outstanding	31,022,557	30,403,670	30,883,261	30,370,034
Effect of dilutive employee and director awards	1,581,566	—	1,575,457	—
Diluted weighted-average shares outstanding and assumed conversions	32,604,123	30,403,670	32,458,718	30,370,034

Rights Plan/Series A Junior Participating Preferred Stock— In January 2005, the Company approved a stockholder rights plan (the "Rights Plan"), pursuant to which the Company entered into a Rights Agreement dated January 12, 2005 with StockTrans, Inc., as Rights Agent, and the Company declared a dividend of a right to acquire one preferred share purchase right (a "Right") for

each outstanding share of the Company's Common Stock, \$0.001 par value per share, to stockholders of record at the close of business on January 28, 2005. Generally, the Rights only are triggered and become exercisable if a person or group acquires beneficial ownership of 15 percent or more of the Company's common stock or announces a tender offer for 15 percent or more of the Company's common stock. The Rights Plan is similar to plans adopted by many other publicly-traded companies. The effect of the Rights Plan is to discourage any potential acquirer from triggering the Rights without first convincing POZEN's Board of Directors that the proposed acquisition is fair to, and in the best interest of, the shareholders and the Company. The provisions of the Plan will substantially dilute the equity and voting interest of any potential acquirer unless the Board of Directors determines that the proposed acquisition is in the best interest of the shareholders. In connection with the Plan, the Company designated 90,000 shares of its authorized Preferred Stock as Series A Junior Participating Preferred Stock. Each Right, if and when exercisable, will entitle the registered holder to purchase from the Company one one-thousandth of a share of Series A Junior Participating Preferred Stock, \$0.001 par value per share, at a purchase price of \$80.00 for each one one-thousandth of a share, subject to adjustment. Each holder of a Right (except for the Acquiring Person (as defined in the Rights Plan), whose Rights will be null and void upon such event) shall thereafter have the right to receive, upon exercise, that number of shares of Common Stock of the Company (or, in certain circumstances, cash, property or other securities of the Company) which equals the exercise price of the Right divided by 50% of the current market price (as defined in the Rights Agreement) per share of Common Stock at the date of the occurrence of such event. The Rights can be terminated by POZEN's Board of Directors and are subject to optional redemption by the Company at \$0.001 per Right. The Rights Plan has a 10-year term and contains provisions requiring a periodic review and evaluation by the Board of Directors.

If there is any change in the number or kind of shares of company stock outstanding or if the value of outstanding shares of company stock is substantially reduced as a result of an extraordinary dividend or distribution, the Company's 2010 Stock Option Plan requires that an equitable adjustment be made to all outstanding grants to preclude dilution of rights and benefits under the plan. Therefore, as a result of the December 31, 2013 cash dividend distribution, a dividend equivalent was provided to all outstanding grants. The adjustments were in the form of additional RSUs to RSU holders or an adjustment to both the outstanding number of options and their strike price; all adjustments were made in compliance with Sections 409A and 424 of the Internal Revenue Code. In addition, the 2010 Stock Option Plan provides for an adjustment to the number of common shares available for grant under the stock option plan. Therefore, as a result of the December 31, 2013 cash dividend distribution, the number of common shares available for grant was adjusted by 416,971 shares and that increase is reflected in the table below.

At June 30, 2014, shares of our common stock reserved for future issuance are as follows:

Common shares available for grant under stock option plans	2,520,071
Common shares issuable pursuant to options and restricted stock units granted under equity compensations plans	5,217,127
Rights Plan shares issuable as Series A Junior Participating Preferred Stock	90,000
Total Reserved	<u>7,827,198</u>

Leases—On February 16, 2009, the Company modified certain terms to our existing lease agreement, dated November 21, 2001, relating to approximately 17,009 square feet of office space located at Exchange Office Building, Chapel Hill, North Carolina. Under the terms of the modification, the lease term was extended for an additional 5 years and 7 months, terminating on September 30, 2015. The modification also provides the Company with a reduced notice period of 7 months for renewals of the lease. The Company is also entitled to a 3-year lease extension option available at the end of the term and a first offer right on available space located within the Exchange Office Building property. As a result of entering into the modification, the Company's noncancellable future minimum lease payments for operating leases increased by approximately \$2.7 million over the lease term. The Company is recognizing rent expense on a straight-line basis over the term of the lease which resulted in a deferred rent balance of \$100,581 at June 30, 2014.

New Accounting Pronouncements— In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Update ("ASU") 2014-09 – Revenue from Contracts with Customers, which provides a single, comprehensive revenue recognition model for all contracts with customers. The core principal of this ASU is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This ASU also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments and assets recognized from costs incurred to obtain or fulfill a contract. This ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2016. Early adoption is not permitted. The Company is currently evaluating the impact this ASU will have on its consolidated financial statements.

In June 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Update ("ASU") 2014-12 – Compensation – Stock Compensation: Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could be Achieved after the Requisite Service Period, which provides explicit guidance for the accounting

treatment for these types of awards. The ASU requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. As such, the performance target should not be reflected in estimating the grant-date fair value of the award. This update is effective for annual periods and interim periods within those annual periods beginning after December 15, 2014. Early adoption is permitted. The Company does not expect this ASU will have a material impact on its consolidated financial statements.

Contingencies—On March 14, 2011, we and AstraZeneca received a Paragraph IV Notice Letter from Dr. Reddy's Laboratories, Ltd and Dr. Reddy's Laboratories, Inc., collectively, Dr. Reddy's, informing us that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent in 2023. The patent is assigned to us and listed with respect to VIMOVO in the Orange Book. On September 19, 2011, Dr. Reddy's amended its ANDA to include a Paragraph IV certification against the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent, which are assigned to AstraZeneca or its affiliates and listed in the Orange Book, with respect to VIMOVO. The patents listed in the Orange Book which are owned by AstraZeneca or its affiliates expire at various times between 2014 and 2018. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Dr. Reddy's. Accordingly, we and AstraZeneca filed suit against Dr. Reddy's on April 21, 2011 in the United States District Court for the District of New Jersey, asserting only the '907 patent against Dr. Reddy's. An amended complaint was filed on October 28, 2011 to include the AstraZeneca patents. The case has been consolidated with the case against Lupin and Anchen. The case is currently in the discovery phase. On December 19, 2012, the District Court conducted a pre-trial "Markman" hearing to determine claim construction. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 18, 2013, the District Court issued a Stipulation and Order dismissing with prejudice those claims and defenses. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties. This case is considered the lead case and has been consolidated with the actions described below for the purpose of pre-trial and discovery. A scheduling order for this case, and all of the consolidated cases, was issued by the Court on June 27, 2014.

On June 13, 2011, we and AstraZeneca received a Paragraph IV Notice Letter from Lupin Ltd., or Lupin, informing us that Lupin had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the 504 patent, patent, the '085 patent, the '872 patent, the '070 patent, the '466 patent and, each of which are assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Lupin's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Lupin and, accordingly, we and AstraZeneca filed suit against Lupin on July 25, 2011 in the United States District Court for the District of New Jersey. The case is currently in the discovery phase. On December 19, 2012, The District Court conducted a pre-trial "Markman" hearing to determine claim construction. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties.

On September 19, 2011, we and AstraZeneca AB received Paragraph IV Notice Letter from Anchen Pharmaceuticals, Inc., or Anchen, informing us that Anchen had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, the '085 patent, the '070 patent, and the '466 patent. The patents are among those listed with respect to VIMOVO in the Orange Book and expire at various times between 2018 and 2023. Anchen's Paragraph IV Notice Letter asserts that its generic product will not infringe those five listed patents or that those five listed patents are invalid or unenforceable. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Anchen and, accordingly, we and AstraZeneca filed suit against Anchen on October 28, 2011 in the United States District Court for the District of New Jersey. The case is currently in the initial phases of discovery. On December 19, 2012, the District Court conducted a pre-trial "Markman" hearing to determine claim construction. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties. On October 4, 2013, Anchen filed an amendment to its ANDA seeking to change its Paragraph IV certification to a Paragraph III. It is unclear when or if the FDA will enter Anchen's amendment. On October 25, 2013, Anchen filed a Motion to Dismiss the case against it, based on its proposed re-certification. On November 18, 2013, we and AstraZeneca filed an Opposition to Anchen's Motion to Dismiss. On June 11, 2014, the Court granted Anchen's Motion and dismissed the case against them.

On November 20, 2012 the Company received a Paragraph IV Notice Letter from Dr. Reddy's, indicating that Dr. Reddy's had filed a second ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO. In that Paragraph IV Notice Letter, Dr. Reddy asserts, among other things, that the '907 patent is invalid and/or not infringed. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Dr. Reddy's on its second ANDA filing and, accordingly, we and AstraZeneca filed suit against Dr. Reddy's on January 4, 2013, in the United States District Court for the District of New Jersey. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 15, 2013 a Stipulation of Partial

Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 18, 2013, the District Court issued a Stipulation and Order dismissing with prejudice those claims and defenses. On May 5, 2013, this case was consolidated with the originally filed Dr. Reddy's case. On June 28, 2013 we and AstraZeneca filed a Motion for Summary Judgment relating to the second ANDA filing asserting that U.S. Patent No. 6,926,907 is not invalid. On August 12, 2013, DRL filed its opposition to the Motion for Summary Judgment. On March 28, 2014, the District Court denied our and AstraZeneca's Motion. On October 11, 2013, DRL filed a Motion for Summary Judgment asserting that the product which is the subject matter of its second ANDA does not infringe the '907 patent. On November 4, 2013, POZEN and AstraZeneca filed a Motion for an Order Denying DRL's Motion for Summary Judgment Pursuant to Rule 56(d) and an Opposition to DRL's Motion for Summary Judgment. On May 29, 2014, the Court issued an order denying DRL's Motion.

On March 29, 2013, we and AstraZeneca received a Paragraph IV Notice Letter from Watson Laboratories, Inc. – Florida, or Watson, informing the companies that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the '504 patent, the '085 patent, the '424 patent, the '872 patent, the '070 patent, and the '466 patent, each of which assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Watson's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. On May 10, 2013, we and AstraZeneca filed a patent infringement lawsuit against Watson in the U.S. District Court of New Jersey.

On May 16, 2013, POZEN and AstraZeneca AB received a Paragraph IV Notice Letter from Mylan Pharmaceuticals Inc., or Mylan, informing the companies that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the '504 patent, the '085 patent, the '424 patent, the '872 patent, the '070 patent, and the '466 patent, each of which assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Mylan's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. On June 28, 2013, we and AstraZeneca filed a patent infringement lawsuit against Mylan in the U.S. District Court of New Jersey.

On October 15, 2013, the United States Patent Office issued '285 patent. The '285 patent, entitled "Pharmaceutical compositions for the coordinated delivery of NSAIDs" and assigned to POZEN, is related to the '907 patent. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement of the '285 patent and, accordingly, on October 23, 2013, we, and AstraZeneca filed patent infringement lawsuits against DRL, Lupin, Watson and Mylan in the U.S. District Court of New Jersey alleging that their ANDA products infringe the '285 patent. On November 8, 2013, we, and AstraZeneca filed a Motion to Amend the Complaint in the actions against DRL, Lupin, Watson and Mylan or, in the alternative, to consolidate the actions involving the '285 patent with the existing consolidated action. DRL, Lupin, Watson and Mylan have each filed answers to the respective amended complaints.

As part of Horizon's purchase of all of AstraZeneca's rights, title and interest to develop, commercialize and sell VIMOVO in the United States, Horizon has assumed AstraZeneca's right to lead the above-described Paragraph IV litigation relating to VIMOVO currently pending in the United States District Court for the District of New Jersey and will assume all patent-related defense costs relating to such litigation, including reimbursement up to specified amounts of the cost of any counsel retained by us. On December 12, 2013, Horizon filed Motions to Join under Fed.R.Civ.Proc. 25(c) as a co-plaintiff in each of the above referenced actions and the consolidated action. On January 31, 2014 and February 2, 2014, the Court granted Horizon's motions.

As with any litigation proceeding, we cannot predict with certainty the patent infringement suit against Dr. Reddy's, Lupin, Mylan and Watson relating to a generic version of VIMOVO. We have incurred an aggregate of \$17.3 million in legal fees through the quarter ended June 30, 2014. Furthermore, we will have to incur additional expenses in connection with the lawsuits relating to VIMOVO, which may be substantial. In the event of an adverse outcome or outcomes, our business could be materially harmed. Moreover, responding to and defending pending litigation will result in a significant diversion of management's attention and resources and an increase in professional fees.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion of our financial condition and the results of operations should be read together with the financial statements, including the notes contained elsewhere in this Quarterly Report on Form 10-Q, and the financial statements, including the notes thereto, contained in our Annual Report on Form 10-K for the year ended December 31, 2013, as filed on March 6, 2014.

This report includes "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about our plans, objectives, representations and contentions and are not historical facts and typically are identified by use of terms such as "may,"

“should,” “could,” “expect,” “plan,” “anticipate,” “believe,” “estimate,” “predict,” “potential,” “continue” and similar words, although some forward-looking statements are expressed differently. You should be aware that the forward-looking statements included herein represent management’s current judgment and expectations, but our actual results, events and performance could differ materially from those in the forward-looking statements. The forward-looking statements are subject to a number of risks and uncertainties which are discussed below in the section entitled “Item 1A --Risk Factors.” We do not intend to update any of these factors or to publicly announce the results of any revisions to these forward-looking statements, other than as is required under the federal securities laws.

Overview

We are a pharmaceutical company focused on transforming medicines that can transform lives. We have operated a business model that has focused on the following:

- developing innovative products that address unmet medical needs in the marketplace;
- obtaining patents for those innovative ideas which we believe have value in the marketplace;
- utilizing a small group of talented employees to develop those ideas by working with strategic outsource partners;
- developing a regulatory pathway with the appropriate agency; and
- determining how best to commercialize our products.

We hire experts with strong project management skills in the specific disciplines we believe are important to maintain within our company. We contract with and manage strong outsource partners as we complete the necessary development work, permitting us to avoid incurring the cost of buying or building laboratories, manufacturing facilities or clinical research operation sites. This allows us to control our annual expenses, but to utilize “best in class” resources as required. We decided to retain ownership of our PA product candidates for cardiovascular indications which contain a combination of a proton pump inhibitor and enteric coated aspirin in a single tablet through the clinical development and pre-commercialization stage and our chief commercial officer was responsible for developing the commercialization strategy for these products and conducting all the required pre-commercialization activities. On September 3, 2013 we entered into an exclusive license agreement with Sanofi US, for the commercialization of PA, PA8140 and PA32540. Under the terms of the agreement, Sanofi US will have exclusive rights to commercialize all PA combinations that contain 325 mg or less of enteric-coated aspirin in the United States. On April 25, 2014, we received a complete response letter, or CRL, from the U.S. Food and Drug Administration, or FDA, advising that the review of our NDA is completed and questions remain that preclude the approval of the NDA in its current form. Specifically, an inspection of the manufacturing facility of an active ingredient supplier of ours concluded with certain inspection deficiencies. Satisfactory resolution of these deficiencies is required before the NDA may be approved. There were no clinical or safety deficiencies noted with respect to either PA8140 or PA32540 and no other deficiencies were noted in CRL. On June 30, 2014, we resubmitted the NDA for PA32540 and PA8140 to the FDA and the FDA notified us that the new action fee date is December 30, 2014. On May 9, 2014, our active ingredient supplier submitted a response to the FDA addressing the inspection deficiencies and subsequently submitted an update to its initial response. However, we cannot guarantee that the FDA will consider the actions taken by the active ingredient supplier to be sufficient to address the inspection deficiencies. If such inspection deficiencies are not resolved by December 30, 2014, our new action date, we could receive another CRL from the FDA.

Our commercialization strategy for PA outside the United States is to secure relationships with one or more strong commercial partners with relevant expertise to commercialize our future products globally. With respect to future products we may develop, we have decided that we will no longer commit substantial resources to further drug development without a partner who agrees to pay the full cost of that development. Consistent with this model, we have reduced our R&D staff and other costs and expenses as our PA development program activities wind down and intend to continue to reduce staff that is no longer required to support our then current business activities. Our board of directors and management team continue to explore potential ways to return value to our stockholders. On November 21, 2013, our Board of Directors declared a special cash distribution of \$1.75 per share to all stockholders of record as of the close of business on December 11, 2013, with a payment date of December 30, 2013. This distribution represented a surplus of corporate cash and is accounted for as a return of capital to stockholders. We are committed to return as much cash to our stockholders as is prudent and may consider other cash distributions in the future.

The success of our business is highly dependent on the marketplace value of our ideas and the related patents we obtain, our ability to obtain from the required regulatory agencies approval to sell the developed products and our ability to find strong commercial partners to successfully commercialize the products.

Treximet®

We have previously developed *Treximet*® in collaboration with GlaxoSmithKline, or GSK. *Treximet* is the brand name for the product combining sumatriptan 85 mg, formulated with RT Technology™ and naproxen sodium 500 mg in a single tablet designed for the acute treatment of migraine. On April 15, 2008, the U.S. Food and Drug Administration, or FDA, approved *Treximet* for the acute

treatment of migraine attacks with or without aura in adults. Upon receipt of FDA approval, GSK notified us of its intention to launch the product and *Treximet* was available in pharmacies in May 2008.

On November 23, 2011, we entered into a purchase and sale agreement, or the Purchase Agreement, with CPPIB Credit Investments Inc. or CII, pursuant to which we sold, and CII purchased, our right to receive future royalty payments arising from U.S. sales of MT 400, including *Treximet*. Under the Purchase Agreement, we received \$75 million and will receive a twenty percent (20%) interest in any royalties received by CII relating to the period commencing on April 1, 2018.

On May 13, 2014, we, Glaxo Group Limited, d/b/a GlaxoSmithKline, or GSK, CII and Pernix Therapeutics Holdings, Inc., or Pernix, entered into certain agreements in connection with GSK's divestiture of all of its rights, title and interest to develop, commercialize and sell *Treximet*® in the U.S. to Pernix. Upon the closing of the divestiture, GSK will assign the Product Development and Commercialization Agreement executed as of June 11, 2003 between us and GSK, the *Treximet* Agreement, to Pernix. Immediately following the closing of the Divestiture, Amendment No. 1 to the *Treximet* Agreement, or Amendment No. 1, between us and Pernix will become effective. Amendment No. 1, among other things, amends the royalty provisions of the Agreement to provide for a guaranteed quarterly minimum royalty of \$4 million for the calendar quarters commencing on January 1, 2015 and ending on March 31, 2018 and requires that Pernix continue certain of GSK's ongoing development activities and to undertake certain new activities, for which we will provide reasonable assistance. Amendment No. 1 also eliminates restrictions in the Agreement on our right to develop and commercialize certain dosage forms of sumatriptan/naproxen combinations outside of the United States and permits POZEN to seek approval for these combinations on the basis of the approved NDA for *Treximet*. Pernix has also issued us a warrant to purchase 500,000 shares of Pernix common stock at an exercise price equal to \$4.28, the closing price of Pernix common stock as listed on the NASDAQ Global Market on May 13, 2014. The common stock underlying the warrants will be registered by Pernix with the Securities and Exchange Commission and will be exercisable from the closing date of the Divestiture until February 28, 2018. If the Divestiture is not consummated, the warrants will be null and void. Lastly, we, GSK, Pernix and CII executed a letter agreement whereby we expressly consented to the assignment by GSK and the assumption by Pernix of the *Treximet* Agreement. On July 30, the parties entered into Amendment No. 2 to the *Treximet* Agreement which will permit Pernix's Irish affiliate to which Pernix will assigns its rights to further assign the Agreement without our prior written consent as collateral security for the benefit of the lenders which may finance the acquisition. Amendment No. 2 will become effective upon the closing of the Divestiture.

VIMOVO®

We have developed VIMOVO® with AstraZeneca AB, or AstraZeneca. VIMOVO (formerly referred to as PN 400) is the brand name for a proprietary fixed dose combination of the PPI esomeprazole magnesium with the NSAID naproxen in a single tablet. On April 30, 2010, the FDA approved VIMOVO for the relief of the signs and symptoms of osteoarthritis, or OA, rheumatoid arthritis, or RA, and ankylosing spondylitis, or AS, and to decrease the risk of developing gastric ulcers in patients at risk of developing NSAID-associated gastric ulcers.

In August 2006, we entered into an exclusive global collaboration and license agreement with AstraZeneca to co-develop and commercialize VIMOVO, which agreement was amended in September 2007 and October 2008. We began the Phase 3 program in September 2007. As part of the program, we conducted two Phase 3 pivotal trials of VIMOVO in patients who are at risk for developing NSAID-associated gastric ulcers, the primary endpoint for which was the reduction in endoscopic gastric ulcers.

The NDA for VIMOVO was submitted on June 30, 2009 and was accepted for filing by FDA in August 2009. POZEN received a \$10.0 million milestone payment from AstraZeneca in September 2009 for the achievement of such milestone. Earlier, in May 2010, we had received a \$20.0 million milestone payment when we received FDA approval of VIMOVO. In October 2009, AstraZeneca submitted a Marketing Authorization Application, or MAA, for VIMOVO in the European Union, or EU, via the Decentralized Procedure, or DCP, and has filed for approval in a number of other countries which are not covered by the DCP. On October 11, 2010, we announced with AstraZeneca that VIMOVO had received positive agreement for approval in 23 countries across the EU following all 22 Concerned Member States agreeing with the assessment of the Netherlands Health Authority (MEB), acting as the Reference Member State for the DCP. We received a \$25.0 million milestone payment when pricing and reimbursement for VIMOVO was granted in the United Kingdom. Other Member States and countries worldwide are now pursuing pricing and reimbursement and national approvals. As of December 2013, VIMOVO has been filed for regulatory approval in 81 countries, approved in 71 countries.

On May 3, 2013, AstraZeneca informed us that, after a strategic business review, it had decided to cease promotion and sampling of VIMOVO by the end of the third quarter of 2013 in certain countries, including the U.S. and all countries in Europe, other than Spain and Portugal, which have pre-existing contractual relationships with third parties. We understand that AstraZeneca will instead now focus on those countries where the product has shown growth and which AstraZeneca believes have the greatest potential for future growth.

On November 18, 2013, AstraZeneca and Horizon Pharma Inc., or “Horizon,” entered into certain agreements in connection with AstraZeneca’s divestiture of all of its rights, title and interest to develop, commercialize and sell VIMOVO in the United States to Horizon. As required by the terms of our agreement with AstraZeneca, we gave our consent to AstraZeneca’s divestiture of such rights to Horizon because we believed that Horizon’s expertise in commercializing products for pain and inflammatory disease, including a similar combination product containing a NSAID and a gastroprotective agent, make it an excellent partner to maximize the potential of VIMOVO in the United States. We were also able to negotiate a guaranteed annual minimum royalty in the United States in the amount of \$5 million in calendar year 2014, and a guaranteed annual minimum royalty amount of \$7.5 million each calendar year thereafter, provided that the patents owned by us which cover VIMOVO are in effect and no generic forms of VIMOVO are in the marketplace.

On July 28, 2014, Horizon announced that it had been verbally notified by CVS Caremark and Express Scripts, Inc. that VIMOVO would no longer be on their formularies and will be placed on their exclusion lists effective January 1, 2015. We have been informed that Horizon estimates that approximately 20-30% of VIMOVO prescriptions could be impacted by these decisions. While Horizon believes it has a strategy to mitigate the effect on VIMOVO sales, POZEN’s royalty revenue from Net Sales of VIMOVO beginning in 2015 may be negatively affected, although we will continue to receive a guaranteed annual minimum royalty of \$7.5 million as described above.

Our Principal Product Candidates

Our PA product candidates, containing a PPI and aspirin, have completed clinical development testing in the United States. Our PA product candidates are excluded from our agreement with AstraZeneca. On September 3, 2013 we entered into a License and Collaboration Agreement with Sanofi US to commercialize our PA product candidates containing an immediate release proton pump inhibitor and 325 mg or less of delayed release or enteric coated aspirin in the United States.

We met with the FDA to discuss the overall development program requirements for PA32540 for the secondary prevention of cardiovascular and cerebrovascular disease in patients at risk for gastric ulcers. An investigational new drug application, or IND, was filed in the fourth quarter of 2007. We completed a study which demonstrated that the (SA) component of PA32540 was bioequivalent to the reference drug, EC aspirin. We filed a Special Protocol Assessment, or SPA, with the FDA for the design of the Phase 3 studies for the product, the primary endpoint for which is the reduction in the cumulative incidence of endoscopic gastric ulcers.

Based upon the FDA’s earlier confirmation that endoscopic gastric ulcers were an acceptable primary endpoint, in October 2009, we began two pivotal Phase 3 and one long-term safety study for PA32540 for the cardiovascular indication. The primary endpoint of the pivotal studies, which included approximately 500 subjects per study, was a significant reduction in the cumulative incidence of gastric ulcers following administration of PA32540 vs. 325 mg enteric-coated aspirin over the six-month treatment period. The primary endpoint was met in both studies. Additionally, the studies met their key secondary endpoints, including a reduction in gastroduodenal ulceration as well as a reduction in discontinuation due to upper gastrointestinal adverse events in subjects taking PA32540 compared to 325 mg enteric-coated aspirin.

In February 2012, the FDA requested an additional Phase 1 study to assess the bioequivalence of PA32540 to EC aspirin 325 mg with respect to acetylsalicylic acid, or ASA. After the Company completed the requested bioequivalence study, the FDA made a preliminary review of the study results and the Company’s summary analyses and, based on its preliminary assessment of the information available to it at the time, the FDA did not agree that bioequivalence of PA32540 to EC aspirin 325 mg was demonstrated. The Company then submitted to the FDA additional information and analyses from the requested bioequivalence study, as well as other relevant pharmacokinetic, clinical pharmacology, and in vitro dissolution data as a Briefing Document in support of a request for a Type A meeting with the FDA. At the Type A meeting held in August 2012, the FDA confirmed that, although it believes bioequivalence of PA32540 to EC aspirin 325 mg, was not strictly established in our bioequivalence study according to the predetermined criteria, the results from this study, together with additional information that will be submitted by the Company in the NDA, constitutes sufficient data to support the establishment of a clinical and pharmacological bridge between the product and EC aspirin 325 mg. The FDA indicated that it would make a final determination during the NDA review. The FDA also indicated that a similar strategy to bridge to the reference listed drug, inclusive of a new, single pharmacokinetic study, could be utilized for a low dose version of PA32540 (currently PA8140). The Company conducted this study with the low dose version against the EC aspirin 81mg. Based on the predetermined criteria acceptable to the FDA, the study demonstrated that PA8140 is bioequivalent to EC aspirin 81mg using criteria for highly variable drugs and had comparable bioavailability.

During a pre-submission meeting with respect to its NDA for PA32540 in April 2012, the FDA suggested that the Company also seek approval for a lower dose formulation of the product containing 81 mg of enteric coated aspirin as part of its NDA for PA32540. Absent the availability of such a lower dose formulation in the market if PA32540 is approved, the FDA indicated that it may limit the indication for PA32540 to use in post coronary artery bypass graft surgery (CABG) with treatment duration not to exceed one year. During the Type A meeting held in August 2012, the FDA confirmed its preference to have both PA32540 and a

lower dose version available in the market so that physicians can have both a low and high dose option available, and agreed that, if both dosage strengths were included in the NDA and subsequently approved, the indications for both will be consistent with the full range of indications described in the current aspirin monograph.

We had generated some clinical pharmacology data and chemical, manufacturing and controls (CMC) data for a product which contains 81 mg of enteric coated aspirin and 40 mg of omeprazole in a single tablet known as PA8140. The Company filed this existing data, together with additional CMC data to be generated and evidence from the scientific literature relating to the ulcerogenic risk of 81 mg of aspirin with the FDA. At this time, we do not intend to conduct Phase 3 clinical trials for PA8140. The data package submitted for PA8140 was similar to that used to gain approval for a lower dosage form of VIMOVO containing 375 mg of naproxen. We have no assurance such data will be sufficient for the FDA to approve PA8140 or to allow a broader indication for PA32540. The FDA will make a final determination with respect to the approvability of and indications for PA32540 and PA8140.

Generation of additional data with respect to PA8140 and incorporation of data into the NDA for PA32540 delayed submission of the NDA from the original planned submission date in the third quarter of 2012. The NDA was filed for both products in March 2013 and in May 2013 the FDA accepted the NDA for review. The FDA assigned a user fee date of January 24, 2014. As part of our continuing discussions with the FDA concerning the NDA for PA32540 and PA8140 tablets, we decided to conduct an additional comparative Phase 1 pharmacokinetic study to determine the pharmacokinetic profile of the omeprazole component of PA 8140 tablets and compare it to that of PA32540 tablets. We submitted study information and data to the FDA as it became available during the conduct of the study and FDA reviewed such information and data from the study when submitted. The final study report for the study was submitted to the FDA in accordance with our agreed timeline. FDA informed us that the Company's user fee date was April 25, 2014. On April 25, 2014, we received a complete response letter, or CRL, from the U.S. Food and Drug Administration, or FDA, advising that the review of our NDA is completed and questions remain that preclude the approval of the NDA in its current form. Specifically, an inspection of the manufacturing facility of an active ingredient supplier of ours concluded with certain inspection deficiencies. Satisfactory resolution of these deficiencies is required before the NDA may be approved. There were no clinical or safety deficiencies noted with respect to either PA8140 or PA32540 and no other deficiencies were noted in CRL. On June 30, 2014, we resubmitted the NDA for PA32540 and PA8140 to the FDA and the FDA notified us that the new action fee date is December 30, 2014. On May 9, 2014, our active ingredient supplier submitted a response to the FDA addressing the inspection deficiencies and subsequently submitted an update to its initial response. However, we cannot guarantee that the FDA will consider the actions taken by the active ingredient supplier to be sufficient to address the inspection deficiencies. If such inspection deficiencies are not resolved by December 30, 2014, our new action date, we could receive another CRL from the FDA.

To assess whether a similar interaction occurs between clopidogrel and PA32540, which contains immediate release omeprazole, we completed two Phase 1 drug-drug interaction studies to evaluate the ex-vivo platelet aggregation effects of PA32540 plus clopidogrel. In the first study, we evaluated ex-vivo platelet aggregation of PA32540 plus clopidogrel when dosed at the same time or dosed 10 hours apart compared to aspirin 325 mg plus clopidogrel dosed together. When PA32540 and clopidogrel were dosed together, data from the study showed a mean 36.7% platelet inhibition compared to a mean 44.0% platelet inhibition when aspirin and clopidogrel were dosed together suggesting a drug-drug interaction based on the study's pre-specified primary analysis. When PA32540 and clopidogrel were dosed 10 hours apart, data from the study indicate no ex-vivo drug-drug interaction based on the study's pre-specified primary analysis. In the second Phase 1 study, we evaluated ex-vivo platelet aggregation of PA32540 plus clopidogrel dosed 10 hour apart compared to a current standard of care of Plavix + Prilosec 40 mg + EC ASA 81 mg dosed together. Subjects on PA32450 demonstrated significantly greater inhibition of platelet aggregation than subjects on standard of care. The clinical relevance of these ex vivo platelet data on cardiovascular events is not known. No further Phase 1 studies on the clopidogrel-PPI interaction are planned. FDA assessment of available data on the drug-drug interaction may result in the inclusion of a warning, similar to that in the current Prilosec label, against the concomitant use of PA32540 and Plavix. As part of the CRL, the FDA indicated that final agreement on the draft product labeling remains pending.

We are also continuing to evaluate how best to commercialize the PA product candidates and programs. We are evaluating the regulatory requirements to obtain an indication for PA for the secondary prevention of colorectal neoplasia. In January 2010, we received input from the FDA with respect to the development requirements for a possible indication in colorectal neoplasia. Further discussions are being considered. We are also evaluating the possibility of developing another dosage strength of PA containing 650 mg of enteric coated aspirin and 20 mg of omeprazole (PA65020) for the treatment of osteoarthritis and similar conditions and we met with the FDA in December 2010 to obtain input with respect to the regulatory requirements to obtain such an indication. The FDA advised us that we will need to demonstrate a reduction in gastric ulcers compared to aspirin alone in a replicate Phase 3 program similar to that we performed for VIMOVO, in addition to a study to establish efficacy of the product in the treatment of osteoarthritis.

We met with a European country that served as the reference member state for approval of VIMOVO in Europe to obtain guidance on a clinical development program for approval of PA65020 in the Europe. We were advised that Phase 3 endoscopic trials demonstrating a reduction in gastric ulcers would not be required in addition to an osteoarthritis efficacy study since omeprazole's actions on gastric ulcers has been well characterized. Instead, Phase 1 studies assessing pharmacokinetics and gastric acid suppression

could be used to support the benefit of omeprazole as a component of PA65020.

We have also received Scientific Advice from the Medicines Evaluation Board, or MEB in the Netherlands, which has agreed to be the Reference Member State in a decentralized filing procedure, regarding the development program required for the approval in the European Union, or EU, of PA tablets, including a lower dosage form containing 100 mg of aspirin and 40 mg of omeprazole (PA10040) for the secondary prevention of cardiovascular disease. The MEB agreed that a full Phase 3 clinical development program for PA10040, to demonstrate the reduction of endoscopic gastric ulcers vs. EC aspirin, would not be necessary. Instead, a Phase 1 pharmacodynamic study comparing gastric pH control for PA10040 vs. EC omeprazole 20 mg, along with a study to demonstrate bioequivalence of PA10040 to a currently marketed EC aspirin product using ASA as the analyte would be sufficient. Study PA10040-101 demonstrated that PA10040 had comparable bioavailability and is bioequivalent to a European Union reference listed enteric coated aspirin 100 mg. Study PA10040-102 demonstrated that PA10040 provides gastric pH greater than 4 control for a percent time over 24 hours of 47%. Furthermore, compared to Losec 20 mg (EC omeprazole 20 mg), PA10040 produced a similar level of 24-hour pH control ($p=0.02$).

A pre-submission follow up meeting with the MEB was held in July 2014. We proposed seeking approval of PA10040 only since the ASA component in that dosage form matches the clinical practice for use of ASA in the EU. Approval of PA10040 would be based on specific studies conducted with the product, as well as data from the entire PA program conducted in the United States. Based on discussions at the meeting, the MEB agreed that the MAA filing can proceed without any further clinical studies and that the Netherlands would be the lead country for the decentralized review process. The MEB also requested that a complete risk-benefit analysis of PA10040 for the intended cardiovascular patient population and proposed indication should be included as part of the MAA submission.

We have incurred significant losses since our inception and have not yet generated significant revenue from product sales. As of June 30, 2014, our accumulated deficit was approximately \$110.7 million. We record revenue under the following categories: royalty revenues and licensing revenues. Our licensing revenues include upfront payments upon contract signing, additional payments if and when certain milestones in the product's development or commercialization are reached, while the royalty payments are based on product sales. Our historical operating losses have resulted principally from our research and development activities, including clinical trial activities for our product candidates and sales, general and administrative expenses. Research and development expenses include salaries and benefits for personnel involved in our research and development activities and direct development costs, which include costs relating to the formulation and manufacturing of our product candidates, costs relating to preclinical studies, including toxicology studies, and clinical trials, and costs relating to compliance with regulatory requirements applicable to the development of our product candidates. Since inception, our research and development expenses have represented approximately 64% of our total operating expenses. For the six months ended June 30, 2014, our research and development expenses represented approximately 41% of our total operating expenses.

Operating losses may be incurred over the next several years as we complete the development and seek regulatory approval for our product candidates, develop other product candidates, conduct pre-commercialization activities, and acquire and/or develop product portfolios in other therapeutic areas. Our results may vary depending on many factors, including:

- The progress of our PA product candidates and our other product candidates in the clinical and regulatory process;
- The ability of Horizon and AstraZeneca to successfully commercialize VIMOVO in the United States and outside the United States, respectively, and the ability of Sanofi US to successfully commercialize our PA product candidates in the United States;
- The establishment of new collaborations and progress and/or maintenance of our existing collaborations for the development and commercialization of any of our product candidates;
- Our ability to successfully defend our regulatory market exclusivity and patent rights against generic challenges and to succeed in obtaining extensions of such exclusivity for which we may be eligible;
- Our ability to commercialize our products with commercial partners in a highly regulated and extremely competitive marketplace;
- The possible acquisition and/or in-licensing, and development of our therapeutic product candidates.

We do not currently have internal commercialization or manufacturing capabilities. We have entered into collaborations and may continue to enter into additional collaborations with established pharmaceutical or pharmaceutical services companies to commercialize and manufacture our product candidates once approved. We decided to retain control of our PA product candidates for cardiovascular indications through the clinical development and pre-commercialization stage. To that end, our chief commercial officer evaluated the commercial opportunities for these product candidates and developed a worldwide commercial strategy, which enabled us to conduct pre-commercialization activities prior to licensing these products to commercial partners. On September 3, 2013 we entered into an exclusive license agreement with Sanofi US for the commercialization of PA8140 and PA32540. Under the terms of the agreement, Sanofi US will have exclusive rights to commercialize all PA combinations that contain 325 mg or less of enteric-

coated aspirin in the United States. In the event the products are not approved for the expected indications, Sanofi US shall have the right, but not the obligation, to terminate the license agreement.

Our ability to generate revenue in the near term is dependent upon our ability, alone or with collaborators, to achieve the milestones set forth in our collaboration agreements, to enter into additional collaboration agreements, to successfully develop product candidates, to obtain regulatory approvals and to successfully manufacture and commercialize our future products. These milestones are earned when we have satisfied the criteria set out in our revenue recognition footnote accompanying the financial statements included elsewhere in this Annual Report on Form 10-K. These payments generate large non-recurring revenue that will cause large fluctuations in quarterly and annual profit and loss.

Status and Expenses Related to Our Approved Products and Product Candidates

There follows a brief discussion of the status of the development of our approved products and our product candidates, as well as the costs relating to our development activities. Our direct research and development expenses were \$2.1 million for the six months ended June 30, 2014, and \$3.9 million for the six months ended June 30, 2013. Our research and development expenses that are not direct development costs consist of personnel and other research and development departmental costs and are not allocated by product candidate. We generally do not maintain records that allocate our employees' time by the projects on which they work and, therefore, are unable to identify costs related to the time that employees spend on research and development by product candidate. Total compensation and benefit costs for our personnel involved in research and development were \$1.7 million for the six months ended June 30, 2014, and \$1.5 million for the six months ended June 30, 2013. Total compensation included \$0.3 million charge for non-cash compensation for stock option expense for the six months ended June 30, 2014 and June 30, 2013. Other research and development department costs were less than \$0.1 million and \$0.1 million for the six months ended June 30, 2014 and June 30, 2013, respectively.

MT 400/Treximet

On April 15, 2008, the FDA approved *Treximet* for the acute treatment of migraine attacks with or without aura in adults. GSK notified us of its intention to launch the product and *Treximet* was available in pharmacies in May 2008. As part of our NDA program for *Treximet*, we conducted five Phase 1 trials, two Phase 3 pivotal trials, and one 12-month open label safety trial using a formulation of *Treximet* developed by GSK. The Phase 3 pivotal trials, including the endpoints required to evaluate *Treximet*, were designed to demonstrate superiority to placebo for relief of pain and the associated symptoms of migraine (nausea, photophobia and phonophobia) at two hours. Additionally, the program was designed to demonstrate that each component makes a contribution to the efficacy of *Treximet* (the "combination drug rule" that the FDA requires of all combination products). The efficacy endpoint for the combination was sustained pain free, which is defined as improvement from moderate or severe pain to no pain at two hours and remaining at no pain through twenty four hours without the use of rescue medicine. Further, GSK has conducted market support studies for *Treximet*, including evaluations in a pediatric population. As required by the terms of our agreement with GSK, we transferred ownership of the NDA and other regulatory filings for *Treximet* to GSK on May 14, 2008, and GSK took responsibility for all ongoing regulatory obligations for the product, including post marketing clinical trial requirements.

We incurred total direct development costs of \$26.4 million associated with the development of our MT 400 and *Treximet* programs. Our direct development costs do not include the cost of research and development personnel or any allocation of our overhead expenses.

On November 23, 2011, we entered into the Purchase Agreement with CII, pursuant to which we sold, and CII purchased, our right to receive future royalty payments arising from U.S. sales of MT 400, including *Treximet*.

On March 21, 2011, we entered into a license agreement with Cilag GmbH International, or Cilag, a division of Johnson & Johnson, for the exclusive development and commercialization of MT 400 in Brazil, Colombia, Ecuador and Peru. Under the terms of the agreement, Cilag made a nominal, initial upfront payment, which is refundable under certain conditions, and that payment to be followed by a nominal milestone payment upon the approval of MT 400 by the National Health Surveillance Agency of Brazil. We will also receive a high single digit royalty on net sales of MT 400 during the first 10 years of sales, followed by a low single digit royalty during the next 5 years. Cilag will be responsible for the manufacturing, development and commercialization of MT 400.

On May 13, 2014, we, GSK, CII and Pernix, entered into certain agreements in connection with GSK's divestiture of all of its rights, title and interest to develop, commercialize and sell *Treximet*® in the U.S. to Pernix. Upon the closing of the divestiture, GSK will assign the *Treximet* Agreement to Pernix. Immediately following the closing of the divestiture, Amendment No. 1 between us and Pernix will become effective. Amendment No. 1, among other things, amends the royalty provisions of the Agreement to provide for a guaranteed quarterly minimum royalty of \$4 million for the calendar quarters commencing on January 1, 2015 and ending on March 31, 2018 and requires that Pernix continue certain of GSK's ongoing development activities and to undertake certain new activities,

for which we will provide reasonable assistance. Amendment No. 1 also eliminates restrictions in the Agreement on our right to develop and commercialize certain dosage forms of sumatriptan/naproxen combinations outside of the United States and permits POZEN to seek approval for these combinations on the basis of the approved NDA for Treximet. Pernix has also granted us a warrant to purchase 500,000 shares of Pernix common stock at an exercise price of \$4.28, the closing price of Pernix common stock as reported on the NASDAQ Global Market on May 13, 2014. The common stock underlying the warrants will be registered by Pernix with the Securities and Exchange Commission and will be exercisable from the closing date of the divestiture until February 28, 2018. If the Divestiture is not consummated, the warrants will be null and void. Lastly, we, GSK, Pernix and CII executed a letter agreement whereby we expressly consented to the assignment by GSK and the assumption by Pernix of the Treximet Agreement. On July 30, the parties entered into Amendment No. 2 to the Treximet Agreement which will permit Pernix's Irish affiliate to which Pernix will assign its rights to further assign the Agreement without our prior written consent as collateral security for the benefit of the lenders which may finance the acquisition. Amendment No. 2 will become effective upon closing of the Divestiture.

PN/VIMOVO Program

Under our PN program, we completed formulation development and clinical studies for several combinations of a PPI and a NSAID in a single tablet intended to provide effective management of pain and inflammation associated with chronic conditions such as osteoarthritis, and intended to have fewer gastrointestinal complications compared to a NSAID taken alone in patients at risk for developing NSAID associated gastric ulcers. We entered into an exclusive, worldwide (except for Japan) collaboration agreement with AstraZeneca on August 1, 2006 and which was amended in September 2007 and October 2008 relating to the development and commercialization of our PN products. Our agreement with AstraZeneca covered the development and commercialization of proprietary fixed dose combinations of the PPI esomeprazole magnesium with the NSAID naproxen in a single tablet. The initial product developed under the agreement, VIMOVO (formerly PN 400), was approved by the FDA on April 30, 2010 for the relief of the signs and symptoms of osteoarthritis, rheumatoid arthritis and ankylosing spondylitis and to decrease the risk of developing gastric ulcers in patients at risk of developing NSAID-associated gastric ulcers.

The NDA for VIMOVO was submitted on June 30, 2009 and was accepted for filing in August 2009. We received a \$10.0 million milestone payment from AstraZeneca in September 2009 for the achievement of such milestone. On April 30, 2010, VIMOVO was approved by FDA for the relief of the signs and symptoms of osteoarthritis, rheumatoid arthritis and ankylosing spondylitis and to decrease the risk of developing gastric ulcers in patients at risk of developing NSAID-associated gastric ulcers. We received a \$20.0 million milestone payment from AstraZeneca in May 2010 in connection with such approval. As required by the terms of our agreement with AstraZeneca, we transferred ownership of the NDA and other regulatory filings for VIMOVO to AstraZeneca on June 1, 2010, and AstraZeneca now has responsibility for all ongoing regulatory obligations for the product in the U.S., including post marketing clinical trial requirements, in addition to responsibility for all regulatory obligations outside the U.S.

Under our agreement with AstraZeneca, AstraZeneca had responsibility for the development program for PN products outside the U.S., including interactions with regulatory agencies. In October 2009, AstraZeneca submitted a MAA for VIMOVO in the EU via the DCP and has filed for approval in a number of other countries which are not covered by the DCP. On October 11, 2010, we announced with AstraZeneca that VIMOVO had received positive agreement for approval in 39 countries across the EU following all 22 Concerned Member States agreeing with the assessment of the Netherlands Health Authority, acting as the Reference Member State for the DCP. We received a \$25.0 million milestone payment when pricing and reimbursement for VIMOVO was granted in the United Kingdom. Other Member States are now pursuing pricing and reimbursement and national approvals. Earlier, in May 2010, we had received a \$20.0 million milestone payment when we received FDA approval of VIMOVO. As of the end of December 31, 2013, VIMOVO has been filed for regulatory approval in 81 countries and approved in 71 countries.

On May 3, 2013, AstraZeneca informed us that, after a strategic business review, it had decided to cease promotion and sampling of VIMOVO by the end of the third quarter of 2013 in certain countries, including the U.S. and all countries in Europe, other than Spain and Portugal, which have pre-existing contractual relationships with third parties. We understand that AstraZeneca will instead now focus on those countries where the product has shown growth and which AstraZeneca believes have the greatest potential for future growth. We continue to assess the financial impact this decision will have on our royalty revenue. On November 18, 2013, AstraZeneca and Horizon entered into certain agreements in connection with AstraZeneca's divestiture of all of its rights, title and interest to develop, commercialize and sell VIMOVO in the United States to Horizon. As required by the terms of our agreement with AstraZeneca, we gave our consent to AstraZeneca's divestiture of such rights to Horizon because we believed that Horizon's expertise in commercializing products for pain and inflammatory disease, including a similar combination product containing a NSAID and a gastroprotective agent, make it an excellent partner to maximize the potential of VIMOVO in the United States. We were also able to negotiate a guaranteed annual minimum royalty in the United States in the amount of \$5.0 million in calendar year 2014, and a guaranteed annual minimum royalty amount of \$7.5 million each calendar year thereafter, provided that the patents owned by us which cover VIMOVO are in effect and no generic forms of VIMOVO are in the marketplace. On July 28, 2014, Horizon announced that it had been verbally notified by CVS Caremark and Express Scripts, Inc. that VIMOVO would no longer be on their formularies and will be placed on their exclusion lists effective January 1, 2015. We have been informed that Horizon estimates that

approximately 20-30% of VIMOVO prescriptions could be impacted by these decisions. While Horizon believes it has a strategy to mitigate the effect on VIMOVO sales, POZEN's royalty revenue from Net Sales of VIMOVO beginning in 2015 may be negatively affected, although we will continue to receive a guaranteed annual minimum royalty of \$7.5 million as described above.

We incurred total direct development cost of \$96.2 million associated with the development of our PN program of which \$57.1 million was funded by development revenue from AstraZeneca. Our direct development costs do not include the cost of research and development personnel or any allocation of our overhead expense.

PA Program

As part of our PA program, we are developing a PPI and aspirin in a single tablet. Similar to the PN program, our PA product candidate is intended to induce fewer gastrointestinal complications compared to an aspirin taken alone in patients at risk for developing aspirin associated gastric ulcers. Our PA product candidates are covered under the same patent as PN, but we have retained all rights to this program through the clinical development and pre-commercialization stage. On September 3, 2013 we entered into a License and Collaboration Agreement with Sanofi US to commercialize our PA product candidates containing an immediate release proton pump inhibitor and 325 mg or less of delayed release or enteric coated aspirin in the United States. On April 25, 2014, we received a complete response letter, or CRL, from the FDA advising that the review of our NDA is completed and questions remain that preclude the approval of the NDA in its current form. Specifically, an inspection of the manufacturing facility of an active ingredient supplier of ours concluded with certain inspection deficiencies. Satisfactory resolution of these deficiencies is required before the NDA may be approved. We believe that these manufacturing facility items can be addressed and will be working with the manufacturer to respond to the FDA as soon as possible. There were no clinical or safety deficiencies noted with respect to either PA8140 or PA32540 and no other deficiencies were noted in CRL.

Our PA product candidates, PA32540 and PA8140, have completed clinical development testing in the United States. Based upon the FDA's earlier confirmation that endoscopic gastric ulcers were an acceptable primary endpoint, in October 2009, we began two pivotal Phase 3 and one long-term safety study for PA32540 for the cardiovascular indication. The primary endpoint was met in both studies. Additionally, the studies met their key secondary endpoints, including a reduction in gastroduodenal ulceration as well as a reduction in discontinuation due to upper gastrointestinal adverse events in subjects taking PA32540 compared to 325 mg enteric-coated aspirin.

In February 2012, the FDA requested an additional Phase 1 study to assess the bioequivalence of PA32540 to EC aspirin 325 mg with respect to acetylsalicylic acid, or ASA. After the Company completed the requested bioequivalence study, the FDA has made a preliminary review of the study results and the Company's summary analyses and, based on its preliminary assessment of the information available to it at the time, the FDA did not agree that bioequivalence of PA32540 to EC aspirin 325 mg was demonstrated. We then submitted to the FDA additional information and analyses from the requested bioequivalence study, as well as other relevant pharmacokinetic, clinical pharmacology, and in vitro dissolution data as a Briefing Document in support of a request for a Type A meeting with the FDA. At the Type A meeting held in August 2012, the FDA confirmed that, although it believes bioequivalence of PA32540 to EC aspirin 325 mg, was not strictly established in our bioequivalence study according to the predetermined criteria, the results from this study, together with additional information that will be submitted by us in the NDA, constitutes sufficient data to support the establishment of a clinical and pharmacological bridge between the product and EC aspirin 325 mg. The FDA indicated that it would make a final determination during the NDA review. FDA also indicated that a similar strategy to bridge to the reference listed drug, inclusive of a new, single pharmacokinetic study, could be utilized for a low dose version of PA32540 (PA8140). We have conducted this study with the low dose version against the EC aspirin 81 mg. Based on the predetermined criteria acceptable to the FDA, the study demonstrated that PA8140 is bioequivalent to EC aspirin using criteria for highly variable drugs and had comparable bioavailability.

During a pre-submission meeting with respect to its NDA for PA32540 in April 2012, the FDA suggested that the Company also seek approval for a lower dose formulation of the product containing 81 mg of enteric coated aspirin as part of its NDA for PA32540. We intended to seek an indication for the secondary prevention of cardiovascular disease in patients at risk for gastric ulcers. During the Type A meeting held in August 2012, the FDA has confirmed its preference to have both PA32540 and a lower dose version available in the market so that physicians can have both a low and high dose option available, and agreed that, if both dosage strengths were included in the NDA and subsequently approved, the indications for both will be consistent with the full range of indications described in the current aspirin monograph.

We had generated some clinical pharmacology data and chemical, manufacturing and controls, or CMC, data for a product which contains 81 mg of enteric coated aspirin and 40 mg of omeprazole in a single tablet known as PA8140. We filed this existing data, together with additional CMC data to be generated and evidence from the scientific literature relating to the ulcerogenic risk of 81 mg of aspirin with the FDA. At this time, the Company does not intend to conduct Phase 3 clinical trials for PA8140. The data package submitted for PA8140 was similar to that used to gain approval for a lower dosage form of VIMOVO containing 375 mg of

naproxen. We have no assurance such data will be sufficient for the FDA to approve PA8140 or to allow a broader indication for PA32540. The FDA will make a final determination with respect to the approvability of and indications for PA32540 and PA8140.

Generation of additional data with respect to PA8140 and incorporation of data into the NDA for PA32540 delayed submission of the NDA from the original planned submission date in the third quarter of 2012. The NDA was filed for both products in March 2013 and in May 2013 the FDA accepted the NDA for review. The FDA assigned a user fee date of January 24, 2014. As part of our continuing discussions with the FDA concerning the NDA for PA32540 and PA8140 tablets, we decided to conduct an additional comparative Phase 1 pharmacokinetic study to determine the pharmacokinetic profile of the omeprazole component of PA8140 tablets and compare it to that of PA32540 tablets. We submitted study information and data to the FDA as it became available during the conduct of the study and FDA agreed to review such information and data from the study when submitted. The final study report for the study was submitted to the FDA in accordance with our agreed timeline. FDA has informed us that the Company's user fee date was April 25, 2014. On April 25, 2014, we received a complete response letter, or CRL, from the U.S. Food and Drug Administration, or FDA, advising that the review of our NDA is completed and questions remain that preclude the approval of the NDA in its current form. Specifically, an inspection of the manufacturing facility of an active ingredient supplier of ours concluded with certain inspection deficiencies. Satisfactory resolution of these deficiencies is required before the NDA may be approved. There were no clinical or safety deficiencies noted with respect to either PA8140 or PA32540 and no other deficiencies were noted in CRL. On June 30, 2014, we resubmitted the NDA for PA32540 and PA8140 to the FDA and the FDA notified us that the new action fee date is December 30, 2014. On May 9, 2014, our active ingredient supplier submitted a response to the FDA addressing the inspection deficiencies and subsequently submitted an update to its initial response. However, we cannot guarantee that the FDA will consider the actions taken by the active ingredient supplier to be sufficient to address the inspection deficiencies. If such inspection deficiencies are not resolved by December 30, 2014, our new action date, we could receive another CRL from the FDA.

We are also continuing to evaluate how best to commercialize the PA product candidates and programs. We are evaluating the regulatory requirements to obtain an indication for PA for the secondary prevention of colorectal neoplasia. In January 2010, we received input from the FDA with respect to the development requirements for a possible indication in colorectal neoplasia. Further discussions are being considered. We are also evaluating the possibility of developing another dosage strength of PA containing 650 mg of enteric coated aspirin and 20 mg of omeprazole (PA65020) for the treatment of osteoarthritis and similar conditions and we met with the FDA in December 2010 to obtain input with respect to the regulatory requirements to obtain such an indication. The FDA advised us that we will need to demonstrate a reduction in gastric ulcers compared to aspirin alone in a replicate Phase 3 program similar to that we performed for VIMOVO, in addition to a study to establish efficacy of the product in the treatment of osteoarthritis.

We recently met with a European country that served as the reference member state for approval of VIMOVO in Europe to obtain guidance on a clinical development program for approval of PA65020 in the Europe. We were advised that Phase 3 endoscopic trials demonstrating a reduction in gastric ulcers would not be required in addition to an osteoarthritis efficacy study since omeprazole's actions on gastric ulcers has been well characterized. Instead, Phase 1 studies assessing pharmacokinetics and gastric acid suppression could be used to support the benefit of omeprazole as a component of PA65020.

We have also received Scientific Advice from the Medicines Evaluation Board, or MEB in the Netherlands, which has agreed to be the Reference Member State in a decentralized filing procedure, regarding the development program required for the approval in the European Union, or EU, of PA tablets, including a lower dosage form containing 100 mg of aspirin and 40 mg of omeprazole (PA10040) for the secondary prevention of cardiovascular disease. The MEB agreed that a full Phase 3 clinical development program for PA10040, to demonstrate the reduction of endoscopic gastric ulcers vs. EC aspirin, would not be necessary. Instead, a Phase 1 pharmacodynamic study comparing gastric pH control for PA10040 vs. EC omeprazole 20 mg, along with a study to demonstrate bioequivalence of PA10040 to a currently marketed EC aspirin product using ASA as the analyte would be sufficient. Study PA10040-101 demonstrated that PA10040 had comparable bioavailability and is bioequivalent to a European Union reference listed enteric coated aspirin 100 mg. Study PA10040-102 demonstrated that PA10040 provides gastric pH greater than 4 control for a percent time over 24 hours of 47%. Furthermore, compared to Losec 20 mg (EC omeprazole 20 mg), PA10040 produced a similar level of 24-hour pH control (($p=0.02$).

A pre-submission follow up meeting with the MEB was held in July 2014. We proposed seeking approval of PA10040 only since the ASA component in that dosage form matches the clinical practice for use of ASA in the EU. Approval of PA10040 would be based on specific studies conducted with the product, as well as data from the entire PA program conducted in the United States. Based on discussions at the meeting, the MEB agreed that the MAA filing can proceed without any further clinical studies and that the Netherlands would be the lead country for the decentralized review process. The MEB also requested that a complete risk-benefit analysis of PA10040 for the intended cardiovascular patient population and proposed indication should be included as part of the MAA submission.

We cannot reasonably estimate or know the amount or timing of the costs necessary to continue development and/or complete the development of any PA product candidates we may seek to develop or when, if and to what extent we will receive cash inflows from any PA products. The additional costs that may be incurred include expenses relating to clinical trials and other research and development activities and activities necessary to obtain regulatory approvals. We have refined our strategy and decided to retain control of our PA product candidates for cardiovascular indications through the clinical development and pre-commercialization stage and then seek strong commercial partners to maximize the potential of these product candidates. On September 3, 2013 we entered into a License and Collaboration Agreement with Sanofi US to commercialize our PA product candidates containing an immediate release proton pump inhibitor and 325 mg or less of delayed release or enteric coated aspirin in the United States. We believe we were able to negotiate more favorable terms with Sanofi U.S. for rights to commercialize the products in the United States than we had licensed the product candidates at an earlier stage in development and will be able to achieve more favorable terms with other partners outside the United States if we are successful in licensing PA products in other territories in the future.

We incurred direct development costs associated with the development of our PA program of \$2.0 million during the six months ended June 30, 2014. We incurred total direct development cost of \$73.4 million associated with the development of our PA program. Our direct development costs do not include the cost of research and development personnel or any allocation of our overhead expenses.

Collaborative Arrangements

We have entered into and may continue to enter into collaborations with established pharmaceutical or pharmaceutical services companies to develop, commercialize and/or manufacture our product candidates. Our existing collaborations are described below.

GlaxoSmithKline (GSK)

In June 2003, we signed an agreement with GSK for the development and commercialization of proprietary combinations of a triptan (5-HT_{1B/1D} agonist) and a long-acting NSAID. The combinations covered by the agreement are among the combinations of MT 400. Under the terms of the agreement, GSK has exclusive rights in the U.S. to commercialize all combinations which combine GSK's triptans, including Imitrex® (sumatriptan succinate) or Amerge® (naratriptan hydrochloride), with a long-acting NSAID. We were responsible for development of the first combination product, while GSK provided formulation development and manufacturing. Pursuant to the terms of the agreement, we received \$25.0 million in initial payments from GSK following termination of the waiting period under the Hart-Scott-Rodino notification program and the issuance of a specified patent. In May 2004, we received a \$15.0 million milestone payment as a result of our commencement of Phase 3 clinical trial activities. In October 2005, we received a \$20.0 million milestone payment upon the FDA's acceptance for review of the NDA for *Treximet*, the trade name for the product. On April 26, 2008, we received, from GSK, \$20.0 million in milestone payments which were associated with the approval of, and GSK's intent to commercialize, *Treximet*. In addition, GSK will pay us two sales performance milestones totaling \$80.0 million if certain sales thresholds are achieved. Up to an additional \$10.0 million per product is payable upon achievement of milestones relating to other products. GSK will pay us royalties on all net sales of marketed products until at least the expiration of the last to expire issued applicable patent (October 2, 2025) based upon the scheduled expiration of currently issued patents. GSK may reduce, but not eliminate, the royalty payable to us if generic competitors attain a pre-determined share of the market for the combination product, or if GSK owes a royalty to one or more third parties for rights it licenses from such third parties to commercialize the product. The agreement terminates on the date of expiration of all royalty obligations unless earlier terminated by either party for a material breach or by GSK at any time upon ninety (90) days' written notice to us for any reason or no reason. Among the contract breaches that would entitle us to terminate the agreement is GSK's determination not to further develop or to launch the combination product under certain circumstances. GSK has the right, but not the obligation, to bring, at its own expense, an action for infringement of certain patents by third parties. If GSK does not bring any such action within a certain time frame, we have the right, at our own expense, to bring the appropriate action. With regard to certain other patent infringements, we have the sole right to bring an action against the infringing third party. Each party generally has the duty to indemnify the other for damages arising from breaches of each party's representations, warranties and obligations under the agreement, as well as for gross negligence or intentional misconduct. We also have a duty to indemnify GSK for damages arising from our development and manufacture of MT 400 prior to the effective date of the agreement, and each party must indemnify the other for damages arising from the development and manufacture of any combination product after the effective date.

On November 23, 2011, we entered into the Purchase Agreement, with CII, pursuant to which we sold, and CII purchased, our right to receive future royalty payments arising from U.S. sales of MT 400, including *Treximet*.

On May 13, 2014, we, GSK, CII and Pernix, entered into certain agreements in connection with GSK's divestiture of all of its rights, title and interest to develop, commercialize and sell *Treximet*® in the U.S. to Pernix. Upon the closing of the divestiture, GSK

will assign the Treximet Agreement to Pernix. Immediately following the closing of the divestiture, Amendment No. 1 between us and Pernix will become effective. Amendment No. 1, among other things, amends the royalty provisions of the Agreement to provide for a guaranteed quarterly minimum royalty of \$4 million for the calendar quarters commencing on January 1, 2015 and ending on March 31, 2018 and requires that Pernix continue certain of GSK's ongoing development activities and to undertake certain new activities, for which we will provide reasonable assistance. Amendment No. 1 also eliminates restrictions in the Agreement on our right to develop and commercialize certain dosage forms of sumatriptan/naproxen combinations outside of the United States and permits POZEN to seek approval for these combinations on the basis of the approved NDA for Treximet. Pernix has also granted us a warrant to purchase 500,000 shares of Pernix common stock at an exercise price equal to \$4.28, the closing price of Pernix common stock as reported on the NASDAQ Global Market on May 13, 2014. The common stock underlying the warrants will be registered by Pernix with the Securities and Exchange Commission and will be exercisable from the closing date of the divestiture until February 28, 2018. If the Divestiture is not consummated, the warrants will be null and void. Lastly, we, GSK, Pernix and CII executed a letter agreement whereby we expressly consented to the assignment by GSK and the assumption by Pernix of the Treximet Agreement. On July 30, the parties entered into Amendment No. 2 to the Treximet Agreement which will permit Pernix's Irish affiliate to which Pernix will assign its rights to further assign the Agreement without our prior written consent as collateral security for the benefit of the lenders which may finance the acquisition. Amendment No. 2 will become effective upon the closing of the Divestiture.

AstraZeneca AB (AstraZeneca)

In August 2006, we entered into a collaboration and license agreement dated as of August 1, 2006 and effective September 7, 2006 with AstraZeneca, a Swedish corporation, regarding the development and commercialization of proprietary fixed dose combinations of the PPI esomeprazole magnesium with the NSAID naproxen, in a single tablet for the management of pain and inflammation associated with conditions such as osteoarthritis and rheumatoid arthritis in patients who are at risk for developing NSAID associated gastric ulcers, as amended, the "Original Agreement". Under the terms of the Original Agreement, we granted to AstraZeneca an exclusive, fee-bearing license, in all countries of the world except Japan, under our patents and know-how relating to combinations of gastroprotective agents and NSAIDs (other than aspirin and its derivatives). Pursuant to the terms of the agreement, we received an upfront license fee of \$40.0 million from AstraZeneca following termination of the waiting period under the Hart-Scott-Rodino notification program.

We retained responsibility for the development and filing of the NDA for the product in the U.S. AstraZeneca is responsible for all development activities outside the U.S., as well as for all manufacturing, marketing, sales and distribution activities worldwide. We agreed to bear all expenses related to certain specified U.S. development activities. All other development expenses, including all manufacturing-related expenses, will be paid by AstraZeneca. The agreement established joint committees with representation of both us and AstraZeneca to manage the development and commercialization of the product. The committees operate by consensus, but if consensus cannot be reached, we generally will have the deciding vote with respect to development activities required for marketing approval of the product in the U.S. and AstraZeneca generally will have the deciding vote with respect to any other matters.

In September 2007, we agreed with AstraZeneca to amend the Original Agreement effective as of September 6, 2007. Under the terms of the amendment, AstraZeneca has agreed to pay us up to \$345.0 million, in the aggregate, in milestone payments upon the achievement of certain development, regulatory and sales events. In September 2007 we received a \$10.0 million payment upon execution of the amendment and a \$20.0 million payment in recognition of the achievement of the primary endpoints for the PN400-104 study, a study which compared acid suppression of different doses of VIMOVO (formerly PN 400), and achievement of the interim results of the PN200-301 study, a six month comparative trial of PN 200 as compared to EC naproxen in patients requiring chronic NSAID therapy, meeting mutually agreed success criteria. In May 2010, we received a \$20.0 million payment for the NDA approval of VIMOVO. We also received an additional \$25.0 million milestone in December 2010 when VIMOVO received approval (including pricing and reimbursement approval) in a major ex-U.S. market and up to \$260.0 million will be paid as sales performance milestones if certain aggregate sales thresholds are achieved.

The amendment also revised the royalty rates we were to have received under the Original Agreement. Prior to the effective date of the amendment, under the terms of the Original Agreement, we were to receive a royalty based on annual net sales by AstraZeneca, its affiliates or sublicensees during the royalty term. The royalty rate varied based on the level of annual net sales of products made by AstraZeneca, its affiliates and sublicensees, ranging from the mid-single digits to the mid-teens. Under the amendment, we receive a flat, low double digit royalty rate during the royalty term on annual net sales of products made by AstraZeneca, its affiliates and sublicensees, in the U.S. and royalties ranging from the mid-single digits to the high-teens on annual net sales of products made by AstraZeneca, its affiliates and sublicensees outside of the U.S. The amendment also revised the rate of reduction to the royalty rate based upon loss of market share due to generic competition inside and outside of the U.S. to account for the new royalty structure. Our right to receive royalties from AstraZeneca for the sale of such products under the collaboration and license agreement, as amended, expires on a country-by-country basis upon the later of (a) expiration of the last-to-expire of certain

patent rights relating to such products in that country, and (b) ten years after the first commercial sale of such products in such country.

We further amended the Original Agreement effective October 1, 2008 to shorten the timing of AstraZeneca's reimbursement obligation for certain development expenses incurred by us under the agreement and to update the description of the target product profile studies (as defined in the agreement) for VIMOVO.

On June 30, 2014 we accrued \$5.5 million of VIMOVO royalty revenue, \$4.2 million related to U.S. sales and \$1.3 million related to ROW sales. The agreement, unless earlier terminated, will expire upon the payment of all applicable royalties for the products commercialized under the agreement. Either party has the right to terminate the agreement by notice in writing to the other party upon or after any material breach of the agreement by the other party, if the other party has not cured the breach within 90 days after written notice to cure has been given, with certain exceptions. The parties also can terminate the agreement for cause under certain defined conditions. In addition, AstraZeneca can terminate the agreement, at any time, at will, for any reason or no reason, in its entirety or with respect to countries outside the U.S., upon 90 days' notice. If terminated at will, AstraZeneca will owe us a specified termination payment or, if termination occurs after the product is launched, AstraZeneca may, at its option, under and subject to the satisfaction of conditions specified in the agreement, elect to transfer the product and all rights to us.

On May 3, 2013, AstraZeneca informed us that, after a strategic business review, it had decided to cease promotion and sampling of VIMOVO by the end of the third quarter of 2013 in certain countries, including the U.S. and all countries in Europe, other than Spain and Portugal, which have pre-existing contractual relationships with third parties. We understand that AstraZeneca will instead now focus on those countries where the product has shown growth and which AstraZeneca believes have the greatest potential for future growth.

On September 16, 2013, we and AstraZeneca entered into another amendment to the Original Agreement which made clarifications to certain intellectual property provisions of the Original Agreement to clarify that AstraZeneca's rights under those provisions do not extend to products which contain acetyl salicylic acid. On September 16, 2013, we and AstraZeneca also executed a letter agreement whereby we agreed that in the event that AstraZeneca divested its rights and obligations to market VIMOVO in the United States to a third party, AstraZeneca would be relieved of its obligations under the Original Agreement with respect to the United States as of the effective date of such divestiture, including its obligation under the Original Agreement to guarantee the performance of such assignee and/or sublicensee.

On November 18, 2013, AstraZeneca and Horizon entered into certain agreements in connection with AstraZeneca's divestiture of all of its rights, title and interest to develop, commercialize and sell VIMOVO in the United States to Horizon. In connection with this divestiture, on November 18, 2013 we and AstraZeneca entered into an Amended and Restated Collaboration and License Agreement for the United States, the "U.S. Agreement," and an Amended and Restated License and Collaboration Agreement for Outside the United States, the "ROW Agreement," which agreements collectively amend and restate the Original Agreement. AstraZeneca has assigned the U.S. Agreement to Horizon in connection with the Divestiture with our consent.

We and Horizon also entered into Amendment No. 1 to the U.S. Agreement which, among other things, amends the royalty provisions of the U.S. Agreement to provide for a guaranteed annual minimum royalty amount of \$5 million in calendar year 2014, and a guaranteed annual minimum royalty amount of \$7.5 million each calendar year thereafter, provided that the patents owned by us which cover VIMOVO are in effect and no generic forms of VIMOVO are in the marketplace. Amendment No. 1 also provides that Horizon has assumed AstraZeneca's right to lead the on-going Paragraph IV litigation relating to VIMOVO currently pending in the United States District Court for the District of New Jersey and will assume all patent-related defense costs relating to such litigation, including reimbursement up to specified amounts of the cost of any counsel retained by us, amends certain time periods for Horizon's delivery of quarterly sales reports to POZEN, and provides for quarterly update calls between the parties to discuss VIMOVO's performance and Horizon's commercialization efforts.

Further, the Company, AstraZeneca and Horizon executed a letter agreement whereby POZEN expressly consented to the assignment by AstraZeneca and the assumption by Horizon of the U.S. Agreement. In addition, the letter agreement establishes a process for AstraZeneca and Horizon to determine if sales milestones set forth in the Original Agreement are achieved on a global basis and other clarifications and modifications required as a result of incorporating the provisions of the Original Agreement into the U.S. Agreement and the ROW Agreement or as otherwise agreed by the parties.

On March 14, 2011, we and AstraZeneca received a Paragraph IV Notice Letter from Dr. Reddy's informing us that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent in 2023. The patent is assigned to us and listed with respect to VIMOVO in the Orange Book. On September 19, 2011, Dr. Reddy's amended its ANDA to include a Paragraph IV certification against the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent, which are assigned to AstraZeneca or its affiliates and listed in the Orange Book, with respect to

VIMOVO. The patents listed in the Orange Book which are owned by AstraZeneca or its affiliates expire at various times between 2014 and 2018. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Dr. Reddy's. Accordingly, we and AstraZeneca filed suit against Dr. Reddy's on April 21, 2011 in the United States District Court for the District of New Jersey, asserting only the '907 patent against Dr. Reddy's. An amended complaint was filed on October 28, 2011 to include the AstraZeneca patents. The case has been consolidated with the case against Lupin and Anchen. The case is currently in the discovery phase. On December 19, 2012, the District Court conducted a pre-trial "Markman" hearing to determine claim construction. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 18, 2013, the District Court issued a Stipulation and Order dismissing with prejudice those claims and defenses. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties. This case is considered the lead case and has been consolidated with the actions described below for the purpose of pre-trial and discovery. A scheduling order for this case, and all of the consolidated cases, was issued by the Court on June 27, 2014.

On June 13, 2011, we and AstraZeneca received a Paragraph IV Notice Letter from Lupin informing us that Lupin had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the 504 patent, patent, the '085 patent, the '872 patent, the '070 patent, the '466 patent and, each of which are assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Lupin's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Lupin and, accordingly, we and AstraZeneca filed suit against Lupin on July 25, 2011 in the United States District Court for the District of New Jersey. The case is currently in the discovery phase. On December 19, 2012, The District Court conducted a pre-trial "Markman" hearing to determine claim construction. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties.

On September 19, 2011, we and AstraZeneca AB received Paragraph IV Notice Letter from Anchen informing us that Anchen had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, the '085 patent, the '070 patent, and the '466 patent. The patents are among those listed with respect to VIMOVO in the Orange Book and expire at various times between 2018 and 2023. Anchen's Paragraph IV Notice Letter asserts that its generic product will not infringe those five listed patents or that those five listed patents are invalid or unenforceable. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Anchen and, accordingly, we and AstraZeneca filed suit against Anchen on October 28, 2011 in the United States District Court for the District of New Jersey. The case is currently in the initial phases of discovery. On December 19, 2012, the District Court conducted a pre-trial "Markman" hearing to determine claim construction. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties. On October 4, 2013, Anchen filed an amendment to its ANDA seeking to change its Paragraph IV certification to a Paragraph III. It is unclear when or if the FDA will enter Anchen's amendment. On October 25, 2013, Anchen filed a Motion to Dismiss the case against it, based on its proposed re-certification. On November 18, 2013, we and AstraZeneca filed an Opposition to Anchen's Motion to Dismiss. On June 11, 2014, the Court granted Andchen's Motion and dismissed the case against them.

On November 20, 2012 the Company received a Paragraph IV Notice Letter from Dr. Reddy's, indicating that Dr. Reddy's had filed a second ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO. In that Paragraph IV Notice Letter, Dr. Reddy asserts, among other things, that the '907 patent is invalid and/or not infringed. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Dr. Reddy's on its second ANDA filing and, accordingly, we and AstraZeneca filed suit against Dr. Reddy's on January 4, 2013, in the United States District Court for the District of New Jersey. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 18, 2013, the District Court issued a Stipulation and Order dismissing with prejudice those claims and defenses. On May 5, 2013, this case was consolidated with the originally filed Dr. Reddy's case. On June 28, 2013 we and AstraZeneca filed a Motion for Summary Judgment relating to the second ANDA filing asserting that U.S. Patent No. 6,926,907 is not invalid. On August 12, 2013, DRL filed its opposition to the Motion for Summary Judgment. On March 28, 2014, the District Court denied our and AstraZeneca's Motion. On October 11, 2013, DRL filed a Motion for Summary Judgment asserting that the product which is the subject matter of its second ANDA does not infringe the '907 patent. On November 4, 2013, POZEN and AZ filed a Motion for an Order Denying DRL's Motion for Summary Judgment Pursuant to Rule 56(d) and an Opposition to DRL's Motion for Summary Judgment. On May 29, 2014, the Court issued an order denying DRL's Motion.

On March 29, 2013, we and AstraZeneca received a Paragraph IV Notice Letter from Watson informing the companies that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the '504 patent, the '085 patent, the '424 patent, the '872 patent, the '070 patent, and the '466 patent, each of which assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Watson's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. On May 10, 2013, we and AstraZeneca filed a patent infringement lawsuit against Watson in the U.S. District Court of New Jersey.

On May 16, 2013, POZEN and AstraZeneca AB received a Paragraph IV Notice Letter from Mylan informing the companies that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the '504 patent, the '085 patent, the '424 patent, the '872 patent, the '070 patent, and the '466 patent, each of which assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Mylan's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. On June 28, 2013, we and AstraZeneca filed a patent infringement lawsuit against Mylan in the U.S. District Court of New Jersey.

On October 15, 2013, the United States Patent Office issued the '285 patent. The '285 patent, entitled "Pharmaceutical compositions for the coordinated delivery of NSAIDs" and assigned to POZEN, is related to the '907 patent. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement of the '285 patent and, accordingly, on October 23, 2013, we, and AstraZeneca filed patent infringement lawsuits against DRL, Lupin, Watson and Mylan in the U.S. District Court of New Jersey alleging that their ANDA products infringe the '285 patent. On November 8, 2013, we, and AstraZeneca filed a Motion to Amend the Complaint in the actions against DRL, Lupin, Watson and Mylan or, in the alternative, to consolidate the actions involving the '285 patent with the existing consolidated action. DRL, Lupin, Watson and Mylan have each filed answers to the respective amended complaints.

As part of Horizon's purchase of all of AstraZeneca's rights, title and interest to develop, commercialize and sell VIMOVO in the United States, Horizon has assumed AstraZeneca's right to lead the above-described Paragraph IV litigation relating to VIMOVO currently pending in the United States District Court for the District of New Jersey and will assume all patent-related defense costs relating to such litigation, including reimbursement up to specified amounts of the cost of any counsel retained by us. On December 12, 2013, Horizon filed Motions to Join under Fed.R.Civ.Proc. 25(c) as a co-plaintiff in each of the above referenced actions and the consolidated action. On January 31, 2014 and February 2, 2014, the Court granted Horizon's motions.

sanofi-aventis U.S. LLC

On September 3, 2013, we entered into a license and collaboration agreement with Sanofi US. Under the license agreement, we will have the responsibility for obtaining regulatory approval and Sanofi US will have responsibility for the commercialization of products containing a combination of immediate release omeprazole and 325 mg or less of delayed release aspirin, including PA32540 and PA8140, which are expected to be indicated for use for the secondary prevention of cardiovascular disease in patients at risk for aspirin-associated gastric ulcers. Under the license agreement, Sanofi US has the exclusive right to commercialize licensed products in the United States, with the Company retaining the right to commercialize licensed products outside the United States. Sanofi US will have responsibility for all sales, marketing and future development for the licensed products. In addition, following approval of the NDA and completion of certain manufacturing milestones, Sanofi US will have responsibility for manufacturing the licensed products for commercialization in the United States. We will retain responsibility for obtaining approval of the NDA, after which time we will transfer the NDA to Sanofi US. The parties will share costs up to certain limits with respect to certain additional development activities required in order to obtain or maintain regulatory approval in the United States. During the term of the license agreement, we may not commercialize in the United States, or license any third party to commercialize in the United States, any product combining any product indicated for treatment of gastric ulcers or gastric bleeding, or both, and 325 mg or less of aspirin.

In consideration for the rights granted to Sanofi US under the license agreement, Sanofi US paid us an upfront payment of \$15 million. We are also eligible to receive pre-commercial milestone payments of \$20 million and additional payments upon the achievement of specified sales milestones. We will also receive tiered royalties ranging from 12.5% to 22.5% on sales of licensed products by Sanofi US, its affiliates and its sublicensees in the United States, subject to certain adjustments specified in the license agreement. Sanofi US will use commercially reasonable efforts to commercialize the licensed products and has agreed to specified advertising and promotional expense levels and sales details for the first two years after launch. In the event net sales for licensed products are less than a specified amount during the third full year of commercialization, we may notify Sanofi US that we wish to purchase back from Sanofi US all rights to the licensed products in the United States. In the event we wish to exercise our option, Sanofi US will have the first right to buy out our remaining interest. The license agreement will terminate upon the expiration of Sanofi US's royalty payment obligations, which occurs, on a licensed product-by-licensed product basis, upon the latest of (i) expiration of the last-to-expire patent covering a licensed product and (ii) a specified number of years following first commercial sale

of such licensed product. Sanofi US may terminate the license agreement at will in its entirety any time after the third anniversary of the effective date of the License Agreement. The license agreement may also be terminated by either party if the other party fails to cure certain material breaches under the license agreement. In addition, Sanofi US may terminate the license agreement under certain other specified circumstances, including in the event the licensed products do not receive approval for the expected indications.

Cilag GmbH International (Cilag)

On March 21, 2011, we entered into a license agreement with Cilag, a division of Johnson & Johnson, for the exclusive development and commercialization of MT 400 in Brazil, Colombia, Ecuador and Peru. Under the terms of the agreement, Cilag made a nominal, initial upfront payment, which is refundable under certain conditions, and that payment to be followed by a nominal milestone payment upon the approval of MT 400 by the National Health Surveillance Agency of Brazil. We will also receive a high single digit royalty on net sales of MT 400 during the first 10 years of sales, followed by a low single digit royalty during the next 5 years.

Cilag will be responsible for the manufacturing, development and commercialization of MT 400. The agreement, unless earlier terminated, will expire on a country-by-country basis upon the 15th anniversary of the first commercial sale of MT 400 in each country. Either party has the right to terminate upon any material breach of the agreement by the other party; if the breaching party has not cured the breach within sixty (60) days after written notice to cure has been given by the non-breaching party. In the case of our termination for uncured breach by Cilag, we may terminate the agreement with respect to the country or countries to which the breach relates. In addition, Cilag may terminate the agreement as a whole or on a country-by-country basis upon thirty (30) days' notice prior to the approval of MT 400 in any country of the Territory and ninety (90) days' notice if MT 400 has been not yet been approved for sale in any country of the Territory. If the agreement is terminated by Cilag at will, Cilag will transfer MT 400 and all rights back to us and will grant us a license to use the trademark for MT 400 in the Territory.

Patheon Pharmaceuticals Inc. (Patheon)

On December 19, 2011, we entered into a Manufacturing Services Agreement, or the Supply Agreement, and a related Capital Expenditure and Equipment Agreement, or the Capital Agreement, relating to the manufacture of PA32540. Under the terms of the Supply Agreement, Patheon has agreed to manufacture, and we have agreed to purchase, a specified percentage of the Company's requirements of the PA32540 for sale in the United States. The term of the Supply Agreement extends until December 31st of the fourth year after the we notify Patheon to begin manufacturing services under the Supply Agreement, or the Initial Term, and will automatically renew thereafter for periods of two years, unless terminated by either party upon eighteen months' written notice prior to the expiration of the Initial Term or twelve months' written notice prior to the expiration of any renewal term. In addition to usual and customary termination rights which allow each party to terminate the Supply Agreement for material, uncured breaches by the other party, we can terminate the Agreement upon thirty (30) days' prior written notice if a governmental or regulatory authority takes any action or raises any objection that prevents us from importing, exporting, purchasing or selling PA32540 or if it is determined that the formulation or sale of PA32540 infringes any patent rights or other intellectual property rights of a third party. We can also terminate the Supply Agreement upon twenty-four (24) months' prior written notice if we license, sell, assign or otherwise transfer any rights to commercialize PA32540 in the Territory to a third party. The Supply Agreement contains general and customary commercial supply terms and conditions, as well as establishing pricing for bulk product and different configurations of packaged product, which pricing will be adjusted annually as set forth in the Supply Agreement. Under the terms of the Capital Agreement, we will be responsible for the cost of purchasing certain equipment specific to the manufacture of PA32540, the cost of which, based on current volume projections, is expected to be less than \$150,000. If additional equipment and facility modifications are required to meet our volume demands for PA32540, we may be required to contribute to the cost of such additional equipment and facility modifications, up to a maximum of approximately \$2.5 million in the aggregate.

The Supply Agreement and Capital Agreement were amended on July 10, 2013. The First Amendment to the Manufacturing and Services Agreement (the "Amendment to the Supply Agreement") expressly incorporates the Company's PA8140 product candidate into the Supply Agreement. The Amendment to the Supply Agreement also clarifies that the manufacturing services contemplated by the Supply Agreement include the manufacture of validation batches, but the placing of an order for such validation batches will not trigger the Commencement Date of the Initial Term (each as defined in the Supply Agreement), updates pricing for the Company's PA32540 product candidate and a incorporates a new pricing schedule for PA8140, as well as other conforming changes to the Supply Agreement. The First Amendment to the Capital Expenditure and Equipment Agreement (the "Amendment to the Capital Agreement"), replaces the existing Schedule A of the Capital Agreement, which lists dedicated and non-dedicated capital equipment and facility modifications to be funded in whole or in part by the Company, with a new updated schedule which reflects the parties' current assumptions regarding the need for and timing of capital equipment expenditures based upon Patheon's current and anticipated production capacity and current volume projections for the PA32540 and PA8140. Under the terms of the Capital Agreement, the Company was previously required to contribute to the cost of such additional capital equipment and facility modifications, up to a maximum of approximately \$2.5 million in the aggregate. Pursuant to the terms of the Amendment to the

Capital Agreement, the parties have agreed to reduce the amount of such maximum expenditure to approximately \$1.2 million dollars in light of the revised capacity and volume assumptions.

Results of Operations

Three months ended June 30, 2014 compared to the three months ended June 30, 2013

Net income (loss) per share: Net income attributable to common stockholders for the three months ended June 30, 2014 was \$3.0 million, or \$0.09 per share, on a diluted basis, as compared to a net loss of \$(4.0) million, or \$(0.13) per share, on a diluted basis, for the three months ended June 30, 2013. The net income for the three months ended June 30, 2014 included a \$0.6 million, or \$0.02 per share charge for non-cash stock-based compensation expense as compared to \$(0.9) million, or \$(0.03) per share for the same period of 2013.

Revenue: We recognized total revenue of \$7.4 million for the three months ended June 30, 2014 as compared to total revenue of \$1.7 million for the three months ended June 30, 2013. The increase in revenue was primarily due to an increase of \$2.0 million in amortization of PA licensing revenue from receipt of \$15.0 million upfront fee for the PA agreement with Sanofi US and the increase of \$3.8 million in VIMOVO royalty. Licensing revenue for the three months ended June 30, 2014 consisted of \$5.4 million of royalty revenue and \$2.0 million of other licensing revenue compared to \$1.7 million of royalty revenue for three months ended June 30, 2013. Our licensing and collaboration agreements have terms that include upfront payments upon contract signing and additional payments if and when certain milestones in the product development or related milestones are achieved. All upfront payments were deferred and the non-refundable portions are being amortized over the periods ending on the anticipated dates of regulatory approvals, as specified in the agreements relating to the product candidates, or the conclusion of any obligation on our part. Substantive milestone payments are recognized as revenue upon completion of the contractual events.

Research and development: Research and development expenses for the three months ended June 30, 2014 and 2013 were \$1.9 million. The 2014 decrease in the PA program and other product development was offset by departmental expenses resulting from the costs related to staff reductions.

Sales, general and administrative: Sales, general and administrative expenses decreased by \$1.2 million to \$2.5 million for the three months ended June 30, 2014, as compared to the same period of 2013. The decrease was due primarily to lower market research and medical affairs costs as compared to the same period of 2013. Sales, general and administrative expenses consisted primarily of the costs of administrative personnel, facility infrastructure, business development expenses, and public company activities.

Other income: Interest and bond amortization income was \$6,800 and \$15,400 for the three months ended June 30, 2014 and 2013, respectively.

Six months ended June 30, 2014 compared to the six months ended June 30, 2013

Net income (loss) per share: Net income attributable to common stockholders for the six months ended June 30, 2014 was \$5.9 million, or \$0.18 per share, on a diluted basis, as compared to a net loss of \$(9.8) million, or \$(0.32) per share, on a diluted basis, for the six months ended June 30, 2013. The net income for the six months ended June 30, 2014 included a \$(1.3) million, or \$(0.04) per share charge for non-cash stock-based compensation expense as compared to \$(1.6) million, or \$(0.05) per share for the same period of 2013.

Revenue: We recognized total revenue of \$15.0 million for the six months ended June 30, 2014 as compared to total revenue of \$3.1 million for the six months ended June 30, 2013. The increase in revenue was primarily due to an increase of \$5.0 million in amortization of PA licensing revenue from receipt of \$15.0 million upfront fee for the PA agreement with Sanofi US and the increase of \$6.9 million in VIMOVO royalty. Licensing revenue for the six months ended June 30, 2014 consisted of \$10.0 million of royalty revenue and \$5.0 million of other licensing revenue compared to \$3.1 million of royalty revenue for the six months ended June 30, 2013. Our licensing and collaboration agreements have terms that include upfront payments upon contract signing and additional payments if and when certain milestones in the product development or related milestones are achieved. All upfront payments were deferred and the non-refundable portions are being amortized over the periods ending on the anticipated dates of regulatory approvals, as specified in the agreements relating to the product candidates, or the conclusion of any obligation on our part. Substantive milestone payments are recognized as revenue upon completion of the contractual events.

Research and development: Research and development expenses decreased by \$1.8 million to \$3.8 million for the six months ended June 30, 2014, as compared to the same period of 2013. The decrease was due primarily to a decrease in direct development costs for our PA program, including the \$1.9 million filing fee incurred in the first quarter of 2013, and in departmental costs, as

compared to the same period of 2013. Direct development costs for the PA program decreased by \$1.8 million to \$2.0 million, primarily due to the completion of the clinical trial activities and other product development activities during the six months ended June 30, 2014. Other direct departmental costs and departmental expenses changed less than \$0.1 million, as compared to the same period of 2013. We have included in our research and development total expenses the departmental personnel costs associated with our research and development activities and direct costs associated with pharmaceutical development, clinical trials, toxicology activities and regulatory matters.

Sales, general and administrative: Sales, general and administrative expenses decreased by \$2.0 million to \$5.3 million for the six months ended June 30, 2014, as compared to the same period of 2013. The decrease was due primarily to lower market research and medical affairs costs as compared to the same period of 2013. Sales, general and administrative expenses consisted primarily of the costs of administrative personnel, facility infrastructure, business development expenses, and public company activities.

Other income: Interest and bond amortization income was \$14,200 and \$40,400 for the six months ended June 30, 2014 and 2013, respectively.

Income Taxes

We estimate an annual effective tax rate of 0% for the year ended December 31, 2014, and our effective tax rate was 0% for the six month period ended June 30, 2014. However, the actual effective rate may vary depending upon actual licensing fees and milestone payments received, specifically the pre-tax book income for the year, and other factors. Income taxes have been accounted for using the liability method in accordance with FASB ASC 740. Since our inception, we have incurred substantial cumulative losses and may incur substantial and recurring losses in future periods. The utilization of these loss carryforwards to reduce future income taxes will depend on the Company's ability to generate sufficient taxable income prior to the expiration of the loss carryforwards. In addition, the maximum annual use of net operating loss and research credit carryforwards is limited in certain situations where changes occur in stock ownership.

We currently file income tax returns in the U.S. federal jurisdiction, and the state of North Carolina. We are no longer subject to federal or North Carolina income tax examinations by tax authorities for years before 2010. However, the loss carryforwards generated prior to 2010 may still be subject to change, if we subsequently begin utilizing these losses in a year that is open under statute and subject to federal or North Carolina income tax examinations by tax authorities.

At June 30, 2014, we had no unrecognized tax benefits that would reduce the Company's effective tax rate if recognized. We recognize any interest and penalties accrued related to unrecognized tax benefits as income tax expense. During the three and six months ended June 30, 2014 and 2013, there were no such interest and penalties.

Liquidity and Capital Resources

At June 30, 2014, cash and cash equivalents totaled \$31.8 million, a decrease of \$1.0 million compared to December 31, 2013. The \$1.0 million decrease in cash resulted from \$7.8 million in operating expenses (net of stock-based compensation expense) and the pay down of \$3.1 million in accrued liabilities, offset by the receipt of a \$6.2 million in VIMOVO royalty payment and \$3.7 million from equity exercises. Our cash is invested in money market funds that invest primarily in commercial paper and certificates of deposit guaranteed by banks.

We received \$6.4 million in operating cash during the six months ended June 30, 2014 pursuant to the terms of our collaboration agreements with AstraZeneca, Sanofi US and Horizon. In addition, our balance sheet included a \$5.5 million accounts receivable for royalties under the AstraZeneca and Horizon agreements.

Based upon the indirect method of presenting cash flow, cash used in operating activities totaled \$4.7 million and \$10.2 million for six months ended June 30, 2014 and June 30, 2013, respectively. There were no investing activities during the six months ended June 30, 2014 and net cash provided by investing activities during the six months ended June 30, 2013 totaled \$18.8 million reflecting investing activities associated with the purchase and sale of short-term investments. Net cash provided by financing activities during the six months ended June 30, 2014 totaled \$3.7 million and net cash used by financing activities totaled \$0.1 million for the six months ended June 30, 2013. Cash required for our operating activities during 2014 is projected to decrease from our 2013 requirements as a result of decreased development and pre-commercialization activities. During the six months ended June 30, 2014 and June 30, 2013 we recorded non-cash stock-based compensation expense of \$1.3 million and \$1.6 million, respectively, associated with the grant of stock options and restricted stock units.

As of June 30, 2014, we had \$31.8 million in cash and cash equivalents. We believe that we will have sufficient cash reserves and cash flow to maintain our planned development program for PA32540 and PA8140 and our planned level of business activities, through 2014 and beyond. However, our anticipated cash flow includes continued receipt of royalty revenue from Horizon and AstraZeneca's sale of VIMOVO. In addition, our expenses might increase during that period beyond currently expected levels if we decide to, or any regulatory agency requires us to, conduct additional clinical trials, studies or investigations for any of our product candidates, including in connection with the agency's consideration, or reconsideration, of our regulatory filings for our product candidates. Our decision to make a cash distribution in December 2013, resulted from the determination that we had surplus corporate cash, based on the decision not to undertake future development programs without a partner. We believe we have retained sufficient cash to fund our expected activities for the next several years.

As part of our ongoing assessment of our business and liquidity needs, we regularly assess available funding options and will consider available funding opportunities as they arise. We consider our current royalty stream as cash assets that could be monetized to accelerate the expected cash flow. We also could sell shares of common stock in the future to fund additional development activities and increase our working capital. We have filed with the Securities and Exchange Commission, or SEC, and the SEC has declared effective, a shelf registration statement on Form S-3 under which we have registered up to 8,500,000 shares of our common stock for sale in one or more public offerings. John R. Plachetka, selling stockholder named in the prospectus for the registration statement, may offer up to an aggregate of 500,000 of such shares, and we will not receive any of the proceeds from the sales of shares made by the selling stockholder. Any additional equity financing may be dilutive to stockholders, and debt financing, if available, may involve restrictive covenants.

Our forecast of the period of time through which we expect that our financial resources will be adequate to support our operations is a forward-looking statement that involves risks and uncertainties, and actual results could vary as a result of a number of factors. Our future capital requirements will depend on many factors, including:

- the number and progress of our clinical trials and other trials and studies;
- our success, or any delays, in obtaining, regulatory approval of our product candidates and success in, and manner of, commercializing our products;
- the success of our existing collaborations and our ability to establish additional collaborations;
- the extent to which we acquire or invest in businesses, technologies or products;
- costs incurred to enforce and defend our patent claims and other intellectual rights;
- our ability to negotiate favorable terms with various contractors assisting in our trials and studies; and
- costs incurred in the defense of our VIMOVO patent against generic companies that have filed ANDAs with the FDA to market the product prior to the expiration of our and AstraZeneca's patents.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The proceeds from revenue from our collaboration agreements have been invested in money market funds that invest primarily in short-term, highly-rated investments, including U.S. Government securities, commercial paper and certificates of deposit guaranteed by banks and short-term corporate fixed income obligations and U.S. Government and Government agency obligations. Under our current policies, we do not use interest rate derivative instruments to manage our exposure to interest rate changes. Because of the short-term maturities of our investments, we do not believe that a decrease in market rates would have a significant negative impact on the value of our investment portfolio.

Item 4. Controls and Procedures

The Company maintains disclosure controls and procedures designed to ensure information required to be disclosed in Company reports filed under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on that evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures as of the end of the period covered by this report are functioning effectively to provide reasonable assurance that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to

allow timely decisions regarding disclosures. A controls system, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the controls system are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

No change in our internal control over financial reporting occurred during the second quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

On March 14, 2011, we and AstraZeneca received a Paragraph IV Notice Letter from Dr. Reddy's informing us that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent in 2023. The patent is assigned to us and listed with respect to VIMOVO in the Orange Book. On September 19, 2011, Dr. Reddy's amended its ANDA to include a Paragraph IV certification against U the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent, which are assigned to AstraZeneca or its affiliates and listed in the Orange Book with respect to VIMOVO. The patents listed in the Orange Book which are owned by AstraZeneca or its affiliates expire at various times between 2014 and 2018. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Dr. Reddy's. Accordingly, we and AstraZeneca filed suit against Dr. Reddy's on April 21, 2011 in the United States District Court for the District of New Jersey, asserting only the '907 patent against Dr. Reddy's. An amended complaint was filed on October 28, 2011 to include the AstraZeneca patents. The case has been consolidated with the cases against Lupin and Anchen (see below). The case is currently in the discovery phase. On December 19, 2012, the District Court conducted a Markman hearing. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 18, 2013, the District Court issued a Stipulation and Order dismissing with prejudice those claims and defenses. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties. This case is considered the lead case and has been consolidated with the actions described below for the purpose of pre-trial and discovery. A scheduling order for this case, and all of the consolidated cases, was issued by the Court on June 27, 2014.

On June 13, 2011, we and AstraZeneca received a Paragraph IV Notice Letter from Lupin informing us that Lupin had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company, and the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent, each of which are assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Lupin's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Lupin and, accordingly, we and AstraZeneca filed suit against Lupin on July 25, 2011 in the United States District Court for the District of New Jersey. The case has been consolidated with the case against Dr. Reddy's and is currently in the discovery phase. On December 19, 2012, the District Court conducted a pre-trial "Markman" hearing to determine claim construction. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties.

On September 19, 2011, we and AstraZeneca received a Paragraph IV Notice Letter notice from Anchen, informing us that Anchen had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent the '085 patent, the '070 patent, and the '466 patent. The patents are among those listed with respect to VIMOVO in the Orange Book and expire at various times between 2018 and 2023. Anchen's Paragraph IV Notice Letter asserts that its generic product will not infringe those five listed patents or that those five listed patents are invalid or unenforceable. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Anchen and, accordingly, we and AstraZeneca filed suit against Anchen on October 28, 2011 in the United States District Court for the District of New Jersey. The case has been consolidated with the case against Dr. Reddy's and is currently in the discovery phase. On December 19, 2012, the District Court conducted a pre-trial "Markman" hearing to determine claim construction. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties. On October 4, 2013, Anchen filed an amendment to its ANDA seeking to change its Paragraph IV certification to a Paragraph III. It is unclear when or if the FDA will enter Anchen's amendment. On October 25, 2013, Anchen filed a Motion to Dismiss the case against it, based on its proposed re-certification. On November 18, 2013, we and AstraZeneca filed an Opposition to Anchen's Motion to Dismiss. On June 11, 2014, the Court granted Anchen's Motion and dismissed the case against them.

On November 20, 2012 the Company received a Paragraph IV Notice Letter from Dr. Reddy's, indicating that Dr. Reddy's had filed a second ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO. In that Paragraph IV Notice Letter, Dr. Reddy asserts, among other things, that the '907 patent is invalid and/or not infringed. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Dr. Reddy's on its second ANDA filing and, accordingly, we and AstraZeneca filed suit against Dr. Reddy's on January 4, 2013, in the United States District Court for the District of New Jersey. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 18, 2013, the District Court issued a Stipulation and Order dismissing with prejudice those claims and defenses. On May 5, 2013, this case was consolidated with the originally filed Dr. Reddy's case. On June 28, 2013 we and AstraZeneca filed a Motion for Summary Judgment relating to the second ANDA filing asserting that U.S. Patent No. 6,926,907 is not invalid. On August 12, 2013, DRL filed its opposition to the Motion for Summary Judgment. On March 28, 2014, the District Court denied our and AstraZeneca's Motion. On October 11, 2013, DRL filed a Motion for Summary Judgment asserting that the product which is the subject matter of its second ANDA does not infringe the '907 patent. On November 4, 2013, POZEN and AstraZeneca filed a Motion for an Order Denying DRL's Motion for Summary Judgment Pursuant to Rule 56(d) and an Opposition to DRL's Motion for Summary Judgment. On May 29, 2014, the Court issued an order denying DRL's motion.

On March 29, 2013, we and AstraZeneca received a Paragraph IV Notice Letter from Watson informing the companies that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the '504 patent, the '085 patent, the '424 patent, the '872 patent, the '070 patent, and the '466 patent, each of which assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Watson's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. On May 10, 2013, we and AstraZeneca filed a patent infringement lawsuit against Watson in the U.S. District Court of New Jersey.

On May 16, 2013, POZEN and AstraZeneca AB received a Paragraph IV Notice Letter from Mylan informing the companies that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the '504 patent, the '085 patent, the '424 patent, the '872 patent, the '070 patent, and the '466 patent, each of which assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Mylan's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. On June 28, 2013, we and AstraZeneca filed a patent infringement lawsuit against Mylan in the U.S. District Court of New Jersey.

On October 15, 2013, the United States Patent Office issued '285 patent. The '285 patent, entitled "Pharmaceutical compositions for the coordinated delivery of NSAIDs" and assigned to POZEN, is related to the '907 patent. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement of the '285 patent and, accordingly, on October 23, 2013, we, and AstraZeneca filed patent infringement lawsuits against DRL, Lupin, Watson and Mylan in the U.S. District Court of New Jersey alleging that their ANDA products infringe the '285 patent. On November 8, 2013, we, and AstraZeneca filed a Motion to Amend the Complaint in the actions against DRL, Lupin, Watson and Mylan or, in the alternative, to consolidate the actions involving the '285 patent with the existing consolidated action. DRL, Lupin, Watson and Mylan have each filed answers to the respective amended complaints

As part of Horizon's purchase of all of AstraZeneca's rights, title and interest to develop, commercialize and sell VIMOVO in the United States, Horizon has assumed AstraZeneca's right to lead the above-described Paragraph IV litigation relating to VIMOVO currently pending in the United States District Court for the District of New Jersey and will assume all patent-related defense costs relating to such litigation, including reimbursement up to specified amounts of the cost of any counsel retained by us. On December 12, 2013, Horizon filed Motions to Join under Fed.R.Civ.Proc. 25(c) as a co-plaintiff in each of the above referenced actions and the consolidated action. On January 31, 2014 and February 2, 2014, the Court granted Horizon's motions.

The filing of these patent infringement lawsuit within forty-five days of receipt of the Notice Letter from Dr. Reddy's, Lupin, Anchen, Watson and Mylan resulted in the FDA automatically instituting a stay, or bar, of approval of their respective ANDAs for up to 30 months or until a final court decision is entered in the infringement suit in favor of the defendants, whichever occurs first. VIMOVO may be eligible for an additional six months of exclusivity upon the completion of certain pediatric studies.

Item 1A. Risk Factors

Described below are various risks and uncertainties that may affect our business. These risks and uncertainties are not the only ones we face. You should recognize that other significant risks and uncertainties may arise in the future, which we cannot foresee

at this time. Also, the risks that we now foresee might affect us to a greater or different degree than expected. Certain risks and uncertainties, including ones that we currently deem immaterial or that are similar to those faced by other companies in our industry or business in general, may also affect our business. If any of the risks described below actually occur, our business, financial condition or results of operations could be materially and adversely affected.

Risks Related to Our Business

We have incurred losses since inception and we may continue to incur losses for the foreseeable future. Product revenue for products which we license out is dependent upon the commercialization efforts of our partners, including the sales and marketing efforts of AstraZeneca and Horizon relating to VIMOVO and Sanofi US relating to our PA product candidates in the United States.

We have incurred significant losses since our inception. As of June 30, 2014, we had an accumulated deficit of approximately \$110.7 million. Our ability to receive product revenue from the sale of products is dependent on a number of factors, principally the development, regulatory approval and successful commercialization of our product candidates. We expect that the amount of our operating losses will fluctuate significantly from quarter to quarter principally as a result of increases and decreases in our development efforts and the timing and amount of payments that we may receive from others. We expect to continue to incur significant operating losses associated with our research and development efforts and do not know the amount or timing of product revenue we will receive as a result of sales of VIMOVO by AstraZeneca and Horizon, future sales of our PA product candidates by Sanofi US, or our other product candidates by other commercial partners. If our licensed products do not perform well in the marketplace our royalty revenue will be impacted and our business could be materially harmed.

Our primary current source of revenue is the royalty payments that we may receive pursuant to our collaboration agreement with AstraZeneca. If the NDA for our PA product candidates is approved, we may also receive approval-related and sales milestones and royalty payments from Sanofi US pursuant to our license agreement. We have received all regulatory milestone payments under our collaboration agreement with AstraZeneca. On May 3, 2013, AstraZeneca informed us that, after a strategic business review, it had decided to cease promotion and sampling of VIMOVO by the end of the third quarter of 2013 in certain countries, including the U.S. and all countries in Europe, other than Spain and Portugal, which have pre-existing contractual relationships with third parties. We understand that AstraZeneca will instead now focus on those countries where the product has shown growth and which AstraZeneca believes have the greatest potential for future growth. The decision to launch the product in additional countries will be made by AstraZeneca on a case by case basis. We will continue to assess the financial impact this decision will have on our royalty revenue. On November 18, 2013, AstraZeneca and Horizon entered into certain agreements in connection with AstraZeneca's divestiture of all of its rights, title and interest to develop, commercialize and sell VIMOVO in the United States to Horizon. As a result, royalty revenues for sales of VIMOVO in the United States will be received from Horizon. On July 28, 2014, Horizon announced that it had been verbally notified by CVS Caremark and Express Scripts, Inc. that VIMOVO would no longer be on their formularies and will be placed on their exclusion lists effective January 1, 2015. Horizon estimates that approximately 20-30% of VIMOVO prescriptions could be impacted by these decisions. While Horizon believes it has a strategy to mitigate the effect on VIMOVO sales, POZEN's royalty revenue from Net Sales of VIMOVO beginning in 2015 may be negatively affected. We may also receive milestone and royalty payments under our agreements with Cilag.

We depend heavily on the success of our product candidates, which may never be approved for commercial use. If we are unable to develop, gain approval of or commercialize those product candidates, we will never receive revenues from the sale of our product candidates.

We anticipate that for the foreseeable future our ability to achieve profitability will be dependent on the successful commercialization of VIMOVO, and, if approved, sales of our PA product candidates by Sanofi US in the United States along with the successful development, approval and commercialization of our current product candidates. If we fail to gain timely approval to commercialize our products from the FDA and other foreign regulatory bodies, we will be unable to generate the revenue we will need to build our business. These approvals may not be granted on a timely basis, if at all, and even if and when they are granted, they may not cover all of the indications for which we seek approval. For example, absent the availability of such a lower dose formulation in the market if PA32540 is approved, the FDA indicated that it may limit the indication for PA32540 to use in post coronary artery bypass graft surgery (CABG) with a treatment duration not to exceed one year. In the event our PA products are approved by the FDA, but not for the expected indication, Sanofi US has the right, but not the obligation, to terminate our license and collaboration agreement. Further, on April 25, 2014, we received a CRL product because of deficiencies noted during an inspection of a supplier of an active ingredient used in the manufacture of the PA products, which has delayed approval of our NDA. There can be no assurance that our PA products will be approved by the FDA and, if so approved, for the expected indication.

Many factors could negatively affect our ability to obtain regulatory approval for our product candidates. For example, in October 2008, the FDA informed us that it was conducting an internal review of the acceptability of using endoscopic gastric ulcers as

a primary endpoint in clinical trials. Reduction of endoscopic gastric ulcers was the primary endpoint in our Phase 3 trials for VIMOVO and the primary endpoint in the ongoing Phase 3 trials for our PA32540 product. In late January 2009, the FDA informed us that it had completed its internal discussions and that there was no change to previous agreements that gastric ulcer incidence was an acceptable primary endpoint for our clinical programs. The FDA decided to obtain further advice on this issue and held an Advisory Board meeting on November 4, 2010 to discuss the adequacy of endoscopically documented gastric ulcers as an outcome measure to evaluate drugs intended to prevent gastrointestinal complications of non-steroidal anti-inflammatory drugs, including aspirin. The Advisory Board voted in favor (8-4) that endoscopically-documented gastric/duodenal ulcers are an adequate primary efficacy endpoint for evaluating products intended to prevent NSAID-associated upper gastrointestinal (UGI) toxicity, which vote supports the clinical design of the pivotal Phase 3 trials conducted for VIMOVO and which are presently being conducted for PA32540. However, there can be no assurance that FDA will continue to accept the recommendation of the Advisory Board or will not decide to reassess the acceptability of this endpoint in the future.

In addition to the inability to obtain regulatory approval, many other factors could negatively affect the success of our efforts to develop and commercialize our product candidates, including those discussed in the risk factors that follow as well as negative, inconclusive or otherwise unfavorable results from any studies or clinical trials, such as those that we obtained with respect to MT 500, which led to our decision to discontinue development of that product candidate in 2002.

Changes in regulatory approval policy or statutory or regulatory requirements, or in the regulatory environment, during the development period of any of our product candidates may result in delays in the approval, or rejection, of the application for approval of one or more of our product candidates. If we fail to obtain approval, or are delayed in obtaining approval, of our product candidates, our ability to generate revenue will be severely impaired.

The process of drug development and regulatory approval for product candidates takes many years, during which time the FDA's interpretations of the standards against which drugs are judged for approval may evolve or change. The FDA can also change its approval policies based upon changes in laws and regulations. In addition, the FDA can decide, based on its then current approval policies, any changes in those policies and its broad discretion in the approval process, to weigh the benefits and the risks of every drug candidate. As a result of any of the foregoing, the FDA may decide that the data we submit in support of an application for approval of a drug candidate are insufficient for approval. For example, in October 2008, the FDA has informed us that it was conducting an internal review of the acceptability of using endoscopic gastric ulcers as a primary endpoint in clinical trials. Reduction of endoscopic gastric ulcers was the primary endpoint in our Phase 3 trials for VIMOVO (formerly referred to as PN 400) and the primary endpoint in our on-going Phase 3 trials for PA32540. In late January 2009, the FDA informed us that it had completed its internal discussions and that there was no change to previous agreements that gastric ulcer incidence was an acceptable primary endpoint for our clinical programs. The FDA decided to obtain further advice on this issue and held an Advisory Board meeting on November 4, 2010 to discuss the adequacy of endoscopically documented gastric ulcers as an outcome measure to evaluate drugs intended to prevent gastrointestinal complications of non-steroidal anti-inflammatory drugs, including aspirin. The Advisory Board voted in favor (8-4) that endoscopically-documented gastric/duodenal ulcers are an adequate primary efficacy endpoint for evaluating products intended to prevent NSAID-associated UGI toxicity, which vote supports the clinical design of the pivotal Phase 3 trials conducted for VIMOVO and PA32540. However, there can be no assurance that FDA will accept the recommendation of the Advisory Board or will not decide to reassess the acceptability of this endpoint in the future.

Changes in policy or interpretation may not be the subject of published guidelines and may therefore be difficult to evaluate. For example, in February 2012, the FDA requested we demonstrate the bioequivalence of PA32540 to EC aspirin 325 mg, with respect to acetylsalicylic acid in an additional Phase 1 study. Enteric coated products such as PA32540 and EC aspirin 325 mg have highly variable pharmacokinetics. Based on our analyses, we believed that the results demonstrated bioequivalence, but the FDA did not agree. However, the FDA did agree that the results from this Phase 1 study, together with additional information that will be submitted by us in the NDA for the product, constitutes sufficient data to support the establishment of a clinical and pharmacological bridge between the product and EC aspirin 325 mg. In the event our PA products are approved by the FDA, but not for the expected indications, Sanofi US has the right, but not the obligation, to terminate our license and collaboration agreement. There can be no assurance that our PA products will be approved by the FDA and, if so approved, for the expected indications.

As another example, the FDA has not recently published guidelines for the approval of new migraine therapies, and we have had to rely on periodic guidance from the FDA obtained (in conversations) informally and in other meetings, the content of which may be subject to significant modification over the period of a drug's development program. There is also the risk that we and the FDA may interpret such guidance differently. The FDA has recently made several changes to the omeprazole label that relate, in part, to the agency's concern regarding certain reported adverse events in patients taking long term PPI such as omeprazole. For example, with VIMOVO, in Dosage and Administration, the label states to use the lowest effective dose for the shortest duration consistent with individual patient treatment goals. There is a risk that further omeprazole safety issue may arise in the future that could impact FDA's benefit/risk assessment of the dose or duration of PPI in subjects requiring long-term PPI use.

Further, additional information about the potential risks of marketed drugs may affect the regulatory approval environment, or the FDA's approval policies, for new product candidates. For example, in February 2005 an advisory committee convened by the FDA met to address the potential cardiovascular risks of COX-2 selective NSAIDs and related drugs in response to disclosures made about possible adverse effects from the use of some of these drugs. On April 7, 2005, the FDA issued a Public Health Advisory, or the Advisory, based, in part, upon the recommendations of the advisory committee. The Advisory stated that it would require that manufacturers of all prescription products containing NSAIDs provide warnings regarding the potential for adverse cardiovascular events as well as life-threatening gastrointestinal events associated with the use of NSAIDs. Moreover, subsequent to the FDA advisory committee meeting in February 2005, the FDA has indicated that long-term studies evaluating cardiovascular risk will be required for approval of new NSAID products that may be used on an intermittent or chronic basis. Long-term cardiovascular safety studies were not required at for FDA approval of our VIMOVO. However, we cannot guarantee that such studies will not be required in the future if new information about naproxen safety concerns becomes available. We will continue to evaluate and review with the FDA its expectations and recommendations regarding the efficacy and safety requirements and study design necessary to support approval of NDAs for product candidates we may develop that contain NSAIDs.

If we, or our current or future collaborators, do not obtain and maintain required regulatory approvals for one or more of our product candidates, we will be unable to commercialize those product candidates. Further, if we are delayed in obtaining or unable to obtain, any required approvals, our collaborators may terminate, or be entitled to terminate, their agreements with us or reduce or eliminate their payments to us under these agreements or we may be required to pay termination payments under these agreements.

Our product candidates under development are subject to extensive domestic and foreign regulation. The FDA regulates, among other things, the development, testing, manufacture, safety, efficacy, record keeping, labeling, storage, approval, advertisement, promotion, sale and distribution of pharmaceutical products in the U.S. In order to market our products abroad, we must comply with extensive regulation by foreign governments. If we are unable to obtain and maintain FDA and foreign government approvals for our product candidates, we, alone or through our collaborators, will not be permitted to sell them. Failure to obtain regulatory approval for a product candidate will prevent us from commercializing that product candidate. Except for *Treximet*, which was approved for commercial sale in the U.S. on April 15, 2008, and VIMOVO, which was approved for commercial sale in the U.S. on April 30, 2010 and has been approved in a number of additional countries in the rest of the world, none of our other product candidates are approved for sale in the U.S. or any foreign market and they may never be approved. For example, we received two approvable letters relating to our NDA for *Treximet* which communicated the FDA's concerns that delayed marketing approval. An approvable letter is an official notification from the FDA that contains conditions that must be satisfied prior to obtaining final U.S. marketing approval. In June 2006, we received the first approvable letter in which the FDA requested additional safety information on *Treximet*, and in August 2007, we received a second approvable letter in which the FDA requested that we address their concern about the potential implications from one preclinical in vitro chromosomal aberration study in which a signal for genotoxicity was seen for the combination of naproxen sodium and sumatriptan. We have also previously received not-approvable letters from the FDA relating to our NDAs for MT 100 and MT 300.

In the U.S., an NDA or supplement must be filed with respect to each indication for which marketing approval of a product is sought. Each NDA, in turn, requires the successful completion of preclinical, toxicology, genotoxicity and carcinogenicity studies, as well as clinical trials demonstrating the safety and efficacy of the product for that particular indication. We may not receive regulatory approval of any of the NDAs that we file with the FDA or of any approval applications we may seek in the future outside the U.S.

Further, our current or future collaboration agreements may terminate, or require us to make certain payments to our collaborators, or our collaborators may have the right to terminate their agreements with us or reduce or eliminate their payments to us under these agreements, based on our inability to obtain, or delays in obtaining, regulatory approval for our product candidates. For example, under our PN collaboration agreement with AstraZeneca, AstraZeneca had the right to terminate the agreement if certain delays occurred or specified development and regulatory objectives were not met. For example, this termination right could have been triggered by AstraZeneca if the FDA had determined that endoscopic gastric ulcers were no longer an acceptable endpoint and we had been required to conduct additional trials which would have delayed NDA approval for VIMOVO. Sanofi US has the right to terminate the PA license agreement for the United States in the event of a number of specified circumstances. Both AstraZeneca, Horizon and GSK have the right to terminate their respective agreements with us upon a 90 day notice for any reason and Sanofi US also has the right to terminate the license agreement at will in its entirety any time after the third anniversary of the effective date of the license agreement upon a specified notice period. Further, if we or our contract manufacturers do not maintain required regulatory approvals, we may not be able to commercialize our products

Approval of a product candidate may be conditioned upon certain limitations and restrictions as to the drug's use, such as possible a warning which the FDA may require in the PA32540 label regarding the concomitant use of PA32540 and Plavix, or upon the conduct of further studies, and is subject to continuous review. The FDA has indicated that, absent the availability of such a lower dose formulation in the market if PA32540 is approved, that it may limit the indication for PA32540 to use in post coronary artery

bypass graft surgery (CABG) with a treatment duration not to exceed one year. We believe that the FDA is concerned that without a formulation containing a lower dose of aspirin, physicians will not have a full range of dosing options available to prescribe in accordance with current cardiovascular treatment guidelines, which recommend doses of 81 mgs or 162 mgs of aspirin for most indications and we followed the FDA's suggestion to seek approval for a lower dose formulation of the product containing 81 mg of enteric coated aspirin as part of our NDA for PA32540. However, there can be no assurance that the FDA will approve a lower dose formulation of the product or will allow a broader indication for PA32540. In the event our PA products are approved by the FDA, but not for the expected indications, Sanofi US has the right, but not the obligation, to terminate our license and collaboration agreement. There can be no assurance that our PA products will be approved by the FDA and, if so approved, for the expected indications.

The FDA may also require us to conduct additional post-approval studies. These post-approval studies may include carcinogenicity studies in animals or further human clinical trials. The later discovery of previously unknown problems with the product, manufacturer or manufacturing facility may result in criminal prosecution, civil penalties, recall or seizure of products, or total or partial suspension of production, as well as other regulatory action against our product candidates or us. If approvals are withdrawn for a product, or if a product is seized or recalled, we would be unable to sell that product and therefore would not receive any revenues from that product.

We and our contract manufacturers are required to comply with the applicable FDA current Good Manufacturing Practices, or cGMP, regulations, which include requirements relating to quality control and quality assurance, as well as the corresponding maintenance of records and documentation. Further, manufacturing facilities must be approved by the FDA before they can be used to manufacture our product candidates, and are subject to additional FDA inspection. On April 25, 2014, we announced that we had received a CRL from the FDA with respect to the NDA for our PA32540 and PA8140 product candidates. In the CRL, the FDA noted that, during an inspection of the manufacturing facility of an active ingredient supplier, inspection deficiencies were found. Satisfactory resolution of deficiencies noted by the field investigator is required before the NDA may be approved. On May 9, 2014, our active ingredient supplier submitted a response to the FDA addressing the inspection deficiencies and subsequently submitted an update to its initial response. However, we cannot guarantee that the FDA will consider the actions taken by the active ingredient supplier to be sufficient to address the inspection deficiencies. If such inspection deficiencies are not resolved by December 30, 2014, our new action date, we could receive another CRL from the FDA. Manufacturing facilities may also be subject to state regulations. We, or our third-party manufacturers, may not be able to comply with cGMP regulations or other FDA regulatory requirements, or applicable state regulations, which could result in a delay or an inability to manufacture the products. If we or our partners wish or need to identify an alternative manufacturer, delays in obtaining FDA approval of the alternative manufacturing facility could cause an interruption in the supply of our products.

Labeling and promotional activities are subject to scrutiny by the FDA and state regulatory agencies and, in some circumstances, the Federal Trade Commission. FDA enforcement policy prohibits the marketing of unapproved products as well as the marketing of approved products for unapproved, or off-label, uses. These regulations and the FDA's interpretation of them may limit our or our partners' ability to market products for which we gain approval. Failure to comply with these requirements can result in federal and state regulatory enforcement action. Further, we may not obtain the labeling claims we or our partners believe are necessary or desirable for the promotion of our product candidate. As part of the CRL received in connection with our PA32540 and PA8140 products, FDA indicated that the final agreement on draft product labeling remains pending.

If third parties challenge the validity of the patents or proprietary rights of our marketed products or assert that we have infringed their patents or proprietary rights, we may become involved in intellectual property disputes and litigation that would be costly and time consuming and could negatively impact the commercialization of our products that we develop or acquire. We have received a Paragraph IV Notice Letters notifying us of the filing of ANDAs with the FDA for approval to market a generic version of VIMOVO. We previously received Paragraph IV Letters notifying us of the filing of ANDAs with the FDA for approval to market a generic version of *Treximet* and those cases have been concluded. We filed patent infringement lawsuits in response to these ANDAs that has led and will continue to lead to costly and time consuming patent litigation.

The intellectual property rights of pharmaceutical companies, including us, are generally uncertain and involve complex legal, scientific and factual questions. Our success in developing and commercializing pharmaceutical products may depend, in part, on our ability to operate without infringing on the intellectual property rights of others and to prevent others from infringing on our intellectual property rights. There has been substantial litigation regarding patents and other intellectual property rights in the pharmaceutical industry. For example, third parties seeking to market generic versions of branded pharmaceutical products often file ANDAs with the FDA, containing a certification stating that the ANDA applicant believes that the patents protecting the branded pharmaceutical product are invalid, unenforceable and/or not infringed. Such certifications are commonly referred to as paragraph IV certifications.

On March 14, 2011, we and AstraZeneca received a Paragraph IV Notice Letter from Dr. Reddy's informing us that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent in 2023. The patent is assigned to us and listed with respect to VIMOVO in the Orange Book. On September 19, 2011, Dr. Reddy's amended its ANDA to include a Paragraph IV certification against U the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent, which are assigned to AstraZeneca or its affiliates and listed in the Orange Book with respect to VIMOVO. The patents listed in the Orange Book which are owned by AstraZeneca or its affiliates expire at various times between 2014 and 2018. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Dr. Reddy's. Accordingly, we and AstraZeneca filed suit against Dr. Reddy's on April 21, 2011 in the United States District Court for the District of New Jersey, asserting only the '907 patent against Dr. Reddy's. An amended complaint was filed on October 28, 2011 to include the AstraZeneca patents. The case has been consolidated with the cases against Lupin and Anchen (see below). The case is currently in the discovery phase. On December 19, 2012, the District Court conducted a Markman hearing. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 18, 2013, the District Court issued a Stipulation and Order dismissing with prejudice those claims and defenses. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties. This case is considered the lead case and has been consolidated with the actions described below for the purpose of pre-trial and discovery. A scheduling order for this case, and all of the consolidated cases, was issued by the Court on June 27, 2014.

On June 13, 2011, we and AstraZeneca received a Paragraph IV Notice Letter from Lupin informing us that Lupin had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company, and the 504 patent, patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent, each of which are assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Lupin's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Lupin and, accordingly, we and AstraZeneca filed suit against Lupin on July 25, 2011 in the United States District Court for the District of New Jersey. The case has been consolidated with the case against Dr. Reddy's and is currently in the discovery phase. On December 19, 2012, the District Court conducted a pre-trial "Markman" hearing to determine claim construction. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties.

On September 19, 2011, we and AstraZeneca received a Paragraph IV Notice Letter notice from Anchen, informing us that Anchen had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent the '085 patent, the '070 patent, and the '466 patent. The patents are among those listed with respect to VIMOVO in the Orange Book and expire at various times between 2018 and 2023. Anchen's Paragraph IV Notice Letter asserts that its generic product will not infringe those five listed patents or that those five listed patents are invalid or unenforceable. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Anchen and, accordingly, we and AstraZeneca filed suit against Anchen on October 28, 2011 in the United States District Court for the District of New Jersey. The case has been consolidated with the case against Dr. Reddy's and is currently in the discovery phase. On December 19, 2012, the District Court conducted a pre-trial "Markman" hearing to determine claim construction. On May 1, 2012, the Court issued a Markman Order construing the claim terms disputed by the parties. On October 4, 2013, Anchen filed an amendment to its ANDA seeking to change its Paragraph IV certification to a Paragraph III. It is unclear when or if the FDA will enter Anchen's amendment. On October 25, 2013, Anchen filed a Motion to Dismiss the case against it, based on its proposed re-certification. On November 18, 2013, we and AstraZeneca filed an Opposition to Anchen's Motion to Dismiss. On June 11, 2014, the Court granted Anchen's Motion and dismissed the case against them.

On November 20, 2012 the Company received a Paragraph IV Notice Letter from Dr. Reddy's, indicating that Dr. Reddy's had filed a second ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO. In that Paragraph IV Notice Letter, Dr. Reddy asserts, among other things, that the '907 patent is invalid and/or not infringed. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement suit against Dr. Reddy's on its second ANDA filing and, accordingly, we and AstraZeneca filed suit against Dr. Reddy's on January 4, 2013, in the United States District Court for the District of New Jersey. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 15, 2013 a Stipulation of Partial Dismissal was filed which sought dismissal of all infringement claims relating to the '504 patent, the '085 patent, the '872 patent, the '070 patent, and the '466 patent (which are each assigned to AstraZeneca), as well as Dr. Reddy's defenses and counterclaims relating to those patents. On April 18, 2013, the District Court issued a Stipulation and Order dismissing with prejudice those claims and defenses. On May 5, 2013, this case was consolidated with the originally filed Dr. Reddy's case. On June 28, 2013 we and

AstraZeneca filed a Motion for Summary Judgment relating to the second ANDA filing asserting that U.S. Patent No. 6,926,907 is not invalid. On August 12, 2013, DRL filed its opposition to the Motion for Summary Judgment. On March 28, the District Court denied our and AstraZeneca's Motion. On October 11, 2013, DRL filed a Motion for Summary Judgment asserting that the product which is the subject matter of its second ANDA does not infringe the '907 patent. On November 4, 2013, POZEN and AstraZeneca filed a Motion for an Order Denying DRL's Motion for Summary Judgment Pursuant to Rule 56(d) and an Opposition to DRL's Motion for Summary Judgment. On May 29, 2014, the Court issued an order denying DRL's Motion.

On March 29, 2013, we and AstraZeneca received a Paragraph IV Notice Letter from Watson informing the companies that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the '504 patent, the '085 patent, the '424 patent, the '872 patent, the '070 patent, and the '466 patent, each of which assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Watson's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. On May 10, 2013, we and AstraZeneca filed a patent infringement lawsuit against Watson in the U.S. District Court of New Jersey.

On May 16, 2013, POZEN and AstraZeneca AB received a Paragraph IV Notice Letter from Mylan informing the companies that it had filed an ANDA with the FDA seeking regulatory approval to market a generic version of VIMOVO before the expiration of the '907 patent, which is assigned to the Company and the '504 patent, the '085 patent, the '424 patent, the '872 patent, the '070 patent, and the '466 patent, each of which assigned to AstraZeneca or its affiliates. The patents are listed with respect to VIMOVO in the Orange Book and expire at various times between 2014 and 2023. Mylan's Paragraph IV Notice Letter asserts that its generic product will not infringe the listed patents or that the listed patents are invalid or unenforceable. On June 28, 2013, we and AstraZeneca filed a patent infringement lawsuit against Mylan in the U.S. District Court of New Jersey.

On October 15, 2013, the United States Patent Office issued '285 patent. The '285 patent, entitled "Pharmaceutical compositions for the coordinated delivery of NSAIDs" and assigned to POZEN, is related to the '907 patent. AstraZeneca has advised us that it has elected to exercise its first right to prosecute the infringement of the '285 patent and, accordingly, on October 23, 2013, we, and AstraZeneca filed patent infringement lawsuits against DRL, Lupin, Watson and Mylan in the U.S. District Court of New Jersey alleging that their ANDA products infringe the '285 patent. On November 8, 2013, we, and AstraZeneca filed a Motion to Amend the Complaint in the actions against DRL, Lupin, Watson and Mylan or, in the alternative, to consolidate the actions involving the '285 patent with the existing consolidated action. DRL, Lupin, Watson and Mylan have each filed answers to the respective amended complaints.

As part of Horizon's purchase of all of AstraZeneca's rights, title and interest to develop, commercialize and sell VIMOVO in the United States, Horizon has assumed AstraZeneca's right to lead the above-described Paragraph IV litigation relating to VIMOVO currently pending in the United States District Court for the District of New Jersey and will assume all patent-related defense costs relating to such litigation, including reimbursement up to specified amounts of the cost of any counsel retained by us. On December 12, 2013, Horizon filed Motions to Join under Fed.R.Civ.Proc. 25(c) as a co-plaintiff in each of the above referenced actions and the consolidated action. On January 31, 2014 and February 2, 2014, the Court granted Horizon's motions.

The filing of these patent infringement lawsuit within forty-five days of receipt of the Notice Letter from Dr. Reddy's, Lupin, Anchen, Watson and Mylan resulted in the FDA automatically instituting a stay, or bar, of approval of their respective ANDAs for up to 30 months or until a final court decision is entered in the infringement suit in favor of the defendants, whichever occurs first. VIMOVO may be eligible for an additional six months of exclusivity upon the completion of certain pediatric studies.

Litigation can be time consuming and costly and we cannot predict with certainty the outcome. If we are unsuccessful in any of the above-described proceedings and the FDA approves a generic version of one of our marketed products, such an outcome would have a material adverse effect on sales of such product, our business and our results of operations.

Our reliance on collaborations with third parties to develop and commercialize our products is subject to inherent risks and may result in delays in product development and lost or reduced revenues, restricting our ability to commercialize our products and adversely affecting our profitability.

With respect to the products we have licensed, we depend upon collaborations with third parties to develop these product candidates and we depend substantially upon third parties to commercialize these products. As a result, our ability to develop, obtain regulatory approval of, manufacture and commercialize our existing and possibly future product candidates depends upon our ability to maintain existing, and enter into and maintain new, contractual and collaborative arrangements with others. We also engage, and may in the future to continue to engage, contract manufacturers and clinical trial investigators.

In addition, although not a primary component of our current strategy, the identification of new compounds or product candidates for development has led us in the past, and may continue to require us, to enter into license or other collaborative agreements with others, including pharmaceutical companies and research institutions. Such collaborative agreements for the acquisition of new compounds or product candidates would typically require us to pay license fees, make milestone payments and/or pay royalties. Furthermore, these agreements may result in our revenues being lower than if we developed our product candidates ourselves and in our loss of control over the development of our product candidates.

We had a collaboration with GSK for the development and commercialization of certain triptan combinations using our MT 400 technology, including *Treximet*, in the U.S. and GSK has entered into an agreement to divest of all of its rights, title and interest to develop, commercialize and sell the licensed products in the U.S. to Pernix upon closing. We also have collaborations with Cilag for the development and commercialization of MT 400 in certain countries in Latin America., AstraZeneca and Horizon for the development and commercialization of proprietary combinations of gastroprotective agents and naproxen, including VIMOVO, with Sanofi US for the commercialization of our PA product candidates containing an immediate release proton pump inhibitor and 325 mg or less of delayed release or enteric coated aspirin in the United States. Contractors or collaborators may have the right to terminate their agreements with us or reduce their payments to us under those agreements on limited or no notice and for no reason or reasons outside of our control. For example, on May 3, 2013, AstraZeneca informed us that, after a strategic business review, it had decided to cease promotion and sampling of VIMOVO by the end of the third quarter of 2013 in certain countries, including the U.S. and all countries in Europe, other than Spain and Portugal, which have pre-existing contractual relationships with third parties. We understood that AstraZeneca would instead focus on those countries where the product has shown growth and which AstraZeneca believed had the greatest potential for future growth. On November 18, 2013, AstraZeneca and Horizon entered into certain agreements in connection with AstraZeneca's divestiture of all of its rights, title and interest to develop, commercialize and sell VIMOVO in the United States to Horizon. In these collaboration agreements, our collaborators also have the right to terminate the agreement upon a default by us. In addition, our collaborators are entitled to terminate their respective agreements with us upon 90 days' notice for any reason. For example, we had a collaboration agreement with Desitin Arzneimittel GmbH, or "Desitin," for the development and commercialization of MT 400 for the 27 countries of the European Union, as well as Switzerland and Norway, but on February 27, 2013, we received written notice from Desitin that it was terminating the license agreement due to reimbursement uncertainty for MT 400 in Germany, a major market for Desitin in the territory. Additionally, GSK and AstraZeneca and Horizon have the right to reduce the royalties on net sales of products payable to us under their respective agreements if generic competitors enter the market and attain a pre-determined share of the market for products marketed under the agreements, or if they must pay a royalty to one or more third parties for rights it licenses from those third parties to commercialize products marketed under the agreements. AstraZeneca was also entitled to terminate its agreement with us if certain delays occur or specified development or regulatory objectives were not met. This termination could have been triggered by AstraZeneca if in January 2009, the FDA had determined that endoscopic gastric ulcers were no longer an acceptable endpoint and we had been required to conduct additional trials which would have delayed NDA approval for VIMOVO. If our current or future licensees exercise termination rights they may have, or if these license agreements terminate because of delays in obtaining regulatory approvals, or for other reasons, and we are not able to establish replacement or additional research and development collaborations or licensing arrangements, we may not be able to develop and/or commercialize our product candidates. Moreover, any future collaborations or license arrangements we may enter into may not be on terms favorable to us. A further risk we face with our collaborations is that business combinations and changes in the collaborator or their business strategy may adversely affect their willingness or ability to complete their obligations to us.

Our current or any future collaborations or license arrangements ultimately may not be successful. Our agreements with collaborators typically allow them discretion in electing whether to pursue various regulatory, commercialization and other activities or with respect to the timing of the development, such as our agreement with GSK under which GSK determined, among other things, the exact formulation and composition of the product candidates using our MT 400 technology for use in the *Treximet* clinical trials. Similarly, under our agreement with AstraZeneca, AstraZeneca had the right to manufacture clinical trial material itself or through a third party.

If any collaborator were to breach its agreement with us or otherwise fail to conduct collaborative activities in a timely or successful manner, the pre-clinical or clinical development or commercialization of the affected product candidate or research program would be delayed or terminated. Any delay or termination of clinical development or commercialization, such as the delay in FDA approval we experienced as a result of approvable letters we received from the FDA in June 2006 and August 2007 related to our *Treximet* NDA, or a delay in FDA approval of VIMOVO which could have occurred if the FDA determined in January 2009 that endoscopic gastric ulcers were no longer an acceptable primary endpoint in clinical trials and we were required to conduct additional clinical trials for the product, would delay or possibly eliminate our potential product revenues. Further, our collaborators may be able to exercise control, under certain circumstances, over our ability to protect our patent rights under patents covered by the applicable collaboration agreement. For example, under our collaboration agreements with GSK and AstraZeneca, GSK and AstraZeneca each has the first right to enforce our patents under their respective agreements and would have exclusive control over such enforcement litigation. GSK elected not to exercise its first right to prosecute infringement suits against Par, Alphapharm, Teva, Dr. Reddy's, and Sun, each of which submitted ANDAs to the FDA for approval to market a generic version of *Treximet* tablets and we filed suit

against these companies in the United States District Court for the Eastern District of Texas. On the other hand, AstraZeneca has elected to its first right to prosecute infringement suits against Dr. Reddy's, Lupin, Anchen, Watson and Mylan, each of which submitted an ANDA to the FDA for approval to market a generic version of VIMOVO. We and AstraZeneca filed suit against Dr. Reddy's, Lupin, Anchen, Watson and Mylan in the United States District Court for the District of New Jersey. As part of Horizon's purchase of all of AstraZeneca's rights, title and interest to develop, commercialize and sell VIMOVO in the United States, Horizon has assumed AstraZeneca's right to lead the above-described Paragraph IV litigation relating to VIMOVO.

Other risks associated with our collaborative and contractual arrangements with others include the following:

- we may not have day-to-day control over the activities of our contractors or collaborators;
- our collaborators may fail to defend or enforce patents they own on compounds or technologies that are incorporated into the products we develop with them;
- third parties may not fulfill their regulatory or other obligations;
- we may not realize the contemplated or expected benefits from collaborative or other arrangements; and
- disagreements may arise regarding a breach of the arrangement, the interpretation of the agreement, ownership of proprietary rights, clinical results or regulatory approvals.

These factors could lead to delays in the development of our product candidates and/or the commercialization of our products or reduction in the milestone payments we receive from our collaborators, or could result in our not being able to commercialize our products. Further, disagreements with our contractors or collaborators could require or result in litigation or arbitration, which would be time-consuming and expensive. Our ultimate success may depend upon the success and performance on the part of these third parties. If we fail to maintain these relationships or establish new relationships as required, development of our product candidates and/or the commercialization of our products will be delayed or may never be realized.

A collaborator may withdraw support or cease to perform work on our product candidates if the collaborator determines to develop its own competing product candidate or other product candidates instead.

We have entered into collaboration and license agreements, and may continue to enter into such agreements, with companies that have products and are developing new product candidates that compete or may compete with our product candidates or which have greater commercial potential. If one of our collaborators should decide that the product or a product candidate that the collaborator is developing would be more profitable for the collaborator than our product candidate covered by the collaboration or license agreement, the collaborator may withdraw support for our product candidate or may cease to perform under our agreement. On May 3, 2013, AstraZeneca informed us that, after a strategic business review, it had decided to cease promotion and sampling of VIMOVO by the end of the third quarter of 2013 in certain countries, including the U.S. and all countries in Europe, other than Spain and Portugal, which have pre-existing contractual relationships with third parties. We understood that AstraZeneca would instead focus on those countries where the product had shown growth and which AstraZeneca believed had the greatest potential for future growth. On November 18, 2013, AstraZeneca and Horizon entered into certain agreements in connection with AstraZeneca's divestiture of all of its rights, title and interest to develop, commercialize and sell VIMOVO in the United States to Horizon. In addition, GSK has entered into an agreement to divest of all of its rights, title and interest to develop, commercialize and sell MT 400 products, including *Treximet*, in the U.S. to Pernix upon closing.

In the event of a termination of the collaborator's agreement upon such cessation of performance, we would need to negotiate an agreement with another collaborator in order to continue the development and commercialization efforts for the product candidate. If we were unsuccessful in negotiating another agreement, we might have to cease development activities of the particular product candidate. For example, our development and commercialization agreements with AstraZeneca is subject to this risk. Under the terms of our agreement with AstraZeneca, either party has the right to terminate the agreement by notice in writing to the other party upon or after any material breach of the agreement by the other party, if the other party has not cured the breach within 90 days after written notice to cure has been given, with certain exceptions. The parties also can terminate the agreement for cause under certain defined conditions. In addition, AstraZeneca can terminate the agreement, at any time, at will, for any reason or no reason, in its entirety or with respect to countries outside the U.S., upon 90 days' notice. If terminated at will, AstraZeneca will owe us a specified termination payment or, if termination occurs after the product is launched, AstraZeneca may, at its option, under and subject to the satisfaction of conditions specified in the agreement, elect to transfer the product and all rights to us. However, under the circumstance above, or similar circumstance, we may need to enter into a new development and commercialization agreement and may need to start the development process all over again. If we were able to negotiate a new development and commercialization agreement to develop our technology, which is not certain, or if we decide to commercialize the products previously partnered by ourselves, we would face delays and redundant expenses in that development.

We need to maintain current agreements and enter into additional agreements with third parties that possess sales, marketing and distribution capabilities, or establish internally the capability to perform these functions, in order to successfully market and sell our future drug products.

We have no sales or distribution personnel or capabilities at the present time. If we are unable to maintain current collaborations or enter into additional collaborations with established pharmaceutical or pharmaceutical services companies to provide those capabilities, we will not be able to successfully commercialize our products. To the extent that we enter into marketing and sales agreements with third parties, such as our agreement with Horizon to sell VIMOVO in the United States and AstraZeneca to sell VIMOVO outside the United States and our agreement with Sanofi US to sell certain dosage forms of our PA product candidates in the United States, our revenues, if any, will be affected by the sales and marketing efforts of those third parties. If our licensed products do not perform well in the marketplace our royalty revenue will be impacted and our business could be materially harmed. For example, on July 28, 2014, Horizon announced that it had been verbally notified by CVS Caremark and Express Scripts, Inc. that VIMOVO would no longer be on their formularies and will be placed on their exclusion lists effective January 1, 2015. We have been notified that Horizon estimates that approximately 20-30% of VIMOVO prescriptions could be impacted by these decisions. While Horizon believes it has a strategy to mitigate the effect on VIMOVO sales, POZEN's royalty revenue from Net Sales of VIMOVO beginning in 2015 may be negatively affected.

We have refined our strategy and have decided to retain control of our PA product candidates for cardiovascular indications through the clinical development and pre-commercialization stage. To that end, our chief commercial officer evaluated the commercial opportunities for these product candidates and developed a worldwide commercial strategy, which included developing certain internal commercialization capabilities to enable us to conduct pre-commercialization activities prior to licensing our PA product candidates to commercial partners. We will continue to depend upon the commercial capabilities of our commercial partners in order to commercialize our products.

We need to conduct preclinical, toxicology, genotoxicity and carcinogenicity and other safety studies, and clinical trials for our product candidates. Any negative or unanticipated results, unforeseen costs or delays in the conduct of these studies or trials, or the need to conduct additional studies or trials or to seek to persuade the FDA to evaluate the results of a study or trial in a different manner, could cause us to discontinue development of a product candidate or reduce, delay or eliminate our receipt of potential revenues for one or more of our product candidates and adversely affect our ability to achieve profitability.

Generally, we must demonstrate the efficacy and safety of our product candidates before approval to market can be obtained from the FDA or the regulatory authorities in other countries. Our existing and future product candidates are and will be in various stages of clinical development. Depending upon the type of product candidate and the stage of the development process of a product candidate, we will need to complete preclinical, toxicology, genotoxicity and carcinogenicity and other safety studies, as well as clinical trials, on these product candidates before we submit marketing applications in the United States and abroad. These studies and trials can be very costly and time-consuming. For example, long-term cardiovascular safety studies, such as those the FDA has indicated will be required for approval of certain product candidates containing NSAIDs, typically take approximately three years. In addition, we rely on third parties to perform significant aspects of our studies and clinical trials, introducing additional sources of risk into our development programs.

It should be noted that the results of any of our preclinical and clinical trial testing are not necessarily predictive of results we will obtain in subsequent or more extensive clinical trials or testing. This may occur for many reasons, including, among others, differences in study design, including inclusion/exclusion criteria, the variability of patient characteristics, including patient symptoms at the time of study treatment, the larger scale testing of patients in later trials, or differences in formulation or doses of the product candidate used in later trials. For example, our results from the first of our two Phase 3 pivotal clinical trials of *Treximet* differed from the results of our second Phase 3 clinical trial and from the Phase 2 proof-of-concept trial of MT 400 that we conducted prior to entering into our collaboration with GSK. Whereas in the Phase 2 trial statistical significance was reached at two hours over placebo in the relief of all associated symptoms of migraine (nausea, photophobia and phonophobia), in the first Phase 3 study *Treximet* failed to achieve statistical significance at two hours compared to placebo in the relief of nausea. In the second Phase 3 pivotal clinical trial, *Treximet* demonstrated superiority over the individual components measured by sustained pain-free response ($p < 0.001$ vs. naproxen; $p = 0.009$ vs. sumatriptan) and met all other regulatory endpoints versus placebo.

The successful completion of any of our clinical trials depends upon many factors, including the rate of enrollment of patients. If we are unable to recruit sufficient clinical patients during the appropriate period, we may need to delay our clinical trials and incur significant additional costs. We also rely on the compliance of our clinical trial investigators with FDA regulatory requirements and noncompliance can result in disqualification of a clinical trial investigator and data that are unusable. In addition, the FDA or Institutional Review Boards may require us to conduct additional trials or delay, restrict or discontinue our clinical trials on various grounds, including a finding that the subjects or patients are being exposed to an unacceptable health risk.

Further, even though we may have completed all clinical trials for a product candidate that were planned for submission in support of an application, we may be required to conduct additional clinical trials, studies or investigations or to submit additional data to support our marketing applications. For example, in February, 2012, the FDA requested an additional Phase 1 study to assess the

bioequivalence of PA32540 to EC aspirin 325 mg with respect to ASA. Enteric coated products such as PA32540 and EC aspirin 325 mg have highly variable pharmacokinetics, making bioequivalence difficult to demonstrate using traditional methods and standards. The FDA made a preliminary review of the study results and the Company's summary analyses and, based on its preliminary assessment of the information available to it at the time, the FDA did not agree that bioequivalence of PA32540 to EC aspirin 325 mg was demonstrated.

In addition, we and/or our marketing or development partners may determine that pre-approval marketing support studies should be conducted. Unanticipated adverse outcomes of such studies, including recognition of certain risks to human subjects, could have a material impact on the approval of filed or planned market applications or could result in limits placed on the marketing of the product. We may also determine from time to time that it would be necessary to seek to provide justification to the FDA or other regulatory agency that would result in evaluation of the results of a study or clinical trial in a manner that differs from the way the regulatory agency initially or customarily evaluated the results, as was the case with the Phase 1 study to assess the bioequivalence of PA32540 to EC aspirin 325 mg described in the preceding paragraph. In addition, we may have unexpected results in our preclinical or clinical trials or other studies that require us to reconsider the need for certain studies or trials or cause us to discontinue development of a product candidate. For example, in reviewing our NDA for *Treximet*, the FDA expressed concern about the potential implications from one preclinical in-vitro chromosomal aberration study, one of four standard genotoxicity assays, in which a possible genotoxicity signal was seen for the combination of naproxen sodium and sumatriptan. Further, additional information about potential drug-drug interactions may restrict the patient population for our products, thus limiting the potential market and our potential revenue. For example, recent scientific publications contain conflicting data regarding a possible interaction between clopidogrel (Plavix®), a widely prescribed anti-platelet agent, and proton pump inhibitor products, and its impact on cardiovascular outcomes. If the clinical relevance of the possible interaction is unresolved by the time PA32540 enters the marketplace, even if the interaction is later proven definitively to have no clinical impact on cardiovascular outcomes, the market potential of the product may be reduced.

Once submitted, an NDA requires FDA approval before the product described in the application can be distributed or commercialized. Even if we determine that data from our clinical trials, toxicology, genotoxicity and carcinogenicity studies are positive, we cannot assure you that the FDA, after completing its analysis, will not determine that the trials or studies should have been conducted or analyzed differently, and thus reach a different conclusion from that reached by us, or request that further trials, studies or analyses be conducted. For example, the FDA requested additional safety information on *Treximet* in the approvable letter we received in June 2006 relating to our NDA for *Treximet*, which required conduct of additional studies, and in August 2007, we received a second approvable letter in which the FDA raised an additional concern about the potential implications from one preclinical in vitro chromosomal aberration study, one of four standard genotoxicity assays, in which a genotoxicity signal was seen for the combination of naproxen sodium and sumatriptan.

The FDA may also require data in certain subpopulations, such as pediatric use, or, if such studies were not previously completed, may require long-term carcinogenicity studies, prior to NDA approval, unless we can obtain a waiver of such a requirement. We face similar regulatory hurdles in other countries to those that we face in the U.S.

Our costs associated with our human clinical trials vary based on a number of factors, including:

- the order and timing of clinical indications pursued;
- the extent of development and financial support from collaborative parties, if any;
- the need to conduct additional clinical trials or studies;
- the number of patients required for enrollment;
- the difficulty of obtaining sufficient patient populations and clinicians;
- the difficulty of obtaining clinical supplies of our product candidates; and
- governmental and regulatory delays.

We currently depend and will in the future depend on third parties to manufacture our product candidates. If these manufacturers fail to meet our requirements or any regulatory requirements, the product development and commercialization of our product candidates will be delayed.

We do not have, and have no plans to develop, the internal capability to manufacture either clinical trial or commercial quantities of products that we may develop or have under development. We rely upon third-party manufacturers and our partners to supply us with our product candidates. We also need supply contracts to sell our products commercially. On December 19, 2011, we entered into a Supply Agreement and a related Capital Agreement with Patheon pursuant to which Patheon has agreed to manufacture, and we have agreed to purchase, a specified percentage of the Company's requirements of PA32540 for sale in the United States. The Supply Agreement and Capital Agreement were amended on July 10, 2013 to, among other things, expressly incorporate the Company's PA8140 product candidate into the Supply Agreement and to replace the schedule of the Capital Agreement which lists dedicated and non-dedicated capital equipment and facility modifications to be funded in whole or in part by the Company, with a new updated

schedule reflecting the parties' current assumptions regarding the need for and timing of capital equipment expenditures. We also rely on third parties to supply the active ingredients and other ingredients used in the manufacture of our products. Failure of such ingredient suppliers to comply with regulatory requirements can impact our ability to obtain approval of our products or our ability to supply the market with our products after approval. For example, On April 25, 2014, we announced that we had received a CRL from the FDA with respect to the NDA for our PA32540 and PA8140 products. In the CRL, the FDA noted that, during an inspection of the manufacturing facility of an active ingredient supplier, inspection deficiencies were found. Satisfactory resolution of deficiencies noted by the field investigator is required before the NDA may be approved. On May 9, 2014, our active ingredient supplier submitted a response to the FDA addressing the inspection deficiencies and subsequently submitted an update to its initial response. However, we cannot guarantee that the FDA will consider the actions taken by the active ingredient supplier to be sufficient to address the inspection deficiencies. If such inspection deficiencies are not resolved by December 30, 2014, our new action date, we could receive another CRL from the FDA.

There is no guarantee that manufacturers that enter into commercial supply contracts with us will be financially viable entities going forward, or will not otherwise breach or terminate their agreements with us. If we do not have the necessary commercial supply contracts, or if Patheon is, or any of our future manufacturers are, unable to satisfy our requirements or meet any regulatory requirements, and we are required to find alternative sources of supply, there may be additional costs and delays in product development and commercialization of our product candidates or we may be required to comply with additional regulatory requirements.

If our competitors develop and commercialize products faster than we do or if their products are superior to ours, our commercial opportunities will be reduced or eliminated.

Our product candidates will have to compete with existing and any newly developed migraine therapies or therapies for any newly developed product candidates for the treatment of other diseases. There are also likely to be numerous competitors developing new products to treat migraine and the other diseases and conditions for which we may seek to develop products in the future, which could render our product candidates or technologies obsolete or non-competitive. For example, our primary competitors will likely include large pharmaceutical companies, biotechnology companies, universities and public and private research institutions. The competition for VIMOVO and any other PN products that may be developed and receive regulatory approval will come from the oral NSAID market, or more specifically the traditional non-selective NSAIDs (such as naproxen and diclofenac), traditional NSAID/gastroprotective agent combination products or combination product packages (such as Arthrotec[®] and Prevacid[®] NapraPAC[™]), combinations of NSAIDs and PPIs taken as separate pills and the only remaining COX-2 inhibitor, Celebrex[®]. The competition for our PA product candidates for which we have conducted studies for secondary prevention of cardiovascular events will come from aspirin itself as well as other products used for secondary prevention. AstraZeneca, with whom we collaborated in the development of VIMOVO, has publicly announced that it has obtained regulatory approval for a combination product containing aspirin and esomeprazole in Europe and has also filed a NDA with the FDA for such product, and for which the FDA issued a CRL declining approval. AstraZeneca has stated that it is currently evaluating the CRL and will continue discussions with the FDA to determine next steps. This product has entered the European market and, if it enters the U.S. market, will compete with our PA cardiovascular product candidates.

Based upon their drug product and pipeline portfolios and the overall competitiveness of our industry, we believe that we face, and will continue to face, intense competition from other companies for securing collaborations with pharmaceutical companies, establishing relationships with academic and research institutions, and acquiring licenses to proprietary technology. Our competitors, either alone or with collaborative parties, may also succeed with technologies or products that are more effective than any of our current or future technologies or products. Many of our actual or potential competitors, either alone or together with collaborative parties, have substantially greater financial resources, and almost all of our competitors have larger numbers of scientific and administrative personnel than we do.

Many of these competitors, either alone or together with their collaborative parties, also have significantly greater resources to or experience in:

- developing product candidates;
- undertaking preclinical testing and human clinical trials;
- obtaining FDA and other regulatory approvals of product candidates; and
- manufacturing and marketing products.

Accordingly, our actual or potential competitors may succeed in obtaining patent protection, receiving FDA or other regulatory approval or commercializing products where we cannot or before we do. Any delays we encounter in obtaining regulatory approvals for our product candidates, such as we experienced as a result of the approvable letters we received from the FDA in June 2006 and August 2007 relating to the NDA for *Treximet*, as a result of the not-approvable letters we received from the FDA on MT

100 and MT 300, and as a result of the CRL we received from the FDA relating to the NDA for PA32540 and PA8140 on April 25, 2014, increase this risk. Our competitors may also develop products or technologies that are superior to those that we are developing, and render our product candidates or technologies obsolete or non-competitive. If we cannot successfully compete with new or existing products, our marketing and sales will suffer and we may not ever receive any revenues from sales of products or may not receive sufficient revenues to achieve profitability.

If we are unable to protect our patents or proprietary rights, or if we are unable to operate our business without infringing the patents and proprietary rights of others, we may be unable to develop our product candidates or compete effectively.

The pharmaceutical industry places considerable importance on obtaining patent and trade secret protection for new technologies, products and processes. Our success will depend, in part, on our ability, and the ability of our licensors, to obtain and to keep protection for our products and technologies under the patent laws of the United States and other countries, so that we can stop others from using our inventions. Our success also will depend on our ability to prevent others from using our trade secrets. In addition, we must operate in a way that does not infringe, or violate, the patent, trade secret and other intellectual property rights of other parties.

We cannot know how much protection, if any, our patents will provide or whether our patent applications will issue as patents. The breadth of claims that will be allowed in patent applications cannot be predicted and neither the validity nor enforceability of claims in issued patents can be assured. If, for any reason, we are unable to obtain and enforce valid claims covering our products and technology, we may be unable to prevent competitors from using the same or similar technology or to prevent competitors from marketing identical products. For example, if we are unsuccessful in protecting our patents in the litigation against Dr. Reddy's, Lupin, Anchen, Watson and Mylan or other companies who may file ANDAs for VIMOVO, such companies could market a generic version of the product prior to the expiration of our and AstraZeneca's patents.

In addition, due to the extensive time needed to develop, test and obtain regulatory approval for our products, any patents that protect our product candidates may expire early during commercialization. This may reduce or eliminate any market advantages that such patents may give us.

In certain territories outside the U.S., our issued patents may be subject to opposition by competitors within a certain time after the patent is issued. Such opposition proceedings and related appeals may not be resolved for several years, and may result in the partial or total revocation of the issued patent. For example, in October 2005 oppositions were filed against our issued European patent for MT 400 by Merck & Co., Inc. and Almirall Prodesfarma asserting that the European patent should not have been granted. As a result of these oppositions and subsequent proceedings, the European Patent Office found that claims relating to combinations of sumatriptan and naproxen for the treatment of migraine were valid. However, broader claims relating to certain other 5-HT 1B/1D agonists and long-acting NSAIDs were held to be insufficiently supported by the presently available technical evidence. In addition, in April 2011, oppositions were also filed against our issued European patent for VIMOVO and our PA Products by Chatfield Laboratories and Strawman Limited asserting that the European patent should not have been granted. Strawman Limited subsequently withdrew from the opposition. Following oral proceedings, the Opposition Division of the European Patent Office found that claims relating to the combination of PPIs and NSAIDs are valid. Chatfield Laboratories did not appeal this decision.

We may need to submit our issued patents for amendment or reissue if we determine that any claims within our patents should not have been issued. While such a submission may be based on our view that only specified claims should not have been granted to us, there can be no assurance that a patent examiner will not determine that additional claims should not have been granted to us. Such was the case with one of our patents covering MT 100, which we submitted for reissue after determining that certain specified claims that are not central to our protection of MT 100 should not have been issued. In April 2006, we received an office action on the reissue application and, consistent with our decision not to devote further resources to the development of this product in the U.S., the reissue application was abandoned in January 2007.

We may need to license rights to third party patents and intellectual property to continue the development and marketing of our product candidates. If we are unable to acquire such rights on acceptable terms, our development activities may be blocked and we may be unable to bring our product candidates to market.

We may enter into litigation to defend ourselves against claims of infringement, assert claims that a third party is infringing one or more of our patents, protect our trade secrets or know-how, or determine the scope and validity of others' patent or proprietary rights. For example, we filed patent infringement lawsuits against Par, Alphapharm, Teva, Dr. Reddy's and Sun in the federal court in the Eastern District of Texas in connection with their respective ANDA submissions to the FDA containing Paragraph IV certifications for approval to market sumatriptan 85 mg/naproxen sodium 500 mg tablets, a generic version of *Treximet* tablets, before the expiration of our patents. Further, we and AstraZeneca filed a patent infringement lawsuit against Dr. Reddy's, Lupin, Anchen, Watson and Mylan in the federal court in the District of New Jersey in connection with their respective ANDA submissions to the

FDA containing a paragraph IV certification for approval to market (a generic version of VIMOVO tablets, before the expiration of our and AstraZeneca's patents. With respect to some of our product candidates, under certain circumstances, our development or commercialization collaborators have the first right to enforce our patents and would have exclusive control over such enforcement litigation. For example, under our collaboration agreements with GSK and AstraZeneca, GSK and AstraZeneca each has the first right to enforce our patents under their respective agreements. GSK advised us that it elected not to exercise its first right to bring an infringement suit against Par, Alphapharm, Teva, and Dr. Reddy's, and Sun each of which submitted ANDAs to the FDA for approval to market a generic version of *Treximet* tablets, while AstraZeneca has exercised its first right to bring an infringement suit against Dr. Reddy's Lupin, Anchen, Watson and Mylan, each of which submitted an ANDA to the FDA for approval to market a generic version of VIMOVO tablets. As part of Horizon's purchase of all of AstraZeneca's rights, title and interest to develop, commercialize and sell VIMOVO in the United States, Horizon has assumed AstraZeneca's right to lead the above-described Paragraph IV litigation relating to VIMIVO.

If we are found to infringe the patent rights of others, then we may be forced to pay damages in an amount that might irreparably harm our business and/or be prevented from continuing our product development and marketing activities. Additionally, if we or our development or commercialization collaborator seek to enforce our patents and are unsuccessful, we may be subject to claims for bringing a failed enforcement action, including claims alleging various forms of antitrust violations (both state and federal) and unfair competition. If we are found to be liable for such claims, then we may be forced to pay damages in an amount that might irreparably harm our business and/or be prevented from continuing our product development and commercialization activities. Even if we are successful in defending any such claims of infringement or in asserting claims against third parties, such litigation is expensive, may have a material effect on our operations, and may distract management from our business operations. Regardless of its eventual outcome, any lawsuit that we enter into may consume time and resources that would impair our ability to develop and market our product candidates.

We have entered into confidentiality agreements with our employees, consultants, advisors and collaborators. However, these parties may not honor these agreements and, as a result, we may not be able to protect our rights to unpatented trade secrets and know-how. Others may independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets and know-how. Also, many of our scientific and management personnel were previously employed by competing companies. As a result, such companies may allege trade secret violations and similar claims against us.

None of our products may be accepted by the market.

The commercial success of our product candidates depends upon the acceptance of these products in the marketplace. Even if a product displays a favorable efficacy and safety profile in clinical trials, market acceptance of a product will not be known until after it is launched and a product may not generate the revenues that we anticipate. The degree of market acceptance will depend upon a number of factors, including:

- the acceptance by physicians and third-party payors of VIMOVO and, if approved, our PA product candidates, as alternatives to other therapies;
- the receipt and timing of regulatory approvals;
- the availability of third-party reimbursement;
- the indications for which the product is approved;
- the rate of adoption by healthcare providers;
- the rate of product acceptance by target patient populations;
- the price of the product relative to alternative therapies;
- the availability of alternative therapies;
- the extent and effectiveness of marketing efforts by our collaborators, and third-party distributors and agents;
- the existence of adverse publicity regarding our products or similar products; and
- the extent and severity of side effects as compared to alternative therapies.

If we or our commercialization partners do not receive adequate third-party reimbursements for our future products, our revenues and profitability will be reduced.

Our ability to commercialize our product candidates successfully will depend, in part, on the extent to which reimbursement for the costs of such products and related treatments will be available from government health administration authorities, such as Medicare and Medicaid in the U.S., private health insurers and other organizations. Significant uncertainty exists as to the reimbursement status of a newly approved healthcare product. Adequate third-party coverage may not be available to enable us to maintain price levels sufficient to realize an appropriate return on our investment in product research and development. If adequate coverage and reimbursement levels are not provided by government and third-party payors for use of our products, our products may fail to achieve market acceptance. For example, on July 28, 2014, Horizon announced that it had been verbally notified by CVS Caremark and Express Scripts, Inc. that VIMOVO would no longer be on their formularies and will be placed on their exclusion lists

effective January 1, 2015. Horizon estimates that approximately 20-30% of VIMOVO prescriptions could be impacted by these decisions. While Horizon believes it has a strategy to mitigate the effect on VIMOVO sales, POZEN's royalty revenue from Net Sales of VIMOVO beginning in 2015 may be negatively affected.

Our future revenues, profitability and access to capital will be affected by the continuing efforts of governmental and private third-party payors to contain or reduce the costs of healthcare through various means. We expect that a number of federal, state and foreign proposals will seek to control the cost of drugs through governmental regulation. We are unsure of the form that any healthcare reform legislation may take or what actions federal, state, foreign and private payors may take in response to any proposed reforms. Therefore, we cannot predict the effect of any implemented reform on our business.

Legislative or regulatory reform of the healthcare system may affect our ability to sell our products profitably.

In both the United States and certain foreign jurisdictions, there have been a number of legislative and regulatory proposals to change the healthcare system in ways that could impact our ability to sell our products profitably. On March 23, 2010, President Obama signed into law the Patient Protection and Affordable Care Act, or PPACA, which includes a number of health care reform provisions and requires most U.S. citizens to have health insurance. PPACA increased the minimum Medicaid drug rebates for pharmaceutical companies, expands the 340B drug discount program, and makes changes to affect the Medicare Part D coverage gap, or "donut hole." The law also revises the definition of "average manufacturer price" for reporting purposes which could increase the amount of the Company's Medicaid drug rebates to states. The law also imposed a significant annual fee on companies that manufacture or import branded prescription drug products. Substantial new provisions affecting compliance also have been added, which may require modification of business practices with health care practitioners.

The reforms imposed by the new law will significantly impact the pharmaceutical industry; however, the full effects of PPACA cannot be known until these provisions are fully implemented and the Centers for Medicare & Medicaid Services and other federal and state agencies issue applicable regulations or guidance. Moreover, in the coming years, additional changes could be made to governmental healthcare programs that could significantly impact the success of our products, and we could be adversely affected by current and future health care reforms.

If product liability lawsuits are successfully brought against us, we may incur substantial liabilities and may be required to limit commercialization of our product candidates.

The testing and marketing of pharmaceutical products entail an inherent risk of product liability. Product liability claims might be brought against us by consumers, healthcare providers, pharmaceutical companies or others selling our future products. If we cannot successfully defend ourselves against such claims, we may incur substantial liabilities or be required to limit the commercialization of our product candidates. We have product liability insurance that covers our commercialized product and human clinical trials in an amount equal to up to \$10 million annual aggregate limit with a \$0.1 million deductible per claim. The amount of insurance that we currently hold may not be adequate to cover all liabilities that may occur. However, insurance coverage is becoming increasingly expensive, and no assurance can be given that we will be able to maintain insurance coverage at a reasonable cost or in sufficient amounts to protect us against losses due to liability. We will explore, on an on-going basis, expanding our insurance coverage related to the sale of our future marketed products when we obtain marketing approval for such products and commercial sales of such products begin. However, we may not be able to obtain commercially reasonable product liability insurance for any products approved for marketing. If a plaintiff brings a successful product liability claim against us in excess of our insurance coverage, if any, we may incur substantial liabilities and our business may be harmed or fail.

We may need additional funding and may not have access to capital. If we are unable to raise capital when needed, we may need to delay, reduce or eliminate our product development or commercialization efforts.

In the future, we may need to raise additional funds to execute our business strategy. We have incurred losses from operations since inception and we may continue to incur additional operating losses. Our actual capital requirements will depend upon numerous factors, including:

- the progress of our research and development programs;
- the progress of preclinical studies, clinical and other testing or the need conduct additional trials, studies or other testing;
- the time and cost involved in obtaining any regulatory approvals;
- the costs of filing, prosecuting, defending and enforcing any patent claims and other intellectual property rights;
- the effect of competing technological and market developments;
- the timing of our receipt, if any, of milestone payments and royalties under collaborative agreements;
- the effect of changes and developments in, or termination of, our collaborative, license and other relationships;
- the terms and timing of any additional collaborative, license and other arrangements that we may establish; and

- our ability to conduct pre-commercialization activities for our products and to arrange for the commercialization of our product candidates.

Our operating expenses for the six months ended June 30, 2014 totaled \$9.1 million, including non-cash compensation expense of \$1.3 million related to stock options and other stock-based awards, primarily associated with our adoption of SFAS No. 123(R) on January 1, 2006. For fiscal years 2011 through 2013, our average annual operating expenses (including average non-cash deferred compensation of \$3.1 million) were \$34.3 million. As of June 30, 2014, we had an aggregate of \$31.8 million in cash and cash equivalents. Our operating expenses for 2014 and 2015 may exceed the net level of our operating expenses in 2013. However, with respect to future products we may develop, we have decided that we will no longer commit substantial resources to further drug development without a partner who agrees to pay the full cost of that development. Consistent with this model, we have reduced our R&D staff and other costs and expenses as our PA development program activities wind down and intend to continue to reduce staff that is no longer required to support our then current business activities. Our board of directors and management team continue to explore potential ways to return value to our stockholders. On November 21, 2013, our Board of Directors declared a special cash distribution of \$1.75 per share to all stockholders of record as of the close of business on December 11, 2013, with a payment date of December 30, 2013. This distribution represented a surplus of corporate cash and was treated as a return of capital to stockholders. We are committed to return as much cash to our stockholders as is prudent and may consider other cash distributions in the future. We believe that we will have sufficient cash reserves and cash flow to maintain our planned level of business activities, through 2014. However, our anticipated cash flow includes continued receipt of royalty revenue from Horizon and AstraZeneca's sale of VIMOVO but does not include any additional milestone payments. In addition, our expenses might increase during that period beyond currently expected levels if we decide to, or any regulatory agency requires us to, conduct additional clinical trials, studies or investigations for any of our product candidates, including in connection with the agency's consideration, or reconsideration, of our regulatory filings for our product candidates. If our projected revenues decrease, we may need to raise additional capital.

If our projected expenses increase for our product candidates currently in development, or if we expand our studies for additional indications for our PA product candidates or new product candidates, then, as a result of these or other factors, we may need to raise additional capital. While we retained ownership of our PA product candidates for cardiovascular indications through the clinical development and pre-commercialization stage, with respect to future products we may develop, we have decided that we will no longer commit substantial resources to further drug development without a partner who agrees to pay the full cost of that development.

We may be unable to raise additional equity funds when we desire to do so due to unfavorable market conditions in our industry or generally, or due to other unforeseen developments in our business. Further, we may not be able to find sufficient debt or equity funding, if at all, on acceptable terms. If we cannot, we may need to delay, reduce or eliminate research and development programs and therefore may not be able to execute our business strategy. Further, to the extent that we obtain additional funding through collaboration and licensing arrangements, it may be necessary for us to give up valuable rights to our development programs or technologies or grant licenses on terms that may not be favorable to us.

The sale by us of additional equity securities or the expectation that we will sell additional equity securities may have an adverse effect on the price of our common stock.

We depend on key personnel and may not be able to retain these employees or recruit additional qualified personnel, which would harm our research and development efforts.

We are highly dependent on the efforts of our key management and scientific personnel, especially John R. Plachetka, Pharm.D., our Chairman, President and Chief Executive Officer. Dr. Plachetka signed an amended and restated employment agreement with us on March 14, 2006, which was amended on September 28, 2007, for a three-year term with automatic one-year renewal terms. We have also entered into employment agreements with certain of our other key management personnel, which provide for one or two-year terms with automatic one-year renewal terms which were amended on September 28, 2007. If we should lose the services of Dr. Plachetka, or are unable to replace the services of our other key personnel who may leave the Company, including John G. Fort, M.D., Chief Medical Officer, or William L. Hodges, Senior Vice President Finance and Administration and Chief Financial Officer, or if we fail to recruit other key scientific and commercial personnel, we may be unable to achieve our business objectives. There is intense competition for qualified scientific and commercial personnel. We may not be able to continue to attract and retain the qualified personnel necessary for developing our business. Furthermore, our future success may also depend in part on the continued service of our other key management personnel and our ability to recruit and retain additional personnel, as required by our business.

New and changing corporate governance and public disclosure requirements add uncertainty to our compliance policies and increase our costs of compliance.

Changing laws, regulations and standards relating to accounting, corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002, other SEC regulations, and the NASDAQ Global Market rules, are creating uncertainty for companies like ours. These laws, regulations and standards may lack specificity and are subject to varying interpretations. Their application in practice may evolve over time, as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs of compliance as a result of ongoing revisions to such corporate governance standards.

In particular, our efforts to comply with Section 404 of the Sarbanes-Oxley Act of 2002 and the related regulations regarding our required assessment of our internal controls over financial reporting and our external auditors' audit of that assessment requires the commitment of significant financial and managerial resources. We consistently assess the adequacy of our internal controls over financial reporting, remediate any control deficiencies that may be identified, and validate through testing that our controls are functioning as documented. While we do not anticipate any material weaknesses, the inability of management and our independent auditor to provide us with an unqualified report as to the adequacy and effectiveness, respectively, of our internal controls over financial reporting for future year ends could result in adverse consequences to us, including, but not limited to, a loss of investor confidence in the reliability of our financial statements, which could cause the market price of our stock to decline. For example, during the fourth quarter of 2012, we identified an error in our presentation of \$5.8 million unsettled investment purchases in the December 31, 2011 Statement of Cash Flows. This was a noncash transaction and there was no change in our total cash and cash equivalents on the Statement of Cash Flows. However, this error constituted a material weakness in our internal controls for our investment process at December 31, 2011. The existence of this or one or more other material weaknesses or significant deficiencies in our internal control over financial reporting could result in errors in our financial statements, and substantial costs and resources may be required to rectify any internal control deficiencies. Although we continually review and evaluate internal control systems to allow management to report on the sufficiency of our internal controls, we cannot assure you that we will not discover weaknesses in our internal control over financial reporting. Any such weakness or failure to remediate any existing material weakness could materially adversely affect our ability to comply with applicable financial reporting requirements and the requirements of our various agreements.

We are committed to maintaining high standards of corporate governance and public disclosure, and our efforts to comply with evolving laws, regulations and standards in this regard have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. In addition, the laws, regulations and standards regarding corporate governance may make it more difficult for us to obtain director and officer liability insurance. Further, our board members, chief executive officer and chief financial officer could face an increased risk of personal liability in connection with their performance of duties. As a result, we may face difficulties attracting and retaining qualified board members and executive officers, which could harm our business. If we fail to comply with new or changed laws, regulations or standards of corporate governance, our business and reputation may be harmed.

Risks Related to Potential Commercialization of our Product Candidates

We continue to evaluate the commercial opportunities for our current product candidates in connection with our development of a worldwide commercialization strategy. If we decide to pursue the commercial opportunities for our future products ourselves or co-promote and/or retain a significant role in the commercialization of our future products with strategic partners and we are unable to develop sales and marketing capabilities on our own, or through partner acquisition, we will not be able to fully exploit the commercial potential of our future products and the costs of pursuing such a strategy may have a material adverse impact on our results of operations.

Although we do not have sales and marketing experience, we continue to evaluate the commercial opportunities for our product candidates in connection with our development of a worldwide commercialization strategy. We decided to retain ownership of our PA product candidates through the clinical development and pre-commercialization stage and our chief commercial officer developed the commercialization strategy for these products and conducted all the required pre-commercialization activities in the United States. On September 3, 2013 we entered into an exclusive license agreement with Sanofi US for the commercialization of PA8140 and PA32540. Under the terms of the agreement, Sanofi US will have exclusive rights to commercialize all PA combinations that contain 325 mg or less of enteric-coated aspirin in the United States. Outside the United States, we intend to secure relationships with one or more strong commercial partners with relevant expertise to commercialize our future products globally. If we change our strategy in the future and decide to pursue commercialization opportunities for our future products ourselves, or if we co-promote and/or retain a significant role in the commercialization of our future products with strategic partners, we may make significant expenditures to secure commercial resources to sell such products and expand our marketing capabilities to support such growth. Any failure or extended delay in the expansion of our sales and marketing capabilities or inability to effectively operate in the marketplace alone or together with our partners could adversely impact our business. There can be no assurance that if we decide to pursue commercialization opportunities ourselves or participate in the commercialization of our products with partners that our sales and

marketing efforts will generate significant revenues and costs of pursuing such a strategy may have a material adverse impact on our results of operations. Events or factors that may inhibit or hinder our commercialization efforts include:

- developing our own commercial team or playing a role in the commercialization with a partner will be expensive and time-consuming and could result in high cash burn or reduced profitability;
- failure to acquire sufficient or suitable personnel to establish, oversee, or implement our commercialization strategy;
- failure to recruit, train, oversee and retain adequate numbers of effective sales and marketing personnel;
- failure to develop a commercial strategy ourselves or together with partners that can effectively reach and persuade adequate numbers of physicians to prescribe our products;
- our or our partners' inability to secure reimbursement at a reasonable price;
- unforeseen costs and expenses associated with creating or acquiring and sustaining an independent commercial organization;
- incurrence of costs in advance of anticipated revenues and subsequent failure to generate sufficient revenue to offset additional costs; and
- our ability to fund our commercialization efforts alone or together with our partners on terms acceptable to us, if at all.

If we decide to pursue commercialization opportunities for our future products ourselves or if we co-promote and/or retain a significant role in the commercialization of our future products with strategic partners, failure to comply with the laws governing the marketing and sale of such future products may result in regulatory agencies taking action against us and/or our partners, which could significantly harm our business.

We retained ownership of our PA product candidates through the clinical development and pre-commercialization stage and our chief commercial officer developed the commercialization strategy for these products and conducted pre-commercialization activities in the United States. On September 3, 2013 we entered into a License and Collaboration Agreement with Sanofi US to commercialize our PA product candidates containing an immediate release proton pump inhibitor and 325 mg or less of delayed release or enteric coated aspirin in the United States. Outside the United States, we intend to secure relationships with one or more strong commercial partners with relevant expertise to commercialize our future products globally. If we change our strategy in the future and decide to pursue commercial opportunities for our future products ourselves, or if we co-promote and/or retain a significant role in the commercialization of our future products with strategic partners, we will be subject to a large body of legal and regulatory requirements. In particular, there are many federal, state and local laws that we will need to comply with if we become engaged in the marketing, promoting, distribution and sale of pharmaceutical products. The FDA extensively regulates, among other things, promotions and advertising of prescription drugs. In addition, the marketing and sale of prescription drugs must comply with the Federal fraud and abuse laws, which are enforced by the Office of the Inspector General of the Division, or OIG, of the Department of Health and Human Services. These laws make it illegal for anyone to give or receive anything of value in exchange for a referral for a product or service that is paid for, in whole or in part, by any federal health program. The federal government can pursue fines and penalties under the Federal False Claims Act which makes it illegal to file, or induce or assist another person in filing, a fraudulent claim for payment to any governmental agency. Because, as part of our and/or our partners commercialization efforts, we or our partners may provide physicians with samples we will be required to comply with the Prescription Drug Marketing Act, or PDMA, which governs the distribution of prescription drug samples to healthcare practitioners. Among other things, the PDMA prohibits the sale, purchase or trade of prescription drug samples. It also sets out record keeping and other requirements for distributing samples to licensed healthcare providers.

In addition, depending upon the terms of our agreements with our partners, we may need to comply with the body of laws comprised of the Medicaid Rebate Program, the Veterans' Health Care Act of 1992 and the Deficit Reduction Act of 2005. This body of law governs product pricing for government reimbursement and sets forth detailed formulas for how we must calculate and report the pricing of our products so as to ensure that the federally funded programs will get the best price. Moreover, many states have enacted laws dealing with fraud and abuse, false claims, the distribution of prescription drug samples and gifts and the calculation of best price. These laws typically mirror the federal laws but in some cases, the state laws are more stringent than the federal laws and often differ from state to state, making compliance more difficult. We expect more states to enact similar laws, thus increasing the number and complexity of requirements with which we would need to comply.

Compliance with this body of laws is complicated, time consuming and expensive. Because we do not have experience in developing, managing and training our employees regarding, a comprehensive healthcare compliance program, we cannot assure you that we will be in compliance with all potentially applicable laws and regulations. Even minor, inadvertent irregularities can potentially give rise to claims that the law has been violated. Failure to comply with all potentially applicable laws and regulations could lead to penalties such as the imposition of significant fines, debarment from participating in drug development and marketing

and the exclusion from government-funded healthcare programs. The imposition of one or more of these penalties could adversely affect our revenues and our ability to conduct our business as planned.

In addition, the Federal False Claims Act, which allows any person to bring suit alleging the false or fraudulent submission of claims for payment under federal programs and other violations of the statute and to share in any amounts paid by the entity to the government in fines or settlement. Such suits, known as qui tam actions, have increased significantly in recent years and have increased the risk that companies like us may have to defend a false claim action. We could also become subject to similar false claims litigation under state statutes. If we are unsuccessful in defending any such action, such action may have a material adverse effect on our business, financial condition and results of operations

Factors That May Affect Our Stockholders

Our stock price is volatile, which may result in significant losses to stockholders.

There has been significant volatility in the market prices of biotechnology companies' securities. Various factors and events may have a significant impact on the market price of our common stock. These factors include:

- fluctuations in our operating results;
- announcements of technological innovations, acquisitions or licensing of therapeutic products or product candidates by us or our competitors;
- published reports by securities analysts;
- positive or negative progress with our clinical trials or with regulatory approvals of our product candidates, including PA32540 and PA8140;
- commercial success of VIMOVO and our other product candidates in the marketplace once approved;
- governmental regulation, including reimbursement policies;
- developments in patent or other proprietary rights;
- developments in our relationships with collaborative partners;
- announcements by our collaborative partners regarding our products or product candidates;
- developments in new or pending litigation;
- public concern as to the safety and efficacy of our products; and
- general market conditions.

The trading price of our common stock has been, and could continue to be, subject to wide fluctuations in response to these factors, including the sale or attempted sale of a large amount of our common stock into the market. From October 16, 2000, when our common stock began trading on The NASDAQ National Market (now known as The NASDAQ Global Market), through July 30, 2014, the high and low sales prices of our common stock ranged from \$2.15 to \$21.75. Broad market fluctuations may also adversely affect the market price of our common stock.

Sales of substantial amounts of our common stock in the public market by us or our largest stockholders could depress our stock price.

We have not sold shares of common stock in a public offering since our initial public offering in October 2000. Accordingly, we have a relatively small number of shares that are traded in the market. Approximately 12% of our outstanding shares are beneficially held by John Plachetka, our President and Chief Executive Officer. Additionally, we believe, based upon our review of public filings by certain stockholders and other publicly available information, an aggregate of approximately 29% of our outstanding share are held by three other stockholders, with two of those stockholders beneficially owning greater than 10% of our outstanding shares. Any sales of substantial amounts of our common stock in the public market, including sales or distributions of shares by our large stockholders, or the perception that such sales or distributions might occur, could harm the market price of our common stock and could impair our ability to raise capital through the sale of additional equity securities. For example, our executive officers may sell shares pursuant to a Rule 10b5-1 trading plans. Further, stockholders' ownership will be diluted if we raise additional capital by issuing equity securities. We filed with the Securities and Exchange Commission a shelf registration statement on Form S-3, which became effective February 22, 2012, for an offering under which we may register up to 8,500,000 shares of our common stock for sale to the public in one or more public offerings. John R. Plachetka, selling stockholder named in the prospectus for the registration statement may offer up to 500,000 of such shares, and we would not receive any of the proceeds from sales of those shares. Purchasers of our common stock in any future offerings by us will incur immediate dilution to the extent of the difference between our net tangible book value per share after the offering and the price paid per share by new investors.

Anti-takeover provisions in our charter documents and under Delaware law could prevent or delay transactions that our stockholders may favor and may prevent stockholders from changing the direction of our business or our management.

Provisions of our charter and bylaws may discourage, delay or prevent a merger or acquisition that our stockholders may consider favorable, including transactions in which you might otherwise receive a premium for your shares, and may also frustrate or prevent any attempt by stockholders to change the direction or management of POZEN. For example, these provisions:

- authorize the issuance of “blank check” preferred stock without any need for action by stockholders;
- provide for a classified board of directors with staggered three-year terms;
- require supermajority stockholder approval to effect various amendments to our charter and bylaws;
- eliminate the ability of stockholders to call special meetings of stockholders;
- prohibit stockholder action by written consent; and
- establish advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted on by stockholders at stockholder meetings.

Further, in January 2005 our board of directors adopted a stockholder rights plan, similar to plans adopted by many other publicly-traded companies. The stockholder rights plan is intended to deter an attempt to acquire us in a manner or on terms not approved by our board of directors.

Section 302 Certification

I, John R. Plachetka, certify that:

1. I have reviewed this Form 10-Q of POZEN Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
