

**FOR IMMEDIATE RELEASE**

## **Rentech Receives Safety Handling Award**

Los Angeles (May 7, 2008) - Rentech, Inc. (AMEX:RTK) announced today that its ammonia fertilizer facility, Rentech Energy Midwest Corporation ("REMC"), received an award from the Canadian National Railway Corporation ("CN") for Safety Handling. REMC also received this prestigious award in 2006 and 2007.

In the press release announcing the award, Jerry Boland, CN's Vice President, Sales, stated, "These awards were established to recognize customers for handling dangerous goods carefully and judiciously, and for respecting high standards."

D. Hunt Ramsbottom, President and CEO of Rentech, noted, "Safety is a top priority for our company. We are extremely proud of our safety record at Rentech in general, and at REMC in particular. This award recognizes the commitment of REMC's employees to provide a safe working environment for themselves and for those with whom we do business."

### **About Rentech, Inc.**

Rentech, Inc. ([www.rentechinc.com](http://www.rentechinc.com)), incorporated in 1981, provides clean energy solutions. The Company has developed and patented the Rentech Process which transforms under-utilized domestic fossil and biomass resources into valuable and clean alternative fuels and chemicals.
