

Pace demonstrates end-to-end solutions for broadcast and broadband service providers at IBC 2014

10 September 2014

Pace plc, a global leader for digital TV and broadband technologies, will be demonstrating their end-to-end portfolio of hardware, software, network equipment and support solutions for service providers at booth B19 in Hall 1 at IBC 2014 in Amsterdam, September 12-16.

Pace's IBC 2014 demonstrations give attendees a comprehensive view of their product offerings and support strategies: customer premise equipment (CPE) for cable, satellite, and telecommunications operators; the complete range of Pace's delivery and access network equipment; and the advanced device software required to deliver leading edge services. The entire end-to-end offering is managed by Pace's award winning 'ECO' suite of services, which provide end user support, network monitoring, and subscriber management.

Examples of the solutions being presented at IBC include:

- Network equipment for optical transport with remote management and monitoring from Pace ECO
- Cost effective network upgrade options including fiber to the premises using PON and RFoG paired with Pace CPE
- Video and data CPE including: 4K Ultra-HD media gateways, IP Clients, DVRs, wireless set-tops, HD zappers, DOCSIS® eMTAs, DSL gateways and home networking peripherals
- 'Elements' whole-home platform with Pace's latest user interface technologies and graphical tools giving operators the ability to create and control consistent experiences across multiple devices
- Pace's widely deployed RDK media servers and IP clients alongside 'Elements' RDK 2.0 compliant software for DVB markets.
- A full range of device software solutions: Pace's 'Helium' gateway software; Pace's 'Tungsten' middleware and pre-integrated video solution; alongside many partner middleware options
- Pace's complete Over the Top (OTT) solution for operators including content ingestion, discovery, and transactions securely delivered to both service provider CPE and customer owned devices (e.g. tablets and smart phones)
- Pace's 'Titanium' Universal Rights Management system providing content protection and key management across managed and unmanaged devices from a single platform
- Pace's ECO 'Monitor' and 'Manage' service management tools allowing operators to remotely monitor and manage all the devices in the home
- Complete end user call centre services using ECO 'Agent' and 'Assist' to help service providers deliver best in class, outsourced and insourced customer support

Mike Pulli, Pace CEO, commented "Pace is delivering leading edge solutions for a wide range of

service providers around the world. Whether they're looking to launch their first broadcast service, increase network capacity, improve customer service, or introduce new services like Ultra-HD: we can help. With Pace's end-to-end, interconnected solutions we offer solutions to the many facets of a service provider's business, giving them complete control over their network and their subscriber's experience."

About Pace

Pace (LSE: PIC) is a leading provider of technology solutions to the PayTV and Broadband industries. With a broad portfolio of customer premise equipment, network solutions, and software and services, Pace empowers service providers to simply and cost-effectively innovate at the speed they want, to define the evolution of their networks, and all in the way they want for their subscribers. Pace has built up its experience and expertise over 30 years and this is recognized by a customer base of over 200 operators around the globe.

Headquartered in the UK, Pace operates in markets across the world, and employs around 2300 people in locations that also include the USA, France, India, and China. For further information, visit: www.pace.com.
