

Pace demonstrate their end to end solutions portfolio at Broadband World Forum 2014

20 October 2014

Pace plc, a global leader for digital TV and broadband technologies, will be demonstrating their end-to-end portfolio of hardware, software, network equipment and support solutions at booth F30 at BBWF 2014 in Amsterdam, October 21-23.

The BBWF 2014 demonstrations give service providers a comprehensive view of Pace's product and services offerings including video and broadband CPE, a complete range of delivery and access network equipment and the advanced gateway software required to deliver leading edge services. The entire set of end-to-end products are managed by Pace's award winning [ECO service management](#) suite which provides self-service & home network management for the subscriber, service & network monitoring for operations and detailed real time and historical data by subscriber for the call centre.

Pace's solutions being demonstrated at BBWF 2014 include:

- The Connected Home: Embracing the Internet of Things (IoT) Pace's gateways utilise the latest hardware and software technologies in order to provide a consistent and intuitive connected home. Pace demonstrate how the gateway can serve as the control hub for security, automation and energy services, and as the point of presence for operators to manage and simplify the increasing complexity of the connected home.
- Pace's new [ADSL](#) and [VDSL](#) gateway range – GA2305, GA4305, GV4305 and GV5707 – entry ADSL through to VDSL with 802.11ac with voice support. Pace will also be showing their cable and fiber gateways along with their PLC and WiFi networking extenders.
- [Video CPE](#) including: Ultra-HD media gateways, IP clients, IPTV Mediaroom and pre-integrated hybrid video solution.
- Pace's complete [Over the Top \(OTT\) video platform solution](#) for service providers who want to augment their service line up with premium secure video securely delivered to all devices in the home.
- Cost-effective [network architectures](#) including fiber-to-the-premises options using PON and RFoG technologies paired with Pace's Fiber CPE including remote management and monitoring from Pace's ECO service management solution.
- Pace's ECO 'Monitor' and 'Manage' service management tools allowing operators to remotely monitor and manage all the devices in the home.

Jon Cobb, President, Pace Software and Services, commented "Pace is delivering leading edge solutions for a wide range of service providers around the world. Whether they're looking to launch their first broadband or TV service, increase network capacity, improve customer service, or capitalize on the explosion in consumer devices we can help. With Pace's end-to-end, pre-integrated

and interoperable products we offer solutions to the many facets of a service provider's business, giving them complete control over their network and their subscriber's experience.”

About Pace

Pace (LSE: PIC) is a leading provider of technology solutions to the PayTV and Broadband industries. With a broad portfolio of customer premise equipment, network solutions, and software and services, Pace empowers service providers to simply and cost-effectively innovate at the speed they want, to define the evolution of their networks, and all in the way they want for their subscribers. Pace has built up its experience and expertise over 30 years and this is recognized by a customer base of over 200 operators around the globe.

Headquartered in the UK, Pace operates in markets across the world, and employs around 2300 people in locations that also include the USA, France, India, and China. For further information, visit: www.pace.com.
