Profile: Founded in 1994, Internet Security Systems, Inc. (ISS) is the trusted expert to global enterprises and world governments, providing products and services that protect against Internet threats. ISS delivers proven cost efficiencies and reduces regulatory and business risk across the enterprise. An established world leader in security, ISS offers superior performance, rapid deployment and ease of use through its **Proventia™** and **RealSecure®** products and related security services. ISS maintains operations throughout the Americas, Asia, Europe and the Middle East and is publicly traded on Nasdaq under the symbol ISSX. Internet Security Systems K.K. – the ISS Asia Pacific subsidiary – is publicly traded on the Japanese Jasdaq under the symbol ISS KK.

Quick Facts:

- World's #1 in intrusion protection and vulnerability assessment
- World's #1 in threat research, analysis and forecasts
- 1,200+ employees worldwide
- 5 Security Operations Centers on 3 continents
- Offices in 22 countries
- 130+ countries served
- 11,000+ corporate customers, including:
 - World's Top 10 Banks
 - World's Top 10 IT Companies
 - World's Top 10 Telcos
 - 9 of World's Top 10 Auto Manufacturers
 - 9 of World's Top 10 Insurance Providers

Technology World Firsts:

1996 – First commercial vulnerability assessment product	2002 – First unified enterprise protection platform (networks, servers, desktops)
1997 – First commercial intrusion detection system	2002 – First centralized enterprise management system (networks, servers, desktops)
1999 – Invented <i>protocol analysis</i>	2003 – First multi-function protection products encompassing firewall, anti-virus, intrusion detection and prevention, content filtering, vulnerability assessment and anti-spam
2001 – First gigabit IDS product	
2001 – First inline intrusion prevention system	
2002 – First application protection with outbound blocking	

History: As a college student in 1992, Christopher Klaus invented the **Internet Scanner®** product, a groundbreaking technology that actively identifies and helps fix network security weaknesses. In response to tremendous demand for the application, Klaus teamed with software management veteran Thomas E. Noonan to create Internet Security Systems, a global, market-leading company dedicated to comprehensive protection for enterprise security needs. ISS followed Internet Scanner with the award-winning, market-leading RealSecure, the first commercial host and network intrusion detection system. This history of innovation and success underlies all of ISS' current offerings.

Doug Johns, Sr. VP, Operations	Greg Adams, VP Product Development
Pete Privateer, Sr. VP, Worldwide Marketing	Cheri Maat, VP, Corporate Marketing
Lawrence A. Costanza, Sr. VP Americas Sales	

Products: Proventia is the world's first and only unified enterprise security product line, protecting the entire infrastructure from the gateway to the core to the most remote endpoints. The centrally-managed family of Proventia multi-function protection products unifies anti-virus, firewall, virtual private network, intrusion detection and prevention, application protection, anti-spam and content filtering technologies on a single engine. Unlike stand-alone security products, Proventia streamlines and simplifies security for maximum protection at a lower cost. Proventia is founded on security intelligence conducted by ISS' **X-Force®** research and development team – the unequivocal world authority in vulnerability and threat research.

Services: Internet Security Systems offers Managed Security Services and Professional Security Services to assist organizations in identifying and addressing online risk. ISS' comprehensive suite of Managed Security Services includes a guaranteed protection offering, enabling organizations to transfer the risk of protecting their networking environment to ISS. The solution goes beyond simple event monitoring and device management by offering a Guaranteed Protection Warranty Program supported by guaranteed performance-based Service Level Agreements (SLAs). Managed Security Services enable organizations to help reduce risk, control escalating security costs and demonstrate due diligence. ISS Professional Services provide organizations with the flexibility to co-source the assessment, design, deployment, management and certification of their security posture, freeing them to focus on their core business. ISS consultants are trusted experts to global enterprises and world governments and offer unparalleled security intelligence and experience.
