The Results are in and NVIDIA Rocks on Doom 3!

“NVIDIA has told us more than once that the 6800 series was “designed to play DOOM 3,” and the truth of that statement is now glaringly obvious.”

Kyle Bennett - HardOCP

GeForce 6800 GT Kicks Ass!

“What is going to be surprising to many of you is that ATI's flagship Radeon X800XT-PE card has been outperformed by NVIDIA's GeForce 6800GT. This is not a fluke and it is a result you will see repeated throughout our results.”

Kyle Bennett - HardOCP

The Hard Numbers AGP Performance...

The Hard Numbers PCI Express Performance...

6800 Ultra - The Full Results: All modes

6800 Ultra is up to 40% faster!

6800 GT - The Full Results: All modes

6800 GT is up to 70% faster!

ATI Simply Can't Compete

“Looking at the cream of the crop in video cards, it is painfully obvious that ATI is going to have to make some changes in their product line to stay competitive, at least with DOOM 3 gamers. There is no way for a \$500 X800XT-PE to compete with a \$400 6800GT when the GT is simply going to outperform the more expensive card by a good margin.”

Kyle Bennett - HardOCP

The Final Word...

“If I had to make a list of high end video cards to purchase to play DOOM 3, the GeForce 6800Ultra and GeForce 6800GT would easily take the number 1 and number 2 spots...”

Kyle Bennett - HardOCP
