

US ONCOLOGY

THE NATION'S LARGEST NETWORK OF COMMUNITY-BASED CANCER-CARE PROVIDERS.

US Oncology is the nation's largest health-care services network devoted exclusively to cancer treatment and research, and a pioneer in community-based cancer care. Today, our network of over 850 affiliated physicians delivers care to more than half-a-million cancer patients each year — including over 15 percent of all newly diagnosed cancer cases in the United States. • Building upon our network of more than 450 sites of service, including

without formulary restrictions. Customized to the unique needs of practices, US Oncology provides purchasing, on-site pharmacist expertise, inventory management, and admixture services, allowing physicians and nurses to spend more time caring for patients.

CANCER CENTER SERVICES Our Cancer Center Services division develops and manages comprehensive cancer centers, enabling community-based physicians to integrate medical oncology,

*With more than **450 sites of service** in 28 states, including **79 comprehensive community-based cancer centers**, US Oncology is the nation's largest cancer-care network.*

79 cancer centers in 28 states, we ensure the latest technology and treatment advances at the local level through the following services: *Oncology Pharmaceutical Services, Cancer Center Services, Cancer Research Services, and Practice Management Services* • Working in partnership with cancer-care professionals, our goal is to provide physicians and their patients access to a full range of patient-care capabilities in community-based, outpatient settings. As a result, affiliated physicians have access to resources that ensure their patients receive the care they need, without leaving the people they care about. **ONCOLOGY PHARMACEUTICAL SERVICES** Our Oncology Pharmaceutical Services division assists practices in implementing a range of pharmaceutical management solutions

radiation oncology, diagnostic imaging, clinical research, and clinical and administrative support in a single, patient-care facility.

CANCER RESEARCH SERVICES Our Cancer Research Services division provides oncologists with support to conduct research at the local level, accelerating the delivery of investigational therapies to patients who might qualify for participation in clinical trials. Services include study-development support, regulatory assistance, and collaboration with local research personnel.

PRACTICE MANAGEMENT SERVICES Under our physician practice management arrangements, we act as the exclusive manager and administrator of all day-to-day, non-medical business functions connected with affiliated practices.
