

Report to the Financial Community and 10Q

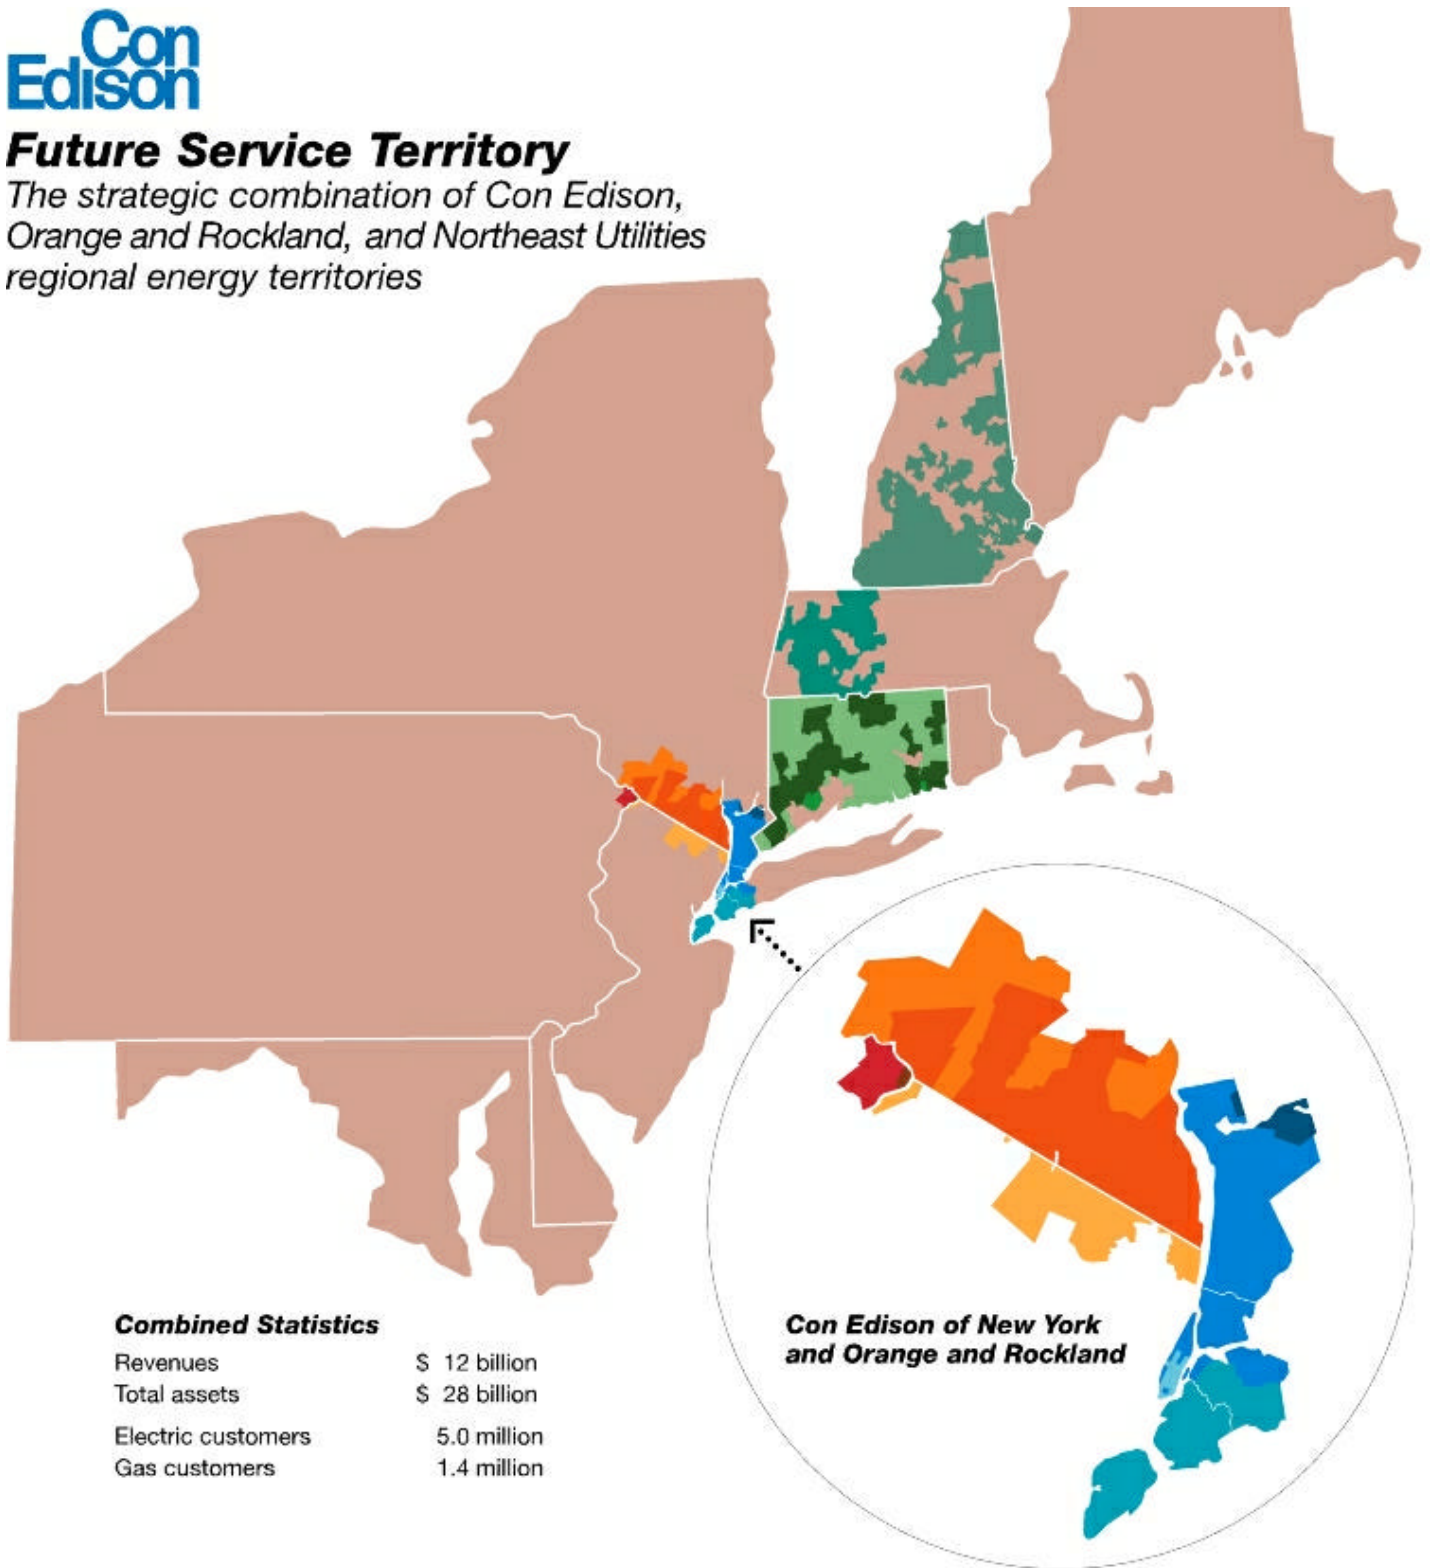

Second Quarter
June 30, 2000

Future Service Territory

The strategic combination of Con Edison, Orange and Rockland, and Northeast Utilities regional energy territories

Combined Statistics

Revenues	\$ 12 billion
Total assets	\$ 28 billion
Electric customers	5.0 million
Gas customers	1.4 million

Northeast Utilities System

- Connecticut Light and Power and Yankee Gas
- Connecticut Light and Power only
- Yankee Gas only
- Western Massachusetts Electric Company
- Public Service of New Hampshire

Con Edison of New York

- Electric, gas and steam
- Electric and gas
- Electric only
- Gas only

Orange and Rockland

- Orange and Rockland electric and gas
- Orange and Rockland electric only
- Rockland Electric Company
- Pike County Light & Power Company electric only
- Pike County Light & Power Company electric and gas

Consolidated Edison, Inc. 2000 Second Quarter Results

Consolidated Edison, Inc. [NYSE: ED] reported net income for common stock for the second quarter of

2000 of \$68.7 million or \$.33 a share, compared with \$66.4 million or \$.30 a share for the second quarter of 1999. The company also declared a dividend of 54.5 cents a share on its common stock payable September 15, 2000 to stockholders of record as of August 16, 2000.

The company's net income for common stock for the first six months of 2000 was \$256.9 million or \$1.21 a share, compared with \$243.0 million or \$1.06 a share for the first six months of 1999.

The company reported net income for common stock for the 12 months ended June 30, 2000 of \$714.5 million or \$3.32 a share, compared with \$721.9 million or \$3.13 a share for the 12 months ended June 30, 1999.

Joan S. Freilich

The company's earnings for the second quarter of 2000 were favorably impacted by higher electric sales growth, reflecting the strong local economy. Results for the quarter also reflect the impact of the company's previously announced \$1.3 billion common stock repurchase program. Through June 30, 2000, the company had repurchased 23.2 million shares for \$1.0 billion. Earnings for the six- and twelve-month periods reflect the same factors.

"Con Edison's earnings for this quarter and the first six months of 2000 reflect the company's continued financial strength, core discipline, and firm grasp of strategic issues during a period of enormous industry change."

Joan S. Freilich
Executive Vice President and
Chief Financial Officer

Con Edison's electric and firm gas sales and transportation volumes in the first six months of 2000 reflect the July 1999 acquisition of Orange and Rockland Utilities, and increases in Con Edison of New York's electric and firm gas sales and transportation of 4.5 percent and 4.2 percent, respectively, compared to the first six months of 1999.

COMPARISON OF CONSOLIDATED EDISON, INC.

& S&P ELECTRICS (industry average as of July 31)

Economy and Real Estate Drive Increase in Electric Demand

A robust regional economy and a hot real estate market in New York City are driving increased demand for electricity in Con Edison's service territory. With technology-dependent businesses thriving, real estate occupancy soaring, and formerly undesirable spaces being converted to new, high-demand uses, Con Edison's electric sales are sharply increasing. Sales in 1999 were 3.9% higher than 1998. After adjustment for weather, sales were 2.7% higher than the prior year.

In the 12 months ended May 2000, the number of jobs in New York City has increased by 100,400, or 2.8%. In the

first quarter of 2000 alone, 45,800 new jobs were added. Led by the booming real estate market, the construction industry has been the fastest growing employment sector. During 1999, total employment in the construction sector grew by 12%.

As Wall Street profits have been invested in renovating and developing office space, vacant space in Manhattan has dropped from 60 million square feet in 1994 to less than 20 million square feet in 1999. Rents have more than doubled during this period.

Favorable economic conditions and the development of the Internet have created an environment particularly attractive to high-tech and new media companies. New York City has become a hub for Internet-based business and is referred to as the "dot.com capital of the world."

With plentiful capital (in 1999, for example, more than \$2.5 billion was invested in New York City high-tech companies) and easy access to investors and customers, more than 4,000 companies, ranging from small start-ups to large enterprises, are pushing out of

Silicon Alley in downtown Manhattan and expanding to Upper Manhattan, the Bronx, Brooklyn, Queens, Staten Island and Westchester, County. More than 3,000 of these companies are located in Manhattan, where space is at a premium and becoming much more difficult to find.

Because of the sharply increased asking rents for prime building space in Manhattan, high-tech companies are seeking more readily available and reasonably priced space. They also need buildings suited to the unique aspects of their businesses.

According to Peter Meloro, Con Edison's manager of Economic Development, this new real estate demand is for "rugged, industrial-type" buildings with the electrical capacity needed to support large computer and telecommunications equipment installations. "They need the kind of space found in former warehouses or factories — strong, solid floors and high ceilings," he said.

The real estate industry finds the potential of this market to be attractive, because there has been a large supply of such buildings sitting vacant or par-

NEW YORK CITY EMPLOYMENT (by sector)

	1994-1999 new jobs
Business Services	81,000
Eating and drinking places	29,000
Health services	27,000
Construction	24,000
Securities and commodities brokers	24,000
Social services	24,000
Engineering and management services	24,000
Educational services	17,000
Miscellaneous retail	15,000
Air transportation	13,000

The New York City real estate market is booming, making building cranes a frequent skyline feature, as seen here in Times Square

tially vacant in New York City for many years. According to a recent article in *Crain's New York Business*, New Media companies located in all five boroughs are approaching 150,000 employees and producing revenues upwards of \$9 billion annually. Forty-five percent of the companies surveyed by *Crain's* have identified affordable facilities as one of their primary concerns of operating in New York City. There is intense competition for suitable

properties, and landlords, property managers, and leasing agents are eager to determine and provide the necessary electric infrastructure. "We follow these developments closely, so that we can be ready to serve our customers as soon as they're ready to do business with us," Meloro said.

One type of new business that requires open, industrial-type architecture is a telecommunications provider that installs fiber-optic cables between and within buildings. Buildings suitable for "telco hotels," where such firms install their telecommunications transmission equipment, must be located reasonably close to fiber-optic communications routes. The floors must be able to sustain loads of at least 125 pounds per square foot. High, unobstructed ceilings are needed to accommodate racks of telecommunication equipment densely packed together.

"These customers come to us with high electrical capacity requirements and air conditioning demand," said Meloro. "Their equipment usually requires 480-volt electric service, uses lots of power, and generates lots of heat. Air conditioning is about half the load

and is required to cool the expensive equipment." Meloro said that Con Edison energy experts work closely with developers and prospective customers to help meet the reliability and infrastructure technology needs of this growing sector. "We understand the crucial need of the dot.coms for the highest quality service," Meloro added. "As the most reliable electric delivery company in the nation and as a proponent and user of e-commerce ourselves, Con Edison is uniquely suited to serve, and to benefit from, these new businesses. The New Economy has revitalized New York City and we at Con Edison are excited to be an important part of this great economic expansion."

MANHATTAN BUILDING OCCUPANCY

Eugene R. McGrath's Interview with the *Daily News*

In a July 23rd interview with the *Daily News*, Con Edison Chairman and CEO Eugene McGrath gave his analysis of the deregulated electricity marketplace.

Q: Why are customers' electricity bills expected to be 30% higher this July and August?

Eugene McGrath: The electricity industry is changing. Con Edison is a distribution company. Our piece of the price of electricity is actually decreasing. On the delivery side, that number's gone down, so over a five-year period it'll be down about a billion dollars.

On the other side, the generating plants are now [competing] in the marketplace. And there are a couple of forces that are pushing those prices up. One is the increase in fuel costs ...

Q: Will rates continue to rise?

A: It depends ... on how this competitive market works for the generation of electricity. The thought behind competition is that prices will tend to decrease. ... It depends a lot on the balance between supply and demand. ... Where there's an excess of capacity, there's a tendency for prices to come down. In any marketplace where there's a shortage of capacity,

no matter what the product is, they tend to go up.

Q: And in New York we have a shortage of supply.

A: We have enough supply now to meet the load this year and next year. But the economy's been growing in New York and in the nation for quite a while.

We estimate the [demand] is going to grow in our area somewhere between 150 and 300 megawatts a year.

That's equivalent to a small power plant, each year.

We're okay this year, we're okay next year, but then it starts to get tighter. We need new power plants. ...

We're not building power plants [because] we're not in that business as a bulk power provider. But to accommodate the growth that we see in the ... future, new power plants are definitely needed.

If things that are on the books now get built on a schedule that's reasonable, we'll be okay.

If the process of building power plants is stalled, then it could be a problem. But there's time now to deal with it, if it's dealt with efficiently.

Q: Why has no one laid any new transmission lines that would bring power from upstate or a neighboring state?

A: We've actually increased the capacity of a couple of our transmission lines. The Independent System Operator will recommend where new transmission capacity may be needed. Under the old rules of the game, when Con Edison was both the supplier and the distributor of electricity, Con Edison had the obligation to prepare for the future supply as the city grew. ... That is no longer Con Ed's obligation in this new world.

Q: Is there any difference between deregulating the long-distance telephone business and deregulating electricity?

A: Telecommunications was deregulated in a time of explosive growth. They were getting growth rates of 20%, 30%, then the computers came along, the cell phones came along. When you have that kind of growth, you know, little glitches along the way don't matter.

We're predicting growth of maybe 1 1/2% in the electric industry, so it's much slower growth. So any glitches are more magnified in that process.

Eugene R. McGrath

Q: Mayor Giuliani has attacked Con Ed for its inability to give New Yorkers assurances we'll have the power we need over the summer. Your response?

A: There are two issues here. Let's talk about distribution. We're fully capable of meeting the expected loads this summer. We've put a lot more money in since last summer's experience. We've spent more than \$100 million more than a normal amount - in the \$300 to \$400 million range. We put in 135 miles worth of new cable. On the supply side, there is enough supply with the reserve to meet the peak loads we expect to have this summer.

Q: During peak demand, do you believe power suppliers are taking advantage of the power squeeze in New York City and charging unjustifiably high prices?

A: What we do is look at the weather, the day of the week, the cloud cover - all kinds of things - and we forecast for the next day what we expect our load will be each hour.

We ... give that to the Independent System Operator. And the other utilities do the same thing. The ISO then says, 'Here's the load I need to meet at each hour tomorrow,' and then goes to generators and asks them, 'What do you bid for this?' That's how prices are developed for power.

The ISO is charged with monitoring the market, and taking action if the market's not working appropriately.

Q: Last summer we had a big blackout in the city. What's your forecast for August if we have two weeks of 95 degree-plus temperatures?

A: Our peak-demand forecast is for about 11,850 megawatts, and we're able to handle that. We're in good shape to meet that.

Competitive Energy Markets in New York

In 1994, the New York State Public Service Commission (PSC) initiated the Competitive Opportunities Proceeding (COP) in order to facilitate the formation of a competitive electricity market in New York. As part of the COP, Con Edison developed a specific plan to promote competition in our service area. This plan was contained in the September 1997 settlement agreement among Con Edison, the PSC, and other parties. The settlement agreement required Con Edison to divest generation and sell sites suitable for future generation. As a result, the majority of the Company's in-city generating plants were sold between June and August 1999. Con Edison also agreed to support the establishment of the Independent System Operator (ISO), which began operation on November 18, 1999.

How Does the New York ISO Energy Market Work?

The ISO operates the New York power grid and has established two markets for the trading of energy. In the day-ahead market, prices reflect forecasted conditions for system loads, generation, and transmission. In the real-time market, prices reflect actual system conditions that occur during the given day. In both the day-ahead and real-time markets, the ISO calculates and posts hourly clearing prices, based on the bids submitted by the generating units. The unit with the highest bid that is selected to serve load in any hour sets the price—called the clearing price—for that hour, except that prices also vary depending on the geographic locations of the generator and load. Customers may elect to have their energy purchased for them by their regulated transmission and distribution company or by an unregulated energy service company (ESCO). Customers pay the clearing price for all energy taken from the ISO, and generators receive the clearing price for all energy supplied to the ISO. In all cases, facilities of the transmission and distribution company are utilized to provide delivery to the ultimate customer.

Results to Date

Since the start of ISO operation, the volatility of hour-to-hour energy prices has increased significantly. For example, real-time prices in New York City on May 8 changed from \$220 per MWh at 3:00 PM to about \$1,500 per MWh at 4:00 PM. Moreover, for comparable periods, energy prices have generally been much higher this year than last. Although we attribute part of this increase to significantly higher fuel costs, the shift in market structure from cost-based to bid-based pricing has also contributed to higher energy prices. As a result of concerns about energy price spikes, the ISO has adopted a \$1,000 per MWh bid cap on generators until October 28, 2000. The ISO, through its Market Monitoring Unit, is responsible for assessing significant fluctuations in energy prices and adopting mitigation measures to eliminate activities that may represent an abuse of market power.

Steady Progress On Con Edison And Northeast Utilities Merger

Since Con Edison and Northeast Utilities (NU) announced, last October, their agreement to merge, steady progress has been made in gaining necessary regulatory approvals and aligning business processes for the completion of the merger in the fourth quarter of this year.

"We have a highly effective transition team," said Kevin Burke, president of Orange and Rockland Utilities, Inc. and Con Edison team leader for the transition. "In addition to our core group, we have put together sub-teams as needed to focus on specialized aspects of the businesses." Several members of the transition team were also part of Con Edison's O&R transition team and had gained valuable experience in identifying synergy savings opportunities, he noted.

Burke explained that the teams are developing sets of recommendations for the areas they represent, which will be the foundation for the ultimate organizational and process decisions. "The knowledge gained as the teams examine business processes has given them a clear view of the strengths of the combined management skills and techni-

cal expertise of the two utilities," he said. "We are excited about the new Con Edison."

Burke said that one dividend of merger activities is the opportunity to identify and share management talent across a larger company. In July, Public

Kevin Walker

Service of New Hampshire (PSNH), a regulated subsidiary of NU, named Con Edison's Kevin E. Walker to the position of vice president, operations. Walker, a plant manager for Waterside station in New York City, will join PSNH under the Con Edison/NU loaned executive program, and the appointment will become permanent when the merger is completed.

"Con Edison, O&R, and NU now post available management

positions on e-mail to all their employees," Burke said. "The ability to transfer expertise and experience will give us the depth of leadership that will serve the new company well."

On May 31, 2000, Con Edison received approval of the merger by the Federal Energy Regulatory Commission (FERC), without conditions. The merger had previously received approvals from utility regulators in Maine, Vermont, New Jersey, Massachusetts, and Pennsylvania. Remaining approvals include the Connecticut Department of Public Utility Control, the New Hampshire Public Utilities Commission, the New York State Public Service Commission, the Nuclear Regulatory Commission, and the Securities and Exchange Commission. Final state approvals are expected in September.

...steady progress has been made in gaining necessary regulatory approvals and aligning business processes for the completion of the merger...

Recent Developments

Powerline Technology

Con Edison is the first electric utility to join the HomePlug Powerline Alliance (www.homeplug.org), a non-profit corporation that is working to promote the development of high-speed data over existing power lines. Powerline technology could offer an attractive alternative to homes and offices interested in acquiring broadband access. The HomePlug Alliance is also working to develop networked products and services for home and offices. Other members of the alliance include Motorola, Cisco Systems, Intel, Compaq, and Texas Instruments.

Furthering corporate involvement in this cutting-edge technology, Con Edison has accepted a position on PLT Solutions' advisory board. PLT Solutions, a subsidiary of Ambient Corp., develops power line communications and owns proprietary technology that facilitates high-speed data transfer. Con Edison's role on the board will be to assist PLT in developing the technology and in overcoming infrastructure limitations. On August 15, Con Edison and PLT Solutions signed a memorandum of understanding to conduct business.

On-line Commodity Service

ConEdison Solutions (CES) has signed up with Energy.com to offer electricity and natural gas to medium and large businesses. Energy.com's Energy Exchange will enable business customers to submit a single request for proposal to all energy service providers, such as ConEdison Solutions, who are available in the region. CES will be able to access an even greater number of commercial customers with the convenience of the Internet and provide them with timely products and services that meet their needs.

Awards

Con Edison's steam system (the largest in the world) was recently awarded the System of the Year award for the year 2000 by the International District Energy Association (IDEA). The system serves approximately 1,850 customers and produces annual revenues of \$350 million. IDEA's selection was made based on the steam system's efficiency, high reliability, and availability, as well as its environmental benefits and Con Edison's strategy of exceeding local, state and

federal environmental compliance standards. The IDEA also noted Con Edison's employee safety and training programs, customer relations, service improvements, communications and marketing efforts, and continuing involvement in community and professional organizations.

Con Edison was named by *Fortune* Magazine as one of America's 50 Best Companies for Minorities. The company has been on the *Fortune* list every year since its inception in 1998, this year improving to 23rd place from 33rd. Minorities make up more than 32% of Con Edison's workforce, 59% of new hires (up 22% from 1998), and more than 32% of employees promoted.

The U.S. Coast Guard has presented Con Edison with its highest award for marine environmental protection, the Benkert Award. This award, which is given every two years, was established to recognize vessel and facility operators who have implemented outstanding marine environmental protection programs that far exceed mere compliance with industrial and regulatory standards.

On August 7, 2000, Northeast Utilities reached an agreement to sell its Millstone power stations

Northeast Utilities Advances

Through the second quarter of 2000, Northeast Utilities (NU) has continued to build upon its 1999 successes, which included restoration of the dividend in the fourth quarter; settlement of key restructuring, environmental, and nuclear issues; an increase in retail sales; and an improving financial performance. Second-quarter earnings, announced July 25, totaled \$12.2 million, or 8 cents a share, following first-quarter earnings of \$74.6 million, or 55 cents a share.

NU's competitive energy production, marketing, and services businesses have made a significant contribution to financial results, earning \$10.3 million in the first six months of 2000. Energy sales by its regulated businesses have benefited from a strong economic expansion in New England, which offsets a reduction in weather-related electricity sales.

In June, NU's Millstone Nuclear power station became the first nuclear station in New England to receive the internationally recognized ISO 14001 certification for environmental excellence. At the same time, the plant set an industry record for safely completing a major refueling outage ahead of schedule at Unit 2 and achieved a capacity factor of almost 100% for Unit 3. On August 7, NU reached an agreement with Dominion Resources, under which Dominion will purchase the Millstone 2 and 3 power stations for \$1.4 billion.

FILING FORMAT

This Quarterly Report on Form 10-Q is a combined report being filed separately by three different registrants: Consolidated Edison, Inc. ("Con Edison"), Consolidated Edison Company of New York, Inc. ("Con Edison of New York") and Orange and Rockland Utilities, Inc. ("O&R"). Neither Con Edison of New York nor O&R makes any representation as to the information contained in this report relating to Con Edison or the subsidiaries of Con Edison other than itself.

O&R, a wholly-owned subsidiary of Con Edison, meets the conditions specified in General Instruction H of Form 10-Q and is permitted to use the reduced disclosure format for wholly-owned subsidiaries of companies, such as Con Edison, that are reporting companies under the Securities Exchange Act of 1934. Accordingly, O&R has omitted from this report the information called for by Part 1, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations and has included in this report its Management's Narrative Analysis of the Results of Operations. In accordance with general instruction H, O&R has also omitted from this report the information, if any, called for by Part 1, Item 3, Quantitative and Qualitative Disclosure About Market Risk; Part II, Item 2, Changes in Securities and Use of Proceeds; Part II, Item 3, Defaults Upon Senior Securities; and Part II, Item 4, Submission of Matters to a Vote of Security Holders.

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q includes forward-looking statements, which are statements of future expectation and not facts. Words such as "estimates," "expects," "anticipates," "intends," "plans" and similar expressions identify forward-looking statements. Actual results or developments might differ materially from those included in the forward-looking statements because of factors such as competition and industry restructuring, Con Edison's pending acquisition of Northeast Utilities, technological developments, changes in economic conditions, changes in historical weather patterns, changes in laws, regulations or regulatory policies, developments in legal or public policy doctrines, and other presently unknown or unforeseen factors.

NOTES TO FINANCIAL STATEMENTS - CON EDISON

NOTE A - GENERAL

These footnotes accompany and form an integral part of the interim consolidated financial statements of Consolidated Edison, Inc. (Con Edison) and its subsidiaries, including the regulated utility Consolidated Edison Company of New York, Inc. (Con Edison of New York), the regulated utility Orange and Rockland Utilities, Inc. (O&R), which Con Edison acquired in July 1999, and several non-utility subsidiaries. These financial statements are unaudited but, in the opinion of Con Edison's management, reflect all adjustments (which include only normally recurring adjustments) necessary for a fair statement of the results for the interim periods presented. These financial statements should be read together with the audited Con Edison financial statements (including the notes thereto) included in the combined Con Edison, Con Edison of New York and O&R Annual Report on Form 10-K for the year ended December 31, 1999 (the "Form 10-K").

NOTE B - ENVIRONMENTAL MATTERS

Hazardous substances, such as asbestos, polychlorinated biphenyls (PCBs) and coal tar, have been used or generated in the course of operations of Con Edison's utility subsidiaries and may be present in their facilities and equipment.

The Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund) and similar state statutes impose joint and several strict liability, regardless of fault, upon generators of hazardous substances for resulting removal and remedial costs and environmental damages. Liabilities under these laws can be material and in some instances may be imposed without regard to fault, or may be imposed for past acts, even though such past acts may have been lawful at the time they occurred.

At June 30, 2000, Con Edison had accrued \$67.5 million as its best estimate of the utility subsidiaries' liability for sites as to which they have received process or notice alleging that hazardous substances generated by them (and, in most instances, other potentially responsible parties) were deposited. There will be additional liability at these sites and other sites, the amount of which is not presently determinable but may be material to Con Edison's financial position, results of operations or liquidity.

Con Edison's utility subsidiaries are permitted under current rate agreements to defer for subsequent recovery through rates certain site investigation and remediation costs with respect to hazardous waste. At June 30, 2000, \$42.7 million of such costs had been deferred as a regulatory asset.

Suits have been brought in New York State and federal courts against Con Edison's utility subsidiaries and many other defendants, wherein a large number of plaintiffs sought large amounts of compensatory and punitive damages for deaths and injuries allegedly caused by exposure to asbestos at various premises of the utility subsidiaries. Many of these suits have been disposed of without any payment by the utility subsidiaries, or for immaterial amounts. The amounts specified in all the remaining suits total billions of dollars but Con Edison believes that these amounts are greatly exaggerated, as were the claims already disposed of. Based on the information and relevant circumstances known to Con Edison at this time, it does not believe that these suits will have a material adverse effect on its financial position, results of operations or liquidity.

NOTE C - NUCLEAR GENERATION

Con Edison of New York owns the Indian Point 2 nuclear generating unit, which has a capacity of approximately 1,000 MW, and the retired Indian Point 1 nuclear generating unit. See Note G to the Con Edison financial statements included in the Form 10-K.

On February 15, 2000, Con Edison of New York shut down Indian Point 2 following a leak in one of its four steam generators. Nuclear Regulatory Commission approval will be required for restart.

On March 30, 2000, the New York State Public Service Commission (PSC) issued an order instituting a proceeding to investigate the Indian Point 2 outage and its causes and the prudence of the

company's actions regarding the operation and maintenance of Indian Point 2 (the PSC Outage Proceeding). The order indicated that the examination should include, among other things, Con Edison of New York's inspection practices, the circumstances surrounding Indian Point 2's October 1997 to September 1998 outage, the basis for postponement of the steam generator replacement and whether, and to what extent, increased replacement power costs and repair and replacement costs should be borne by Con Edison's shareholders.

On May 25, 2000, Westchester County, New York sued the PSC and Con Edison of New York seeking to prevent the company from recovering costs relating to the ongoing outage. The suit, which is entitled *The County of Westchester et al., v. Maureen O. Helmer, et al.*, was brought in the Supreme Court of the State of New York, County of Albany.

The costs resulting from the unavailability of Indian Point 2 to produce energy have been included in the purchased power costs that Con Edison of New York has billed to customers under PSC-approved rate provisions.

Con Edison of New York has commenced replacement of the steam generators with steam generators it has owned since 1988. The company expects the steam generator replacement to be completed by the end of 2000 and estimates that replacement will require additional expenditures (exclusive of replacement power costs) of up to \$150 million.

At June 30, 2000, Con Edison had accrued \$30 million for its potential liability to customers in connection with the ongoing outage.

On August 8, 2000, the Governor of State of New York signed into law an act (the Indian Point 2 Law) which provides that:

"With respect to the February 15, 2000 outage at the Indian Point 2 Nuclear Facility, the New York state public service commission shall prohibit the Consolidated Edison Company from recovering from its ratepayers any costs associated with replacing the power from such facility. Such prohibition shall apply to any such costs incurred until the conclusion of such outage, or incurred at any time until all defective steam generation equipment at the facility has been replaced, whichever occurs later. Such prohibition shall apply to automatic adjustment mechanisms as well as base rates or any other rate recovery mechanism. The commission shall order the company to refund any such costs which have been recovered from ratepayers."

On August 9, 2000, the PSC issued an order with respect to the Indian Point 2 Law. The order directs Con Edison of New York to revise its electric tariff to prevent prospective recovery of these replacement power costs and, commencing September 2000, to implement a refund of all such costs collected since February 15, 2000. The order indicates that "the anticipated amount to be refunded to customers is approximately \$162 million."

On August 14, 2000, the company initiated an action in the United States District Court for the Northern District of New York, entitled *Consolidated Edison Company of New York, Inc. v. Pataki, et al.*, seeking to prevent implementation of the Indian Point 2 Law and to have the Indian Point 2 Law declared unconstitutional.

Con Edison believes that the operation, maintenance and inspection practices related to Indian Point 2 have been prudent. However, if the Indian Point 2 Law is implemented and determined to be constitutional, Con Edison of New York will not recover from its customers its Indian Point 2 replacement power costs. In addition, Con Edison is unable to predict whether or not any other Indian Point 2-related proceedings, lawsuits, legislation or other actions, including the PSC's Outage Proceeding, will have a material adverse effect on its financial position, results of operations or liquidity.

NOTE D – O&R

In July 1999, Con Edison completed its acquisition of O&R for \$791.5 million in cash. See Note K to the Con Edison financial statements included in the Form 10-K. The unaudited pro forma consolidated Con Edison financial information shown below has been prepared based upon the historical consolidated income statements of Con Edison and O&R for the three and six-month periods ended June 30, 1999, giving effect to the acquisition as if it had occurred at January 1, 1999. The historical information has been adjusted to reflect amortization for the three and six-month periods of the goodwill recorded by Con Edison in connection the acquisition and the after-tax cost Con Edison would have incurred during the period for financing the acquisition by issuing debt on January 1, 1999 at an assumed 8 percent per annum interest rate. The proforma information is not necessarily indicative of the results that Con Edison would have had if the acquisition had been completed prior to July 1999, or the results that Con Edison will have in the future.

NOTES TO FINANCIAL STATEMENTS - CON EDISON OF NEW YORK

NOTE A - GENERAL

These footnotes accompany and form an integral part of the interim consolidated financial statements of Consolidated Edison Company of New York, Inc. (Con Edison of New York) and its subsidiaries. Consolidated Edison, Inc. (Con Edison) owns all of the outstanding common stock of Con Edison of New York. These financial statements are unaudited but, in the opinion of Con Edison of New York's management, reflect all adjustments (which include only normally recurring adjustments) necessary for a fair statement of the results for the interim periods presented. These financial statements should be read together with the audited Con Edison of New York financial statements (including the notes thereto) included in the combined Con Edison, Con Edison of New York and Orange and Rockland Utilities, Inc. Annual Report on Form 10-K for the year ended December 31, 1999 (the "Form 10-K").

NOTE B - ENVIRONMENTAL MATTERS

Hazardous substances, such as asbestos, polychlorinated biphenyls (PCBs) and coal tar, have been used or generated in the course of operations of Con Edison of New York and may be present in its facilities and equipment. The Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund) and similar state statutes impose joint and several strict liability, regardless of fault, upon generators of hazardous substances for resulting removal and remedial costs and environmental damages. Liabilities under these laws can be material and in some instances may be imposed without regard to fault, or may be imposed for past acts, even though such past acts may have been lawful at the time they occurred.

At June 30, 2000, Con Edison of New York had accrued \$50.2 million as its best estimate of its liability for sites as to which it has received process or notice alleging that hazardous substances generated by the company (and, in most instances, other potentially responsible parties) were deposited. There will be additional liability at these sites and other sites, the amount of which is not presently determinable but may be material to the company's financial position, results of operations or liquidity.

Under Con Edison of New York's current electric, gas and steam rate agreements, site investigation and remediation costs in excess of \$5 million annually incurred with respect to hazardous waste for which it is responsible are to be deferred and subsequently reflected in rates. At June 30, 2000, \$24.2 million of such costs had been deferred as a regulatory asset.

Suits have been brought in New York State and federal courts against Con Edison of New York and many other defendants, wherein a large number of plaintiffs sought large amounts of compensatory and punitive damages for deaths and injuries allegedly caused by exposure to asbestos at various premises of the company. Many of these suits have been disposed of without any payment by Con Edison of New York, or for immaterial amounts. The amounts specified in all the remaining suits total billions of dollars but the company believes that these amounts are greatly exaggerated, as were the claims already disposed of. Based on the information and relevant circumstances known to the company at this time, it does not believe that these suits will have a material adverse effect on its financial position, results of operations or liquidity.

NOTE C - NUCLEAR GENERATION

Con Edison of New York owns the Indian Point 2 nuclear generating unit, which has a capacity of approximately 1,000 MW, and the retired Indian Point 1 nuclear generating unit. See Note G to the Con Edison financial statements included in the Form 10-K.

On February 15, 2000, Con Edison of New York shut down Indian Point 2 following a leak in one of its four steam generators. Nuclear Regulatory Commission approval will be required for restart.

On March 30, 2000, the New York State Public Service Commission (PSC) issued an order instituting a proceeding to investigate the Indian Point 2 outage and its causes and the prudence of the company's actions regarding the operation and maintenance of Indian Point 2 (the PSC Outage Proceeding). The order indicated that the examination should include, among other things, Con Edison of New York's inspection practices, the circumstances surrounding Indian Point 2's October 1997 to September 1998 outage, the basis for postponement of the steam generator replacement and whether, and to what extent, increased replacement power costs and repair and replacement costs should be borne by Con Edison's shareholders.

On May 25, 2000, Westchester County, New York sued the PSC and Con Edison of New York seeking to prevent the company from recovering costs relating to the ongoing outage. The suit, which is entitled *The County of Westchester et al., v. Maureen O. Helmer, et al.*, was brought in the Supreme Court of the State of New York, County of Albany.

The costs resulting from the unavailability of Indian Point 2 to produce energy have been included in the purchased power costs that Con Edison of New York has billed to customers under PSC-approved rate provisions.

Con Edison of New York has commenced replacement of the steam generators with steam generators it has owned since 1988. The company expects the steam generator replacement to be completed by the end of 2000 and estimates that replacement will require additional expenditures (exclusive of replacement power costs) of up to \$150 million.

At June 30, 2000, Con Edison had accrued \$30 million for its potential liability to customers in connection with the ongoing outage.

On August 8, 2000, the Governor of State of New York signed into law an act (the Indian Point 2 Law) which provides that:

"With respect to the February 15, 2000 outage at the Indian Point 2 Nuclear Facility, the New York state public service commission shall prohibit the Consolidated Edison Company from recovering from its ratepayers any costs associated with replacing the power from such facility. Such prohibition shall apply to any such costs incurred until the conclusion of such outage, or incurred at any time until all defective steam generation equipment at the facility has been replaced, whichever occurs later. Such prohibition shall apply to automatic adjustment mechanisms as well as base rates or any other rate recovery mechanism. The commission shall order the company to refund any such costs which have been recovered from ratepayers."

On August 9, 2000, the PSC issued an order with respect to the Indian Point 2 Law. The order directs Con Edison of New York to revise its electric tariff to prevent prospective recovery of these replacement power costs and, commencing September 2000, to implement a refund of all such costs collected since February 15, 2000. The order indicates that "the anticipated amount to be refunded to customers is approximately \$162 million."

On August 14, 2000, the company initiated an action in the United States District Court for the Northern District of New York, entitled *Consolidated Edison Company of New York, Inc. v. Pataki, et al.*, seeking to prevent implementation of the Indian Point 2 Law and to have the Indian Point 2 Law declared unconstitutional.

Con Edison of New York believes that the operation, maintenance and inspection practices related to Indian Point 2 have been prudent. However, if the Indian Point 2 Law is implemented and determined to be constitutional, Con Edison of New York will not recover from its customers its Indian Point 2 replacement power costs. In addition, Con Edison of New York is unable to predict whether or not any other Indian Point 2-related proceedings, lawsuits, legislation or other actions, including the PSC's Outage Proceeding, will have a material adverse effect on its financial position, results of operations or liquidity.

NOTES TO FINANCIAL STATEMENTS - O&R

NOTE A - GENERAL

These footnotes accompany and form an integral part of the interim consolidated financial statements of Orange and Rockland Utilities, Inc. (O&R), a wholly-owned subsidiary of Consolidated Edison, Inc. (Con Edison). These financial statements are unaudited but, in the opinion of O&R's management, reflect all adjustments (which include only normally recurring adjustments) necessary for a fair statement of the results for the interim periods presented. These financial statements should be read together with the audited O&R financial statements (including the notes thereto) included in the combined Con Edison, Consolidated Edison Company of New York, Inc. and O&R Annual Report on Form 10-K for the year ended December 31, 1999 (the Form 10-K).

NOTE B - ENVIRONMENTAL AND OTHER LITIGATION

ENVIRONMENTAL MATTERS

Hazardous substances, such as asbestos, polychlorinated biphenyls (PCBs) and coal tar, have been used or generated in the course of operations of O&R and may be present in its facilities and equipment. The Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund) and similar state statutes impose joint and several liability, regardless of fault, upon generators of hazardous substances for resulting removal and remedial costs and environmental damages. Liabilities under these laws can be material and in some instances may be imposed without regard to fault, or may imposed for past acts, even though such past acts may have been lawful at the time they occurred.

At June 30, 2000, O&R had accrued \$17.3 million as its best estimate of its liability for sites as to which it has received process or notice alleging that hazardous substances generated by the company (and, in most instances, other potentially responsible parties) were deposited. There will be additional liability at these sites and other sites, including the costs of investigating and remediating sites where the company or its predecessors manufactured gas. The total amount of liability is not presently determinable but may be material to the company's financial position, results of operations or liquidity.

Under O&R's current gas rate agreement, O&R may defer for subsequent recovery through rates the costs of investigating and remediating manufactured gas sites. At June 30, 2000, \$18.5 million of such costs had been deferred as a regulatory asset.

Suits have been brought in New York State and federal courts against O&R and many other defendants, wherein a large number of plaintiffs sought large amounts of compensatory and punitive damages for deaths and injuries allegedly caused by exposure to asbestos at various premises of the company. Many of these suits have been disposed of without any payment by O&R, or for immaterial amounts. The amounts specified in all the remaining suits total billions of dollars but the company believes that these amounts are greatly exaggerated, as were the claims already disposed of. Based on the information and relevant circumstances known to the company at this time, it does not believe that these suits will have a material adverse effect on its financial position, results of operations or liquidity.

In May 2000, the New York State Department of Environmental Conservation (DEC) issued notices of violation to O&R and four other companies that have operated coal-fired electric generating facilities in New York State. The notices allege violations of the federal Clean Air Act and the New York State Environmental Conservation Law resulting from the alleged failure of the companies to obtain DEC permits for physical modifications to their generating facilities and to install air pollution control equipment that would have reduced harmful emissions. The notice of violation received by O&R relates to the Lovett Generating Station that it sold in June 1999. O&R is unable to predict whether or not the alleged violations will have a material adverse effect on its financial position, results of operation or liquidity.

OTHER LITIGATION

In 1996, O&R was sued for its alleged breach of an agreement to purchase electric capacity and associated energy from a 4 MW cogeneration facility and for an alleged breach of an implied covenant of good faith. In 1999, plaintiff filed a motion for summary judgment and O&R filed a motion in opposition of plaintiff's motion. O&R cannot predict the ultimate outcome of this proceeding.

NOTE D - RELATED PARTY TRANSACTIONS

Each month O&R is invoiced by Con Edison and its affiliates for the cost of any services rendered to O&R by Con Edison and its affiliates. These services, provided primarily by Con Edison of New York, include substantially all administrative support operations such as corporate directorship and associated ministerial duties, accounting, treasury, investor relations, information resources, legal, human resources, fuel supply and energy management services. The cost of these services totaled \$5.6 million during the first six months of 2000. In addition, O&R purchased \$21.3 million of gas from Con Edison of New York during this period.

O&R provides certain recurring services to Con Edison of New York on a monthly basis, including cash receipts processing, rubber goods testing, and certain administrative services. The cost of these services totaled \$3.7 million during the first six months of 2000. In addition, O&R sold \$4.9 million of gas to Con Edison of New York during this period.

NOTE E- RESTATEMENT OF RETAINED EARNINGS

In July 1999, O&R's retained earnings as of the effective date of its acquisition by Con Edison was reclassified to additional paid in capital. See "Acquisition By Con Edison" immediately preceding Note A to the O&R financial statements included in the Form 10-K. As of June 30, 2000, O&R has reversed this reclassification. The amounts shown as additional paid in capital and retained earnings on O&R's December 31, 1999 balance sheet have been restated to reflect this reclassification. This classification did not change the total common shareholder's equity for any of the periods presented.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CON EDISON

Consolidated Edison, Inc. (Con Edison) is a holding company which operates only through its subsidiaries and has no material assets other than the stock of its subsidiaries. Con Edison's principal subsidiaries are regulated utilities: Consolidated Edison Company of New York, Inc. (Con Edison of New York) and Orange and Rockland Utilities, Inc. (O&R). Con Edison also has several unregulated subsidiaries. In October 1999 Con Edison agreed to acquire Northeast Utilities.

The following discussion and analysis, which relates to the interim consolidated financial statements of Con Edison and its subsidiaries (including Con Edison of New York and, from its date of acquisition in July 1999, O&R) included in Part I, Item 1 of this report, should be read in conjunction with Con Edison's Management's Discussion and Analysis of Financial Condition and Results of Operations (Con Edison's 10-K MD&A) in Item 7 of the combined Con Edison, Con Edison of New York and O&R Annual Reports on Form 10-K for the year ended December 31, 1999 (File Nos. 1-14514, 1-1217 and 1-4315, the Form 10-K) and Con Edison's Management's Discussion and Analysis of Financial Condition and Results of Operations (Con Edison's First Quarter 10-Q MD&A) in Part I, Item 2 of the combined Con Edison, Con Edison of New York and O&R Quarterly Reports on Form 10-Q for the quarterly period ended March 31, 2000 (the First Quarter Form 10-Q). Reference is also made to the notes to the Con Edison financial statements in Part I, Item 1 of this report, which notes are incorporated herein by reference.

LIQUIDITY AND CAPITAL RESOURCES

Cash and temporary cash investments and outstanding commercial paper (shown as notes payable on the balance sheet) at June 30, 2000 and December 31, 1999 were (amounts shown in millions):

	<u>June 30, 2000</u>	<u>December 31, 1999</u>
Cash and temporary cash investments	\$ 37.7	\$485.1
Commercial paper	\$204.3	\$495.4

Cash and temporary cash investments, net of commercial paper, decreased at June 30, 2000, compared to December 31, 1999, reflecting reduced cash flows from operations, increased construction expenditures by Con Edison of New York, investment in nonregulated electric generating facilities, long-term debt repayments and issuances and repurchases of common stock.

Net cash flows from operating activities during the first six months of 2000 decreased \$111.5 million, compared to the first six months of 1999, principally because net cash flows in the 2000 period reflect the effects of generation divestiture, including increased recoverable energy costs and accounts payable related to the purchase of electricity for customers.

The approximately \$1.1 billion of divestiture net proceeds that was held by Con Edison of New York at June 30, 1999 was used in 1999 to pay dividends to Con Edison (which it used to repay commercial paper issued to fund initially its acquisition of O&R), to repay commercial paper and for the Con Edison common stock repurchase program.

Construction expenditures during the first six months of 2000 increased \$120.2 million compared to the first six months of 1999, principally as a result of expenditures related to meeting load growth on Con Edison of New York's electric distribution system.

In June 2000 an unregulated subsidiary of Con Edison purchased an 80 percent interest in a partnership that owns a 236-MW electric generating unit in Lakewood, New Jersey (the Lakewood Project) for \$96.3 million. The Lakewood Project had \$187 in long term debt outstanding which has been included in Con Edison's interim consolidated financial statements.

In January 2000 Con Edison of New York repaid at maturity \$125 million of 7.6 percent Series 1992 C debentures. In March 2000 O&R redeemed \$80 million of 9.375 percent Series 1990 A debentures and \$20 million of 6.14 percent Series 1993 C debentures.

In May 2000 Con Edison of New York issued \$325 million aggregate principal amount of 10-year 8.125 percent debentures. In June 2000 O&R issued \$55 million of 10-year 7.5 percent debentures. See "Liquidity and Capital Resources – Capital Resources" in Con Edison's 10-K MD&A and in Con Edison's First Quarter 10-Q MD&A.

During the first quarter of 2000, Con Edison purchased approximately 1.9 million shares of its common stock at an aggregate cost of \$60.6 million. No shares were repurchased in the second quarter of 2000. See "Liquidity and Capital Resources – Stock Repurchases" in Con Edison's 10-K MD&A.

Con Edison's accounts receivable – customer, less allowance for uncollectible accounts increased \$38.2 million at June 30, 2000, compared with year-end 1999, due primarily to increased billings by Consolidated Edison Solutions, Inc., Con Edison's unregulated energy services subsidiary, reflecting pricing based on a higher wholesale cost of power. Con Edison of New York's equivalent number of days of revenue outstanding (ENDRO) of customer accounts receivable was 27.4 days at June 30, 2000, compared with 28.8 days at December 31, 1999. For O&R, the ENDRO was 35.0 days at June 30, 2000 and 40.4 days at December 31, 1999.

Other receivables increased \$44.7 million, compared with year-end 1999, due primarily to the inclusion in Con Edison's interim consolidated financial statements of other receivables of the Lakewood Project.

Prepayments at June 30, 2000 include cumulative credits to pension expense for Con Edison of New York of \$218.0 million, compared with \$116.0 million at December 31, 1999. See Note D to the Con Edison financial statements included in Item 8 of the Form 10-K.

Recoverable energy costs increased \$183.7 million at June 30, 2000, compared with year-end 1999, reflecting increased purchased power costs discussed below in "Results of Operations," offset, partially, by the ongoing recovery of previously deferred amounts. See "Recoverable Fuel Costs" in Note A to the Con Edison financial statements included in Item 8 of the Form 10-K. Also see Note C to the Con Edison financial statements included in Part I, Item 1 of this report (which Note C is incorporated herein by reference).

Other regulatory assets increased \$76.2 million at June 30, 2000, compared with year-end 1999, reflecting the deferral of \$49.5 million of electric capacity costs under contracts with the buyers of the generating assets sold by Con Edison of New York (see Note I to the Con Edison financial statements included in Item 8 of the Form 10-K), and the deferral of \$19.1 million of Indian Point 2 refueling and maintenance outage expenses discussed below in "Results of Operations."

Unfunded other post-employment benefit (OPEB) obligations (shown as pension and benefit reserve on the balance sheet) were \$183.6 million at June 30, 2000, compared to \$143.8 million at December 31, 1999. Con Edison's policy is to fund its estimated OPEB costs to the extent deductible under current tax limitations. O&R's obligations also include a reserve for its supplemental executive retirement program. See Note E to the Con Edison financial statements included in Item 8 of the Form 10-K.

The accumulated provision for injuries and damages was \$128.1 million at June 30, 2000, compared to \$119.0 million at December 31, 1999. The increase resulted primarily from increased workers' compensation claims.

Accounts payable increased \$259.9 million, compared with year-end 1999, due primarily to the higher costs of power purchases.

Accrued taxes increased \$58.3 million, compared to year-end 1999, due principally to timing differences.

Other regulatory liabilities increased \$61.5 million, compared with year-end 1999, reflecting the accrual of a \$30 million liability relating to the ongoing Indian Point 2 outage (see "Nuclear Generation," below) and the deferral for future refund to customers of \$26.9 million of certain transmission revenues received from the New York Independent System Operator, offset by the recognition of \$22.3 million of previously deferred revenues relating to a scheduled Indian Point 2 refueling and maintenance outage.

CAPITAL RESOURCES

Con Edison's ratio of earnings to fixed charges (for the 12 months ended on the date indicated) and common equity ratio (as of the date indicated) were:

	<u>June 30, 2000</u>	<u>December 31, 1999</u>
Earnings to fixed charges (SEC basis)	3.77	4.04
Common equity ratio*	50.9	53.1

* Common shareholders' equity as a percentage of total capitalization

NORTHEAST UTILITIES

In April 2000 Con Edison and Northeast Utilities shareholders approved Con Edison's pending acquisition of Northeast Utilities. In June 2000 the Federal Energy Regulatory Commission approved the acquisition. Approvals are still required by utility regulators in New York, New Hampshire, Connecticut, and the Securities and Exchange Commission. In addition, the Hart-Scott-Rodino Antitrust Improvements Act and the related rules and regulations prohibit Con Edison from completing the acquisition until applicable waiting periods requirements have been satisfied. Con Edison is in the process of responding to requests for additional information from the Department of Justice. In June 2000, to partially hedge its interest rate risk with respect to financing the approximately \$1.8 billion cash portion of the merger consideration, Con Edison purchased, for \$8.9 million, cash-settled options expiring in December 2000 on an aggregate \$800 million notional amount of interest rate swap contracts. See "Liquidity and Capital Resources – Northeast Utilities Merger" in Con Edison's 10-K MD&A.

REGULATORY MATTERS

In April 2000 Con Edison of New York, pursuant to its 1997 restructuring agreement, reduced its electric rates by approximately \$103 million annually and expanded its electric Retail Choice program to a maximum of 3,000 MW of peak load. See "Regulatory Matters – Electric" in Con Edison's 10-K MD&A.

In May 2000 the installed capacity market of the New York Independent System Operator commenced operations, and Con Edison of New York ended its purchases of capacity under agreements with the buyers of the generating assets it sold in 1999. See Note I to the Con Edison financial statements in Item 8 of the Form 10-K.

NUCLEAR GENERATION

Con Edison of New York's Indian Point 2 nuclear generating unit was shut down on February 15, 2000 following a leak in one of its four steam generators. See "Nuclear Generation" in Con Edison's 10-K MD&A and Con Edison's First Quarter Form 10-Q MD&A, the combined Con Edison and Con Edison of New York Current Report on Form 8-K, dated March 30, 2000 and Note C to the Con Edison financial statements included in Part I, Item 1 of this report (which Note C is incorporated herein by reference).

FINANCIAL MARKET RISKS

Reference is made to "Financial Market Risks" in Con Edison's 10-K MD&A. At June 30, 2000 neither the fair value of derivatives outstanding nor potential derivative losses from reasonably possible near-term changes in market prices were material to the financial position, results of operations or liquidity of the company.

ENVIRONMENTAL MATTERS

For information concerning potential liabilities of the company arising from laws and regulations protecting the environment, including the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund), see the notes to Con Edison's financial statements included in Part I, Item 1 of this report and also see Part II, Item 3 of this report.

RESULTS OF OPERATIONS

Second Quarter of 2000 Compared with Second Quarter of 1999

Con Edison's net income for common stock for the second quarter of 2000 was \$68.7 million or \$.33 a share (based upon an average of 212.0 million common shares outstanding), compared with \$66.4 million or \$.30 a share (based upon an average of 226.0 million common shares outstanding) for the second quarter of 1999. O&R financial results are not included in earnings for periods prior to its July 1999 acquisition by Con Edison.

Earnings for the quarters ended June 30, 2000 and 1999 were as follows:

(Millions of dollars)	2000	1999
Con Edison of New York	\$71.1	\$69.2
O&R	5.3	—
Nonregulated subsidiaries	(4.0)	(2.2)
Other*	(3.7)	(0.6)
CON EDISON	\$68.7	\$66.4

* Includes holding company expenses (including amortization of \$2.7 million of goodwill from the acquisition of O&R) and intercompany eliminations.

Con Edison's earnings for the second quarter of 2000, compared to the second quarter of 1999, increased \$2.3 million, reflecting \$5.3 million of O&R earnings, \$23.2 million of increased pension credits (see Note D to the Con Edison financial statements included in Item 8 of the Form 10-K), \$5.5 million of lower employee benefit expenses and higher electric sales of \$57.3 million as a result of weather and the favorable economy for Con Edison of New York, offset, partially, by \$27.8 million of increased distribution expense, \$23.4 million of rate reductions under Con Edison of New York's 1997 electric restructuring plan (see "Regulatory Matters – Electric" in Con Edison's 10-K MD&A and "Regulatory Matters," above), \$11.2 million of expenses incurred and the accrual of a \$15 million liability relating to the ongoing Indian Point 2 outage.

Con Edison estimates that the divestiture of most of Con Edison of New York's electric generating capacity in 1999 did not significantly impact its earnings per share in the 2000 period. The company estimates that reductions in property taxes, depreciation and other operating and maintenance costs, its acquisition of O&R and the common stock repurchase program have substantially offset the effects of divestiture.

A comparison of the results of operations of Con Edison for the second quarter of 2000 compared to the second quarter of 1999 follows.

THREE MONTHS ENDED JUNE 30, 2000 COMPARED WITH THREE MONTHS ENDED
JUNE 30, 1999

(Millions of dollars)

	INCREASES (DECREASES)	INCREASES (DECREASES)
	AMOUNT	PERCENT
Operating revenues	\$562.8	38.1%
Purchased power – electric and steam	505.2	(A)
Fuel – electric and steam	(74.0)	(61.0)
Gas purchased for resale	86.5	(A)
Operating revenues less purchased power, fuel and gas purchased for resale (net revenues)	45.1	4.5
Other operations and maintenance	36.3	9.5
Depreciation and amortization	12.0	9.0
Taxes, other than federal income tax	(9.6)	(3.4)
Federal income tax	(15.2)	(31.6)
Operating income	21.6	14.5
Other income less deductions and related federal income tax	0.2	(A)
Net interest charges	19.5	24.4
Preferred stock dividend requirements	—	—
Net income for common stock	\$2.3	3.5%

(A) Amounts in excess of 100 percent

A discussion of Con Edison's operating revenues and operating income by business segment follows. Con Edison's principal business segments are its electric, gas and steam utility businesses. For additional information about Con Edison's business segments, see the notes to the Con Edison financial statements included in Part I, Item 1 of this report.

ELECTRIC

Con Edison's electric operating revenues in the second quarter of 2000 increased \$368.7 million, compared to the second quarter of 1999, reflecting Con Edison of New York's increased sales volumes and increased purchased power costs (which it bills to customers under PSC-approved rate provisions), offset by electric rate reductions of approximately \$23.4 million. The increase also reflects \$112.6 million of O&R electric operating revenues. See Note C to the Con Edison financial statements included in Part I, Item 1 of this report (which Note C is incorporated herein by reference).

Electricity sales volume in Con Edison of New York's service territory increased 5.5 percent in the second quarter of 2000, compared to the second quarter of 1999. The increase in sales volume reflects the continued strength of the New York City economy. After adjusting for variations, principally weather and billing days, in each period, electricity sales volume in Con Edison of New York's service territory increased 3.7 percent in the 2000 period. Weather-adjusted sales represent an estimate of the sales that would have been made if historical average weather conditions had prevailed.

Con Edison of New York's purchased power costs increased \$359.0 million in the second quarter of 2000, compared to the second quarter of 1999, as a result of its divestiture of most of its generating capacity in 1999, the ongoing Indian Point 2 outage and increases in the price of purchased power. Fuel costs decreased \$91.0 million as a result of generation divestiture.

Con Edison's electric operating income increased \$21.0 million in the second quarter of 2000, compared to the second quarter of 1999. The principal components of the increase were: O&R's electric operating income of \$11.1 million and an increase in Con Edison of New York's electric operating income of \$9.9 million, comprised primarily of a reduction in net revenues (operating revenues less fuel and purchased power) of \$38.5 million, \$11.2 million of expenses incurred and the accrual of a \$15 million liability relating to the ongoing Indian Point 2 outage, offset by lower pension expenses (\$18.4 million), lower employee benefit expenses (\$4.8 million), property taxes (\$15.8 million), Federal income tax (\$15.8 million) and the deferral of \$12.4 million of electric capacity costs.

The increase in the 2000 period in other operations and maintenance expenses reflects certain expenses relating to Indian Point 2 and a \$37.7 million decrease in expenses relating to Con Edison of New York's other electric generating assets (most of which were sold in 1999). Refueling and maintenance procedures that had been planned for a previously scheduled April 2000 outage have been performed as part of the ongoing Indian Point 2 outage. Refueling and maintenance expenses of \$18.7 million and a like amount of revenues were recognized in income in the second quarter of 2000. An additional \$19.1 million of refueling and maintenance expenses have been deferred for recovery through rates during the remaining months of the rate year ending March 2001. See "Outage Accounting" in Note G to the Con Edison financial statements included in the Form 10-K. In addition operation and maintenance expenses in the second quarter of 2000 reflect \$11.2 million of other expenses related to the ongoing Indian Point 2 outage.

GAS

Con Edison's gas operating revenues and gas operating income increased \$57.3 million and \$4.4 million, respectively, in the second quarter of 2000, compared to the second quarter of 1999. These changes reflect O&R's gas operating revenues of approximately \$31.0 million and gas operating loss of \$0.9 million, and Con Edison of New York's increased gas sales and transportation volumes.

Gas sales and transportation volume for Con Edison of New York's firm customers increased 7.6 percent in the second quarter of 2000, compared to the second quarter of 1999. After adjusting for variations, principally weather and billing days, in each period, firm gas sales and transportation volume increased 0.7 percent in the 2000 period.

A weather-normalization provision that applies to the gas businesses of Con Edison's utility subsidiaries operating in New York moderates, but does not eliminate, the effect of weather-related changes on gas operating income.

STEAM

Con Edison's steam operating revenues increased \$21.7 million and operating income decreased \$1.7 million in the second quarter of 2000, compared to the second quarter of 1999. The higher revenues reflect Con Edison of New York's increased fuel and purchased power costs (which it bills to customers under the fuel adjustment clause applicable to steam sales).

Steam sales volume increased 2.3 percent in the 2000 period. After adjusting for variations, principally weather and billing days, in each period, steam sales volume decreased 0.1 percent in the 2000 period.

NET INTEREST CHARGES

Net interest charges increased \$19.5 million in the 2000 period, reflecting primarily the addition of \$5.7 million of O&R debt expense and, with respect to Con Edison of New York, \$5.6 million of increased interest on long-term borrowings, \$1.9 million of increased interest related to short-term borrowing and \$4.0 million of interest accrued on the gain on generation divestiture that has been deferred for disposition by the PSC.

SIX MONTHS ENDED JUNE 30, 2000 COMPARED WITH THE SIX MONTHS ENDED JUNE 30, 1999

Con Edison's net income for common stock for the six months ended June 30, 2000 was \$256.9 million or \$1.21 a share (based upon an average of 212.4 million common shares outstanding), compared with \$243.0 million or \$1.06 a share (based upon an average of 228.5 million common shares outstanding) for the six months ended June 30, 1999. O&R financial results are not included in earnings for periods prior to its July 1999 acquisition by Con Edison.

Earnings for the six months ended June 30, 2000 and 1999 were as follows:

(Millions of dollars)	<u>2000</u>	<u>1999</u>
Con Edison of New York	\$249.4	\$251.2
O&R	16.0	—
Nonregulated subsidiaries	(1.7)	(7.9)
Other*	(6.8)	(0.3)
CON EDISON	\$256.9	\$243.0

* Includes holding company expenses (including amortization of \$5.5 million of goodwill from the acquisition of O&R) and intercompany eliminations.

Con Edison's earnings for the first six months of 2000, compared to the first six months of 1999, increased \$13.9 million, reflecting \$16.0 million of O&R earnings, \$57.0 million of increased pension credits (see Note D to the Con Edison financial statements included in Item 8 of the Form 10-K), \$5.0 million of lower employee benefits expenses and higher electric sales of \$78.0 million as a result of weather and the favorable economy for Con Edison of New York, offset, partially, by \$40.2 million of increased distribution and transmission expense, \$47.6 million of rate reductions under Con Edison of New York's 1997 electric restructuring plan (see "Regulatory Matters – Electric" in Con Edison's 10-K MD&A and "Regulatory Matters," above), \$15.2 million of expenses incurred and the accrual of a \$30 million liability relating to the ongoing Indian Point 2 outage.

Con Edison estimates that the divestiture of most of Con Edison of New York's electric generating capacity in 1999 did not significantly impact its earnings per share in the 2000 period. The company estimates that reductions in property taxes, depreciation and other operating and maintenance costs, its acquisition of O&R and the common stock repurchase program have substantially offset the effects of divestiture.

A comparison of the results of operations of Con Edison for the six months ended June 30, 2000 compared to the six months ended June 30, 1999 follows.

SIX MONTHS ENDED JUNE 30, 2000 COMPARED WITH SIX MONTHS ENDED JUNE 30, 1999

(Millions of dollars)	INCREASES (DECREASES)	INCREASES (DECREASES)
	AMOUNT	PERCENT
Operating revenues	\$1,104.8	33.9%
Purchased power – electric and steam	946.5	(A)
Fuel – electric and steam	(105.3)	(44.1)
Gas purchased for resale	172.3	66.7
Operating revenues less purchased power, fuel and gas purchased for resale (net revenues)	91.3	4.2
Other operations and maintenance	57.8	7.4
Depreciation and amortization	22.0	8.3
Taxes, other than federal income tax	(18.9)	(3.2)
Federal income tax	(15.5)	(10.4)
Operating income	45.9	11.2
Other income less deductions and related federal income tax	0.8	47.7
Net interest charges	32.8	20.5
Preferred stock dividend requirements	—	—
Net income for common stock	\$13.9	5.7%

(A) Amounts in excess of 100 percent

A discussion of Con Edison's operating revenues and operating income by business segment follows. Con Edison's principal business segments are its electric, gas and steam utility businesses. For additional information about Con Edison's business segments, see the notes to the Con Edison financial statements included in Part I, Item 1 of this report.

ELECTRIC

Con Edison's electric operating revenues for the six months ended June 30, 2000 increased \$687.5 million compared to the comparable period of 1999, reflecting Con Edison of New York's increased sales volumes and increased purchased power costs (which it bills to customers under PSC-approved rate provisions), offset by electric rate reductions of approximately \$47.6 million. The increase also reflects \$217.3 million of O&R electric operating revenues. See Note C to the Con Edison financial statements included in Part I, Item 1 of this report (which Note C is incorporated herein by reference).

Electricity sales volume in Con Edison of New York's service territory increased 4.5 percent for the six months ended June 30, 2000, compared to the six months ended June 30, 1999. The increase in sales volume reflects the continued strength of the New York City economy. After adjusting for variations, principally weather and billing days, in each period, electricity sales volume in Con Edison of New York's service territory increased 3.4 percent in the 2000 period. Weather-adjusted sales represent an estimate of the sales that would have been made if historical average weather conditions had prevailed.

Con Edison of New York's purchased power costs increased \$693.5 million in the six months ended June 30, 2000, compared to the six months ended June 30, 1999, as a result of its divestiture of most of its generating capacity in 1999, the ongoing Indian Point 2 outage and increases in the price of purchased power. Fuel costs decreased \$145.6 million as a result of generation divestiture.

Con Edison's electric operating income increased \$27.3 million for the six months ended June 30, 2000 from the comparable 1999 period. The principal components of the increase were: O&R's electric operating income of \$17.9 million and an increase in Con Edison of New York's electric operating income of \$9.4 million, comprised primarily of a reduction in net revenues (operating revenues less fuel and purchased power) of \$105.5 million, \$15.2 million of expenses incurred and the accrual of a \$30 million liability relating to the ongoing Indian Point 2 outage, offset by lower pension expenses (\$45.5 million), employee benefit expenses (\$4.9 million), property taxes (\$35.7 million), Federal income tax (\$23.5 million) and the deferral of \$49.5 million of electric capacity costs.

The increase in the 2000 period in other operations and maintenance expenses reflects certain expenses relating to Indian Point 2 and a \$71.4 million decrease in expenses relating to Con Edison of New York's other electric generating assets (most of which were sold in 1999). Refueling and maintenance procedures that had been planned for a previously scheduled April 2000 outage have been performed as part of the ongoing Indian Point 2 outage. Refueling and maintenance expenses of \$36.7 million and a like amount of revenues were recognized in income in the 2000 period. An additional \$19.1 million of refueling and maintenance expenses have been deferred for recovery through rates during the remaining months of the rate year ending March 2001. See "Outage Accounting" in Note G to the Con Edison financial statements included in the Form 10-K. In addition operation and maintenance expenses in the second quarter of 2000 reflect \$15.2 million of other expenses related to the ongoing Indian Point 2 outage.

GAS

Con Edison's gas operating revenues and gas operating income increased \$145.4 million and \$16.6 million, respectively, for the six months ended June 30, 2000, compared to the six months ended June 30, 1999. These changes reflect O&R's gas operating revenues of approximately \$108.5 million and gas operating income of approximately \$8.4 million, and Con Edison of New York's increased gas sales and transportation volumes.

Gas sales and transportation volume for Con Edison of New York's firm customers increased 4.2 percent in the six months ended June 30, 2000, compared to the six months ended June 30, 1999. After adjusting for variations, principally weather and billing days, in each period, firm gas sales and transportation volume increased 1.2 percent in the 2000 period.

A weather-normalization provision that applies to the gas businesses of Con Edison's utility subsidiaries operating in New York moderates, but does not eliminate, the effect of weather-related changes on gas operating income.

STEAM

Con Edison's steam operating revenues increased \$51.2 million and operating income decreased \$1.0 million for the six months ended June 30, 2000, compared to the six months ended June 30, 1999. The higher revenues reflect Con Edison of New York's increased fuel and purchased power costs (which it bills to customers under the fuel adjustment clause applicable to steam sales).

Steam sales volume increased slightly (0.8 percent) in the 2000 period. After adjusting for variations, principally weather and billing days, in each period, steam sales volume decreased 0.7 percent in the 2000 period.

NET INTEREST CHARGES

Net interest charges increased \$32.8 million in the 2000 period, reflecting primarily the addition of \$12.7 million of O&R debt expense and, with respect to Con Edison of New York, \$6.8 million of increased interest on long-term borrowings, \$7.9 million of increased interest related to short-term borrowing and \$4.0 million of interest accrued on the gain on generation divestiture that has been deferred for disposition by the PSC.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CON EDISON OF NEW YORK

Consolidated Edison Company of New York, Inc. (Con Edison of New York) is a regulated utility that provides electric service to over three million customers and gas service to over one million customers in New York City and Westchester County. It also provides steam service in parts of Manhattan. All of the common stock of Con Edison of New York is owned by Consolidated Edison, Inc. (Con Edison).

This discussion and analysis should be read in conjunction with Con Edison of New York's Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7 of the combined Con Edison, Con Edison of New York and Orange and Rockland Utilities, Inc. (O&R) Annual Reports on Form 10-K for the year ended December 31, 1999 (File Nos. 1-14514, 1-1217 and 1-4315, the Form 10-K) and Con Edison of New York's Management's Discussion and Analysis of Financial Condition and Results of Operations (Con Edison of New York's First Quarter 10-Q MD&A) in Part I, Item 2 of the combined Con Edison, Con Edison of New York and O&R Quarterly Reports on Form 10-Q for the quarterly period ended March 31, 2000 (Con Edison of New York's First Quarter Form 10-Q). Reference is also made to the notes to the financial statements in Part I, Item 1 of this report, which notes are incorporated herein by reference.

LIQUIDITY AND CAPITAL RESOURCES

Cash and temporary cash investments and outstanding commercial paper (shown as notes payable on the balance sheet) at June 30, 2000 and December 31, 1999 were (amounts shown in millions):

	June 30, 2000	December 31, 1999
Cash and temporary cash investments	\$ 1.2	\$349.0
Commercial paper	\$109.9	\$495.4

Cash and temporary cash investments, net of commercial paper, decreased at June 30, 2000, compared to December 31, 1999, reflecting reduced cash flows from operations, increased construction expenditures and long-term debt repayments and issuances.

Net cash flows from operating activities during the first six months of 2000 decreased \$136.4 million, compared to the first six months of 1999, principally because net cash flows in the 2000 period reflect the effects of generation divestiture, including increased recoverable energy costs and accounts payable related to the purchase of electricity for customers.

The approximately \$1.1 billion of divestiture net proceeds that was held by Con Edison of New York at June 30, 1999 was used in 1999 to pay dividends to Con Edison (which it used to repay commercial paper issued to fund initially its acquisition of O&R), to repay commercial paper and for the Con Edison common stock repurchase program.

Construction expenditures during the first six months of 2000 increased \$99.8 million, compared to the first six months of 1999, principally as a result of expenditures related to meeting load growth on the company's electric distribution system.

In January 2000 Con Edison of New York repaid at maturity \$125 million of 7.6 percent Series 1992 C debentures.

In May 2000 Con Edison of New York issued \$325 million aggregate principal amount of 10-year 8.125 percent debentures. See "Liquidity and Capital Resources – Capital Resources" in Con Edison of New York's 10-K MD&A and in Con Edison of New York's First Quarter 10-Q MD&A.

Con Edison of New York's accounts receivable – customer, less allowance for uncollectible accounts decreased \$7.5 million at June 30, 2000, compared with year-end 1999. Con Edison of New

York's equivalent number of days of revenue outstanding (ENDRO) of customer accounts receivable was 27.4 days at June 30, 2000, compared with 28.8 days at December 31, 1999.

Prepayments at June 30, 2000 include cumulative credits to pension expense of \$218.0 million, compared with \$116.0 million at December 31, 1999. See Note D to the Con Edison of New York financial statements included in Item 8 of the Form 10-K.

Recoverable energy costs increased \$166.5 million at June 30, 2000, compared with year-end 1999, reflecting increased purchased power costs discussed below in "Results of Operations," offset, partially, by the ongoing recovery of previously deferred amounts. See "Recoverable Fuel Costs" in Note A to the Con Edison of New York financial statements included in Item 8 of the Form 10-K. Also see Note C to the Con Edison of New York financial statements included in Part I, Item 1 of this report (which Note C is incorporated herein by reference).

Deferred charges for divestiture – capacity replacement reconciliation increased \$49.5 million at June 30, 2000, compared with year-end 1999, reflecting the deferral of additional electric capacity costs under contracts with the buyers of the generating assets sold by Con Edison of New York. See Note G to the Con Edison of New York financial statements included in Item 8 of the Form 10-K.

Other regulatory assets increased \$15.6 million at June 30, 2000, compared with year-end 1999, reflecting the deferral of \$19.1 million of Indian Point 2 refueling and maintenance outage expenses discussed below in "Results of Operations."

Unfunded other post-employment benefit (OPEB) obligations (shown as pension and benefit reserve on the balance sheet) were \$113.9 million at June 30, 2000, compared to \$76.8 million at December 31, 1999. Con Edison of New York's policy is to fund its estimated OPEB costs to the extent deductible under current tax limitations. See Note E to the Con Edison of New York financial statements included in Item 8 of the Form 10-K.

The accumulated provision for injuries and damages was \$119.6 million at June 30, 2000, compared to \$110.1 million at December 31, 1999. The increase resulted primarily from increased workers' compensation claims.

Accounts payable increased \$209.2 million, compared with year-end 1999, due primarily to the higher costs of power purchases.

Accrued taxes increased \$46.8 million, compared to year-end 1999, due principally to timing differences.

Other regulatory liabilities increased \$66.1 million, compared with year-end 1999, reflecting the accrual of a \$30 million liability relating to the ongoing outage at Indian Point 2 (see "Nuclear Generation," below) and the deferral for future refund to customers of \$26.9 million of certain transmission revenues received from the New York Independent System Operator, offset by the recognition of \$22.3 million of previously deferred revenues relating to a scheduled Indian Point 2 refueling and maintenance outage.

CAPITAL RESOURCES

Con Edison of New York's ratio of earnings to fixed charges (for the 12 months ended on the date indicated) and common equity ratio (as of the date indicated) were:

	June 30, 2000	December 31, 1999
Earnings to fixed charges (SEC basis)	3.91	4.17
Common equity ratio*	48.5	49.4

* Common shareholders' equity as a percentage of total capitalization

COLLECTIVE BARGAINING AGREEMENTS

In June 2000 Con Edison of New York concluded a four-year collective bargaining agreement with the union representing approximately two-thirds of its employees. The agreement, among other things, provides for general wage increases of 3.0 percent in each of the first three years and 2.5 percent in year four, with a potential 0.5 percent merit increase in each year.

REGULATORY MATTERS

In April 2000 Con Edison of New York, pursuant to its 1997 restructuring agreement, reduced its electric rates by approximately \$103 million annually and expanded its electric Retail Choice program to a maximum of 3,000 MW of peak load. See "Regulatory Matters – Electric" in Con Edison of New York's 10-K MD&A.

In May 2000 the installed capacity market of the New York Independent System Operator commenced operations, and Con Edison of New York ended its purchases of capacity under agreements with the buyers of the generating assets it sold in 1999. See Note I to the Con Edison of New York financial statements in Item 8 of the Form 10-K.

NUCLEAR GENERATION

Con Edison of New York's Indian Point 2 nuclear generating unit was shut down on February 15, 2000 following a leak in one of its four steam generators. See "Nuclear Generation" in Con Edison of New York's 10-K MD&A and Con Edison of New York's First Quarter Form 10-Q MD&A, the combined Con Edison and Con Edison of New York Current Report on Form 8-K, dated March 30, 2000 and Note C to the Con Edison of New York financial statements included in Part I, Item 1 of this report (which Note C is incorporated herein by reference).

FINANCIAL MARKET RISKS

Reference is made to "Financial Market Risks" in Con Edison of New York's 10-K MD&A. At June 30, 2000 neither the fair value of derivatives outstanding nor potential derivative losses from reasonably possible near-term changes in market prices were material to the financial position, results of operations or liquidity of the company.

ENVIRONMENTAL MATTERS

For information concerning potential liabilities of Con Edison of New York arising from laws and regulations protecting the environment, including the Federal Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund), see the notes to Con Edison of New York's financial statements included in Part I, Item 1 of this report and also see Part II, Item 3 of this report.

RESULTS OF OPERATIONS

Second Quarter of 2000 Compared with Second Quarter of 1999

Con Edison of New York's net income for common stock for the second quarter of 2000 was \$71.1 million, compared with \$69.2 million for the second quarter of 1999. Con Edison of New York's net income reflects higher electric sales of \$57.3 million as a result of weather and the favorable economy and increased pension credits of \$23.2 million, offset, partially, by electric rate reductions of \$23.4 million, increased distribution expenses of \$22.5 million, \$11.2 million of expenses incurred and the accrual of a \$15 million liability relating to the ongoing Indian Point 2 outage.

A comparison of the results of operations of Con Edison of New York for the second quarter of 2000 compared to the second quarter of 1999 follows.

THREE MONTHS ENDED JUNE 30, 2000 COMPARED WITH THREE MONTHS ENDED
JUNE 30, 1999

(Millions of dollars)

	INCREASES (DECREASES)	INCREASES (DECREASES)

(A) Amounts in excess of 100 percent

A discussion of Con Edison of New York's operating revenues and operating income by business segment follows. Con Edison of New York's principal business segments are its electric, gas and steam utility businesses. For additional information about Con Edison of New York's business segments, see the notes to the Con Edison of New York financial statements included in Part I, Item 1 of this report.

ELECTRIC

Con Edison of New York's electric operating revenues in the second quarter of 2000 increased \$229.4 million, compared to the second quarter of 1999. The increase reflects increased sales volumes and increased purchased power costs (which it bills to customers under PSC-approved rate provisions) offset by electric rate reductions of approximately \$23.4 million. See Note C to the Con Edison of New York financial statements included in Part I, Item 1 of this report (which Note C is incorporated herein by reference).

Con Edison of New York's electric sales, excluding off-system sales, for the second quarter of 2000 compared with the second quarter of 1999 were:

Description	MILLIONS OF KWHRS.			
	Three Months Ended June 30, 2000	Three Months Ended June 30, 1999	Variation	Percent Variation
Residential/Religious	2,610	2,469	141	5.7%
Commercial/Industrial	4,688	4,578	110	2.4
Other	104	121	(17)	(14.0)
TOTAL FULL SERVICE CUSTOMERS	7,402	7,168	234	3.3
Retail Choice Customers	2,121	1,817	304	16.7
SUB-TOTAL	9,523	8,985	538	6.0
NYPA, Municipal Agency and Other Sales	2,337	2,256	81	3.6
TOTAL SERVICE AREA	11,860	11,241	619	5.5%

Electricity sales volume in Con Edison of New York's service territory increased 5.5 percent in the second quarter of 2000, compared to the second quarter of 1999. The increase in sales volume reflects the continued strength of the New York City economy. After adjusting for variations, principally weather and billing days, in each period, electricity sales volume in Con Edison of New York's service territory increased 3.7 percent in the 2000 period. Weather-adjusted sales represent an estimate of the sales that would have been made if historical average weather conditions had prevailed.

Con Edison of New York's purchased power costs increased \$359.0 million in the second quarter of 2000, compared to the second quarter of 1999, as a result of its divestiture of most of its generating capacity in 1999, increases in the price of purchased power, and the ongoing Indian Point 2 outage. Fuel costs decreased \$91.0 million as a result of generation divestiture.

Con Edison of New York's electric operating income increased \$9.9 million in the second quarter of 2000, compared with the second quarter of 1999, as a result of decreased net revenues (operating revenues less fuel and purchased power) of \$38.5 million, \$11.2 million of expenses incurred and the accrual of a \$15 million liability relating to the ongoing Indian Point 2 outage, offset by reduced pension expenses (\$18.4 million), employee benefit expenses (\$4.8 million), property taxes (\$15.8 million), Federal income tax (\$15.8 million) and the deferral of \$12.4 million of electric capacity costs.

The increase in the 2000 period in other operations and maintenance expenses reflects certain expenses relating to Indian Point 2 and a \$37.7 million decrease in expenses relating to Con Edison of New York's other electric generating assets (most of which were sold in 1999). Refueling and maintenance procedures that had been planned for a previously scheduled April 2000 outage have been performed as part of the ongoing Indian Point 2 outage. Refueling and maintenance expenses of \$18.7 million and a like amount of revenues were recognized in income in the second quarter of 2000. An additional \$19.1 million of refueling and maintenance expenses have been deferred for recovery through rates during the remaining months of the rate year ending March 2001. See "Outage Accounting" in Note G to the Con Edison of New York financial statements included in the Form 10-K. In addition operation and maintenance expenses in the second quarter of 2000 reflect \$11.2 million of other expenses related to the ongoing Indian Point 2 outage.

GAS

Con Edison of New York's gas operating revenues and gas operating income increased \$27.7 million and \$5.4 million, respectively, in the second quarter of 2000, compared to the second quarter of 1999. These changes reflect increased gas sales and transportation volumes.

Gas sales and transportation volume for Con Edison of New York's firm customers increased 7.6 percent in the second quarter of 2000, compared to the 1999 period. After adjusting for variations, principally weather and billing days, in each period, firm gas sales and transportation volume increased 0.7 percent in the 2000 period.

A weather-normalization provision that applies to Con Edison of New York's gas business moderates, but does not eliminate, the effect of weather-related changes on gas operating income.

STEAM

Con Edison of New York's steam operating revenues increased \$21.7 million and operating income decreased \$1.7 million in the second quarter of 2000, compared to the second quarter of 1999. The higher revenues reflect increased fuel and purchased power costs (which it bills to customers under the fuel adjustment clause applicable to steam sales).

Steam sales volume increased 2.3 percent in the 2000 period. After adjusting for variations, principally weather and billing days, in each period, steam sales volume decreased 0.1 percent in the 2000 period.

NET INTEREST CHARGES

Net interest charges increased \$12.1 million in the 2000 period, reflecting \$5.6 million of increased interest on long-term borrowings, \$1.9 million of increased interest related to short-term borrowing and \$4.0 million of interest accrued on the gain on generation divestiture that has been deferred for disposition by the PSC.

SIX MONTHS ENDED JUNE 30, 2000 COMPARED WITH THE SIX MONTHS ENDED JUNE 30, 1999

Con Edison of New York's net income for common stock for the six months ended June 30, 2000 was \$249.4 million, compared with \$251.2 million for the six months ended June 30, 1999. Con Edison of New York's net income reflects higher electric sales of \$78.0 million as a result of weather and the favorable economy and increased pension credits of \$57.0 million, offset by electric rate reductions of \$47.6 million, increased distribution expenses of \$33.5 million, \$15.2 million of expenses incurred and the accrual of a \$30 million liability relating to the ongoing Indian Point 2 outage.

A comparison of the results of operations of Con Edison of New York for the six months ended June 30, 2000 compared to the six months ended June 30, 1999 follows.

SIX MONTHS ENDED JUNE 30, 2000 COMPARED WITH SIX MONTHS ENDED JUNE 30, 1999

(Millions of dollars)	INCREASES (DECREASES)	INCREASES (DECREASES)
	AMOUNT	PERCENT
Operating revenues	\$533.6	16.8%
Purchased power – electric and steam	700.4	(A)
Fuel – electric and steam	(111.0)	(46.5)
Gas purchased for resale	36.9	17.3
Operating revenues less purchased power, fuel and gas purchased for resale (net revenues)	(92.7)	(4.3)
Other operations and maintenance	(29.7)	(4.0)

Taxes, other than federal income tax	(52.8)	(9.1)
Federal income tax	(26.1)	(16.9)
Operating income	16.7	4.0
Other income less deductions and related federal income tax	(0.1)	(81.6)
Net interest charges	18.4	11.5
Net income for common stock	\$(1.8)	(0.7)%

(A) Amounts in excess of 100 percent

A discussion of Con Edison of New York's operating revenues and operating income by business segment follows. Con Edison of New York's principal business segments are its electric, gas and steam utility businesses. For additional information about Con Edison of New York's business segments, see the notes to the Con Edison of New York financial statements included in Part I, Item 1 of this report.

ELECTRIC

Con Edison of New York's electric operating revenues in the six months ended June 30, 2000 increased \$442.4 million, compared to the six months ended June 30, 1999. The increase reflects increased sales volumes and increased purchased power costs (which it bills to customers under PSC-approved rate provisions), offset by electric rate reductions of approximately \$47.6 million. See Note C to the Con Edison of New York financial statements included in Part I, Item 1 of this report (which Note C is incorporated herein by reference).

Con Edison of New York's electric sales, excluding off-system sales, for the six months ended June 30, 2000 compared with the six months ended June 30, 1999 were:

Description	MILLIONS OF KWHRS.			
	Six Months Ended June 30, 2000	Six Months Ended June 30, 1999	Variation	Percent Variation
Residential/Religious	5,407	5,193	214	4.1%
Commercial/Industrial	9,371	10,120	(749)	(7.4)
Other	240	261	(21)	(8.1)
TOTAL FULL SERVICE CUSTOMERS	15,018	15,574	(556)	(3.6)
Retail Choice Customers	4,376	2,866	1,510	52.7
SUB-TOTAL	19,394	18,440	954	5.2
NYPA, Municipal Agency and Other Sales	4,812	4,730	82	1.7
TOTAL SERVICE AREA	24,206	23,170	1,036	4.5%

Electricity sales volume in Con Edison of New York's service territory increased 4.5 percent for the six months ended June 30, 2000, compared to the six months ended June 30, 1999. The increase in sales volume reflects the continued strength of the New York City economy. After adjusting for variations, principally weather and billing days, in each period, electricity sales volume in Con Edison of New York's service territory increased 3.4 percent in the 2000 period. Weather-adjusted sales represent an estimate of the sales that would have been made if historical average weather conditions had prevailed.

Con Edison of New York's purchased power costs increased \$693.5 million for the six months ended June 30, 2000, compared to the six months ended June 30, 1999, as a result of its divestiture of most of its generating capacity in 1999, increases in the price of purchased power, and the ongoing Indian Point 2 outage. Fuel costs decreased \$145.6 million as a result of generation divestiture.

Con Edison of New York's electric operating income increased \$9.4 million in the six months ended June 30, 2000, compared with the six months ended June 30, 1999, as a result of decreased net revenues (operating revenues less fuel and purchased power) of \$105.5 million, increased distribution and transmission expenses associated with system reinforcement and the relocation of company facilities to avoid interference with municipal infrastructure projects of \$33.1 million, \$15.2 million of expenses incurred and the accrual of a \$30 million liability relating to the ongoing Indian Point 2 outage, offset by reduced pension expenses (\$45.5 million), employee benefit expenses (\$4.9 million), property taxes (\$35.7 million), Federal income tax (\$23.5 million) and the deferral of \$49.5 million of electric capacity costs.

The increase in the 2000 period in other operations and maintenance expenses reflects certain expenses relating to Indian Point 2 and a \$71.4 million decrease in expenses relating to Con Edison of New York's other electric generating assets (most of which were sold in 1999). Refueling and maintenance procedures that had been planned for a previously scheduled April 2000 outage have been performed as part of the ongoing Indian Point 2 outage. Refueling and maintenance expenses of

\$36.7 million and a like amount of revenues were recognized in income in the 2000 period. An additional \$19.1 million of refueling and maintenance expenses have been deferred for recovery through rates during the remaining months of the rate year ending March 2001. See "Outage Accounting" in Note G to the Con Edison of New York financial statements included in the Form 10-K. In addition operation and maintenance expenses in the 2000 period reflect \$15.2 million of other expenses related to the ongoing Indian Point 2 outage.

GAS

Con Edison of New York's gas operating revenues and gas operating income increased \$40.0 million and \$8.2 million, respectively, for the six months ended June 30, 2000, compared to the six months ended June 30, 1999. These changes reflect increased gas sales and transportation volumes and higher pension credits.

Gas sales and transportation volume for Con Edison of New York's firm customers increased 4.2 percent for the six months ended June 30, 2000, compared to the 1999 period. After adjusting for variations, principally weather and billing days, in each period, firm gas sales and transportation volume increased 1.2 percent in the 2000 period.

A weather-normalization provision that applies to Con Edison of New York's gas business moderates, but does not eliminate, the effect of weather-related changes on gas operating income.

STEAM

Con Edison of New York's steam operating revenues increased \$51.2 million and operating income decreased \$1.0 million for the six months ended June 30, 2000, compared to the six months ended June 30, 1999. The higher revenues reflect increased fuel and purchased power costs (which it bills to customers under the fuel adjustment clause applicable to steam sales).

Steam sales volume increased slightly (0.8 percent) in the 2000 period. After adjusting for variations, principally weather and billing days, in each period, steam sales volume decreased 0.7 percent in the 2000 period.

NET INTEREST CHARGES

Net interest charges increased \$18.4 million in the 2000 period, reflecting \$6.8 million of increased interest on long-term borrowings, \$7.9 million of increased interest related to short-term borrowing and \$4.0 million of interest accrued on the gain on generation divestiture that has been deferred for disposition by the PSC.

O&R MANAGEMENT'S NARRATIVE ANALYSIS OF THE RESULTS OF OPERATIONS

Orange and Rockland Utilities, Inc. (O&R), a wholly-owned subsidiary of Consolidated Edison, Inc. (Con Edison), meets the conditions specified in General Instruction H to Form 10-Q and is permitted to use the reduced disclosure format for wholly-owned subsidiaries of companies, such as Con Edison, that are reporting companies under the Securities Exchange Act of 1934. Accordingly, this O&R Management's Narrative Analysis of the Results of Operations is included in this report, and O&R has omitted from this report the information called for by Part I, Item 2 (Management's Discussion and Analysis of Financial Condition and Results of Operations).

O&R's net income for common stock for the six month period ended June 30, 2000 was \$16.0 million, \$24.4 million higher than the corresponding 1999 period. The 1999 period included \$21.5 million of non-recurring merger and divestiture related charges. Excluding the impact of these charges, net income would have increased \$2.9 million in the 2000 period, compared to the corresponding 1999 period. This increase was due primarily to higher electric and gas sales, and reduced operation and maintenance expenses, property taxes, depreciation expense and interest charges, offset, in part, by electric rate changes implemented in the third quarter of 1999.

In June 2000 O&R concluded a new four-year collective bargaining agreement with the union representing approximately 65 percent of its employees. The O&R agreement, among other things,

provides for general wage increases of 3.25 percent in the first year, and 3.0 percent for the next two years and 3.25 percent in the fourth year of the contract.

A comparison of the results of operations of O&R for the six months ended June 30, 2000 compared to the six months ended June 30, 1999 follows.

(Millions of dollars)	INCREASES (DECREASES)	INCREASES (DECREASES)
	AMOUNT	PERCENT
Operating revenues	\$0.3	0.1%
Purchased power – electric	65.5	(A)
Fuel – electric	(23.0)	(A)
Gas purchased for resale	10.0	17.5
Operating revenues less purchased power, fuel and gas purchased for resale (net revenues)	(52.2)	(25.8)
Other operations and maintenance	(51.9)	(42.4)
Depreciation and amortization	(4.7)	(24.2)
Taxes, other than federal income tax	(15.3)	(33.0)
Federal income tax	5.3	(A)
Operating income	14.4	(A)
Other income less deductions and related federal income tax	4.6	(A)
Net interest charges	(4.5)	(26.2)
Preferred stock dividend requirements	(0.9)	(A)
Net income for common stock	\$24.4	(A)

(A) Amounts in excess of 100 percent

A discussion of O&R's operating revenues by business segment follows. O&R's principal business segments are its electric and gas utility businesses. For additional information about O&R's business segments, see the notes to the O&R financial statements included in Part I, Item 1 of this report.

Electric operating revenues decreased \$7.1 million in the six months ended June 30, 2000, compared to the corresponding 1999 period. In the 1999 period, O&R reduced revenues by \$3.2 million to reflect a liability to refund to customers this portion of the proceeds of its June 1999 divestiture of the company's electric generating assets. Excluding the impact of this non-recurring accrual, electric operating revenues would have decreased \$10.3 million in the 2000 period, compared to the corresponding 1999 period. This decrease was attributable primarily to the rate reductions implemented by O&R in July and August 1999. These rate reductions were made as a result of the divestiture by O&R of its generating capacity in June 1999 and O&R's acquisition by Con Edison in July 1999. See Note A to the O&R financial statements in Item 8 of the combined Con Edison, Con Edison of New York and O&R Annual Report on Form 10-K for the year ended December 31, 1999 (File Nos. 1-14514, 1-1217 and 1-4315, the Form 10-K).

O&R's electric energy sales in the six months ended June 30, 2000 increased 2.0 percent to 2,403,530 megawatt hours (MWhr) from 2,355,913 MWhr in the corresponding 1999 period. The increase was due primarily to the continued strength of the economy. After adjusting for variations, principally weather and billing days, electricity sales were 2.8 percent higher in the 2000 period. Weather-adjusted sales represent an estimate of the sales that would have been made if historical average weather conditions had prevailed.

O&R's purchased power costs increased \$65.5 million during the six months ended June 30, 2000, compared to the corresponding 1999 period. Fuel costs decreased \$23.0 million in the 2000 period. These variations are attributable primarily to the June 1999 divestiture of the company's electric

generating assets, higher customer sales, and increases in the cost of purchased energy. O&R's purchased power and fuel costs are recoverable from O&R's customers under rate provisions approved by the appropriate state utility regulatory commissions and did not impact earnings in the 2000 or 1999 periods.

O&R's gas operating revenues increased \$7.9 million in the six months ended June 30, 2000, compared to the corresponding 1999 period. The increase was due primarily to recovery from customers of higher gas costs and increases in gas sales and transportation volumes in the 2000 period. O&R's total sales of gas to customers during the 2000 period totaled 17,230,365 Dekatherms (Dth), compared with 16,781,045 Dth during the 1999 period, an increase of 2.7 percent.

O&R's revenues from gas sales in New York are subject to a weather normalization clause. After adjusting for variations, principally weather and billing days, in each period, gas sales and transportation volume to firm customers was 0.2 percent lower for the 2000 period, compared to the 1999 period.

O&R's cost of gas purchased for resale increased \$10 million in the six months ended June 30, 2000, compared to the corresponding 1999 period, due primarily to higher gas costs and an increase in firm sales for the period.

O&R's other operation and maintenance expenses decreased \$51.9 million in the six months ended June 30, 2000, compared to the corresponding 1999 period, due primarily to the June 1999 divestiture of the company's electric generating assets and operating efficiencies resulting from Con Edison's July 1999 acquisition of the company.

Taxes other than federal income tax decreased \$15.3 million in the six months ended June 30, 2000, compared to the corresponding 1999 period, due primarily to reduced property taxes resulting from the June 1999 divestiture of the company's electric generating assets.

O&R's other income increased \$4.7 million in the six months ended June 30, 2000, compared to the corresponding 1999 period, due primarily to interest earned on proceeds from the June 1999 divestiture of the company's electric generating assets. In addition, the 1999 period included non-recurring adjustments to expense related to O&R's acquisition by Con Edison of \$1.3 million.

O&R's interest charges decreased \$4.5 million in the six months ended June 30, 2000, compared to the corresponding 1999 period, due primarily to lower debt outstanding as a result of repayment of indebtedness with a portion of the proceeds from the June 1999 divestiture of the company's electric generating assets.

O&R redeemed all outstanding shares of its preferred stock in April 1999 and therefore had no preferred stock dividend requirements in the six months ended June 30, 2000.

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

CON EDISON

For information about Con Edison's primary market risks associated with activities in derivative financial instruments, other financial instruments and derivative commodity instruments, see "Financial Market Risks" in Con Edison's Management's Discussion and Analysis of Financial Condition and Results of Operations in Part 1, Item 2 of this report and Item 7A of the combined Con Edison, Con Edison of New York and O&R Annual Report on Form 10-K for the year ended December 31, 1999 (the "Form 10-K"), which information is incorporated herein by reference.

CON EDISON OF NEW YORK

For information about Con Edison of New York's primary market risks associated with activities in derivative financial instruments, other financial instruments and derivative commodity instruments, see "Financial Market Risks" in Con Edison of New York's Management's Discussion and Analysis of Financial Condition and Results of Operations in Part 1, Item 2 of this report and Item 7A of the Form 10-K, which information is incorporated herein by reference.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

CON EDISON

NORTHEAST UTILITIES SHAREHOLDERS' SUIT

Reference is made to "Northeast Utilities Shareholders Suit" in Part II, Item 1, Legal Proceedings in the combined Con Edison, Con Edison of New York and O&R Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2000 (the "First Quarter Form 10-Q").

CON EDISON OF NEW YORK

SUPERFUND – ARTHUR KILL TRANSFORMER SITE

Reference is made to "Superfund – Arthur Kill Transformer Site" in Part I, Item 3, Legal Proceedings of the combined Con Edison, Con Edison of New York and O&R Annual Report on Form 10-K for the year ended December 31, 1999 (the "Form 10-K") and in Part II, Item 1, Legal Proceedings in the First Quarter Form 10-Q.

SUPERFUND – MANUFACTURED GAS SITES

Reference is made to "Superfund – Manufactured Gas Sites" in Part I, Item 3, Legal Proceedings of the Form 10-K.

Coal tar and other manufactured gas plant-related contamination have been detected in the soil and groundwater beneath a Con Edison of New York electric distribution substation in White Plains, New York. Based on the limited testing conducted to date, it appears that the contamination extends to at least one neighboring property and possibly others. Additional studies are planned to delineate the full extent of the contamination. Depending on the results of those studies and the cleanup requirements imposed by the DEC, the costs of cleaning up the contamination could exceed \$10 million.

SUPERFUND – BCF OIL REFINING SITE

In May 2000, the United States Environmental Protection Agency (EPA) designated Con Edison of New York and numerous other parties as potentially responsible parties (PRPs) for the BCF Oil Refining Site in Brooklyn, New York. The site was operated as a waste oil reprocessing facility from the late 1970's until August 1994, when the facility was forced to close down because its storage and processing tanks had become contaminated with elevated concentrations of polychlorinated biphenyls (PCBs). In November 1994, the owners of the site sued Con Edison of New York, alleging that its shipments of waste oil and oily wastewater to the facility were the source of the high concentration of PCBs that had contaminated the facility's tanks. The action was dismissed after a jury verdict in Con Edison of New York's favor. However, the facility's tanks still contain significant quantities of PCB-contaminated oil and EPA has determined that an emergency cleanup program estimated to cost \$2.1 million is required for them. EPA is currently attempting to negotiate with the owners of the facility for the implementation of the required emergency cleanup program, but has indicated that it may order PRPs who shipped waste oil to the facility to implement or to fund the program if the facility owners do not agree to carry out the program.

SUPERFUND – MATTIACE PETROCHEMICAL COMPANY SITE

In July 2000, Con Edison of New York was served with an EPA Superfund information request for the Mattiace Petrochemical Company Superfund Site in Glen Cove, New York. According to EPA, the Mattiace Petrochemical Company processed, blended, repacked, and distributed solvents at the site from the mid-1960's until 1987. Between 1974 and 1982, Mattiace Petrochemical's affiliate, the M&M Drum Company, cleaned and refurbished metal drums at the site. Since 1988, EPA has spent in excess of \$12 million conducting emergency removal and cleanup work at the site. Con Edison of New York is presently investigating whether it shipped hazardous substances to the site. While the

investigation is not yet complete, it appears that during the early 1980's, Con Edison of New York purchased naphtha and a mineral spirit solvent from Mattiace Petrochemical and sold scrap drums to Mattiace and M&M Drum.

EMPLOYEES' CLASS ACTION

Reference is made to "Employees' Class Action" in Part I, Item 3, Legal Proceedings of the Form 10-K. In June 2000, the court preliminarily approved a settlement agreement between Con Edison of New York and the plaintiffs. If the agreement receives final approval, the company will pay an estimated aggregate \$10 million (including attorneys' fees) and will take certain actions with respect to its personnel practices. At June 30, 2000, the company had approximately \$10 million accrued as its liability with respect to this action.

INDIAN POINT 2 OUTAGE LITIGATION

Reference is made to Note C to the Con Edison of New York financial statements included in Part I, Item 1 of this report.

O&R

SHAREHOLDER LAWSUITS

Reference is made to "Shareholder Lawsuits" in Part I, Item 3, Legal Proceedings of the Form 10-K and in Part II, Item 1, Legal Proceedings in the First Quarter Form 10-Q. In May 2000, the trial court dismissed plaintiffs' actions and imposed sanctions on plaintiffs' counsel in Suzanne Hennessy, et al. v. D. Louis Peoples, et al.

O&R CLEAN AIR ACT PROCEEDING

In May 2000, the New York State Department of Environmental Conservation ("DEC") issued notices of violation to O&R and four other companies that have operated coal-fired electric generating facilities in New York State. The notices allege violations of the federal Clean Air Act and the New York State Environmental Conservation Law resulting from the alleged failure of the companies to obtain DEC permits for physical modifications to their generating facilities and to install air pollution control equipment that would have reduced harmful emissions. The notice of violation received by O&R relates to the Lovett Generating Station that it sold in June 1999. O&R is unable to predict whether or not the alleged violations will have a material adverse effect on its financial position, results of operation or liquidity.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

CON EDISON

(a) At the Annual Meeting of Stockholders of Con Edison on May 15, 2000, the stockholders of Con Edison voted to elect management's nominees for the Board of Directors, to ratify and approve the appointment of Con Edison's independent accountants, and not to adopt a stockholder proposal. 161,785,528 shares of Common Stock of Con Edison, representing approximately 76.21% of the 212,292,190 shares of Common Stock outstanding and entitled to vote, were present at the meeting in person or by proxy.

(b) The name of each nominee for election as a member of Con Edison's Board of Directors and the number of shares voted for or with respect to which authority to vote for was withheld are as follows:

	<u>VOTES FOR</u>	<u>VOTES WITHHELD</u>
E. VIRGIL CONWAY	159,242,410	2,543,118
PETER W. LIKINS	159,481,540	2,303,988
RUTH M. DAVIS	159,243,513	2,542,015
EUGENE R. MCGRATH	159,439,504	2,346,024
GORDON J. DAVIS	158,276,938	3,508,590
ELLEN V. FUTTER	159,413,924	2,371,604
RICHARD A. VOELL	159,079,447	2,706,081
