⁽¹⁾ Equals book value plus after-tax deferred premium revenue (net of prepaid reinsurance premiums and deferred acquisition costs), plus after-tax present value of future anticipated installment premiums, plus the after-tax unrealized gain or loss on investment contract liabilities.

⁽²⁾ Includes net investment income and net realized gains or losses from Insurance Operations, Investment Management Services, Municipal Services and the Corporate segments.

⁽³⁾ Net debt service outstanding divided by capital base.

⁽⁴⁾ Net debt service outstanding divided by the sum of capital base, unearned premium reserve (after-tax), loss and LAE reserves, present value of installment premiums (after-tax), and standby line of credit/stop loss.

⁽¹⁾ All stock options have been adjusted to reflect the three-for-two stock split effective April 20, 2001.

⁽²⁾ Certain Executive Officers have adopted trading plans pursuant to Securities and Exchange Commission Rule 10b5-1 under which they plan to exercise options, which expire during 2004, and to sell the underlying stock on a periodic basis over the next 12 to 18 months. These plans may be changed from time to time.

⁽¹⁾ In this section, data for the industry and MBIA is provided on a sale date basis and will not reconcile with MBIA data in subsequent sections which is provided on a closing date basis.

⁽²⁾ New issue municipal obligations excluding notes, remarketings, private placements and non-municipal obligations. Based on MBIA data, subject to revisions as new information becomes available. May not agree with figures published in The Bond Buyer.

MBIA's CDO Exposure As of December 31, 2002 (dollars in billions)

Collateralized Debt Obligations (CDOs) are structured securities, which are backed by a diversified pool of debt instruments. The underlying assets may comprise a variety of collateral types including both high-yield and investment grade corporate bond obligations (CBOs), corporate loan obligations (CLOs), emerging market debt, and asset backed securities (ABS CDOs). Typically, the lowest risk tranches are the most senior securities and typically are rated Triple-A by the major rating agencies (prior to MBIA insuring them), due to the protection the mezzanine and equity tranches provide as a first and second loss position in front of the senior tranche that MBIA insures.

While other types of asset securitizations typically include an asset servicer, in a CDO transaction this function is performed by an asset manager. In keeping with MBIA's no loss underwriting standard, the Company performs a rigorous analysis of the underlying assets, structure of the CDO, and a separate evaluation of the asset manager. The portfolio is underwritten and monitored both at the transaction level and on an aggregated basis to ensure that there is no excessive build-up of individual name exposures.

MBIA's CDO Exposure (cont'd)

As of December 31, 2002 (dollars in billions)

Market Type (1) (2)

"Primary Market" means that MBIA insured the transaction from inception at the request of the issuer.

"Secondary Market" means that MBIA insured at least some part of the transaction after it was originally issued, usually at the request of the bondholder rather than the issuer.

Insured in Primary Market
