FOR IMMEDIATE RELEASE

Investment Technology Group Provides Access to Broker Algorithms through Triton EMS

NEW YORK, NY, February 27, 2007 . Investment Technology Group, Inc. (NYSE: ITG), a leading provider of technology-based trading services and transaction research, today announced the availability of broker algorithms from the Triton[®] execution management system (EMS).

Clients can now access proprietary algorithms from Banc of America, BNY ConvergeX, Bear Stearns, Citi, Jefferies, JPMorgan, Lehman Brothers, Merrill Lynch, Sanford C. Bernstein and UBS in addition to ITG's own algorithmic trading suite. The full functionality of these algorithms is available directly from the Triton trading blotter and includes the ability to set execution parameters and constraints.

ITG's inclusion of broker algorithms through our Triton execution management system is another example of our broker neutral approach, where orders are routed to the destinations that our clients choose, said Andrew Larkin, Managing Director at ITG. We are committed to giving our clients a single execution management system that provides flexible and efficient access to multiple algorithms, analytics and liquidity pools.

ITG Triton connects customers to over 90 brokers and all major ATS, ECN and exchange destinations.

About ITG

Investment Technology Group, Inc. (NYSE:ITG), is a specialized agency brokerage and technology firm that partners with clients globally to provide innovative solutions spanning the entire investment process. A pioneer in electronic trading, ITG has a unique approach that combines pre-trade analysis, order management, trade execution,

and post-trade evaluation to provide clients with continuous improvements in trading and cost efficiency. The firm is headquartered in New York with offices in North America, Europe and the Asia Pacific regions. For more information on ITG, please visit www.itg.com.

In addition to historical information, this press release may contain "forward-looking" statements, as defined in the Private Securities Litigation Reform Act of 1995, that reflect management's expectations for the future. A variety of important factors could cause results to differ materially from such statements. These factors include the company's ability to achieve expected future levels of sales; the actions of both current and potential new competitors; rapid changes in technology; financial market volatility; general economic conditions in the United States and elsewhere; evolving industry regulation; cash flows into or redemption from equity funds; effects of inflation; customer trading patterns; and new products and services. These and other risks are described in greater detail in the company's Annual Report on Form 10-K for the fiscal year ended December 31, 2005, and other documents filed with the Securities and Exchange Commission and available on the company's web site.
