ENDESA CHILE AMONG THE 10 BEST CHILEAN COMPANIES IN CORPORATE SOCIAL RESPONSIBILITY

On June 26, 2008 Endesa Chile was awarded with the ninth place in the fourth version of the PROhumana ranking. This ranking, organized by Fundación PROhumana, the Confederación de la Producción y del Comercio (CPC) and Capital Magazine, evaluates the CSR development and implementation at companies taking into consideration the employees' valuation, knowledge and practice regarding employers' development and performance of CSR. Within 103 questions, the evaluation involves the economic, environmental and social performance of the companies. This year 60 companies participated in the ranking representing 140,000 employees. Since 2006 Endesa Chile has been placed within the 10 best companies in Chile. In 2006 and 2007 Endesa Chile was awarded with the ninth and sixth place respectively. For Endesa Chile, social responsibility is founded on compliance with the seven commitments established in the company's Sustainability Policy, which is reflected in the work with the communities and the contribution to education, concern for good governance, respect and care of employees, its own and those of contractors, innovation and energy efficiency.
