zixcorp®

Corporate Fact Sheet

Zix Corporation (ZixCorp®), (Nasdaq: ZIXI), the leader in hosted services for email encryption and e-prescribing

ZixCorp is the leading provider of easy-to-use-and-deploy email encryption and e-prescribing services that Connect entities with their customers and partners to Protect and Deliver sensitive information in the healthcare, finance, insurance and government industries. ZixCorp's hosted Email Encryption Service provides an easy and cost-effective way to ensure customer privacy and regulatory compliance for corporate email. Its PocketScript® e-prescribing service saves lives and saves money by automating the prescription process between payors, doctors and pharmacies.

- Publicly traded on the Nasdaq Global Market under the symbol ZIXI

- SysTrust and SAS-70 certified world-class data center

- Headquartered in Dallas, TX, ZixCorp had 156 employees at 2006 year-end

"2006 was the best year in ZixCorp's operating history. We had a record year for revenues and gross profits… In our Email Encryption business last year, we built on our leadership position in the healthcare market while seeing significant growth in financial services…As the leader in e-Prescribing, we solidified the economic model for this business with the addition of a $1 per qualified script fee or comparable license with three of our programs. With the continued focus on reining in prescription drug spending and increased attention on what's been called a "healthcare crisis" in patient safety, we remain very optimistic about the strong growth prospects in this emerging market."

– Rick Spurr,
ZixCorp's chief executive officer
February 20, 2007

Email Encryption

ZixCorp's Email Encryption Service is the leading service for securing email, providing send-to-anyone capabilities and access to ZixDirectory,™ the largest directory of protected addresses. As the largest hosted email encryption service provider, ZixCorp protects millions of email addresses including those of some of the nation's most influential institutions. ZixCorp's easy-to-use service connects entities with their customers and partners to protect and deliver sensitive information in healthcare, finance, insurance and government.

ZixVPM® is a policy-based email encryption gateway for privacy and compliance.

ZixDirectory™ is the largest email encryption directory in the world, protecting more than 7.5 million email addresses.

ZixConnect™ allows customers to securely communicate with their regulators and partners without the need for additional hardware or software at their facility.

ZixDirect™ uses clientless "push" technology that sends encrypted messages directly to the recipient's inbox.

ZixPort® uses clientless "pull" technology that sends encrypted email through a web portal.

ZixMail® is a desktop application that plugs into your email client and encrypts and decrypts email at the desktop.

ZixAuditor® is an email assessment service that identifies, quantifies and reports security vulnerabilities.

e-Prescribing

ZixCorp's PocketScript® provides clinical decision support at the point-of-care with real-time access to a drug reference guide as well as patient-level eligibility, formulary, and co-pay information to aid the prescriber in selecting the most cost-effective prescription based on the patient's benefits. PocketScript delivers end-to-end connectivity within the healthcare system to reduce unnecessary costs, improve patient safety and convenience, and enhance practice efficiency. PocketScript enables physicians to order prescriptions through a secure wireless mobile PDA or secure Web site and deliver them electronically to retail pharmacies via SureScripts or mail order pharmacies via RxHub. The application also provides comprehensive drug-to-drug and drug-to-allergy interaction alerts based on patient-specific dispensed drug history.

With PocketScript, users can:

- Check for harmful drug-drug and drug-allergy interactions

- Eliminate callbacks due to legibility, drug incompatibility or ineligibility

- Access patient-specific drug history

- Automatically link to real-time patient eligibility and up-to-date formularies

- Access a comprehensive online drug reference guide

- Immediately transmit prescriptions to any pharmacy, or printed to paper
