

RADIAN

Second Quarter 2008

Safe Harbor Statement

All statements made during today's investor call of included in this presentation that address events, developments or results that we expect or anticipate may occur in the future are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the U.S. Private Securities Litigation Reform Act of 1995. These statements, which include, without limitation, projections regarding our future performance and financial condition are made on the basis of management's current views and assumptions with respect to future events. Any forward-looking statement is not a guarantee of future performance and actual results could differ materially from those contained in the forward looking information. The forward-looking statements, as well as our prospects as a whole, are subject to risks and uncertainties, including the following:

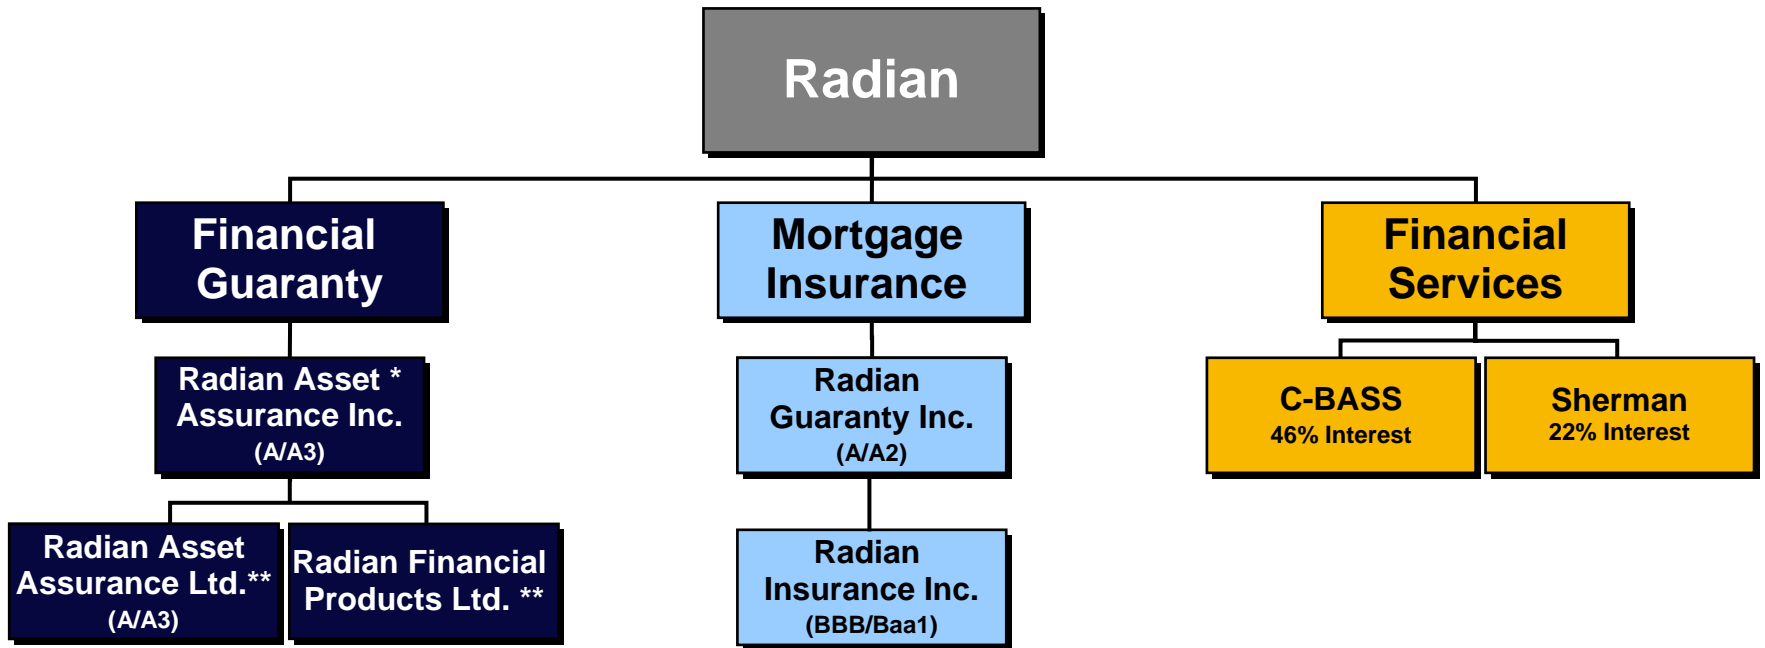

- changes in general financial and political conditions, such as extended national or regional economic recessions, changes in housing demand or mortgage originations, changes in housing values (in particular, further deterioration in the housing, mortgage and related credit markets, which would harm our future consolidated results of operations and could cause losses for our businesses to be worse than expected), changes in the liquidity in the capital markets and the further contraction of credit markets, population trends and changes in household formation patterns, changes in unemployment rates, changes or volatility in interest rates or consumer confidence, changes in credit spreads, changes in the way investors perceive the strength of private mortgage insurers or financial guaranty providers, investor concern over the credit quality and specific risks faced by the particular businesses, municipalities or pools of assets covered by our insurance;
- economic changes or catastrophic events in geographic regions where our mortgage insurance or financial guaranty insurance in force is more concentrated;
- our ability to successfully obtain additional capital, if necessary, to support our long-term liquidity needs and to protect our credit ratings and the financial strength ratings of Radian Guaranty Inc., our primary mortgage insurance subsidiary;
- a decrease in the volume of home mortgage originations due to reduced liquidity in the lending market, tighter underwriting standards and a deterioration in housing markets throughout the U.S.;
- our ability to maintain adequate risk-to-capital ratios, leverage ratios and surplus requirements in our mortgage insurance business in light of on-going losses in this business;
- a decrease in the volume of municipal bonds, and other public finance and structured finance transactions that we insure, or a decrease in the volume of such transactions for which issuers or investors seek or demand financial guaranty insurance;
- the loss of a customer for whom we write a significant amount of mortgage insurance or financial guaranty insurance or the influence of large customers;
- reduction in the volume of reinsurance business available to us from one or more of our primary financial guaranty insurer customers due to adverse changes in their ability to generate new profitable direct financial guaranty insurance or their need for us to reinsure their risk;
- disruption in the servicing of mortgages covered by our insurance policies;
- the aging of our mortgage insurance portfolio and changes in severity or frequency of losses associated with certain of our products that are riskier than traditional mortgage insurance or financial guaranty insurance policies;
- the performance of our insured portfolio of higher risk loans, such as Alternative-A ("Alt-A") and subprime loans, and adjustable rate products, such as adjustable rate mortgages and interest-only mortgages, which have resulted in increased losses in 2007 and 2008 and may result in further losses;
- reduced opportunities for loss mitigation in markets where housing values fail to appreciate or begin to decline;
- changes in persistency rates of our mortgage insurance policies caused by changes in refinancing activity, in the rate of appreciation or depreciation of home values and changes in the mortgage insurance cancellation requirements of mortgage lenders and investors;
- recapture of reinsurance business by the primary insurers under our financial guaranty reinsurance arrangements, which would reduce written and earned premiums in our financial guaranty business and correspondingly reduce the amount of capital required to be held against this risk;

Safe Harbor Statement (Continued)

- downgrades or threatened downgrades of, or other ratings actions with respect to, our credit ratings or the insurance financial strength ratings assigned by the major rating agencies to any of our rated insurance subsidiaries at any time (in particular, our credit rating and the financial strength ratings assigned to Radian Guaranty Inc., which are currently on CreditWatch Negative or negative outlook); which risk is discussed in more detail below in Item 1A of Part II of this report on Form 10-Q;
- heightened competition for our mortgage insurance business from others such as the Federal Housing Administration and the Veterans' Administration or other private mortgage insurers (in particular those that have been assigned higher ratings from the major ratings agencies);
- changes in the charters or business practices of Federal National Mortgage Association and Freddie Mac, the largest purchasers of mortgage loans that we insure, and our ability to retain our "Top Tier" eligibility requirement from both Freddie Mac and Fannie Mae;
- heightened competition for financial guaranty business from other financial guaranty insurers, from other forms of credit enhancement such as letters of credit, guaranties and credit default swaps provided by foreign and domestic banks and other financial institutions and from alternative structures that may permit insurers to securitize assets more cost-effectively without the need for the types of credit enhancement we offer, or result in our having to reduce the premium we charge for our products;
- the application of existing federal or state consumer, lending, insurance, securities and other applicable laws and regulations, or changes in these laws and regulations or the way they are interpreted; including, without limitation: (i) the possibility of private lawsuits or formal investigations by state insurance departments and state attorneys general alleging that services offered by the mortgage insurance industry, such as captive reinsurance, pool insurance and contract underwriting, are violative of the Real Estate Settlement Procedures Act and/or similar state regulations, (ii) legislative and regulatory changes affecting demand for private mortgage insurance or financial guaranty insurance, or (iii) legislation and regulatory changes limiting or restricting our use of (or requirements for) additional capital, the products we may offer, the form in which we may execute the credit protection we provide or the aggregate notional amount of any product we may offer for any one transaction or in the aggregate;
- the possibility that we may fail to estimate accurately the likelihood, magnitude and timing of losses in connection with establishing loss reserves for our mortgage insurance or financial guaranty businesses, or the premium deficiency for our first- and second-lien mortgage insurance business, or to estimate accurately the fair value amounts of derivative contracts in our mortgage insurance and financial guaranty businesses in determining gains and losses on these contracts;
- volatility in our earnings caused by changes in the fair value of our derivative instruments and our need to reevaluate the premium deficiencies in our mortgage insurance business on a quarterly basis;
- changes in accounting guidance from the Securities and Exchange Commission ("SEC") or the Financial Accounting Standards Board;
- legal and other limitations on amounts we may receive from our subsidiaries as dividends or through tax and expense sharing arrangements with our subsidiaries; and
- vulnerability to the performance of our strategic investments, including in particular, our investment in Sherman Financial Group LLC.

For more information regarding these risks and uncertainties as well as certain additional risks that we face, you should refer to the Risk Factors detailed in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2007 as well as the material changes to these risks discussed in Item 1A of Part II of our June 30, 2008 Quarterly Reports on Form 10-Q. We caution you not to place undue reliance on these forward-looking statements, which are current only as of the date on which we filed this report. We do not intend to, and we disclaim any duty or obligation to, update or revise any forward-looking statements made during today's investor call or included in the presentation to reflect new information or future events or for any other reason.

*Radian Asset has no direct HELOC exposure.

**100% of the BBB exposure is assumed through treaties from the monoline primaries.

***All of the BIG exposure is on Radian Asset's Watch List and reserves have been established for these as needed.

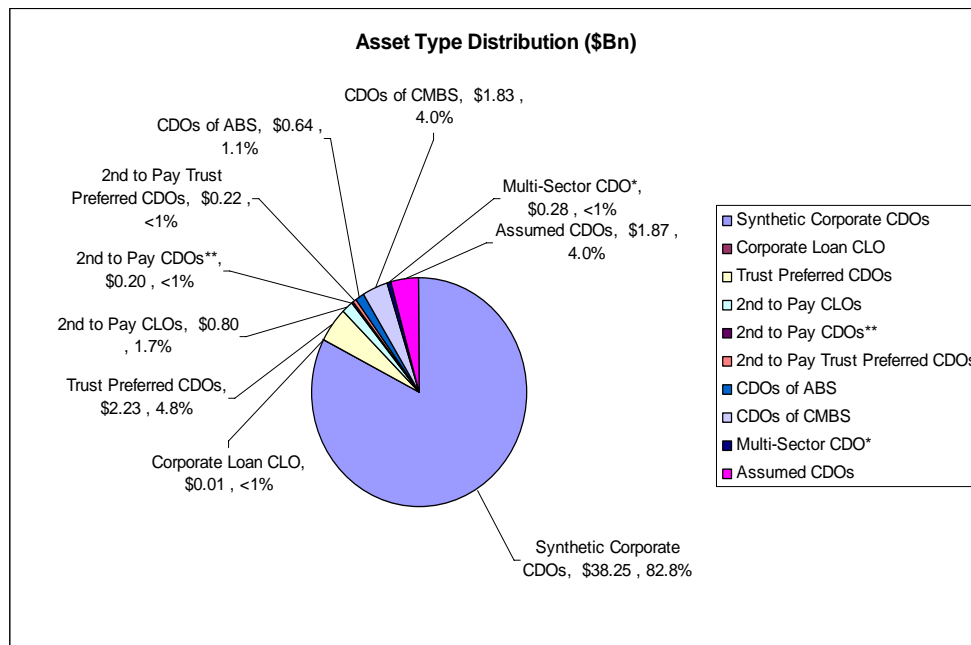

Note: Ratings are based on Radian Asset's internal ratings.

CDO Portfolio: Financial Guaranty CDO Portfolio

\$46.3 Billion Net Par Outstanding as of June 30, 2008

Direct exposure (\$44.4 billion; 96% of CDO exposure):

- Synthetic Corporate CDOs represents more than 80% of the CDO exposure. 100% attach at the AAA level or higher, with an average attachment point of 2.3x the AAA level and weighted average tenor of 5.4 years.
- 59% of the total number of deals have attachment points of at least 2x the AAA level as determined by S&P CDO Evaluator
- On an outstanding notional basis, at least 85% of the transactions we have insured (with a typical portfolio of 100-150 referenced corporate entities) can sustain at least 15 defaults (30% recovery assumption) without Radian Asset incurring a loss
- Trust Preferred CDOs attach at AAA or multiple of AAA level
- 100% of CDOs of CMBS and Multi-sector CDOs net par outstanding is rated AAA

*One multi-sector CDO with net par outstanding of \$283.4 million

**Includes one second to pay CDO of corporate bonds with net par outstanding of \$113.7 million

Note: See CDOs of ABS, CDOs of CMBS and Multi-sector CDOs table for detail on these sectors

Financial Guaranty CDO Portfolio: Synthetic Corporate CDO Underlying Collateral Ratings

Ratings Distribution by Notional (\$billions)*

*Lower of Moody's or S&P

- S&P had a total of 81 rating actions on the underlying corporate credits in the CDO book during the 2nd quarter, consisting of 60 downgrades and 21 upgrades.
- There were 121 rating actions taken by Moody's on the underlying corporate credits in the CDO book during the 2nd quarter, consisting of 71 downgrades and 50 upgrades.
- 12.7% of the number of Buildings & Real Estate sector names and 22.1% of the number of Insurance sector names in the CDO portfolio had rating downgrades in the second quarter of 2008

Total		2,757																	

* Ratings are based on Moody's ratings. If Moody's rating is unavailable, then S&P rating applies.

** S&P downgraded this CDO to AA- in March 2008 and then to B+ in July 2008 and Moody's downgraded it to Aa3 in April 2008 and then to A2 in July 2008.

Financial Guaranty CDO Portfolio: CMBS Exposure

Outstanding Par	Total Reference Obligations	Average Size of Ref Obligation	Average Subordination of Ref Obligation	Total Delinquencies (Average of Ref Oblig)
352.5MM	30	50MM	14%	0.60%
430.0MM	40	25MM	13%	0.52%
598.5MM	30	80MM	20%	0.38%
450.0MM	27	72MM	31%	0.61%
\$1,831MM	127			

- All 4 synthetic CDOs are rated AAA by both Moody's and S&P and contain 127 AAA rated (by at least two of the three rating agencies) CMBS tranches issued as part of 88 securitizations (the "Reference Obligations").
- The total balance of the Reference Obligations equals \$6.8 billion, however the loan collateral supporting these 127 tranches consists of 15,000 loans with a balance close to \$200 billion.
- Performance has been consistent with that of the CMBS market, with 81% of the 88 securitizations experiencing total delinquencies of less than 1%.
- Underlying loan collateral is well diversified both geographically and by property type.
