

Quantity. Quality. Quickly. Pick any three.

Electrogalvanized steel. Without the wait. From MSC

Galvanized steel is hard to find, right? Not any more. MSC – Material Sciences Corporation – can convert your bare or coated steel with an electrogalvanized layer, in the quantities you need, with the quick turnaround your business demands.

Like Hot Dip. Only Better.

MSC's advanced electrogalvanizing process results in products that can perform better than hot dip – at competitive prices. Now you can offer this high-performance, value-added steel as the answer to your customer's toughest applications – even exposed automotive. And with MSC, you won't be hunting for sufficient quantities.

No wishing. No waiting.

MSC's state-of-the-art plant in Walbridge, Ohio has the productive capacity to deliver exactly the steel you want, when you want it. And our cutting-edge 72" wide processing lines deliver a full range of superior results, including edge trim and full inspection. Of course, higher volumes mean greater savings.

Material Sciences Corporation

Engineered Materials and Solutions Group
