COMPANY OVERVIEW

Centillium Communications, Inc. is a leading innovator of high performance, cost-effective semiconductor solutions that give consumers, enterprises and service providers the winning edge in broadband access. The company's complete, end-to-end system-on-chip solutions accelerate development time-to-market for "last mile" products with Digital Subscriber Line (DSL), Fiber-To-The-Premises (FTTP) and Voice-over-Internet Protocol (VoIP) technologies. Centillium products include digital and mixed-signal integrated circuits and related software for DSL and FTTP central office and customer premises equipment and VoIP solutions for carrier- and enterprise-class gateways and consumer telephony. Centillium is a global company with headquarters in Fremont, CA.

STRATEGY FOR GROWTH

Centillium is pursuing a growth strategy that leverages our leadership position to diversify into growing markets and emerging related technologies. The company has a twofold diversification strategy for growth: First, to diversify its DSL business to markets outside of Japan, and second, to diversify its business within broadband access to other technologies and growth markets such as VDSL2, FTTP and VolP.

^{*} Excludes stock-based comp.
