- **Talk time:** Up to approximately 4.3 hours continuous digital talk time with standard battery
- **Large, full-color screen:** Vibrant 2.3" TFT display with 65K colors and 320 x 240 resolution

FEATURES:

- **International voice and data capabilities:** Travel around the world and stay connected with this versatile device. The Samsung ACE is a quad-band device that operates on the Sprint Mobile Broadband Network in the United States and is capable of voice and data roaming in North America on CDMA networks and internationally on GSM/GPRS networks where Sprint has roaming agreements. A complete list of countries where service is available can be found at www.sprint.com/international.
- **Unlocked SIM card:** A Sprint-provided SIM card is pre-installed in the device for customers who wish to use Sprint International Roaming Services (special activation required) while traveling abroad. Customers may also take advantage of the unlocked SIM, which allows the device to accept an in-market international carrier's SIM for voice and data services.
- **Windows Mobile 6.1:** Brings new time-saving features, easier phone navigation and management, and stronger security safeguards. Users have access to mobile versions of the familiar Windows desktop applications such as Microsoft Office and Live Search.
- **Enhanced GPS capabilities:** Provides advanced GPS functionality and allows support of popular applications such as Sprint Navigation. Sprint Navigation provides audio and visual turn-by-turn directions, more than 10 million local listings, and one-click traffic rerouting on compatible phones, similar to an in-vehicle GPS system.
- **Office Mobile 6.1:** This allows users to view and edit the latest versions of Microsoft Word and Excel documents and to view the latest versions of PowerPoint and PDFs.
- **Sprint Mobile Broadband with Power Vision:** Experience EV-DO Rev. 0 data speeds averaging up to 400-700 kbps and peak speeds up to 2.0 Mbps when accessing Sprint Power

Vision services and content. This device is backward-compatible to 1XRTT technology in areas where EV-DO is not yet available. Supported Power Vision applications include:

- **Sprint TVSM:** See and hear your favorite news, sports, weather and more with rich, clear visual quality and crisp sound that downloads at broadband-like speeds.
- **On-Demand:** Retrieve customized, up-to-date web content such as sports, weather, news, money and movie information with the push of a button. Available only from Sprint.
- **Downloadable applications:** Includes the Sprint Software Store provided by Handmark[®], an on-device software catalog enabling wireless downloads on-the-go. Customers can find, download and buy software, games, ring tones, graphics and other Windows Mobile applications simply and securely. Additional titles are available from the desktop PC at <http://softwarestore.sprint.com>
- **Installation of unsigned applications:** The upgrade will allow for the installation of unsigned third-party applications, even those without certification.
- **Wireless email:** Send and receive email from multiple corporate and personal email accounts. Get wireless email access to popular commercial POP3 and IMAP accounts. Users can also set up wireless access to Microsoft Outlook email with a direct connection to Microsoft Exchange Server 2003.
- **Microsoft ActiveSync[®]:** ActiveSync technology offers one of the best PC-to-mobile device sync experiences, making it easier to configure with faster data transfer and sync accuracy.
- **File Viewer:** File Viewer allows viewing of MS Word, Excel and PowerPoint documents.
- **Text messaging enabled:** Send and receive text messages across the room or across the country.
- **Built-in Bluetooth[®] wireless technology (v.2.0 with stereo support):** When used with your Sprint PCS phone and compatible Bluetooth-enabled accessories, Bluetooth allows fast, secure transmission without cables or wires, even though the two devices are not in line-of-sight. Compatible Bluetooth-enabled wireless accessories sold separately.
- **Micro SD expansion slot:** Add memory and selected peripherals, transfer music, photos, and video from your desktop, or load additional games and applications. Cards up to 2GB are supported.
- **1.3 Megapixel camera/camcorder:** 2.0 MP camera with 5X digital zoom, auto focus and video capture with sound.
- **Microsoft Windows Media Player 10 Mobile:** With Windows Media Player you can play music, videos, and more on your device, and it works seamlessly with Windows Media Player 10 on your Windows XP-based computer.
- **Built-in speakerphone:** Hands-free operation made easy with dedicated speakerphone button.
- **RSS reader:** An RSS ("Really Simple Syndication") reader is a software application that resides on your device and obtains syndicated Web content such as news headlines and blogs from different locations and displays them in an easy-to-view stream.
