MUSTANG CREATES FOUNDERS' LEGACY

HOUSTON - Mustang Engineering ("Mustang"), a subsidiary of international energy services company John Wood Group PLC ("Wood Group"), announced that it has created the *Founders' Legacy* to honor the company's founders – Paul Redmon, Bill Higgs and Felix Covington – upon Mustang's 20th anniversary. Watkins Middle School of the Cypress-Fairbanks ("Cy-Fair") Independent School District has been selected to receive \$10,000 as the initial Legacy partner. In addition to the monetary donation, Mustangers will get personally involved throughout the school year, helping Watkins students and teachers through face-to-face volunteer efforts.

Mustang President Steve Knowles stated, "The *Founders' Legacy* is about giving back, a value that our three founders developed as an integral part of Mustang's culture. We specifically targeted middle school students in our community for this award. Statistics have shown that this age group is at a crossroads of defining their sense of self and their vision of the future. We feel that this award will support our youth and can make a difference in their lives. It expands the vision of our founders and appropriately honors them."

Jose Martinez, Watkins principal, said, "Mustang has core values of people helping people, teamwork and getting the job done. It's a wonderful opportunity to partner with a company like that as they invest in our students and teachers."

Mustang is an independent services provider to the global oil, gas, chemical and manufacturing industries. The company specializes in design, engineering, procurement, project management and construction management and offers these services through its six business units: upstream oil and gas, midstream, pipeline, automation and control, refining and petrochemicals, and process & industrial. Mustang has a staff of 4,000 worldwide, with offices in the United States, United Kingdom and Australia. Its U.S. offices are located in Houston, Texas; Birmingham, Alabama; Atlanta, Georgia; Monroe, Louisiana; Martinez, California; Greenville, South Carolina; and Wilmington, Delaware.

Wood Group is an international energy services company with \$3.5bn sales, employing 22,000 people worldwide and operating in 46 countries. The Group has three businesses - Engineering & Production Facilities, Well Support, and Gas Turbine Services - providing a range of engineering, production support, maintenance management and industrial gas turbine overhaul and repair services to the oil & gas, and power generation industries worldwide.
