KUPE DEVELOPMENT WELLS DISCLOSURE NOTICE

New Zealand Oil & Gas Ltd (NZOG) advises that as of 14:00 hours on 21 May, completion operations were being finalised on Kupe South 8 (KS-8). Over the past week the 5 inch liner was cleaned out and the well displaced to completion fluid prior to running a cement bond evaluation log. The 5-1/2 inch production tubing and down-hole monitoring equipment have been installed and control lines are currently being terminated at the wellhead.

Upon finishing this operation, the production tree will be installed and batch testing of the three production wells will begin, commencing with KS-8. Batching testing is expected to take around one week. The three wells will then be shut-in before the rig is moved to drill the Momoho exploration well.

Drilling of the three development wells began at 22:40 hrs on 19 December 2007. All three wells have reached their target depths.
