Hospira, Inc.:
New Segment and Product Line Reporting

To better reflect how Hospira currently manages its business, as well as its strategic focus on certain product lines, beginning in the first quarter of 2008 we are re-aligning our segment and product line reporting presentation. Going forward, Hospira has three reportable segments:

- Americas
- Europe, Middle East and Africa (EMEA)
- Asia Pacific (APAC)

Within each of these three segments, we will report products sold in all distribution channels (for example: hospital and alternate site) under the following categories:

Specialty Injectable Pharmaceuticals	Includes generic injectables (including biogenerics) and proprietary specialty injectables (such as Precedex [®])
Other Pharmaceuticals	Includes large volume IV solutions, nutritionals and contract manufacturing services (including former “Sales to Abbott”)
Medication Management Systems	Includes infusion pumps, related software and services, and administration sets for infusion pumps
Other Devices	Includes gravity administration sets, critical care products and other miscellaneous device products

The following page presents the historical quarterly net sales for 2007 and 2006 re-cast under these new categories. Please note that 2007’s net sales include 11 months of Mayne Pharma Limited’s net sales (from the date of acquisition) classified in the appropriate product line; Mayne is not broken out separately. The net sales for 2006 do not include Mayne’s sales.

Hospira’s first-quarter 2008 financial results be presented in this new reporting format when they are issued on May 7, 2008.
