

**MetroPCS™ and Wired Plastic™ MasterCard® to Offer Wireless Industry's  
First fully integrated stored value mastercard®**

**MetroPCS™ Wired Plastic™ MasterCard? Provides Customers Another Benefit –  
A Convenient Method for Paying Wireless Bills and Shopping Anywhere MasterCard is  
Accepted**

**DALLAS - October 13, 2003** - MetroPCS announces its partnership with One Global Finance, Inc. to offer the wireless industry's first fully integrated stored value card, the MetroPCS Wired Plastic? MasterCard?. The card underscores MetroPCS' commitment of providing its customers with convenient, everyday wireless solutions.

The MetroPCS Wired Plastic MasterCard has a direct link to each MetroPCS phone. By dialing #222 customers can hear the card's available balance, pay their MetroPCS bill and add funds to their Metro-Connect account. Customers also receive text messages directly to their MetroPCS phone with daily balance alerts, load confirmation, and other important notifications. All of these integrated features are free of charge.

The card is re-loadable and can be used anywhere MasterCard is accepted. No bank account, credit or employment verification is required to qualify for the card. Since launching its service last year in the metropolitan areas of Atlanta, Miami, San Francisco and Sacramento, MetroPCS has continually listened and responded to customer needs by developing new offerings. In addition to offering unlimited, anytime local calls for \$35 per month with no contract, MetroPCS offers unlimited text messaging for \$3 month and three domestic long distance packages priced at 1.7 cents per minute.

“We selected the Wired Plastic MasterCard because of its cardholder features and benefits and their strong commitment to superior customers service. This partnership exemplifies MetroPCS' continued efforts to identify ways to enhance our offerings so that customers will realize everyday wireless solutions that benefit them,” said Roger Linquist, MetroPCS founder and CEO. “The card, which is ideal for college students, shopping online, the unbanked and budget conscious consumer, provides an easy, simple option for customers to make their MetroPCS monthly service payments and the convenience and security of using the card anywhere MasterCard is accepted.”

The enrollment process is simple providing customers with two options; completing an application directly on the MetroPCS Web site [www.metropcs.com](http://www.metropcs.com) or by calling the toll free number 800-849-9140. After receiving the card customers have several convenient loading options: such as the ability to add cash at over 50,000 participating retail locations including Western Union® SwiftPay® Agents, InstaPay retail locations, and participating MetroPCS dealers, Bank Wire Transfer and USPS Money Order. Using Payroll Direct™ customers can receive money (payroll, Social Security, Medicare, welfare, disability, or military) directly to the card free of charge.

“We are very excited about the opportunity to partner with MetroPCS and introduce the Wired Plastic MasterCard to their customers. The MetroPCS Wired Plastic MasterCard offers unparalleled cardholder features and benefits and a new way of managing personal

finances.” said Dave Wilkes Executive Vice President Strategic Alliances, One Global Finance, Inc.

About Wired Plastic MasterCard
