## FY-2009 Financial & Business Highlights

On a full year basis, Fixed Networks revenue registered the highest growth at 6%. Mobile remained the major revenue contributor at 51%. Pay TV, Broadband, Fixed Network Services and Sales of Equipment contributed 19%, 11%, 15% and 4% respectively to the mix.

- **Mobile** revenue grew 1% YoY. The higher revenue was mainly contributed by a larger customer base. Pre-paid mobile services revenue increased 6% to S\$259 million, accounting for 24% of the Mobile revenue mix. Post-paid mobile services revenue remained stable at S\$835 million.
- **Pay TV** revenue rose 2% to S\$406 million from S\$398 million. This was driven by a larger customer base, which increased 3% YoY. For the year, ARPU came in at S\$56 and was S\$1 lower from a year ago. The total customer base expanded to 539,000 households.
- **Broadband** revenue at S\$241 million was 5% lower YoY. This was due to customers' plan mix towards lower tier price plans, and increased discounts offered across all our Broadband subscriptions to drive multi-services take-up. The MaxOnline customer base now stands at 400,000, an increase of 7%.
- **Fixed Network** revenue increased 6% to S\$318 million from S\$300 million previously. Data & Internet services revenue, which makes up 85% of the Fixed Network revenue, grew 9% to S\$269 million from the previous year.
- The percentage of total **Hubbing** households that subscribed to any two or more StarHub services stands at 55%, with 44% subscribing to all three services.

“Considering the competitive landscape and slow economy, we have delivered a stable FY2009 result, with all our lines of business performing as expected,” said Mr Neil Montefiore, CEO of StarHub. “For 2010, Hubbing continues to be our main strategy; delivering a comprehensive range of branded quality content and innovative services across our multi-service platforms to delight our customers.”

“In addition, we expect to ramp up our activities in broadband and fixed line services in order to leverage on the upcoming launch of the Next-Generation Nationwide Broadband Network,” added Mr Montefiore. “For our shareholders, we expect to maintain our minimum quarterly dividend of 5.0 cents per share for the whole year.”

### **Outlook for FY2010**

Based on the current outlook, we expect the Group’s 2010 operating revenue growth to be in the low single-digit range, and EBITDA margin on service revenue is expected to be around 30%. The 2010 cash capex, as a percentage of operating revenue, is expected to increase but not exceed 14%. The increase in capex, driven by the new IT business support systems and the roll out capex of Nucleus Connect, will result in 2010 depreciation being higher at around 13% of operating revenue. We intend to pay a minimum cash dividend of 5.0 cents per ordinary share per quarter, totalling 20.0 cents for FY2010.
