# NOTES TO FINANCIAL STATEMENTS

**1. Summary of Significant Accounting Policies**

A. Accounting Practices

The accompanying financial statements of RiverSource Life Insurance Company ("the Company" or "RiverSource Life") have been prepared in conformity with accounting practices prescribed or permitted by the Department of Commerce of the State of Minnesota. The State of Minnesota has adopted the National Association of Insurance Commissioners ("NAIC") Accounting Practices and Procedures Manual as its prescribed basis of Statutory Accounting Principles ("SAP"). The Company does not have any prescribed or permitted practices that differ from NAIC SAP.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premium revenue

Universal life-type insurance premiums and annuity considerations are recognized as revenue when received. Premiums on other life insurance contracts are recognized as revenue on the anniversary date of the contracts. Premiums on accident and health insurance contracts are recognized as revenue over the contract period. Funds received on contracts that do not have mortality or morbidity risks are reported as liabilities on deposit-type contracts, not as revenue.

Policy acquisition costs

Expenses incurred in connection with acquiring and renewing insurance and annuity business, including such costs as sales commissions, are charged to operations as incurred.

Liabilities for future policy benefits

Liabilities for fixed single premium and installment deferred annuities are based on the Commissioners Annuity Reserve Valuation Method ("CARVM") at interest rates ranging from 4.0% to 10.0%. Liabilities for variable deferred and payout annuities are based on Actuarial Guideline 43, which requires a minimum reserve equal to the standard scenario amount. A stochastic excess reserve is required if it exceeds the standard scenario amount.

Liabilities for fixed annuities in a benefit status are based on the 1949a Annuity Table with interest at 3.5%, the 1971 Individual Annuity Table with interest at 6.0% or 4.0%, the 1971 Group Annuity Table with interest at 6.0%, the 1983a Table with various interest rates ranging from 6.5% to 11.25%, or the Annuity 2000 Table with interest rates ranging from 4.25 % to 7.0%.

Liabilities for universal life-type insurance policies are based on the Commissioners Reserve Valuation Method or Net Single Premium Method at interest rates ranging from 3.0% to 6.0% and the 1958, 1980 and 2001 Commissioners Standard Ordinary ("CSO") Mortality Tables. Actuarial Guideline 36 is followed for indexed universal life. Actuarial Guidelines 37 and 38 are followed for variable universal life insurance death benefit guarantees and universal life insurance with secondary guarantees.

Liabilities for future benefits on traditional life insurance have generally been computed by the net level premium or Commissioners Reserve Valuation Method, based on the 1941, 1958, 1980, or 2001 CSO Mortality Tables with interest at various rates ranging from 3.0% to 5.5%.

Liabilities for future disability income policy benefits have been computed using the net level premium or two year full preliminary term method, based on the 1964 Commissioners Disability Table with the 1958 CSO Mortality Table at 3.0% interest or the 1985 Commissioners Individual Disability Table A with the 1980 or 2001 CSO Mortality Tables from 4.0% to 5.0% interest.

Liabilities for future benefits on long-term care insurance have been computed by the one year full preliminary term method, using morbidity rates based on the Company's experience, mortality rates based on the 1983 Group Annuity Mortality Table, lapse rates based on the Company's experience and an interest rate from 4.5% to 5.5%.

Reinsurance

The Company cedes significant amounts of insurance risk to other insurers under reinsurance agreements. Reinsurance premiums paid and benefits received are accounted for consistently with the basis used in accounting for the policies from which risk is reinsured and consistently with the terms of the reinsurance contracts. Reinsurance premium, net of the change in any reinsurance premium asset, is reported as a reduction of premiums. Policy and contract liabilities ceded to reinsurers are reported as reductions to the related reserves. Commissions allowed by reinsurers on business ceded are reported as income when received.

The Company also assumes life insurance and fixed annuity risk from other insurers in limited circumstances. Reinsurance premiums received and benefits paid are accounted for consistently with the basis used in accounting for the policies from which risk is reinsured and consistently with the terms of the reinsurance contracts. Liabilities for assumed business are recorded within reserves.

In addition, the Company uses the following accounting policies:

(1) Short-term investments are stated at amortized cost except for money market funds, which were purchased at par and carried at cost. Short-term investments are accounted for in the same manner as similar long-term investments except that any premium or discount is amortized on a straight-line basis to maturity.

(2) Bonds, other than loan-backed and structured securities, are carried at amortized cost with premium or discount amortized using the scientific amortization method. Bonds with an NAIC designation of 6 are reported at the lower of amortized cost or fair value.

(3) Common stocks are carried at fair value with changes in fair value recorded as unrealized gain or loss. Investments in stocks of unconsolidated subsidiaries in which the Company has a 20% interest or more are carried on the equity basis.

(4) Preferred stock: None.

(5) Mortgage loans are stated at the unpaid principle balance, net of allowances for loan losses, if any.

(6) Loan-backed and structured securities are carried at amortized cost using the scientific amortization method and include anticipated prepayments. Changes in estimated cash flow and in coupon interest cash flows from original purchase assumptions are accounted for using the retrospective method.

(7) The Company carries its non-insurance subsidiaries at audited U.S. generally accepted accounting principles ("GAAP") equity value and its insurance company subsidiary at SAP equity.

(8) The Company has ownership interests in joint ventures. The Company carries these based on the underlying GAAP equity of the investee.

(9) All derivatives that are not part of a designated hedge transaction, principally, index call options, index put options, interest rate swaps, total return swaps, variance swaps, credit default swaps and options on swaps are stated at fair value with changes in the fair value being reflected in unrealized capital gains (losses). Futures contracts are marked to market daily with changes in market value being paid or received and recorded in unrealized capital gains (losses). When the futures contracts are closed the change in value is realized in earnings.

(10) The Company utilizes anticipated investment income on a conservative basis as a factor in the premium deficiency calculation, but has not reported any premium deficiency reserves.

(11) Claim reserves for both future benefit payments and waived premiums are held for each known open claim and are calculated using tabular methods. An additional reserve for claims incurred but not reported is determined from multiple years of historical claim lag experience (updated at least annually). Claim liabilities are held for payments potentially due but unpaid as of the valuation date on known open claims. A claim administration expense reserve based on a review of actual expenses in relation to claim payments is also held.

(12) The Company has not modified its capitalization policy from the prior period.

# NOTES TO FINANCIAL STATEMENTS

**2. Accounting Changes and Corrections of Errors**

**Accounting Changes**

*Reclassification of syndicated loans*

At December 31, 2012, the Company reclassified its investments in syndicated loans from other invested assets (Schedule BA) to bonds (Schedule D, Part 1), which better aligns with industry practice. The carrying value of these investments was $302 million and $300 million at December 31, 2012 and December 31, 2011, respectively. The related investment income was reclassified to bonds retrospectively, effective January 1, 2012, so that both the year-end holdings and investment income for the twelve months ending December 31, 2012 are presented together in Schedule D of the annual statement.

*Statement of Statutory Accounting Principles ("SSAP") 100—Fair Value of Financial Instruments* ("SSAP 100")

SSAP 100 defines fair value, establishes a framework for measuring fair value and establishes disclosure requirements about fair value. In March 2012, the NAIC adopted revisions to SSAP 100, effective January 1, 2012, to require the following expanded/new disclosures:

1. Documentation of the fair value hierarchy for items that are disclosed with a fair value measurement but may not be reported at fair value in the balance sheet.
2. A gross presentation of purchases, sales, issuances and settlements in the rollforward of securities classified as Level 3 in the fair value hierarchy.

The Company early-adopted item 2 at December 31, 2011. The Company adopted item 1 at March 31, 2012. The adoption of these items did not impact the Company's financial condition or results of operations. See Note 20 for the required disclosures.

*SSAP 101—Income Taxes, A Replacement of SSAP 10R and SSAP 10 ("SSAP 101")*

In August 2011, the NAIC issued SSAP 101, with an effective date of January 1, 2012. SSAP 101 establishes statutory accounting principles for current and deferred income taxes. The primary changes from SSAP 10R are as follows:

- The reversal period and surplus limitation parameters of the deferred tax asset admissibility calculation are determined based on risk-based capital levels. Insurers whose risk-based capital exceeds the defined threshold shall use a three year reversal period and 15% surplus limitation.
- Application of the admissibility standards is no longer an optional election and separate presentation of the incremental increase in admitted deferred tax assets resulting from the SSAP 10R election is not applicable.
- Insurers are required to establish a tax loss contingency reserve if, based upon management's best estimate, it is *more likely than not* that a tax position will not be sustained, replacing the former "probable" standard for recognition.

The Company adopted SSAP 101 January 1, 2012. The adoption did not have a material effect on the Company's financial statements.

**Correction of Errors**

In the second quarter of 2012, the Company made a correction for a tax item related to prior periods, which resulted in a $30.3 million increase in federal income taxes payable. During the second quarter, the Company discovered it had received incomplete data from a third party service provider for securities lending activities that resulted in the miscalculation of the Company's dividend received deduction and foreign tax credit, which resulted in an understatement of taxes payable and an overstatement of reported earnings in prior periods. Management has determined that the effect of this correction is not material to the Financial Statements for all current and prior periods. The Company has resolved the data issue and has stopped the securities lending that negatively impacted its tax position. This amount is reported as a prior period adjustment to surplus (Line 53) in the Summary of Operations.

In the fourth quarter of 2012, the Company made an adjustment to the variable annuity guaranteed living benefit utilization computation within the Actuarial Guideline 43 stochastic reserve primarily attributable to prior periods, which resulted in a $31.8 million reduction to reserves. At December 31, 2011, the reserves (Liabilities, Line 1) were overstated by $57.3 million. This amount is reported as a prior period adjustment to surplus in the Summary of Operations.

**3. Business Combinations and Goodwill**

Not applicable.

**4. Discontinued Operations**

Not applicable.

**5. Investments**

A. Mortgage Loans

(1) The maximum and minimum lending rates for mortgage loans during 2012 were: 10.25% and 2.00%.

(2) During 2012, the Company reduced interest rates of outstanding mortgage loans as follows:

| Commercial Mortgage Loans | | |
|---|---|---|
| Change in Rate | Carrying Value | Number of Loans |
| 1.53% | $ 4,796,437 | 1 |
| 1.14% | 3,765,067 | 1 |

(3) For commercial mortgage loans, the maximum percentage of any one loan to the value of security at the time of loan, exclusive of insured or guaranteed or purchase money mortgage was 80%. The Company does not originate new residential mortgage loans.

| | | 2012 | 2011 |
|---|---|---|---|
| (4) | At December 31, 2012, the Company held mortgages with interest more than 180 days past due with a recorded investment, excluding accrued interest | $ 3,198,514 | $ — |
| | a. Total interest due on mortgages with interest more than 180 days past due | 664,380 | — |
| (5) | Taxes, assessments and any amounts advanced and not included in the mortgage loan total | — | — |
| (6) | Impaired loans with related allowance for credit losses | 30,060,486 | 60,836,204 |
| | a. Related allowance for credit losses | 4,750,000 | 9,000,000 |
| (7) | Impaired loans without an allowance for credit losses | — | 3,094,445 |
| (8) | Average recorded investment in impaired loans | 15,030,243 | 31,965,324 |
| (9) | Interest income recognized during the period the loans were impaired | 1,645,487 | 2,912,838 |
| (10) | Amount of interest income recognized on a cash-basis during the period the loans were impaired | 137,653 | 137,653 |
| (11) | Allowance for credit losses: | | |
| | a. Balance at beginning of period | $ 9,000,000 | $ 7,250,000 |
| | b. Additions charged to operations | 2,500,000 | 4,586,283 |
| | c. Direct write-downs charged against the allowances | — | — |
| | d. Recoveries of amounts previously charged off | (6,750,000) | (2,836,283) |
| | e. Balance at end of period | $ 4,750,000 | $ 9,000,000 |

(12) Interest accrual is stopped when a mortgage is 90 days delinquent. Income received while a loan is over 90 days delinquent is recognized on a cash basis until the loan is brought current and then is returned to a normal accrual status.

B. Debt Restructuring

| | | 2012 | 2011 |
|---|---|---|---|
| (1) | The total recorded investment in restructured loans, as of year end | $ 68,759,030 | $ 74,844,373 |
| (2) | The realized capital losses related to these loans | — | — |
| (3) | Total contractual commitments to extend credit to debtors owning receivables whose terms have been modified in troubled debt restructurings | — | — |

# NOTES TO FINANCIAL STATEMENTS

(4) The Company accrues interest income on impaired loans to the extent it is deemed collectible (delinquent less than 90 days) and the loan continues to perform under its original or restructured contractual terms. Interest income on non-performing loans is generally recognized on a cash basis.

C. Reverse Mortgages
None.

D. Loan-Backed and Structured Securities ("LBaSS")

(1) Prepayment assumptions for LBaSS are based on financial information provided by a licensed data provider. These assumptions are consistent with the current interest rate and economic environment. The retrospective method is used to value all types of these securities except in a situation where rate changes result in recalculation of the effective yield. The recalculated yield is used to amortize the investment as of the rate change date.

(2) The Company has no loan-backed or structured securities for which an other-than- temporary impairments ("OTTI") was recognized due to intent to sell or inability or lack of intent to retain for a period of time sufficient to recover the amortized cost basis.

(3) The following table provides information about LBaSS held at December 31, 2012 for which an OTTI has been recognized due to the fact that the present value of cash flows expected to be collected is less than amortized cost basis of the securities.

| CUSIP | Carrying Value Before Current Period OTTI | Present Value of Projected Cash Flows | Recognized OTTI | Amortized Cost After OTTI | Fair Value | Date of Financial Statement Where Reported |

(4) The following table provides information about investments in LBaSS for which the carrying value (amortized cost) exceeds fair value and the length of time that individual securities have continuously had amortized cost in excess of fair value, as of December 31, 2012:

a. The aggregate amount of unrealized losses:

| | | |
|---|---|---|
| 1. | Less than 12 Months | $ (418,578) |
| 2. | 12 Months or Longer | $ (79,223,698) |

b. The aggregate related fair value of securities with unrealized losses:

| | | |
|---|---|---|
| 1. | Less than 12 Months | $ 143,283,756 |
| 2. | 12 Months or Longer | $ 442,666,983 |

For all LBaSS for which carrying value exceeds fair value, RiverSource Life has the intent and ability to retain the investment in the security for a period of time sufficient to recover the carrying value.

E. Repurchase Agreements
The Company enters into repurchase agreements in exchange for cash, which it accounts for as secured borrowings. The Company receives cash at least equal to 95% of the fair value of securities sold under repurchase agreements. All investments purchased with the cash proceeds during 2012 had an average maturity of greater than 3 years. The Company has pledged securities consisting of agency residential mortgage backed securities and commercial mortgage backed securities to collateralize its obligation under the repurchase agreements. The carrying value of securities pledged as of both December 31, 2012 and 2011 were $495 million. These securities continue to be accounted for as investments and are reported in bonds. The fair value of these securities as of December 31, 2012 and 2011 were $518 million and $521 million, respectively. As of December 31, 2012 and 2011, the Company's liability under repurchase agreements, including accrued interest, is $501 million and $504 million, respectively, and is reported as a component of borrowed money.

**6. Joint Ventures, Partnerships and Limited Liability Companies**

A. The Company has no investments in joint ventures, partnerships or limited liability companies that exceed 10% of its admitted assets.

B. None.

# NOTES TO FINANCIAL STATEMENTS

**7. Investment Income**

A. The Company stops accruing interest when it determines a bond is in default. All investment income due and accrued that is over 90 days past due is nonadmitted.

B. There was no due and accrued interest excluded from surplus (nonadmitted) in 2012.

**8. Derivative Instruments**

A. Economic hedging of Equity Indexed Annuities:

Option transactions and long and short financial futures mitigate the exposure to equity and market risks associated with the equity-indexed annuity ("EIA") product. To economically hedge the appreciation in obligations under the EIA contracts, the Company purchases call options, purchases financial futures and both purchases and writes knock-in put options. On the purchased calls, the Company pays an initial premium to the counterparty. If the identified index level exceeds the strike price on the expiration date, the Company receives a payment. For purchased financial futures, gains are generated if the market rises above the index level that existed when the contracts were opened and a payment will be received by the Company. A return to the client is locked-in if the index rises above 150% of its initial value and subsequently drops below. If the index level rises above this strike price and subsequently drops below the strike price, a payment is received by the Company on the purchased knock-in puts. If the index level subsequently drops below another identified strike price, the Company is obligated to pay the counterparty on the written knock-in puts.

Economic hedging of Variable Annuity Living Benefits:

Under interest rate swap agreements, the Company contracts with other parties to receive or pay fixed rate interest amounts and pay or receive variable rate interest amounts as calculated on an agreed upon notional amount at specified determination dates.

Under total return swap agreements, the Company contracts with other parties to receive or pay variable interest amounts and pay or receive payments based on the return of an underlying index.

The Company has entered into purchased option contracts on swaps (swaptions) that provide the right but not the obligation, to enter into swap contracts at a future date. The Company may also choose a cash settlement on option expiration date if the option has a positive value as determined by the present value of the underlying swap transaction.

Exchange traded index futures are used to protect the Company in the event of changes in the market indices which impact the liabilities being economically hedged. There is no cash exchanged at the origination of the contract, but cash settles daily over the life of the contract to record the changes to the underlying index.

Purchase put and call index options are used to protect the Company in the event of changes in the market indices which impact the liabilities being economically hedged. The premium associated with certain of these options is paid semi-annually over the life of the option contract, while the rest of the option premiums are paid up front. These contracts are European options. The Company receives a payment at expiration on a call (put) if the value of the underlying index is above (below) the strike price of the option.

The Company enters into credit default swaps and variance swaps on various indices to protect the Company in the events of credit-related or volatility-related impact on the economically hedged liabilities. Variance swaps do not have cash flows at the origination of the contract. Cash paid (received) to enter into credit default swaps is exchanged at the origination of the contract. In addition, periodic (usually quarterly) interest payments are made.

Economic hedging of Indexed Universal Life:

In 2011, the Company began offering indexed universal life ("IUL") insurance. IUL is similar to universal life insurance ("UL") in that it provides life insurance coverage and cash value that increases as a result of credited interest. Also, like UL, there is a minimum guaranteed credited rate of interest. Unlike UL, the rate of credited interest above the minimum guarantee for funds allocated to the indexed account is linked to the S&P 500 Index (subject to a cap). The policyholder may allocate all or a portion of the policy value to a fixed or indexed account. The equity-linked return to investors creates equity price risk as the amount credited depends on changes in equity prices. Most of the proceeds received from IUL insurance are invested in fixed income securities. To hedge the equity exposure, a portion of the investment earnings received from the fixed income securities is used to purchase call spreads which generate returns to replicate what the Company must credit to client accounts.

Credit Risk

The Company is exposed to credit risk in the event of nonperformance by counterparties. The Company monitors credit exposure through established approval procedures. Credit risk exposure is represented by a positive fair value (market value) of contracts at the reporting date. Refer to Schedule DB for additional details.

B. The Company enters into derivative financial instruments to manage exposure to interest rate risk and equity market risk. To manage these exposures, and any related mismatches between assets and liabilities, the Company invests in interest rate swaps, credit default swaps, variance swaps, total return swaps, floors, index options, swap options and financial futures contracts. Option transactions include purchased and written calls, and purchased and written puts and swaptions. The futures transactions are long and short positions resulting from purchases or sale of the futures contracts. The Company holds no derivative instruments for trading purposes.

C. Options, swaptions and swaps that are not part of a hedging transaction are marked to fair value with changes reflected in unrealized gains (losses). Interest earned or paid on swaps is recognized currently in net investment income. Realized gains and losses on the sale of swaps are recorded in earnings.

Futures contracts are stated at the value of any cash deposits that have been made. Futures contracts are marked-to-market daily with changes in market value being paid or received and recorded in unrealized gains (losses). When the futures contracts are closed, the change in value is realized in earnings.

D. The Company's derivative contracts are not part of a designated hedge and therefore have not been monitored for hedge effectiveness. Fair value accounting is used. The following amounts are included in change of unrealized capital gains (losses) for 2012:

| | | |
|---|---|---|
| Swaps | $ | 43,184,760 |
| Futures | | (10,336,911) |
| Options | | (972,515,917) |
| Total | $ | (939,668,068) |

# NOTES TO FINANCIAL STATEMENTS

Dividends paid and received by RiverSource Life were as follows:

| | Years Ended December 31, | |
|---|---|---|
| | 2012 | 2011 |
| | (in millions) | |
| Cash dividends paid to Ameriprise Financial | $ 865 | $ 750 |
| Non-cash dividend paid to Ameriprise Financial | — | 850 |
| Cash dividends received from RiverSource Life of NY | 50 | 79 |
| Cash dividends received from RTA | — | 53 |

During 2012 and 2011, RiverSource Life made cash contributions to RTA of $53 million and $111 million, respectively, for ongoing funding commitments related to affordable housing partnership investments.

In October 2012, the Company purchased $954 million of residential mortgage loans from an affiliate, Ameriprise Bank, FSB. The Company purchased the loans for investment purposes and as part of Ameriprise Financial's initiative to transition Ameriprise Bank, FSB from a federal savings bank to a limited powers national trust bank. The portfolio consists primarily of variable rate revolving loans, and includes both first and second liens. The loans were purchased by the Company at fair value. The purchase price takes into account the credit quality of the loan portfolio resulting in no allowance for loan losses recorded at purchase. The residential mortgage loans are presented net of unamortized discount of $80 million as of December 31, 2012.

D. The amounts for receivables from/payables to affiliates are separately presented on the balance sheet. These amounts will be settled in the ordinary course of business.

Refer to Note 11 – Debt for additional information.

E. The Company has not made any guarantees or undertakings for the benefit of any affiliates or related parties which result in a material contingent exposure of the Company's assets or liabilities.

**12. Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans**

A. Defined Benefit Plans
Not applicable.

B. Defined Contribution Plans
The Company participates in the defined contribution pension plans of Ameriprise Financial which cover all employees who have met certain employment requirements. The Company contributions to the plans are a percent of either each employee's eligible compensation or basic contributions. Costs of these plans charged to operations were $2.0 million and $1.5 million in 2012 and 2011, respectively.

C. Multiemployer Plans
Not applicable.

D. Consolidated/Holding Company Plans
The Company participates in the Ameriprise Financial Retirement Plan which covers all permanent employees age 21 and over who have met certain employment requirements. Employer contributions to the plan are based on participants' age, years of service and total compensation for the year. Funding of retirement costs for this plan complies with the applicable minimum funding requirements specified by the Employee Retirement Income Security Act of 1974, as amended. The Company's share of the total net periodic pension cost was $1.4 million and $1.3 million in 2012 and 2011, respectively.

The Company also participates in the Ameriprise Financial 2005 Incentive Compensation Plan. Employees, directors and independent contractors are eligible to receive incentive awards including stock options, restricted stock awards, restricted stock units, performance shares and similar awards designed to comply with the applicable federal regulations and laws of jurisdiction. The Company's expense for incentive awards was $1.2 million and $1.3 million in 2012 and 2011, respectively.

The Company participates in the defined benefit health care plans of Ameriprise Financial that provide health care and life insurance benefits to retired employees and retired financial advisors. The plans include participant contributions and service- related eligibility requirements. Upon retirement, eligible employees are considered to have been employees of Ameriprise Financial. Ameriprise Financial expenses these benefits and allocates the expenses to its subsidiaries. The Company's allocated share of these plans charged to operations was $(0.2) million and $(0.1) million in 2012 and 2011, respectively.

E. Postemployment Benefits and Compensated Absences
Not applicable.

F Impact of Medicare Modernization Act on Postretirement Benefits (INT 04-17)
Not applicable.

**13. Capital and Surplus, Shareholders' Dividend Restrictions and Quasi-Reorganizations**

(1) The Company has 100,000 shares of common stock authorized, issued and outstanding at year-end. All shares have a $30 par value.

(2) Preferred stock: None.

(3) Dividends in excess of statutory unassigned funds (surplus) require advance notice to the Minnesota Department of Commerce and are subject to potential disapproval. In addition, dividends whose fair market value, together with that of other dividends or distributions made within the preceding 12 months, exceed the greater of (1) the previous year's statutory net gain from operations or (2) 10% of the previous year-end statutory capital and surplus are referred to as "extraordinary dividends." Extraordinary dividends also require advance notice to the Minnesota Department of Commerce, and are subject to potential disapproval. Dividends are not cumulative.

(4) RiverSource Life paid dividends to Ameriprise Financial, as follows:

| 2012 | | 2011 | |
|---|---|---|---|
| | (in millions) | | |
| March 26 | $ 225 * | March 31 | $ 200 |
| May 30 | 325 * | May 16 | 400 |
| September 24 | 190 * | August 25 | 150 |
| December 20 | 125 * | December 19 | 850 * |
| Total | $ 865 | Total | $ 1,600 |

* A portion of these dividends were considered extraordinary.

(5) Within the limitations of item (3) above, there are no restrictions on the portion of the Company's profits that may be paid as dividends.

(6) There are no restrictions on the Company's unassigned funds (surplus) other than the limitations described in item (3) above.

(7) Mutual company advances to surplus – Not applicable.

(8) The Company does not hold any of its own stock or that of its affiliated companies for special purposes.

(9) Special Surplus Funds – None.

(10) The portion of unassigned funds (surplus) represented by cumulative unrealized capital gains (losses) is $(218.9) million unrealized loss.

(11) Surplus Notes – Not applicable.

(12)-(13) Quasi-reorganization's - Not applicable.

**14. Contingencies**

A. Contingent Commitments
In 1981, RiverSource Life guaranteed that it will maintain the capital and surplus of RiverSource Life of NY at or above $3 million, subject to several conditions, in order to secure authorization from the State of New York for the establishment of variable annuity separate account operations by RiverSource Life of NY.

B. Assessments

(1) The Company is required by law to be a member of the guaranty fund association in every state where it is licensed to do business. In the event of insolvency of one or more unaffiliated insurance companies, the Company could be adversely affected by the requirement to pay assessments to the guaranty fund associations. Uncertainty and volatility in the U.S. economy and financial markets in recent years have weakened the financial condition of numerous insurers, including insurers currently in receiverships, increasing the risk of triggering guaranty fund assessments.

The Company projects its cost of future guaranty fund assessments based on estimates of insurance company insolvencies provided by the National Organization of Life and Health Insurance Guaranty Associations ("NOLHGA") and the amount of its premiums written relative to the industry-wide premium in each state. The Company accrues the estimated cost of future guaranty fund assessments when it is considered probable that an assessment will be imposed, the event obligating the Company to pay the assessment has occurred and the amount of the assessment can be reasonably estimated.

# NOTES TO FINANCIAL STATEMENTS

Executive Life Insurance Company of New York ("ELNY") was placed into rehabilitation by a New York state court in 1991. On April 16, 2012, the court issued an order converting the rehabilitation into a liquidation proceeding under a plan submitted by the New York insurance regulator with support from NOLHGA and the industry.

During the second quarter of 2012, the Company established a liability for estimated guaranty fund assessments and a related premium tax asset, primarily associated with ELNY. At December 31, 2012, the estimated liability was $21 million and the related premium tax asset was $16 million. The expected period over which the assessments will be made and the related tax credits recovered is not known. At December 31, 2011, the net liability was not considered material.

| d. | Assets recognized from paid and accrued premium tax offsets and policy surcharges current year | $ 18,397,878 |

C. Gain Contingencies
None.

D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming from Lawsuits.
None.

E. All Other Contingencies
At December 31, 2012, the Company had no material commitments to purchase investments other than mortgage loan fundings.

The Company's annuity and life products all have minimum interest rate guarantees in their fixed accounts. As of December 31, 2012, these guarantees range up to 5.0%.

Insurance companies have been the subject of increasing regulatory, legislative and judicial scrutiny. Numerous state and federal regulatory agencies have commenced examinations and other inquiries of insurance companies regarding sales and marketing practices (including sales to older consumers and disclosure practices), claims handling, and unclaimed property and escheatment practices and procedures. With regard to an industry-wide investigation of unclaimed property and escheatment practices and procedures, the Company is responding to regulatory audits, market conduct examinations and other inquires (including inquiries from the State of Minnesota and a multistate insurance department examination). The Company has cooperated and will continue to cooperate with the applicable regulators regarding their inquiries.

The Company is involved in the normal course of business in a number of other legal and arbitration proceedings concerning matters arising in connection with the conduct of its business activities. The Company believes that it is not a party to, nor are any of its properties the subject of, any pending legal, arbitration or regulatory investigation or proceeding that is likely to have a material adverse effect on its financial condition, results of operations or liquidity. Notwithstanding the foregoing, it is possible that the outcome of any current or future legal, arbitration or regulatory proceeding could have a material impact on results of operations in any particular reporting period as the proceedings are resolved.

Uncertain economic conditions, heightened and sustained volatility in the financial markets and significant financial reform legislation may increase the likelihood that clients and other persons or regulators may present or threaten legal claims or that regulators increase the scope or frequency of examinations of the Company or the insurance industry generally.

**15. Leases**
None.

**16. Information About Financial Instruments With Off-Balance Sheet Risk and Financial Instruments With Concentrations of Credit Risk**
(1) The table below summarizes the notional amounts of the Company's derivatives as of December 31, 2012 and 2011.

| | Assets | | Liabilities | |
|---|---|---|---|---|
| | 2012 | 2011 | 2012 | 2011 |

| d. Total | $ 68,443,115,446 | $ 58,730,796,042 | $ 71,875,203,987 | $ 44,132,880,226 |

Refer to Schedule DB of the Company's Annual Statement for additional detail.

(2) Under exchange-traded futures and options, the Company agrees to purchase or sell a specified number of contracts with other parties and for the futures to post variation margin on a daily basis in an amount equal to the difference in the daily market values of those contracts. The parties with whom the Company enters into exchange-traded futures and options are regulated futures commissions merchants who are members of a trading exchange.

(3) The Company is exposed to credit-related losses in the event of nonperformance by counterparties. The Company monitors credit exposure through established approval procedures. Credit risk exposure is represented by a positive fair value (market value) of contracts at the reporting date. Because exchanged-traded futures and options are affected through a regulated exchange and the futures positions are marked to market on a daily basis, the Company has little exposure to credit-related losses in the event of nonperformance by counterparties to such financial instruments.

(4) The Company is required to furnish collateral for certain derivative contracts. The amount of collateral that is required is determined by the Company and the counterparty and is governed by a negotiated credit support agreement.

The current credit exposure of the Company's derivative contracts is limited to the fair value at the reporting date. Credit risk is managed by entering into transactions with creditworthy counterparties and by obtaining collateral where appropriate and customary. The Company also attempts to minimize its exposure to credit risk using various credit monitoring techniques; 100% of the net credit exposure for the Company from derivative contracts is with investment-grade counterparties.

(1) Represents securities with a fair value of $0.6 million that were transferred to from Level 2 to Level 3 as fair value of these securities is now based on a single non-binding broker quote.

(2) Represents non-agency residential mortgage backed securities with a fair value of $19.3 million that were transferred out of Level 3 to Level 2. The transfers reflect improved pricing transparency of these securities, a continuing trend of increased activity in the non-agency residential mortgage backed security market and increased observability of significant inputs to the valuation methodology.

(3) Represents securities with a fair value of $15.4 million that were transferred to Level 2 as the fair value of the securities are now obtained from a third party service with observable inputs.

(1) Includes securities with a fair value of $12.0 million that were transferred to Level 3 as these bonds are reported at fair value as of December 31, 2011.

(2) Includes securities with a fair value of $10.6 million that transferred out of Level 3 in the third quarter of 2011, as these bonds were no longer reported at fair value. These securities subsequently transferred back into Level 3 with a fair value of $8.6 million as these bonds were reported at fair value as of December 31, 2011.

(3) Includes securities with a fair value of $1.5 million that are no longer reported at fair value as of December 31, 2011.

(4) Represents non-agency residential mortgage backed securities with a fair value of $4.6 million that were transferred out of Level 3 to Level 2 in the fourth quarter of 2011. The transfers reflect improved pricing transparency of these securities, a continuing trend of increased activity in the non-agency residential mortgage backed security market and increased observability of significant inputs to the valuation methodology.

(3) The Company recognizes transfers between levels of the fair value hierarchy as of the beginning of the quarter in which each transfer occurred.

# NOTES TO FINANCIAL STATEMENTS

(4) The Company categorizes its fair value measurements according to a three-level hierarchy. The hierarchy prioritizes the inputs used by the Company's valuation techniques. A level is assigned to each fair value measurement based on the lowest level input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are defined as follows:

Level 1 Unadjusted quoted prices for identical assets or liabilities in active markets that are accessible at the measurement date.
Level 2 Prices or valuations based on observable inputs other than quoted prices in active markets for identical assets and liabilities.
Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

The Company uses valuation techniques consistent with the market and income approaches to measure the fair value of its assets and liabilities. The Company's market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. The Company's income approach uses valuation techniques to convert future projected cash flows to a single discounted present value amount. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs.

The following is a description of the valuation techniques used to measure fair value and the general classification of these instruments pursuant to the fair value hierarchy.

**Bonds and common stocks**
Fair value is based on quoted prices in active markets. If quoted prices are not available, fair values are obtained from third-party pricing services, non-binding broker quotes, or other model-based valuation techniques.

Level 2 bonds include non-agency residential mortgage backed securities and syndicated loans. The fair value of Level 2 bonds is based on a market approach with prices obtained from third-party pricing services. Observable inputs used to value these bonds can include, but are not limited to reported trades, benchmarks yields, issuer spreads and non-binding broker quotes. Level 3 bonds include non-agency residential mortgage backed securities. The fair value of Level 3 bonds is obtained from third party pricing services who use significant unobservable inputs to estimate fair value.

Level 2 common stocks are valued using third-party pricing services. The fair value of Level 3 common stocks is based on a single non-binding broker quote. The underlying inputs used for non-binding broker quotes are not readily available to the Company. In 2011, Level 3 common stocks included certain structured investment vehicles that were valued using discounted cash flow models.

**Derivative assets**
Derivatives that are measured using quoted prices in active markets, such as derivatives that are exchange-traded, are classified as Level 1 measurements. Some options are classified as Level 1. The fair value of derivatives that are traded in less active over-the-counter markets are generally measured using pricing models with market observable inputs such as interest rates and equity index levels. These measurements are classified as Level 2 within the fair value hierarchy and include swaps and the majority of options. The counterparties' nonperformance risk associated with uncollateralized derivative assets was immaterial at December 31, 2012.

**Separate account assets**
The fair value of assets held by separate accounts is determined by the net asset value ("NAV") of the funds in which those separate accounts are invested. The NAV represents the exit price for the separate account. Separate account assets are generally classified as Level 2 as they are traded in principal-to-principal markets with little publicly released pricing information. Separate account assets supporting the Company's modified guaranteed annuities include bonds, for which fair value is obtained from third-party pricing services, non-binding broker quotes or other model-based valuation techniques. Level 2 bonds include residential mortgage backed securities, commercial mortgage backed securities, asset backed securities and municipal and corporate bonds. The fair value of Level 2 bonds is based on a market approach with prices obtained from third-party pricing services. Observable inputs used to value these bonds can include, but are not limited to reported trades, benchmarks yields, issuer spreads and non-binding broker quotes. Level 3 bonds include corporate bonds and commercial mortgage backed securities. The fair value of Level 3 securities is based on a single non-binding broker quote. The underlying inputs used for non-binding broker quotes are not readily available to the Company.

B. Not applicable.

| Separate account liabilities | 352,246,886 | 352,246,886 |

**Bonds**
Fair value is based on quoted prices in active markets. If quoted prices are not available, fair values are obtained from third-party pricing services, non-binding broker quotes or other model-based valuation techniques. Level 1 securities primarily include U.S. Treasuries. Level 2 securities include municipal and corporate bonds, residential mortgage backed securities, commercial mortgage backed securities, asset backed securities, U.S. agency and foreign government securities and syndicated loans. The fair value of these Level 2 securities is based on a market approach with prices obtained from third-party pricing services. Observable inputs used to value these securities can include, but are not limited to, reported trades, benchmark yields, issuer spreads and non-binding broker quotes. Level 3 securities primarily include corporate bonds, non-agency residential mortgage backed securities, commercial mortgage backed securities, asset backed securities and syndicated loans. The fair value of these Level 3 securities is typically based on a single non-binding broker quote. The underlying inputs used for the non-binding broker quotes are not readily available to the Company.

# NOTES TO FINANCIAL STATEMENTS

**Common stocks**
Common stocks include an investment in FHLB shares. The carrying value is considered a reasonable estimate of the fair value, as this represents the stated exit price for this asset. FHLB shares are classified as Level 3 due to restrictions on transfer of shares.

**Cash equivalents**
Cash equivalents include highly liquid investments with original maturities of 90 days or less. Cash equivalents are classified as Level 2 and measured at amortized cost, which is a reasonable estimate of fair value because of the short time between the purchase of the instrument and its expected realization.

**Mortgage loans on real estate**
The fair value of commercial mortgage loans, except those with significant credit deterioration, is determined by discounting contractual cash flows using discount rates that reflect current pricing for loans with similar remaining maturities and characteristics including loan-to-value ratio, occupancy rate, refinance risk, debt-service coverage, location, and property condition. For commercial mortgage loans with significant credit deterioration, fair value is determined using the same adjustments as above with an additional adjustment for the Company's estimate of the amount recoverable on the loan.

The fair value of residential mortgage loans is determined by discounting estimated cash flows and incorporating adjustments for prepayment, administration expenses, severity and credit loss estimates, with discount rates based on the Company's estimate of current market conditions.

Given the significant unobservable inputs to the valuation of mortgage loans, these measurements are classified as Level 3.

**Other invested assets**
At December 31, 2012, the Company reclassified its investments in syndicated loans from other invested assets to bonds. See Note 2 for more information. The fair value of syndicated loans is obtained from a third-party service or non-binding broker quotes. Syndicated loans that are priced by multiple pricing services are classified as Level 2 and syndicated loans priced using a single non-binding broker quote are classified as Level 3.

**Short-term investments**
Short-term investments consist of actively traded money market funds which are measured at their NAV and classified as Level 1.

**Contract loans**
The fair value of contract loans is determined using discounted cash flows and are classified as Level 3 as the discount rate used may be adjusted for the underlying performance of individual policies.

**Future policy benefits**
The fair value of fixed annuities, in deferral status, is determined by discounting cash flows using a risk neutral discount rate with adjustments for profit margin, expense margin, early policy surrender behavior and a provision for adverse deviation from estimated early policy surrender behavior. The fair value of fixed annuities, in payout status, is determined by discounting cash flows using a risk neutral discount rate with adjustments for expense margin. Variable annuity fixed sub-accounts and equity indexed annuities fair value is determined by discounting cash flows adjusted for policyholder behavior. Given the use of significant unobservable inputs to these valuations, these measurements are classified as Level 3.

**Borrowed money**
Borrowed money includes liabilities under repurchase agreements and amounts outstanding under a line of credit with Ameriprise Financial. The fair value of repurchase agreements has been determined from a third-party pricing service and classified as Level 2. The fair value of the line of credit is determined by discounting cash flows, however due to the short-term nature of the line of credit, the carrying value is used as an approximation of the fair value and is classified as Level 3.

**Separate account liabilities**
Certain separate account liabilities are classified as investment contracts and are carried at an amount equal to the related separate account assets. Carrying value is a reasonable estimate of the fair value as it represents the exit value as evidenced by withdrawal transactions between contractholders and RiverSource Life. The fair value of these separate account liabilities is classified as Level 2.

D. Not Practicable to Estimate Fair Value
None.

**21. Other Items**

A. Extraordinary Items
None.

B. Troubled Debt Restructuring: Debtors
Not applicable.

C. Other Disclosures
Assets with a carrying value of $4.6 million and $4.7 million at December 31, 2011 and 2010, respectively, were on deposit with government authorities as required by law. At both December 31, 2012 and 2011, assets in the amount of $1.1 million, were pledged as collateral for bank loans.

D. Uncollectible Accounts
None.

E. Business Interruption Insurance Recoveries
None.

F. State Transferable and Non-transferable Tax Credits
None.

G. Subprime-Mortgage-Related Risk Exposure

(1) Sub-prime mortgage lending is the origination of residential mortgage loans to customers with weak credit profiles. Alt-A mortgage lending is the origination of residential mortgage loans to customers who have credit ratings above sub-prime but may not conform to government-sponsored standards. Prime mortgage lending is the origination of residential mortgage loans to customers with good credit profiles. The Company has exposure to each of these types of loans predominantly through mortgage backed and asset backed securities. The slowdown in the U.S. housing market, combined with relaxed underwriting standards by some originators, has led to higher delinquency and loss rates for some of these investments. Market conditions have increased the likelihood of other-than-temporary impairments for certain non-agency residential mortgage backed securities. As a part of the Company's risk management process, an internal rating system is used in conjunction with market data as the basis of analysis to assess the likelihood that the Company will not receive all contractual principal and interest payments for these investments. For the investments that are more at risk for impairment, the Company performs its own assessment of projected cash flows incorporating assumptions about default rates, prepayment speeds and loss severity to determine if an other-than-temporary impairment should be recognized.

(2) There is no direct exposure to subprime mortgage loans.

Yes ( ) No (X)

2. Have any policies issued by the Company been reinsured with a company chartered in a country other than the United States (excluding U.S. Branches of such companies) that is owned in excess of 10% or controlled directly or indirectly by an insured, a beneficiary, a creditor or an insured or any other person not primarily engaged in the insurance business?
Yes ( ) No (X)

Section 2 – Ceded Reinsurance Report – Part A

1. Does the Company have any reinsurance agreements in effect under which the reinsurer may unilaterally cancel any reinsurance for reasons other than for nonpayment of premium or other similar credits?
Yes ( ) No (X)

2. Does the Company have any reinsurance agreements in effect such that the amount of losses paid or accrued through the statement date may result in a payment to the reinsurer of amounts that, in aggregate and allowing for offset of mutual credits from other reinsurance agreements with the same reinsurer, exceed the total direct premium collected under the reinsured policies?

Yes ( ) No (X)

Section 3 – Ceded Reinsurance Report – Part B

1. What is the estimated amount of the aggregate reduction in surplus, (for agreements other than those under which the reinsurer may unilaterally cancel for reasons other than for nonpayment of premium or other similar credits that are reflected in Section 2 above) of termination of all reinsurance agreements, by either party, as of the date of this statement? Where necessary, the Company may consider the current or anticipated experience of the business reinsured in making this estimate. $0

**31. Reserves for Life Contracts and Annuity Contracts**
(1) The Company waives the deduction of deferred fractional premiums upon the death of the insured and returns any portion of the final premium beyond the date of death. Any surrender values promised in excess of the legally computed reserves are included in Exhibit 5 – aggregated reserves for life contracts ("Exhibit 5") with the basic reserve.

(2) Additional premiums are charged for policies issued on substandard lives according to underwriting classification. The corresponding reserves held on such policies are calculated using the standard reserves plus unearned gross extra premium for policies with a flat extra premium and standard reserve, plus an additional approximate reserve based on multiple reserves for policies issued with multiple table ratings.

(3) As of December 31, 2012, the Company had $12.8 billion of insurance in force for which gross premiums are less than net premiums according to the standard valuation set by the State of Minnesota. Total reserves to cover the above insurance totaled the gross amount of $69.2 million at year-end. These reserves are reported in Exhibit 5 Part 1, Line 0700003. Through coinsurance agreements, $13.1 million of this reserve is ceded to reinsurers.

(4) Tabular interest, tabular less actual reserve released and tabular cost have been determined by formula, as described in the NAIC Instructions.

(5) Actual interest is credited on accounts.

**34. Separate Accounts**

A. Separate Account Activity:

(1) The Company utilizes separate accounts to record and account for assets and liabilities for particular lines of business and/or transactions. For the current reporting year, RiverSource Life reported assets and liabilities from the following product lines/transactions into a separate account:

- Variable life insurance
- Variable annuities
- Modified guaranteed annuities

The separate account classification of the above product lines/transactions is supported by Minnesota Statutes §61A.14.

(2) In accordance with the products/transactions recorded within the separate account, some assets are considered legally insulated whereas others are not legally insulated from the general account. The legal insulation of the separate account assets prevents such assets from being generally available to satisfy claims resulting from the general account. The assets legally insulated from the general account, and those not legally insulated as of December 31, 2012 are attributed to the following products/transactions:

| | Separate Account Assets | |
|---|---|---|
| Product/Transaction | Legally Insulated | Not Legally Insulated |
| Variable life and annuity products | $ 65,608,509,340 | $ — |
| Modified guaranteed annuities | — | 180,557,995 |
| Total | $ 65,608,509,340 | $ 180,557,995 |

(3) Some separate account liabilities are guaranteed by the general account. In accordance with the guarantees provided, if the investment proceeds are insufficient to cover the rate of return guaranteed for the product, the policyholder proceeds will be remitted by the general account.

# NOTES TO FINANCIAL STATEMENTS

As of December 31, 2012 and 2011, the general account of the Company had a maximum guarantee for separate account liabilities of $638.3 million and $2.1 billion, respectively. The amount paid by the general account due to separate account guarantees for the years ending December 31, 2012 and 2011 was $7.6 million and $10.1 million, respectively. To compensate the general account for the risk taken, the separate account paid risk charges as follows for the past five years:

| | | |
|---|---|---|
| a. | 2012 | $305,283,223 |
| b. | 2011 | $253,803,473 |
| c. | 2010 | $199,759,402 |
| d. | 2009 | N/A |
| e. | 2008 | N/A |

(4) RiverSource Life does not engage in securities lending transactions within the separate account.

B. General Nature and Characteristics of Separate Accounts Business

Most separate and variable accounts held by the Company relate to variable annuities and variable universal life insurance of a nonguaranteed return nature. The net investment experience of the separate account is credited directly to the policyholder or contractholder and can be positive or negative. The assets and liabilities of these accounts are carried at fair value.

Some of the separate account business is of a modified guaranteed annuity type and some of the variable annuities offer a modified guaranteed annuity fixed investment option. A policyholder selects a guarantee duration and is then credited a rate for that duration. If the policyholder surrenders the policy during the period of the guarantee, a market value adjustment is applied. These modified guaranteed annuity reserves are reported in Exhibit 3 of the Separate Account Annual Statement. This business has been included in columns 2 and 3 of the following table.

Many of the variable annuity contracts provide a guaranteed death benefit approximately equal to the maximum of the account value, premium paid, or the account value as of the most recent 6th contract anniversary. Other optional death benefits include maximum anniversary account value, rising floor, reset ratchet and gain gross up. All of the death benefits are adjusted for partial withdrawals. The cost for these additional death benefits is priced into the product or added for a separate fee via a rider.

The Company also sells products with guaranteed living benefits. These include guaranteed minimum withdrawal benefit for life and guaranteed minimum accumulation benefit. Clients who purchase these benefits are invested in a fund (the Columbia VP Managed Volatility Fund) designed to mitigate exposure to market volatility. In 2007, the Company ceased offering contracts with guaranteed minimum income benefit provisions.

The majority of the Company's guaranteed living benefits in force are guaranteed minimum withdrawal benefits for life. Benefit percentages range from 2.75% to 7% of the benefit base. Waiting periods apply for most withdrawal benefit guarantees and can include a step-up and roll-up feature. All living benefits are added as a separate rider with an additional fee. Variable annuity guaranteed benefit reserves are reported in Exhibit 5, Line 0700004.

Variable life insurance products inforce are single premium variable life and variable universal life. Variable life insurance guaranteed benefits are limited to minimum guaranteed death benefits. For current products, these last for the longer of 10 years and attained age 75. These guarantees are subject to minimum premium payments. These guaranteed benefit reserves are reported in Exhibit 5, Line 0700002.

All non-modified guaranteed annuities and life insurance have been included in column 4 of the table below.
