### Fund Performance & Lipper Ranking

As of September 30, 2008

Source of Data: Lipper

### Important Disclosures

*Rankings based on annualized total returns, excluding sales charges. Net asset value (NAV) returns for all periods would have been lower if the applicable sales charges were included.*

*Please note the following about the "Ranking since" Lipper Rankings: In order to obtain a more accurate "since inception" Lipper Ranking for funds with an inception prior to 2000, the Thursday or month-end date following the actual inception date was used, rather than the actual inception date. When researching since inception rankings, please use the "Ranking Since" date.*

*Please note the following about the "Annualized Returns @ POP": The POP return is calculated assuming a one-time purchase of the Fund at the maximum sales charge listed in the exhibit. RiverSource S&P 500 Index Fund has no sales loads, however, a redemption fee of 0.50% is charged on shares redeemed within 180 days of purchase.*

*Net assets per fund include all share classes. Assets for RiverSource Portfolio Builder Funds, RiverSource Income Builder Funds and RiverSource Retirement Plus Funds are invested in other RiverSource Funds and therefore would be double counted if assets are summed to reach a total.*

*Fee waivers were in place for each subadvised fund shown and the return would have been lower for each Fund had fee waivers not been in place.*

***An investment in money market funds is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although these funds seek to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in these funds.***

***You should consider the investment objectives, risks, and charges and expenses of mutual funds carefully before investing. *The RiverSource Global Technology Fund is a narrowly focused sector fund and it may exhibit higher volatility than funds with broader investment objectives.*

*Investments in small- and mid-capitalization companies often involve greater risk and potential volatility than investments in larger, more established companies.*

*The RiverSource Precious Metals Fund is a narrowly focused sector fund and it may exhibit higher volatility than funds with broader investment objectives.*

*The RiverSource Real Estate Fund is a narrowly focused sector fund and it may exhibit higher volatility than funds with broader investment objectives. An investment in a real estate fund is subject to the same risks as a direct investment in real estate. Such risks include market risk, economic risk and mortgage rate risk.*

*International investing involves increased risk and volatility, not typically associated with domestic investing, due to changes in currency exchange rates, foreign government regulations, differences in auditing and accounting standards, potential political and economic instability, limited liquidity and volatile prices. The risks of international investing are particularly significant in emerging markets.*

*There are risks associated with an investment in a bond fund, including the impact of interest rates, credit and inflation. These and other risk considerations are discussed in the fund's prospectus. In general, bond prices rise when interest rates fall and vice versa. This effect is usually more pronounced for longer-term securities. Non-investment grade securities, commonly called "high-yield" or "junk" bonds, generally have more volatile prices and carry more risk to principle and income than investment grade securities.*

*High yield funds invest in lower-rated bonds, which generally have more volatile prices and carry more risk to principal and income than investment grade securities.*

*Principal risks associated with the RiverSource Inflation Protected Securities Fund include style risk, interest rate risk, market risk, credit risk, liquidity risk and sector/concentration risk. Treasury Inflation Protected Securities (TIPS) are backed by the full faith and credit of the U.S. government. The U.S. government guarantee applies only to the underlying TIPS securities, and not the Fund itself.*

*Income from tax-exempt funds may be subject to state and local taxes, and a portion of income may be subject to the federal and/or state alternative minimum tax for certain investors. Federal income tax rules will apply to any capital gains distribution.*

### Important Disclosures - continued

*Shares of the RiverSource Short Duration U.S. Government Fund and the RiverSource U.S. Government Mortgage Fund are not insured or guaranteed by the U.S. government.*

*The Floating Rate Fund invests primarily in floating rate loans, the market value of which may fluctuate, sometimes rapidly and unpredictably. The principal risks of investing in the fund include liquidity risk, interest rate risk, credit risk, counterparty risk, highly leveraged transactions risk, derivatives risk, confidential information access risk, and impairment of collateral risk. Generally, when interest rates rise, the prices of fixed income securities fall, however, securities or loans with floating interest rates can be less sensitive to interest rate changes, but they may decline in value if their interest rates do not rise as much as interest rates in general. Limited liquidity may affect the ability of the fund to purchase or sell floating rate loans and may have a negative impact on fund performance. The floating rate loans and securities in which the fund invests generally are lower-rated (non-investment grade) and are more likely to experience a default, which results in more volatile prices and more risk to principal and income than investment grade loans or securities. See the Fund's prospectus for information on these and other risks associated with the Fund.*

*The RiverSource Portfolio Builder Funds, RiverSource Income Builder Funds and RiverSource Retirement Plus Funds are "funds of funds" comprised of holdings in several different RiverSource funds, which may include small cap, mid cap, large cap, money market, international, bond and/or other sector funds. Specific risk considerations are discussed in each fund's prospectus. Each of the underlying funds in which the portfolio invests has its own investment risks, and those risks can affect the value of each portfolio's shares and investments. See each fund's prospectus for specific risks that may be associated with the underlying funds.*
