News Release

JON C. WEAVER

Staff Vice President System Operations

Jon Weaver is responsible for critical operational systems including the System Operations Control Center, planning/engineering and emergency procedures. He has led ExpressJet to a greater than 99 percent controllable completion factor and helped ExpressJet become a leader with one of the best rankings for the industry's fewest carrier-caused delays.

Beginning as a ramp serviceman with United Airlines in 1978, Jon rose swiftly to station/city manager roles with Sun West, Pioneer and Trans-Colorado Airlines. After joining Continental Airlines/Rocky Mountain Airways in 1987, he was promoted from Manager of Dispatch, to Director System Control, Senior Director System Operations, and in 2004, to his current role. Among many career accomplishments, Jon helped to launch Continental Express by spearheading the merger of three regional, manually operated airlines into a single, state-of-the-art system operations control center.

A graduate of the University of Colorado, where he focused on Climatology, Jon is an FAA Certified Aircraft Dispatcher and FAA Certified Private Pilot as well as a National Weather Service Certified Weather Observer.
