SUCAMPO PHARMACEUTICALS, INC.

Corporate Fact Sheet

About Us

Sucampo Pharmaceuticals is a specialty biopharmaceutical company focused on the development and commercialization of. drugs based on prostones, which are bio-lipids that occur naturally in the human body. In January 2006, the FDA approved Sucampo's first product, AMITIZA® (lubiprostone), (24 mcg) for Chronic Idiopathic Constipation in adults and in April 2008 approved the product for Irritable Bowel Syndrome with Constipation (8 mcg). The company is marketing AMITIZA® (lubiprostone) 24 mcg for CIC in adults and 8mcg for IBS-C in women 18 years of age and older, and is developing the drug for additional gastrointestinal disorders with large potential markets. In addition, the company has a robust pipeline of compounds with the potential to target underserved diseases affecting millions of patients worldwide.

AMITIZA®: A New Medicine for Chronic Constipation

amitiza lubiprostone

AMITIZA® (lubiprostone) is Sucampo's FDA-approved drug for the treatment of chronic idiopathic constipation in adults of all ages. AMITIZA is the #1 branded prescription product for chronic idiopathic constipation. AMITIZA was launched in the United States in April 2006, and is co-marketed by Sucampo's institutional sales force and partner, Takeda Pharmaceutical Company Limited. Our national TV advertising campaign for AMTIZA *"Move to AMITIZA"* is currently on-going. Look for it on local stations.

Established Sales Force Infrastructure

Sucampo has an established sales force that focuses on the institutional and long-term care markets. Sucampo has been recognized as a top 20 pharmaceutical company in promoting to the U.S. nursing home market in a spring 2007 survey by Verispan, alongside other global pharmaceutical companies. Our strategy to target the long-term care market with products to treat diseases affecting an aging population complements our focus of treating particular indications in the elderly population.

Focused Growth Strategy

- Expand the U.S. market for AMITIZA
- Develop and commercialize AMITIZA for additional indications
- Pursue approval and marketing of AMITIZA and other candidates in Europe and Asia-Pacific
- Focus resources for our core discoveries and clinical development and commercialization activities
- Grow through strategic acquisitions and in-licensing opportunities
- Develop and commercialize pipeline of additional prostone-based compounds

Pipeline Builds on our Core Prostone Technology

Sucampo is building a pipeline of clinical candidates designed to leverage the strength of its discovery and development experience with prostones. Additional compounds in development include:

• **Cobiprostone (SPI-8811)** for the treatment of ulcers induced by non-steroidal anti-inflammatory drugs, or NSAIDs, portal hypertension, non-alcoholic fatty liver disease, and disorders associated with cystic fibrosis and chronic obstructive pulmonary disease.

• **SPI-017** for the treatment of peripheral arterial and vascular disease and central nervous system disorders. Sucampo is working on the development of an intravenous formulation of SPI-017 for the treatment of peripheral arterial disease, and developing an oral formulation of SPI-017 for the treatment of Alzheimer's disease.
