

Operating facilities in the country since 2001

12 generation plants

933 MW generation capacity

1 integrated utility serving more than 528,000 customers

More than 2,500 AES people working in Cameroon

AES SONEL provides power to the country of Cameroon. As an integrated utility, it both generates power and distributes it to over 528,000 customers in the country.

Since AES acquired the company in 2001, AES SONEL has steadily improved and expanded the electricity generation, transmission and distribution system across Cameroon. As part of these efforts, AES SONEL recently announced plans to expand its electricity network, more than doubling the number of people it serves over the next 15 years and extending its network to previously unserved parts of the country. The company expects to add approximately 750,000 new electricity connections throughout the country by 2021 by adding approximately 50,000 new electricity connections each year over the next 15 years. The company also plans to upgrade its existing transmission, distribution and generation facilities. The improvements are part of an amended concession agreement AES SONEL reached with the Government of Cameroon in December 2006. The company secured a \$340 million (€260 million) financing package—one of the largest ever provided to a privatized utility in sub-Saharan Africa—to finance a majority of these system improvements.

In 2004, AES SONEL constructed an 85 MW thermal power plant, called Limbé, to decrease the country's traditional dependence on hydroelectric power. Limbé has increased available generating capacity in the dry season by approximately 20%.

As a result of AES SONEL's efforts, Cameroon's growing economy now enjoys a whole new level of service reliability—and more of its people from every walk of life can reap the benefits of steady electric power.

Forward Looking Statements: Financial information in this fact sheet is in summary form. The complete financial statements and notes are filed in the Company's Form 10-K for the year ended December 31, 2005, as well as our other Securities and Exchange Commission (SEC) filings, and should be read in conjunction with this fact sheet. Copies of these filings can be obtained from our website at www.aes.com, or from the SEC's website at www.sec.gov. Also, certain statements in this fact sheet may constitute "forward-looking statements" as defined by the SEC. Such statements are not historical facts, but are predictions about the future that inherently involve risks and uncertainties, and these risks and uncertainties could cause our actual results to differ from those contained in the forward-looking statements. In addition, AES disclaims any obligations to update any forward-looking statement to reflect events or circumstances after the date hereof. We urge investors to read our descriptions and discussions of these risks that are contained under the section "Risk Factors" in the Company's most recent Form 10-K as noted above.
