

Security for the Real World

Barclays Global Technology Conference San Francisco, CA December 7, 2011

Forward Looking Statements

Forward Looking Statements

This presentation contains forward-looking statements. These statements relate to future events or to future financial performance and involve known and unknown risks, uncertainties, and other factors that may cause our actual results, levels of activity, performance, or achievements to be materially different from any future results, levels of activity, performance, or achievements expressed or implied by these forward-looking statements. In some cases, you can identify forward-looking statements by the use of words such as "may," "could," "expect," "intend," "plan," "seek," "anticipate," "believe," "estimate," "predict," "potential," or "continue" or the negative of these terms or other comparable terminology. You should not place undue reliance on forward-looking statements because they involve known and unknown risks, uncertainties and other factors that are, in some cases, beyond our control and that could materially affect actual results, levels of activity, performance, or achievements.

Other factors that could materially affect actual results, levels of activity, performance or achievements can be found in Sourcefire's Form 10-Q for the quarter ended September 30, 2011, filed with the Securities and Exchange Commission on November 3, 2011. If any of these risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may vary significantly from what we projected. Any forward-looking statement you see or hear during this presentation reflects our current views with respect to future events and is subject to these and other risks, uncertainties, and assumptions relating to our operations, results of operations, growth strategy, and liquidity. We assume no obligation to publicly update or revise these forward-looking statements for any reason, whether as a result of new information, future events, or otherwise.

Can You Really Build A Company Around This?

Forbes

America's 25 Fastest-Growing Tech Companies

February 16, 2011

15	Sourcefire	Security Systems Services
16	Apple	Computer Hardware/ Software
17	Google	Internet Software/ Services
18	Gilead Sciences	Biological Prod's Not Diagnostic
19	Red Hat	Prepackaged Software

\$130.6

Award-winning Performance

NSS Labs Testing

- § 11 Network IPS vendors evaluated
- § 1,179 live exploits
- § No cost to participate

Sourcefire Test Results

- § #1 in detection
- § #1 in performance
- § #1 in vulnerability coverage
- § 100% evasion free

"This is the second year in a row that Sourcefire blocked the most attacks of all products."

- NSS Labs Test Report

GARTNER IPS 2010 Magic Quadrant

Challengers Leaders McAfee HP Cisco • Sourcefire • IBM Juniper StoneSoft • TopLayer Radware Nitro Security • CheckPoint _ StillSecure Deep Nines • Enterasys

Sourcefire has been a leader in the Gartner IPS Magic Quadrant since 2006.

Ability to Execute

Visionaries

Sourcefire is Trusted Security

- § In business for over 10 years
- § Security from network to endpoint
- § Protecting 2500+ organizations in over 180 countries
- § Innovative: 41 patents, awarded & pending
- § World-class security research
- § Open source projects
 - ► Snort[®], ClamAV[®], Razorback[®]

Worldwide and Growing

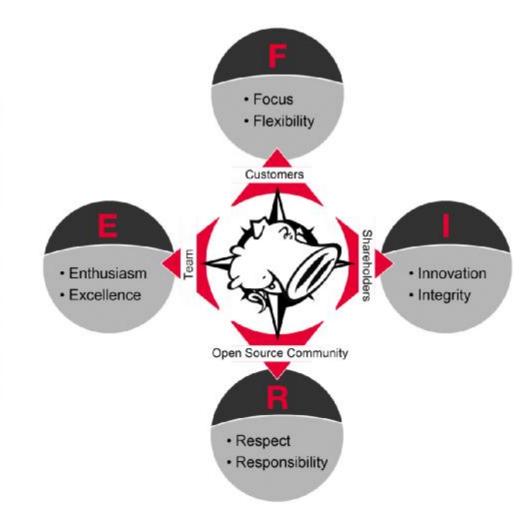

Firemen Vision, Mission, and Principles

Vision

Security for the Real World

Mission

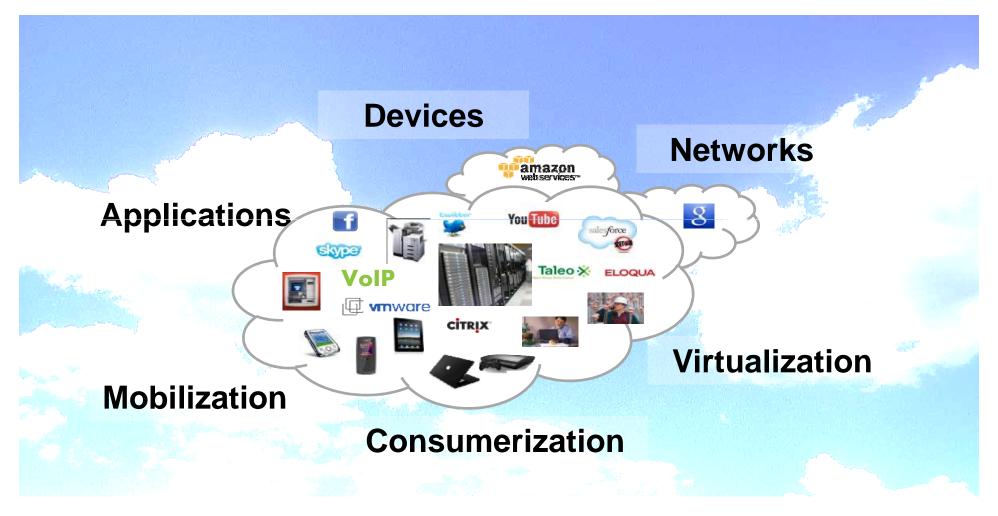

To be the leading provider of intelligent cybersecurity solutions for the enterprise

IT Environments are Changing Rapidly

Threats are Increasingly Complex

Targeted | Organized Relentless | Innovative

Threats Change — Security Products Cannot

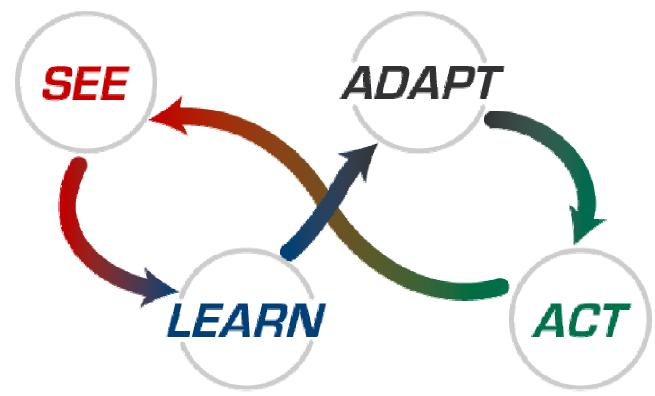

What the World Needs is...

Agile Security

...a continuous process to respond to continuous change

Sourcefire's Agile Security

Traditional Security

SOURCE fire

Closed / Blind

Intelligence about your environment

Black Box / Inflexible

Automated correlation & collective intelligence

Static Defenses

Automated tuning & custom fit security

Human Intensive

Automation / Real-time & right-time

How Sourcefire Delivers Agile Security

MANAGEMENT

IPS | NGIPS | NGFW | SSL

ENDPOINT

Advanced Malware Protection

Cutting Edge Technologies for Comprehensive Protection

Next Generation Security Platforms

Single platform, with single pass engine, providing the benefits of a converged infrastructure... ... and the benefits of Agile Security

Advance Malware Protection

Applies big data analytics to fight threats missed by other security layers

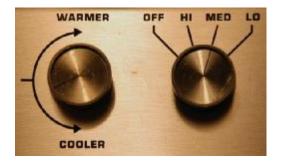

§ Visibility

- Cloud-based, real time
- Root cause analysis
- Identification of "Patient 0"

§ Control

- Custom signatures
- Retrospective remediation
- Outbreak control

Expanding our Addressable Market

Network IPS: \$2.1 billion

Next-Gen Firewall: \$4.8 billion

Endpoint Protection: \$3.3 billion

Addressable Market: \$10.2 billion
