

**ENTROPIC COMMUNICATIONS, INC.**  
**Non-GAAP Supplemental Financial Information**  
**(Unaudited; in thousands, except percentage data)**

The following table sets forth certain non-GAAP financial measures used in calculating Entropic's non-GAAP net income for the periods presented. Such non-GAAP financial measures are based upon Entropic's unaudited consolidated statements of operations for the periods presented and give effect to certain adjustments identified in the table. The presentation of such non-GAAP financial measures is not intended to be considered in isolation or as a substitute for, or superior to, the financial information prepared and presented in accordance with GAAP. In addition, investors should not rely on the results of prior periods as an indication of Entropic's future performance.

(1) The Company's non-GAAP net income per share is calculated using the cash tax rate of 7%. The estimated cash tax rate is the estimated tax payable on the Company's tax returns as a percentage of estimated annual non-GAAP pre-tax net income. The Company uses an estimated cash tax rate to adjust for the historical variation in the effective book tax rate associated with the reversal of valuation allowances, the utilization of research and development tax credits, and the utilization of loss carryforwards which currently have an overall effect of reducing taxes payable. The Company believes that the cash tax rate provides a more transparent view of the Company's operating results. The Company's effective tax rate used for the purposes of calculating GAAP net income for the first quarter of 2011 was approximately 35%.
