

Dahlman Rose & Co.  
Metals, Mining & Materials Conference  
Wednesday, November 17, 2010

John Seaberg  
*Vice President - Investor Relations*

# Cautionary Statement

This presentation contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which are intended to be covered by the safe harbor created by such sections and other applicable laws. Such forward-looking statements include, without limitation: (i) estimates of future equity gold and equity copper production; (ii) estimates of future costs applicable to sales; (iii) estimates of future capital expenditures; (iv) statements regarding potential ounces or tons, reserves, resources and NRM; and (v) expectations regarding the exploration potential, development opportunity, ramp-up, growth, mine life, estimate of first production, potential average annual production, estimated average CAS, expected initial CapEx and other financial outlook of the Company’s operations and projects, including, without limitation, Boddington, Batu Hijau, Ahafo, Akyem, Subika Expansion, Conga, Nimba, Hope Bay, Elang, as applicable. Estimates or expectations of future events or results are based upon certain assumptions, which may prove to be incorrect. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company’s projects being consistent with current expectations and mine plans; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as other the exchange rates being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels; and (vii) the accuracy of our current mineral reserve and mineral resource estimates. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, such statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by the “forward-looking statements”. Such risks include, but are not limited to, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, political and operational risks in the countries in which we operate, and governmental regulation and judicial outcomes. For a more detailed discussion of such risks and other factors, see the Company’s 2009 Annual Report on Form 10-K, filed on February 25, 2010, with the Securities and Exchange Commission, as well as the Company’s other SEC filings. The Company does not undertake any obligation to release publicly revisions to any “forward-looking statement,” including, without limitation, financial outlook, to reflect events or circumstances after the date of this presentation, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws. Investors should not assume that any lack of update to a previously issued “forward-looking statement” constitutes a reaffirmation of that statement. Continued reliance on “forward-looking statements” is at investors' own risk.

# Investing in Newmont

## Consistently Delivering Operational Execution, Gold Price Leverage and Project Development

### 1. Execution

*Operational excellence and strong track record*

### 2. Cash Flow

*Superior operating and free cash flow generation TODAY*

### 3. Flexibility

*Strong balance sheet to fund internal development and strategic opportunities*

### 4. Optionality

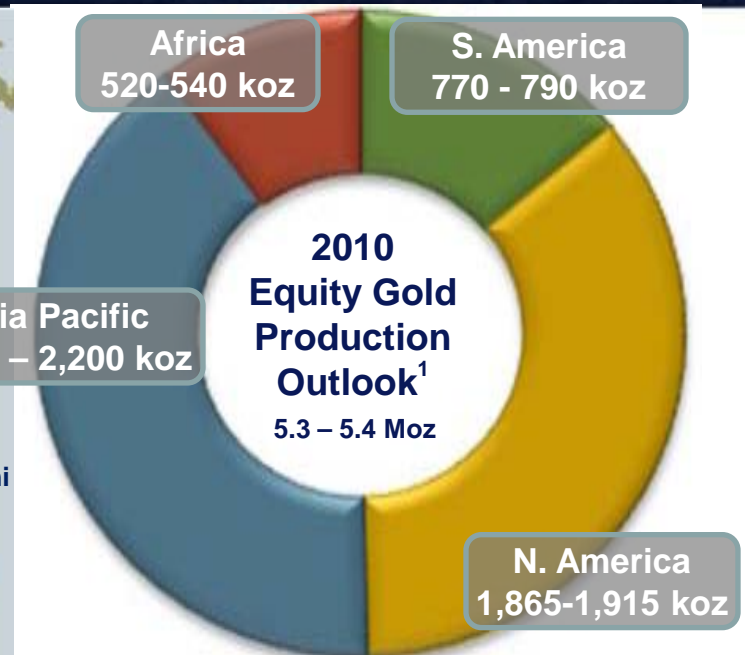

*Robust pipeline of development opportunities*

### 5. Leadership

*Leading sustainability, community relations and human resource development practices*

# Recent Performance and Full Year Outlook

	Q3 2010	Q3 2009	Change
Equity Gold Production (Moz)	1.408	1.326	▲ 6%
Gold CAS (\$/oz)	\$477	\$404	▲ 18%
Major Project CapEx (\$M)	\$120	\$287	\$167
Sustaining CapEx (\$M)	\$242	\$139	\$103

<sup>1</sup>Refer to slide 289 for cautionary statement regarding outlook  
 Newmont Mining Corporation

# Q3 2010 Operating and Financial Highlights

	<u>Q3 2010</u>	<u>Q3 2009</u>	<u>Q3 2010 v Q3 2009</u>
<b>Revenue (\$M)</b>	\$2,597	\$2,049	 27%
<b>Equity Gold Production (Moz)</b>	1.408	1.326	 6%
<b>Gold CAS (\$/oz)</b>	\$477	\$404	 18%
<b>Gold Operating Margin (\$/oz)<sup>1</sup></b>	\$744	\$560	 33%
<b>Equity Copper Production (Mlbs)</b>	83	64	 30%
<b>Copper CAS (\$/lb)</b>	\$0.73	\$0.50	 46%
<b>Copper Operating Margin (\$/lb)<sup>2</sup></b>	\$2.56	\$2.30	 11%
<b>Adj. Net Income per share (\$)<sup>3</sup></b>	\$1.08	\$0.79	 37%

<sup>1</sup> Gold operating margin calculated as average realized gold price per ounce, less gold cost applicable to sales per ounce, divided by average realized gold price per ounce

<sup>2</sup> Copper operating margin calculated as average realized copper price per pound, less copper cost applicable to sales per pound, divided by average realized copper price per pound

<sup>3</sup> Refer to slide 27 for reconciliation to GAAP net income attributable to Newmont stockholders

# Industry Leading Cash Flow per Share Generation

Operating Cash Flow (\$ Millions)

Q3 Operating Cash Flow per Share<sup>1</sup>

OCF per Share	Q1 2010	Q2 2010	Q3 2010
NEM	\$1.46	\$1.53	\$1.74

<sup>1</sup>Source for chart: Bloomberg. Calculated as Cash Flow from Operations, divided by average basic number of shares outstanding

# Q3 2010 Regional Operations Update: North America

Headframe at Leeville

- Higher Leeville throughput nearly offset impact from completion at Deep Post in 2009
- CAS increase from lower production resulting from Gold Quarry slope failure
- CapEx increase related to Hope Bay infrastructure and development at Turf/Leeville

	Q3 2010	Q3 2009	Change
Gold Production (koz)	495	510	▼ 3%
Gold CAS (\$/oz)	\$565	\$532	▲ 6%
Major Project CapEx (\$M)	\$50	\$2	\$48
Sustaining CapEx (\$M)	\$84	\$57	\$27

# Q3 2010 Regional Operations Update: South America

- Mine sequencing caused lower leach tons placed
- Advancing Chaquicocha pit, seeing higher gold grades
- Commercial production began at La Zanja in September 2010

	Q3 2010	Q3 2009	Change
Gold Production (koz)	187	280	▼ 33%
Gold CAS (\$/oz)	\$420	\$294	▲ 43%
Major Project CapEx (\$M)	\$43	\$5	\$38
Sustaining CapEx (\$M)	\$41	\$27	\$14

# Q3 2010 Regional Operations Update: Asia Pacific

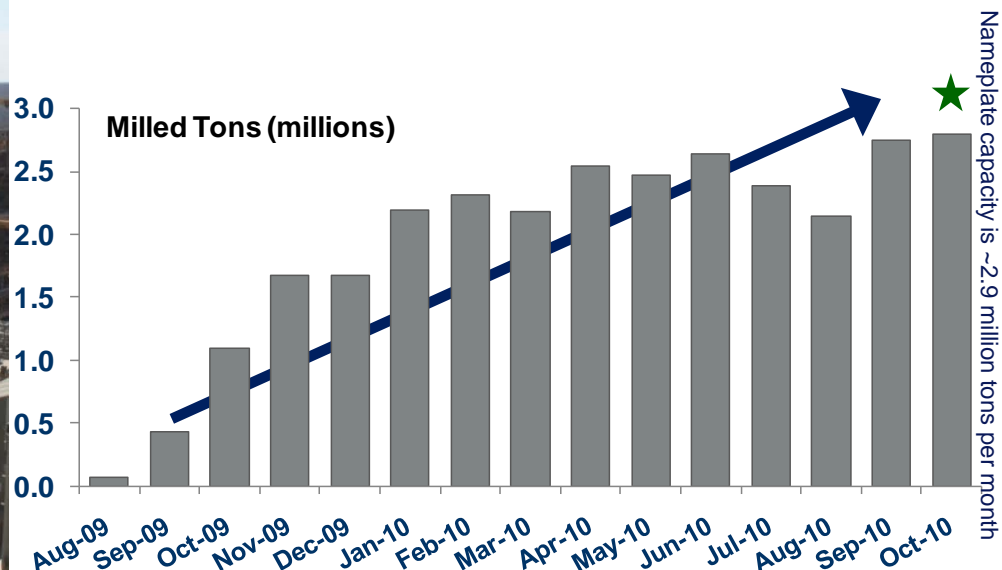

- Ramp-up at Boddington continues
- Batu Hijau dry season uncharacteristically wet
- Higher grades, throughput and recoveries at KCGM and Tanami

	Q3 2010	Q3 2009	Change
Gold Production (koz)	570	389	 47%
Gold CAS (\$/oz)	\$451	\$380	 19%
Copper Production (Mlbs)	83	64	 30%
Copper CAS (\$/lb)	\$0.73	\$0.50	 46%
Major Project CapEx (\$M)	\$0	\$277	\$277
Sustaining CapEx (\$M)	\$88	\$36	\$52

# Boddington Update, Ramp-up Continues

Dry Plant at Boddington

		Q3 2010	Q2 2010	Q1 2010	Q4 2009
Production	Gold (Koz)	180	184	158	118
	Copper (Mlbs)	14	15	14	10
CAS (\$/oz)	Co-product	\$617	\$582	\$532	\$468
	By-product <sup>1</sup>	\$487	\$503	\$436	\$352

<sup>1</sup> Refer to slide 28 for reconciliation of Co-Product Costs Applicable to Sales to By-Product Costs Applicable to Sales

# Q3 2010 Regional Operations Update: Africa

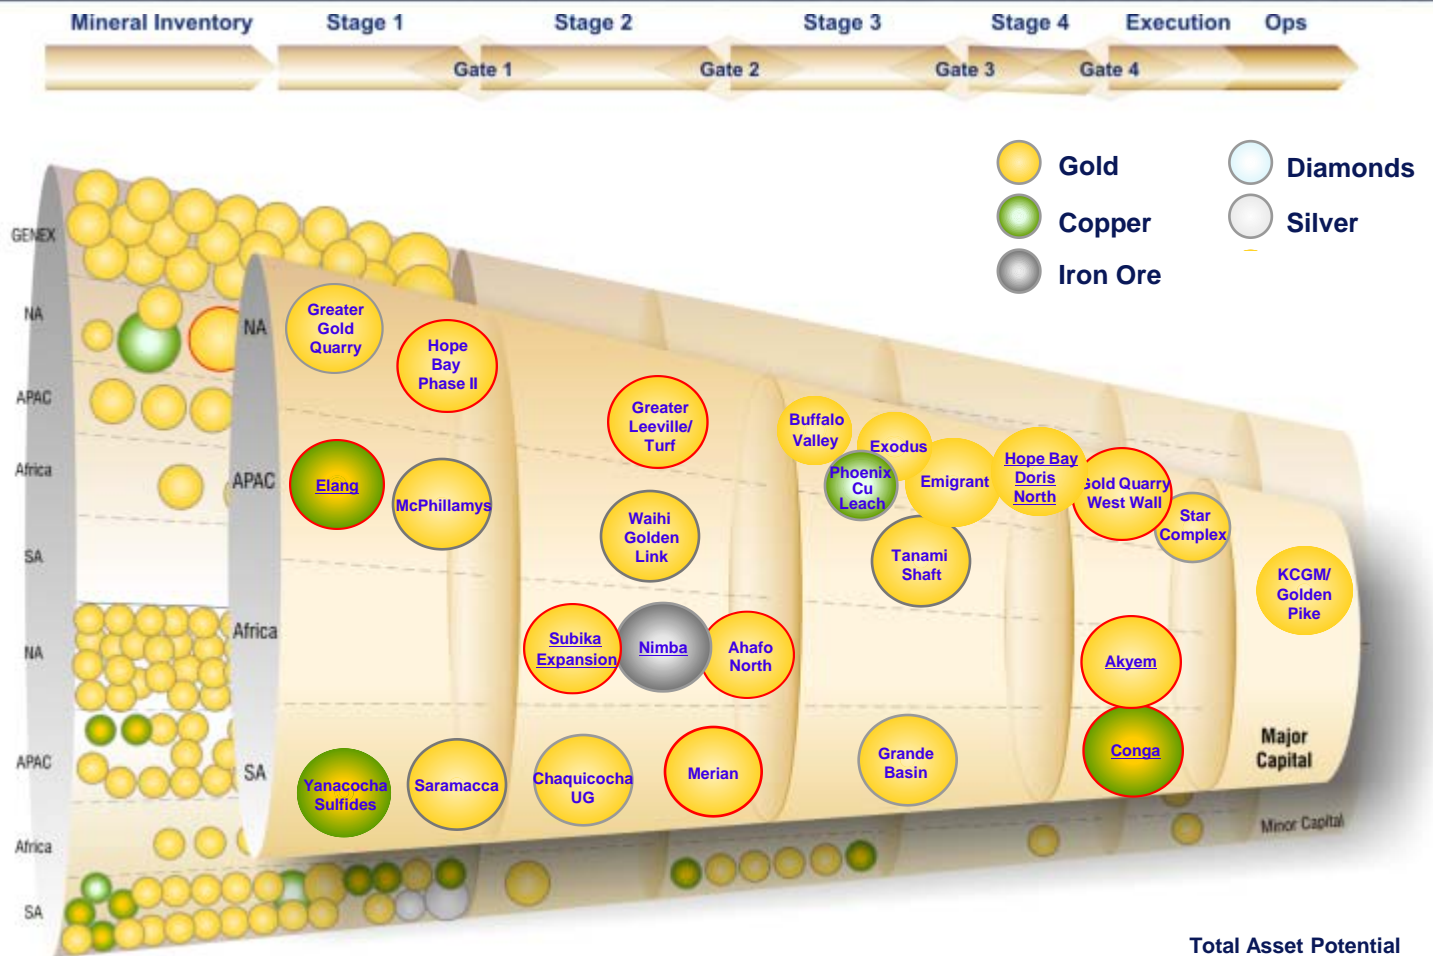

Conveyor at Ahafo

- Benefited from higher grades and recoveries
- Improved mill throughput from processing more oxide ore
- Amoma Pit began commercial production on October 1

	Q3 2010	Q3 2009	Change
Gold Production (koz)	156	145	 8%
Gold CAS (\$/oz)	\$422	\$446	 5%
Major Project CapEx (\$M)	\$27	\$3	\$24
Sustaining CapEx (\$M)	\$29	\$19	\$10

# Project Pipeline

# Akyem: Our Second Major Gold Project in Ghana with Potential to Double Production in the Region

# Akyem: Project Overview

## Highlights:

- Current potential of 8-9 Moz Au, with 7.7 Moz in Reserves and 0.7 Moz in NRM<sup>1</sup>
- Potential average annual production (1<sup>st</sup> five years): 400-500 koz
- Estimated average CAS (1<sup>st</sup> five years)<sup>2</sup>: \$425-\$550/oz
- Expected initial CapEx<sup>3</sup>: \$0.7-\$1.0 Billion

## Status:

- Moving towards completion of detailed engineering by end of 2010
- Optimizing capital and operating costs
- Land access activities in progress
- Major process equipment procured
- Continue to expect first production late 2013 - 2014

<sup>1</sup> Reserves and NRM as of 12/31/09. See slides 31-33 for further information regarding NRM

<sup>2</sup> All figures are unescalated and based upon current business plan assumptions

<sup>3</sup> Excluding capitalized interest and sunk costs

# Subika Expansion: Promising Underground Development Project that will Increase Production and Mine Life at Ahafo

# Subika Expansion: Project Overview

## Highlights:

- Current potential of up to 9 Moz Au, with 2.7 Moz in Reserves and 3.1 Moz in NRM<sup>1</sup>

## Status:

- Exploration decline advancing; currently at ~1,050 meters
- Began stockpiling ore
- Working to complete operating permit
- Development progressing in favorable ground and hydrological conditions
- Ore body open at depth/strike

<sup>1</sup> Reserves and NRM as of 12/31/2009

# Nimba: World Class Iron Ore Joint Venture Project with BHP Billiton

# Nimba<sup>1</sup>: Project Overview

## Highlights:

- Current potential of up to ~1.3 B tons<sup>2</sup> of iron ore

## Status:

- Working with Governments of Liberia and Guinea on transport agreements
- Implementing industry leading environmental and social programs
- Working with Government of Guinea to amend mining convention
- Exploration in neighboring concessions indicates upside in magnetite resource potential
- Pre-feasibility study expected to begin by mid-2011

<sup>1</sup> Newmont's current interest in Euronimba Limited is 43.5%, BHP Billiton interest is 43.5% and Areva has 13%.

<sup>2</sup> None currently in Reserves or NRM

# Conga: A World Class Gold and Copper Project Extending Yanacocha's Mine Life for Decades

# Conga<sup>1</sup>: Project Overview

## Highlights:

- Current potential of 15-20 Moz Au (11.8 Moz in Reserves, 3.1 Moz in NRM) and 4-6 Blbs Cu (3.2 Blbs in Reserves, 0.9 Blbs in NRM)<sup>2</sup>
- Potential average annual production (1<sup>st</sup> five years): 650-750 koz Au, 160-210 Mlbs Cu
- Estimated average CAS (1<sup>st</sup> five years)<sup>3</sup>: \$300-\$400/oz Au; \$0.95-\$1.25/lb Cu
- Expected initial CapEx<sup>4,5</sup>: \$2.5-\$3.5 Billion

## Status:

- Environmental Impact Assessment approval received
- Construction planning underway
- Procured mill engineering, camp buildings, and treatment plants
- Contract awarded for early road works, contractor mobilized
- Community relations and environmental work ongoing

<sup>1</sup> All figures are based on 100% equity interest; Newmont's current interest is 51.35%

<sup>2</sup> Reserves and NRM as of 12/31/09

<sup>3</sup> Assumes permits received by end of 2010

<sup>4</sup> All figures are unescalated and based upon current business plan assumptions

<sup>5</sup> Excluding capitalized interest and sunk costs

# Hope Bay: 80km Greenstone Belt in a AAA-rated Jurisdiction

# Hope Bay: Project Overview

## Highlights:

- Current potential of up to 9 Moz Au<sup>1</sup>

## Status:

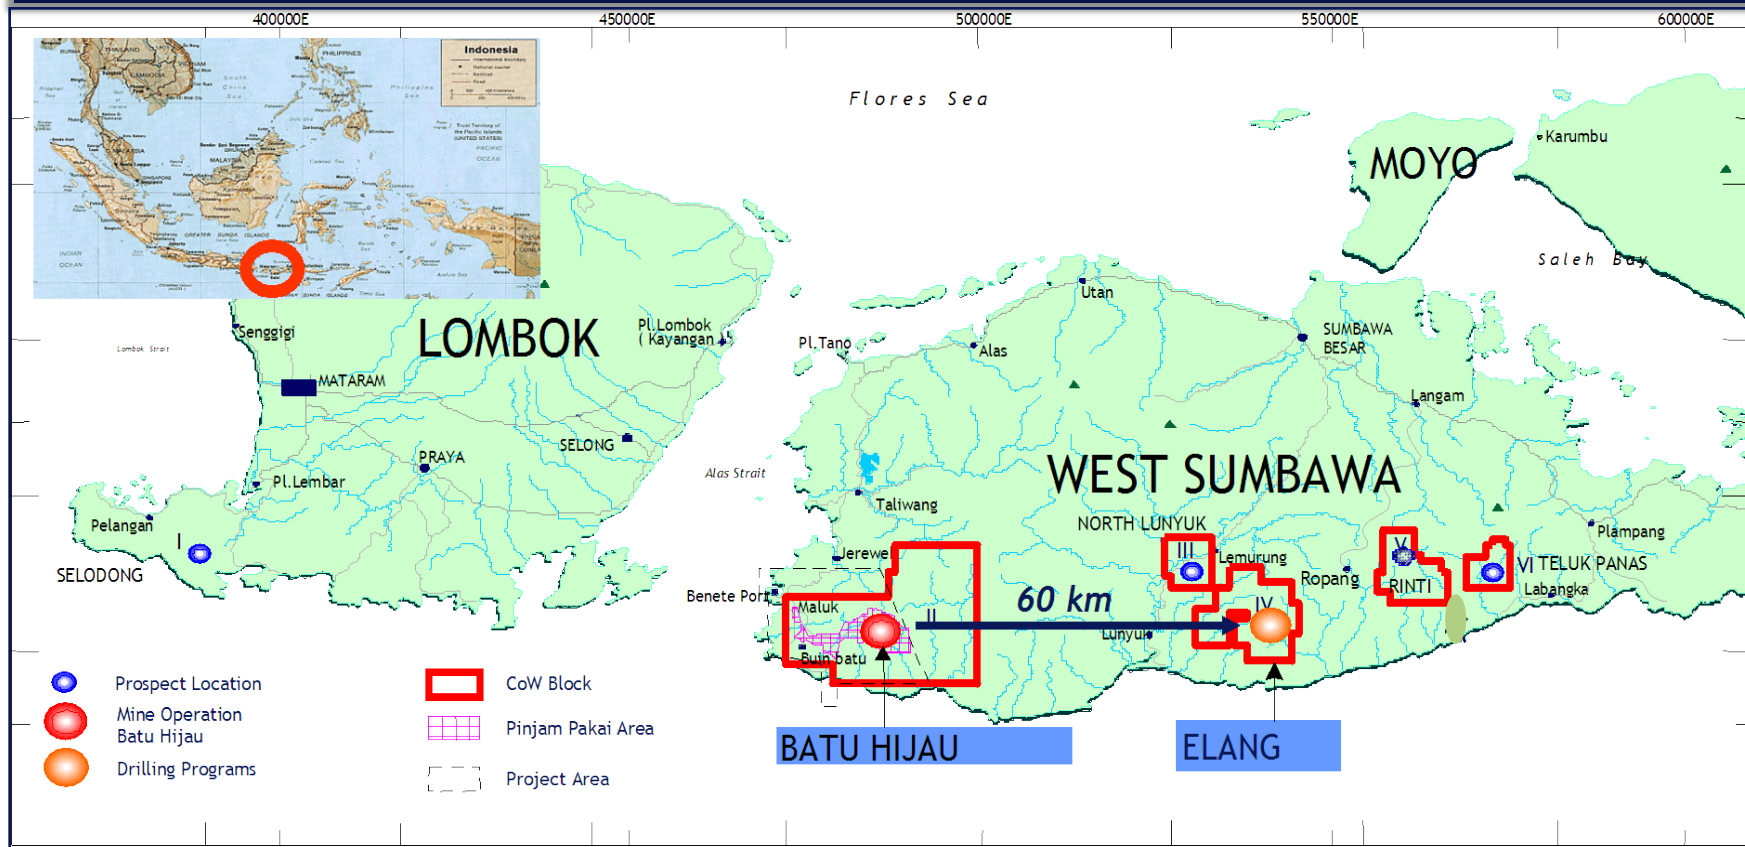

- Doris North portal collared and decline initiated
- Sealift successfully completed
- Potential to develop and expand existing resources
- Infrastructure construction underway

<sup>1</sup> None of which are currently in Reserves or NRM

# Elang: Significant Copper/Gold Development Opportunity

## 60 Kilometers East of Batu Hijau Mine

### PTNNT Contract of Work

# Elang: Project Overview

## Highlights:

- Potential for larger resource than Batu Hijau, which contained ~19Moz Au and ~18Blbs Cu in Reserves and NRM<sup>1</sup>

## Status:

- Potential deposit based on 116 core drill holes<sup>2</sup>
- Larger footprint than Batu Hijau
- Exploration permit received; September 27, 2010 – February 28, 2030
- Potential to significantly extend region's production of Au and Cu

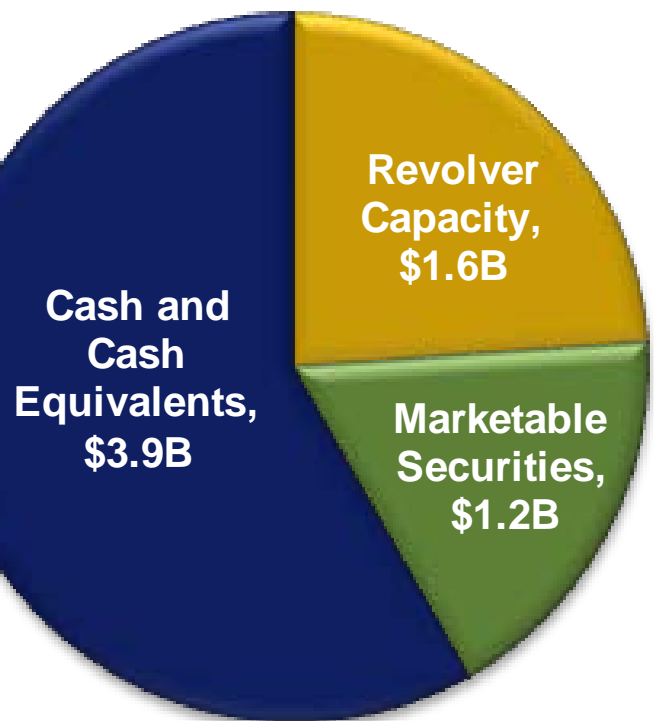

<sup>1</sup> No ounces or pounds currently in Reserves or NRM. Please see Cautionary Statement on page 29

<sup>2</sup> Additional exploration is required to define mineral Reserve and/or NRM and it is uncertain whether Newmont will be able to define such a reserve or NRM.

# Strong Balance Sheet and Free Cash Flow Provide Flexibility

Over \$6.7 Billion in Available Liquidity

As of 9/30/2010

## Uses of Available Cash

### Internal Project Development

Execute our advanced projects

#### Exploration

Discoveries and reserve additions across our global districts

#### Opportunistic M&A

Extend mine life, lower costs and improve growth profile

#### Return of Capital

Dividend increased 50% on July 28, 2010

A graphic element consisting of a white, upward-sweeping curved line that ends in a gold-colored triangle pointing upwards and to the right.

***NEWMONT***™

# Reconciliation - Adjusted Net Income to GAAP Net Income

Management of the Company uses the non-GAAP financial measure Adjusted net income to evaluate the Company's operating performance, and for planning and forecasting future business operations. The Company believes the use of Adjusted net income allows investors and analysts to compare the results of the continuing operations of the Company and its direct and indirect subsidiaries relating to the production and sale of minerals to similar operating results of other mining companies, by excluding exceptional or unusual items, income or loss from discontinued operations and the permanent impairment of assets, including marketable securities and goodwill. Management's determination of the components of Adjusted net income are evaluated periodically and based, in part, on a review of non-GAAP financial measures used by mining industry analysts.

The table below sets forth a reconciliation of adjusted net income to GAAP net income, the directly comparable GAAP financial measure.

(\$million except per share, after-tax)	Three months ended September 30,		Nine months ended September 30,	
	2010	2009	2010	2009
<b>GAAP Net income (1)</b>	<b>\$ 537</b>	<b>\$ 388</b>	<b>\$ 1,465</b>	<b>\$ 739</b>
Income tax benefit from internal restructuring	-	-	(127)	-
Net gain on asset sales	(3)	(2)	(35)	(2)
PTNNT community contribution	-	-	13	-
Impairment of assets	-	1	3	6
Boddington acquisition costs	-	-	-	44
Loss from discontinued operations (1)	-	-	-	9
<b>Adjusted net income</b>	<b>\$ 534</b>	<b>\$ 387</b>	<b>\$ 1,319</b>	<b>\$ 796</b>
<b>Adjusted net income per share</b>	<b>\$ 1.08</b>	<b>\$ 0.79</b>	<b>\$ 2.68</b>	<b>\$ 1.64</b>

(1) Attributable to Newmont stockholders.

# Reconciliation - Co-Product Costs Applicable to Sales to By-Product Costs Applicable to Sales

Sales and Costs applicable to sales for Boddington are presented in the Condensed Consolidated Financial Statements for both gold and copper due to the significant portion of copper production (approximately 15-20% of total sales based on the latest life-of-mine plan and metal price assumptions). The co-product method allocates costs applicable to sales to each metal based on specifically identifiable costs where applicable and on a relative proportion of sales values for other costs. Management also assesses the performance of the Boddington mine on a by-product basis due to the majority of sales being derived from gold and to determine contingent consideration payments to AngloGold. The by-product method deducts copper sales from costs applicable to sales as shown in the following table:

	Three months ended September 30, 2010		Nine months ended September 30, 2010	
	Boddington	Consolidated	Boddington	Consolidated
(\$ millions)				
Co-product costs applicable to sales - gold	\$ 91	\$ 788	\$ 284	\$ 2,307
Less copper margin:				
Sales - copper	38	581	117	1,373
Costs applicable to sales - copper	(19)	(115)	(68)	(329)
Copper margin	19	466	49	1,044
By-product costs applicable to sales - gold	\$ 72	\$ 322	\$ 235	\$ 1,263
<b>Costs applicable to sales - gold (per ounce)</b>				
Co-product	\$ 617	\$ 477	\$ 577	\$ 483
By-product	\$ 487	\$ 195	\$ 478	\$ 264
<b>Gold ounces sold (thousands)</b>	148	1,651	492	4,778

# Cautionary Statement Regarding 2010 Outlook – Q3 Update

2010 Outlook Q3 Update projections contained in this presentation (“Outlook”) are considered “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended which are intended to be covered by the safe harbor created by such sections and other applicable laws. Outlook represents management’s good faith estimates or expectations of future results as of November 2, 2010 and is based upon certain assumptions. Such assumptions, include, but are not limited to: (i) there being no significant change to current geotechnical, metallurgical, hydrological and other physical conditions; (ii) permitting, development, operations and expansion of the Company’s projects being consistent with current expectations and mine plans; (iii) political developments in any jurisdiction in which the Company operates being consistent with its current expectations; (iv) certain exchange rate assumptions for the Australian dollar to the U.S. dollar, as well as other the exchange rates, being approximately consistent with current levels; (v) certain price assumptions for gold, copper and oil; (vi) prices for key supplies being approximately consistent with current levels; and (vii) the accuracy of our current mineral reserve and mineral resource estimates. However, Outlook is subject to risks, uncertainties and other factors, including that such assumptions may prove to be incorrect and other factor referred to on slide, which could cause actual results to differ materially from Outlook. Consequently, Outlook cannot be guaranteed. Investors are cautioned that the Company does not undertake to subsequently reaffirm, provide comfort or otherwise update Outlook to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Investors should not assume that any lack of update constitutes a current reaffirmation of Outlook. Continued reliance on Outlook after the date it is first issued is at investors' own risk.

# Summary of Adjustments: 2010 Outlook - Q3 Update

<b>Equity Gold Production (000 ounces)</b>	<b>Q3 Update</b>	<b>Q2 Update</b>	<b>Q1 Update</b>	<b>2010 Original</b>

(1) Mineralized material is reported exclusive of reserves.

(2) Mineralized Material calculated at a gold price of US\$950, A\$1,200, or NZ\$1,400 per ounce unless otherwise noted. 2008 Mineralized material was calculated at a gold price of US\$850, A\$1,000, or NZ\$1,175 per ounce. Tonnage amounts have been rounded to the nearest 100,000.

(3) Mineralized material estimates were provided by Barrick, the operator of the Turquoise Ridge Joint Venture.

(4) Stockpiles are comprised primarily of material that has been set aside to allow processing of higher grade material in the mills. Stockpiles increase or decrease depending on current mine plans.

(5) Mineralized material estimates were provided by Buenaventura, the operator of the La Zanja Project.

(6) Percentage reflects Newmont's economic interest at December 31, 2009. In November and December 2009 our economic interest increased from 45% to 52.44% as a result of transactions with a noncontrolling partner, partially offset by divestiture required under the Contract of Work.

(7) Newmont acquired the remaining 33.33% of Boddington from AngloGold in June 2009.

(1) Mineralized material is reported exclusive of reserves.

(2) Mineralized material calculated at a copper price of US\$2.50 or A\$3.00 per pound unless otherwise noted. 2008 mineralized material was also calculated at a copper price of US\$2.50 or A\$3.00 per pound. Tonnage amounts have been rounded to the nearest 100,000.

(3) Percentage reflects Newmont's economic interest at December 31, 2009. In November and December 2009 our economic interest increased from 45% to 52.44% as a result of transactions with a noncontrolling partner, partially offset by divestiture required under the Contract of Work.

(4) Newmont acquired the remaining 33.33% of Boddington from AngloGold in June 2009.

# Non-Reserve Mineralization Definitions Supplemental Information (continued)

## DEFINITIONS

(1) The term “reserve” means that part of a mineral deposit that can be economically and legally extracted or produced at the time of the reserve determination. The term “economically,” as used in this definition, means that profitable extraction or production has been established or analytically demonstrated in a full feasibility study to be viable and justifiable under reasonable investment and market assumptions. The term “legally,” as used in this definition, does not imply that all permits needed for mining and processing have been obtained or that other legal issues have been completely resolved. However, for a reserve to exist, Newmont must have a justifiable expectation, based on applicable laws and regulations, that issuance of permits or resolution of legal issues necessary for mining and processing at a particular deposit will be accomplished in the ordinary course and in a timeframe consistent with Newmont’s current mine plans. Reserves in this document are aggregated from the Proven and Probable classes.

(2) The term “non-reserve mineralization” or “NRM” refers to Measured, Indicated and/or Inferred materials, which are exclusive of reserves. Newmont has determined that such non-reserve mineralization would be substantively the same as those prepared using the Guidelines established by the Society of Mining, Metallurgy and Exploration.

(3) The term “potential” or “potential resource” refers to the aggregate of potential ore-grade material, including Proven and Probable reserves, Measured, Indicated and Inferred non-reserve mineralization, in addition to other potential ore-grade materials that have less certainty of conversion to reserves.

(4) References to “equity ounces” or “equity pounds” mean that portion of gold or copper produced, sold or included in proven and probable reserves that is attributable to our ownership or economic interest.

## SUPPLEMENTAL INFORMATION AND CAUTIONARY STATEMENT REGARDING REPORTING OF RESERVES AND NRM

Ian Douglas, Newmont’s Group Executive of Reserves and Geostatistics, is the qualified person responsible for the preparation of the Reserve and non-reserve mineralization estimates in this presentation. The reserves disclosed in this presentation have been prepared in compliance with Industry Guide 7 published by the SEC. Non-reserve mineralization and potential has not been prepared in accordance with Industry Guide 7. Estimates of non-reserve mineralization and potential are subject to further exploration and development, are subject to many risks and highly speculative, and may not be converted to future reserves of the company. In addition, our current or future reserves and exploration and development projects may not result in new mineral producing operations. Even if significant mineralization is discovered and converted to reserves, it will likely take many years from the initial phases of exploration to development and ultimately to production, during which time the economic feasibility of production may change.

For a description of the key assumptions, parameters and methods used to estimate mineral reserves and mineralized material on Newmont’s material properties, as well as a general discussion of the extent to which the estimates may be affected by any known environmental, permitting, legal, title, taxation, socio-political, marketing or other relevant factors, please see Newmont’s most recent Annual Report on Form 10-K and other SEC filings.
