

Raytheon is a global technology company that provides innovative solutions to customers in 80 nations. With 72,000 employees and 2007 revenues of \$21.3 billion, we are a leader in aerospace, defense and homeland security, providing integrated systems and complete life-cycle support.

Our vision is to be the most admired defense and aerospace systems supplier through world-class people and technology. Our strategy is to leverage our domain knowledge to deliver NoDoubt™ performance in the four core defense markets of Sensing, Effects, C3I (Command, Control, Communications and Intelligence) and Mission Support. Through strategic focus, process discipline and absolute commitment to our customers' success, we provide industry-leading solutions to each of these markets.

Every day, Raytheon customers undertake missions vital to the security and well-being of people all over the world. We are proud to help them succeed today while preparing for the missions of tomorrow.

# Raytheon Businesses

Six Raytheon businesses deliver world-class products, systems and support for government and defense customers and partners worldwide:

## 1 Integrated Defense Systems

2007 sales: \$4.7 billion  
Headquarters: Tewksbury, Mass.

Integrated naval, missile and air defense, and domain awareness systems and homeland security solutions

## 2 Intelligence and Information Systems

2007 sales: \$2.7 billion  
Headquarters: Garland, Texas

Information solutions spanning intelligence, surveillance and reconnaissance for defense and homeland security

## 3 Missile Systems

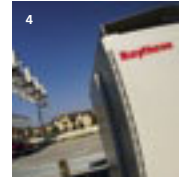

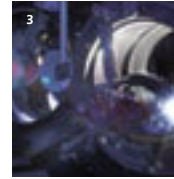

2007 sales: \$5.0 billion  
Headquarters: Tucson, Ariz.

Advanced missile systems and solutions for the armed forces of the U.S. and allied nations

## 4 Network Centric Systems

2007 sales: \$4.2 billion  
Headquarters: McKinney, Texas

Net-centric solutions for sensing, command and control, communications, air traffic management and homeland security

## 5 Space and Airborne Systems

2007 sales: \$4.3 billion  
Headquarters: El Segundo, Calif.

Integrated sensing solutions for advanced applications in aviation and space technology

## 6 Technical Services

2007 sales: \$2.2 billion  
Headquarters: Reston, Va.

Mission Support, counter-proliferation and counter-terrorism, integrated training solutions, base and range operations and customized engineering services

# Raytheon Core Markets

Our domain knowledge, technological leadership and global experience have created expanding opportunities in four core defense markets:

## 1 Sensing:

Technologies that acquire data and create accurate, reliable information for effective battlespace decisions. Raytheon sensing technologies span the full electromagnetic spectrum, including electro-optical, radio frequency, hyperspectral, acoustic and ultraviolet systems.

## 2 Effects:

Technologies that achieve specific military actions or outcomes. Raytheon solutions span the spectrum of current and next-generation effects, including striking targets and disabling hostile information systems.

## 3 C3I (Command, Control, Communications and Intelligence):

Integrated real-time systems that optimize operational planning and execution. Raytheon C3I solutions cover ground, sea, air and space operations with comprehensive capabilities built on advanced network architectures and global combat experience.

## 4 Mission Support:

Total life-cycle solutions that ensure NoDoubt performance. Raytheon's customized Mission Support solutions draw on the full breadth of Raytheon and third-party technologies to ensure flawless performance under an extraordinary range of conditions.
