Invested capital from continuing operations****	\$ 17,077	\$ 17,898	\$ 18,675
ROIC	7.6%	5.9%	5.2%

* 2004 excludes shareholder settlement

** Effective tax rate: 2006 – 34.4%, 2005 – 34.7% and 2004 – 22.6%

*** Net debt is defined as total debt less cash and cash equivalents and is calculated using a 2 point average

**** Calculated using a 2 point average

We define Return on Invested Capital (ROIC) as income from continuing operations plus after-tax net interest expense plus one-third of operating lease expense after-tax (estimate of interest portion of operating lease expense) divided by average invested capital after capitalizing operating leases (operating lease expense times a multiplier of 8), adding financial guarantees less net investment in discontinued operations, and adding back the cumulative minimum pension liability/impact of adopting FAS 158. ROIC is not a measure of financial performance under generally accepted accounting principles (GAAP) and may not be defined and calculated by other companies in the same manner. ROIC should be considered supplemental to and not a substitute for financial information prepared in accordance with GAAP. The company uses ROIC as a measure of the efficiency and effectiveness of its use of capital and as an element of management compensation.
