ONE FOCUS: CARDIAC SURGERY

Continuing its focus right on cardiac surgery, ATS Medical, Inc. is a leading developer, marketer and manufacturer of innovative products and services directed to the cardiac surgery market. The \$2.5 billion worldwide cardiac surgery market is comprised of some 9,000 cardiac surgeons in 3,000 open heart centers performing up to 1.2 million cardiac procedures each year. ATS Medical focuses on the cardiac surgery community in two distinct but operationally synergistic segments: heart valve therapy and surgical cardiac ablation.

LOOKING BACK

The goal, to Advance the Standard of mechanical heart valve performance, is reflected in the company name and led to the introduction of the ATS Open Pivot Heart Valve. The company's cornerstone product continues to gain surgeon acceptance worldwide with more than 140,000 implants to date.

President and Chief Executive Officer Michael D. Dale, who assumed additional responsibilities as Chairman of the Board in 2004, continues to oversee the company's effort to build brand value and equity in its innovative products and services by leveraging the ATS Medical sales, marketing and distribution infrastructure.

LOOKING AHEAD

For the future, the company is more than ever committed to researching and developing new technologies to meet market demand for less invasive products, embracing the needs of the cardiac surgery community and improving the medical outcomes of patients.
