BUSINESS DESCRIPTIONS

Consumer Products. Our Consumer segment focuses on delivering our Internet security, PC tuneup, and backup products to individual users and home offices. Key products include Norton 360 and Norton Internet Security.

Security and Data Management. Our Security and Data Management segment focuses on providing large to small and medium-sized businesses with solutions for compliance and security management, endpoint security, messaging management, and data protection management software solutions that allow our customers to secure and backup their laptops, PCs, mobile devices and servers.

Data Center Management. Our Data Center Management segment focuses on providing enterprise customers with storage and server management, data protection, and application performance management solutions across heterogeneous storage and server platforms. Key products include NetBackup and the Storage and Server Foundation suite of products.

Services. Our Services segment consists of consultants with extensive technical knowledge, business expertise, and global insight across multi-vendor environments who assist organizations in managing IT risk on an ongoing basis. Key offerings address all areas of IT risk – security, availability, performance, and compliance.

Altiris. On April 6, 2007, we completed our acquisition of Altiris, Inc., a leading provider of IT management software that enables businesses to easily manage and service network-based endpoints. Altiris enables us to help customers better manage and enforce security policies at the endpoint, identify and protect against threats, and repair and service assets.
