## **NATIONAL FUEL REPORTS FIRST QUARTER RESULTS**

Williamsville, New York: National Fuel Gas Company (“National Fuel” or the “Company”) (NYSE:NFG) today announced results for the first quarter of its 2009 fiscal year (the quarter ended December 31, 2008).

### **HIGHLIGHTS**

- National Fuel is reporting a loss for the quarter of \$42.7 million or \$0.53 per share. The loss is due to the previously announced \$108.2 million (after tax), non-cash impairment charge to write down the book value of its oil and natural gas producing properties as a result of significantly lower commodity prices at December 31, 2008.
- Quarterly operating results, before items impacting comparability (“Operating Results”) for the quarter were \$64.3 million, or \$0.80 per share compared to \$70.6 million or \$0.82 per share for the prior year’s first quarter. The main drivers causing the decrease in Operating Results were lower average crude oil prices realized and lower natural gas production in the Exploration and Production segment during the quarter.
- Production of crude oil and natural gas during the quarter ended December 31, 2008 decreased 1.1 billion cubic feet equivalent (“Bcfe”) compared to the prior year’s first quarter, mainly due to lingering curtailments in the Gulf of Mexico caused by Hurricane Ike. All pre-hurricane production is expected to be back on line by the end of the second quarter. Total forecast production for the entire 2009 fiscal year remains in the previously announced range between 38 and 44 Bcfe.
- The Company is revising its GAAP earnings guidance range for fiscal 2009 to a range of \$1.10 to \$1.30 per share. This guidance includes the impairment charge (\$1.35 per share) noted above, and assumes flat NYMEX equivalent pricing of \$5.50 per MMBtu for natural gas and \$45.00 per Bbl for crude oil for unhedged production for the remainder of the fiscal year.
- A conference call is scheduled for Friday, February 6, 2009, at 11:00 am Eastern Standard Time.

### **MANAGEMENT COMMENTS**

David F. Smith, President and Chief Executive Officer of National Fuel Gas Company stated: “The volatility and turmoil in the financial markets and worldwide economy during the

-more-

past several months have also affected National Fuel and the energy industry as a whole. The continued decrease in commodity prices since July has had a significant negative impact on our financial results, contributing to the large ceiling test write-down as well as the drop in recurring earnings. While there is little we can do to influence global commodity prices, we are acutely focused on operating our assets in the most effective way possible. In that regard, we've seen great success, particularly in our regulated segments, which performed flawlessly in the face of significant weather variations, and which delivered stable and predictable earnings that are in line with our last rate awards.

We've long believed in our integrated business model. The value of that model has been particularly evident over the past few quarters. When commodity prices peaked over the summer, we enjoyed record earnings. Even though prices have now cycled lower, we still expect that our operating companies will generate sufficient cash to fund our operations and allow us to comfortably continue our dividend payments. Looking to the future, we expect the overall business environment will continue to be challenging. But, more than ever, we believe that the quality and diversity of our operating results, coupled with our long-standing commitment to fiscal discipline, position us to capitalize on future opportunities."

## SUMMARY OF RESULTS

National Fuel had a consolidated loss for the quarter ended December 31, 2008 of \$42.7 million, or \$0.53 per share, compared to the prior year's first quarter earnings of \$70.6 million or \$0.82 per share. (note: all references to earnings per share are to diluted earnings per share, all amounts are stated in U.S. dollars, and all amounts used in the earnings and Operating Results discussions are after tax unless otherwise noted).

	Three Months Ended December 31,	
	2008	2007

Impairment of investment in partnership	0.01	
Gain on life insurance proceeds	(0.03)	
<b>Operating Results</b>	\$ 0.80	\$ 0.82

<sup>1</sup> See discussion of these items below.

As outlined in the table above, certain items included in GAAP earnings impacted the comparability of the Company's financial results when comparing the first quarters of fiscal 2009 and fiscal 2008. Excluding these items, Operating Results for the current first quarter of \$64.3 million or \$0.80 per share decreased \$6.3 million, or \$0.02 per share, from the prior year's first quarter. Items impacting comparability will be discussed in more detail within the discussion of segment earnings below.

## DISCUSSION OF RESULTS BY SEGMENT

The following discussion of the earnings of each segment is summarized in a tabular form at pages 8 and 9 of this report. It may be helpful to refer to those tables while reviewing this discussion. The Company is reporting financial results for four business segments: Exploration and Production, Pipeline and Storage, Utility, and Energy Marketing. Previously the Company reported separate results for the Timber segment. During the quarter ended December 31, 2008, the Company made the decision to eliminate the Timber segment as a reportable segment based on the fact that the Timber operations do not meet any of the quantitative thresholds specified by Generally Accepted Accounting Principles. Results from the former Timber segment are now included in the All Other category.

### Exploration and Production Segment

The Exploration and Production segment operations are carried out by Seneca Resources Corporation ("Seneca"). Seneca explores for, develops and purchases natural gas and oil reserves mainly in California, in the Appalachian region and in the Gulf of Mexico.

The Exploration and Production segment's loss in the first quarter of fiscal 2009 of \$83.6 million, or \$1.04 per share, is a decrease of \$117.6 million, or \$1.43 per share, when compared with the prior year's first quarter. The decrease was mainly due to a non-cash charge of \$108.2 million to write down the value of Seneca's oil and natural gas producing properties.

Seneca uses the full cost method of accounting for determining the book value of its oil and natural gas properties. This accounting method requires that Seneca perform a quarterly "ceiling test" to compare the present value of future revenues from its oil and natural gas reserves based on period end spot prices (the "ceiling") with the book value of those reserves at the balance sheet date. If the book value of the reserves exceeds the ceiling, a non-cash charge must be recorded in order to reduce the book value of the reserves to the calculated ceiling.

Excluding the impact of the ceiling test charge this quarter, Operating Results in the Exploration and Production segment were \$24.7 million or \$0.31 per share, compared to \$34.0 million or \$0.39 per share in the first quarter of the prior year. The decrease was primarily due to lower crude oil prices realized after hedging and lower natural gas production. For the quarter ended December 31, 2008, the weighted average oil price received by Seneca (after hedging) was \$64.34 per barrel ("Bbl"), a decrease of \$8.25 per Bbl, from the prior year's first quarter. The weighted average natural gas price received by Seneca (after hedging) for the quarter ended December 31, 2008, was \$8.90 per thousand cubic feet ("Mcf"), an increase of \$1.00 per Mcf compared to the prior year's first quarter.

Overall production for the quarter ended December 31, 2008 was 9.6 Bcfe, a decrease of 1.1 Bcfe compared to the prior year's first quarter. Hurricane related shut-ins were responsible for most of the 1.2 Bcfe decrease in production of Seneca's Gulf division. Two significant producing properties were shut-in for the entire first quarter due to repair work on third party pipelines and onshore processing facilities. Production was also slightly lower in the East division primarily due to compressor downtime and pipeline constraints. Higher production in the West partially offset the decreases in the other divisions.

Other items impacting Operating Results for the quarter were higher lease operating expenses ("LOE") and general and administrative ("G&A") expenses. The increase in LOE is mainly due to higher production taxes related to increased production from the High Island 24L and 23L fields located in the Gulf division, higher property taxes and increased well repair costs associated with higher than normal activity in the West, and an increase in the number of producing properties in Appalachia. G&A expenses increased primarily due to a bad debt charge related to a customer's bankruptcy filing. Additional staffing and associated costs in the East division also contributed to the higher G&A expenses.

#### Pipeline and Storage Segment

The Pipeline and Storage segment operations are carried out by National Fuel Gas Supply Corporation ("Supply Corporation") and Empire Pipeline Inc. ("Empire"). These companies provide natural gas transportation and storage services to affiliated and non-affiliated companies through an integrated system of pipelines and underground natural gas storage fields in western New York and western Pennsylvania.

The Pipeline and Storage segment's earnings of \$17.2 million, or \$0.21 per share, for the quarter ended December 31, 2008, increased \$4.4 million, or \$0.06 per share, when compared with the same period in the prior fiscal year. The increase is mainly the result of higher transportation and storage revenues and higher efficiency gas revenues. The increase in transportation and storage revenues was largely due to the addition of several new contracts for firm transportation service. The higher efficiency gas revenues were due to higher transported volumes. Also contributing to the higher earnings was an increase in the allowance for funds used during construction related to the construction of the Empire Connector that was placed in service in mid-December 2008. Because of the mid-December start-up date, the Empire Connector did not make a significant contribution to volumes or revenues for the quarter ended December 31, 2008.

#### Utility Segment

The Utility segment operations are carried out by National Fuel Gas Distribution Corporation ("Distribution"), which sells or transports natural gas to customers located in western New York and northwestern Pennsylvania. The Utility segment's earnings of \$22.1 million, or \$0.28 per share, for the quarter ended December 31, 2008, increased \$1.9 million, or \$0.04 per share compared to the prior year's first quarter.

In the New York division, earnings increased \$1.3 million. The increase was due to lower operating expenses mainly related to the rate of accrual for postretirement benefit expenses and lower interest expense this quarter. A decrease in margins partially offset the increase in

earnings for the current quarter compared to the prior year's first quarter. The decrease in margins was primarily due to the rate design change approved by the New York State Public Service Commission's December 28, 2007 rate order.

Earnings increased \$0.6 million in the Pennsylvania division, primarily due to weather that was colder than the prior year. This increase was partially offset by higher bad debt expense.

### Energy Marketing

National Fuel Resources, Inc. ("NFR") comprises the Company's Energy Marketing segment. NFR markets natural gas to industrial, wholesale, commercial, public authority and residential customers primarily in western and central New York and northwestern Pennsylvania, offering competitively priced natural gas to its customers.

The Energy Marketing segment's earnings for the quarter ended December 31, 2008 of \$0.6 million decreased \$0.4 million from the first quarter last year. This decrease is mainly due to lower margins.

### Corporate and All Other

Other active, wholly owned subsidiaries of the Company include Highland Forest Resources, Inc., a corporation that markets high quality hardwoods from New York and Pennsylvania land holdings; Horizon LFG, Inc., a corporation engaged, through subsidiaries, in the purchase, processing, transportation and sale of landfill gas; and Horizon Power, Inc., a corporation that develops and owns independent electric generation facilities that are fueled by natural gas or landfill gas.

Earnings in the Corporate and All Other category for the first quarter of fiscal 2009 decreased \$1.6 million when compared to the prior year's first quarter. The comparability of the quarterly results is impacted by a \$2.3 million gain recognized on corporate-owned executive life insurance policies and a \$1.1 million impairment in the value of Horizon Power's 50 percent investment in Energy Systems North East, LLC, a partnership that owns an 80-megawatt combined cycle, natural gas-fired power plant in the town of North East, Pennsylvania. Excluding these items, Operating Results decreased \$2.8 million due to lower margins from the timber operations as a result of decreased sales volumes and prices, lower margins experienced in the landfill gas operations, and a decrease in income from unconsolidated subsidiaries. Also contributing to the decrease in Operating Results were higher interest expense and lower interest income. Lower corporate operating expenses partially offset the decrease in Operating Results. Expenses related to a proxy contest in the prior year did not recur in fiscal 2009.

## **EARNINGS GUIDANCE**

The Company is revising its earnings guidance for fiscal 2009 to reflect actual first quarter results as well as a change in pricing assumptions for crude oil and natural gas. The revised GAAP earnings range is \$1.10 to \$1.30 per share. This includes the impairment charge (\$1.35 per share) noted previously, forecast oil and gas production for fiscal 2009 for the Exploration and Production segment in the range between 38 and 44 Bcfe, hedges currently in place, and

NYMEX equivalent flat commodity pricing on non-hedged volumes exclusive of basis differential of \$5.50 per MMBtu for natural gas and \$45.00 per Bbl for crude oil.

## EARNINGS TELECONFERENCE

The Company will host a conference call on Friday, February 6, 2009, at 11 a.m. (Eastern Time) to discuss this announcement. There are two ways to access this call. For those with Internet access, visit the investor relations page at National Fuel's Web site at [investor.nationalfuelgas.com](http://investor.nationalfuelgas.com). For those without Internet access, access is also provided by dialing (toll-free) 1-866-783-2146, and using the passcode "16850387." For those unable to listen to the live conference call, a replay will be available at approximately 2 p.m. (Eastern Time) at the same Web site link and by phone at (toll free) 1-888-286-8010 using passcode "64283323." Both the webcast and telephonic replay will be available until the close of business on Friday, February 13, 2009.

Additional information about National Fuel is available on its Internet Web site: [www.nationalfuelgas.com](http://www.nationalfuelgas.com) or through its investor information service at 1-800-334-2188.

Certain statements contained herein, including those regarding estimated future earnings, and statements that are identified by the use of the words "anticipates," "estimates," "expects," "forecasts," "intends," "plans," "predicts," "projects," "believes," "seeks," "will," "may" and similar expressions, are "forward-looking statements" as defined by the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve risks and uncertainties, which could cause actual results or outcomes to differ materially from those expressed in the forward-looking statements. The Company's expectations, beliefs and projections contained herein are expressed in good faith and are believed to have a reasonable basis, but there can be no assurance that such expectations, beliefs or projections will result or be achieved or accomplished. In addition to other factors, the following are important factors that could cause actual results to differ materially from those discussed in the forward-looking statements: financial and economic conditions, including the availability of credit, and their effect on the Company's ability to obtain financing on acceptable terms for working capital, capital expenditures and other investments; occurrences affecting the Company's ability to obtain financing under credit lines or other credit facilities or through the issuance of commercial paper, other short-term notes or debt or equity securities, including any downgrades in the Company's credit ratings and changes in interest rates and other capital market conditions; changes in economic conditions, including global, national or regional recessions, and their effect on the demand for, and customers' ability to pay for, the Company's products and services; the creditworthiness or performance of the Company's key suppliers, customers and counterparties; economic disruptions or uninsured losses resulting from terrorist activities, acts of war, major accidents, fires, hurricanes, other severe weather, pest infestation or other natural disasters; changes in actuarial assumptions, the interest rate environment and the return on plan/trust assets related to the Company's pension and post-retirement benefits, which can affect future funding obligations and costs and plan liabilities; changes in demographic patterns and weather conditions; changes in the availability and/or price of natural gas or oil and the effect of such changes on the accounting treatment of derivative financial instruments or the valuation of the Company's natural gas and oil reserves; impairments under the SEC's full cost ceiling test for natural gas and oil reserves; uncertainty of oil and natural gas reserve estimates; ability to successfully identify, drill for and produce economically viable natural gas and oil reserves, including shortages, delays or unavailability of equipment and services required in drilling operations; significant changes from expectations in the Company's actual production levels for natural

gas or oil; changes in the availability and/or price of derivative financial instruments; changes in the price differentials between various types of oil; inability to obtain new customers or retain existing ones; significant changes in competitive factors affecting the Company; changes in laws and regulations to which the Company is subject, including tax, environmental, safety and employment laws and regulations; governmental/regulatory actions, initiatives and proceedings, including those involving acquisitions, financings, rate cases (which address, among other things, allowed rates of return, rate design and retained natural gas), affiliate relationships, industry structure, franchise renewal, and environmental/safety requirements; unanticipated impacts of restructuring initiatives in the natural gas and electric industries; significant changes from expectations in actual capital expenditures and operating expenses and unanticipated project delays or changes in project costs or plans; the nature and projected profitability of pending and potential projects and other investments, and the ability to obtain necessary governmental approvals and permits; ability to successfully identify and finance acquisitions or other investments and ability to operate and integrate existing and any subsequently acquired business or properties; significant changes in tax rates or policies or in rates of inflation or interest; significant changes in the Company's relationship with its employees or contractors and the potential adverse effects if labor disputes, grievances or shortages were to occur; changes in accounting principles or the application of such principles to the Company; the cost and effects of legal and administrative claims against the Company or activist shareholder campaigns to effect changes at the Company; increasing health care costs and the resulting effect on health insurance premiums and on the obligation to provide post-retirement benefits; or increasing costs of insurance, changes in coverage and the ability to obtain insurance. The Company disclaims any obligation to update any forward-looking statements to reflect events or circumstances after the date hereof.

FISCAL 2009 EARNINGS GUIDANCE AND SENSITIVITY**

<u>Fiscal 2009 (Diluted earnings per share guidance*)</u>	<u>Earnings Range</u>	<u>Earnings per share sensitivity to changes from prices used in guidance* ^</u>			
		<u>\$1 change per MMBtu gas</u>		<u>\$5 change per Bbl oil</u>	
		Increase	Decrease	Increase	Decrease
Consolidated Earnings	\$1.10 - \$1.30	+ \$0.07	- \$0.07	+ \$0.05	- \$0.05

\* Please refer to forward looking statement footnote beginning at page 6 of this document.

^ This sensitivity table is current as of February 4, 2009 and only considers revenue from the Exploration and Production segment's crude oil and natural gas sales. This revenue is based upon pricing used in the Company's earnings forecast. For the last three quarters of its fiscal 2009 earnings forecast, the Company is utilizing flat NYMEX equivalent commodity pricing, exclusive of basis differential, of \$5.50 per MMBtu for natural gas and \$45 per Bbl for crude oil. The sensitivities will become obsolete with the passage of time, changes in Seneca's production forecast, changes in basis differential, as additional hedging contracts are entered into, and with the settling of hedge contracts at their maturity. This table does not factor in any possible additional reduction to earnings due to future "ceiling test" impairments as described in the text of this earnings release.
